Frank A. Friedley, Secy.

THE VETERANS.

Every year they're marching slower;
Every year they're stooping lower
Every year the lilting music stirs the hearts of older men;
Every year the flags above them
Seem to bend and bless and love them
As if grieving for the future when they'll never march again.

Every year that day draws nearer
Every day the truth is clearer,
That the men who saved the nation from the severing southern sword
Soon must pass away forever
From the scene of their endeavor;
Soon must answer to the roll call of the angel of the Lord.

Every year, with dwindling number,
Loyal still to those that slumber,
Forth they march to where, already, many have found peace at last;
And they place the fairest blossoms
O'er the silent mould'ring bosoms
Of the valiant friends and comrades of the battles of the past

Every year grow dimmer, duller,
Tattered flag and faded color;
Every year the hands that bear them find a harder task to do.
And the eyes that only brightened
When the blaze of battle lightened,
Like the tattered flags they follow, are grown dim and faded, too.

Every year we see them massing
Every year we see them passing;
Scarcely pausing in our hurry after pleasure, after gain;
But the battle flags above them,
Seem to bend and bless and love them,
And through all the lilting music sounds an undertone of pain.

—*Pittsburgh Leader.*

MINNEAPOLIS FLORIST CLUB.

A very interesting feature at the regular meeting of the Minneapolis Florist Club, May 5th, was the final report of the Executive Committee of the Minneapolis S. A. F. & O. H. Convention Association, of which the following is a synopsis:

All obligations against the Association have been paid, and all amounts due the Association have been collected, leaving a surplus of which the Committee recommend that a part be turned into the treasury of the Minneapolis Florist Club, and the balance set aside as a Reserve Fund.

"The purposes for which this Reserve Fund may be used from time to time shall be to meet initiatory and working expenses of flower shows or similar educational undertakings by the Club.

"To assist the club in such other undertakings as will be in the interest and to the advancement of the trades and the club in general.

"That a Board of Reserve Fund Trustees of five members be created now who shall work out a proper plan for the investment and safeguarding of such fund.

"In conclusion, your Executive Committee wishes to thank all members of the Convention Association and the Club for the willing and loyal support given them in the entire Convention work and program. We feel that, due to the splendid co-operation of all, the Convention has been a great success. It was the united and untiring work of all that made it possible to receive and entertain the National Society in the generally approved manner it has been our privilege and good fortune to do. The fact that we were not only able to meet all our financial obligations at the proper time, but that all our debtors have met their obligations towards our Association, is an indication that from a business point of view the Convention Association has been accorded the approval of all who had any dealings with it. It would therefore seem only proper and wise that we use the success achieved as a basis for similar work in the future.

"In creating a Reserve Fund as herein recommended, we will not only receive inspiration to further similar undertakings, but also have the means to launch them without having to first call on the financial support of the Club and individual members. We have now a nucleus for a good fund, something to build on, and we should make good and careful use of this splendid opportunity."

By unanimous vote of the members of the club, the report was adopted, and the following members were elected to serve as Trustees of the Reserve Fund: Theodore Wirth for 5 years, W. D. Desmond 4 years, Hugh Will 3 years, C. N. Ruedlinger 2 years, C. F. Rice 1 year.

The Convention Association was then dissolved and the thanks of the club were voted to Chairman Wirth for his untiring energy and wonderful executive ability which was of inestimable value in carrying through the work of the association to a successful termination.

The thanks of the club were also voted to John S. Mitchell for the very able manner in which he handled the finances of the committee and he was unanimously elected an honorary member of the club.

J. G. TAYLOR, Secretary.

ST. LOUIS FLORIST CLUB.

The meeting of this club on Thursday afternoon, May 14th, was well attended considering the busy planting season, all the officers and twenty-five members being present. Communications from Secretary John Young, the Chicago Florists' Club and others, were read and acted upon. State Vice-President R. J. Windler of the S. A. F. reported that he would issue a call to all S. A. F. members for June 11th to the meeting of the Florist Club. The trustees reported that they have completed arrangements for the club's 28th annual banquet. Hotel Jefferson has been selected and the date June 24th. The Trustees were instructed to arrange for the yearly picnic for florists and their families at the expense of the Club to take place the latter part of July. The Trustees were also made a committee to assist H. C. Dyer and the school children in securing plants and seeds to plant vacant lots in different parts of the city.

The Florists' and Gardeners' Club of Rhode Island, will meet hereafter on the fourth Monday evening of each month.

Houston, Tex. Receivership proceedings against the Henk Dirken Floral and Nursery Co., were begun May 12 in the Fifty-fifth district court by E. R. Schinzler, a former employe of the company and a minority stockholder. Schinzler contends that the company is indebted to him for $256.66 back salary.

AGAVE VICTORIA REGINA.

The accompanying illustrations are from two protographs of Agave Victoria Regina which were taken by L. G. Van Leeuwen at Cambridge, Mass., last week. Inquiries made at the Massachusetts Horticultural Society library revealed the fact that they had but one photograph, taken in Cambridge Botanical Garden in 1882. The evident scarcity of this plant may make the pictures worth reproducing here.

MEMORIAL DAY

We have superb stock timed exactly right for this occasion. Make your selection from the following and push along your order without delay.

Hydrangeas **50c.** to **$4.00** each. Spiræa Gladstone and Alexandra, **$4.00** to **$6.00** per dozen. Rambler Roses, pink and red, **$9.00** doz. Bedding Plants, all kinds. Palms **$1.00** up. Boston and Whitmani Ferns, **$6.00** doz. Cut Tulips, Gesneriana, bright scarlet, **$5.00** per **100.** Spiræa cut, **$4.00** per **100.**

WM. W. EDGAR CO., WAVERLEY. MASS.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

A well-attended meeting on Tuesday evening, May 19, was amply rewarded in the enjoyment of one of the best talks ever given before this club. A talk by Prof. Rane of the Massachusetts Department of Forestry had been promised, but this gentleman had been unexpectedly called to the Forestry Convention at Amherst and Secretary Bailey of the Forestry Department took his place most acceptably. The speaker was eloquent, impressive and entertaining in the highest degree. His topic was the forests of Massachusetts, the reclaiming of vast tracts of waste land by reforestation, the methods of taxing forest lands, the conservation of timber, fire control and the insect pest problem. He declared that there is nothing more conducive to good results than organization and paid a high compliment to the Boston Club for the spirit shown in so large and enthusiastic an attendance of members. The lecture was illustrated by many fine colored stereopticon views. Some excellent exhibits adorned the platform. W. N. Craig showed four varieties of French hydrangeas, also specimen Otaksas with enormous flower heads, tomato Listers' Prolific and English Mill-track mushrooms. Alex McKay brought a pair of standard Hydrangea Otaksa which were greatly admired, also plants of Calceolaria Stewarti. F. W. Fletcher showed antirrhinums.

TUXEDO HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held in the Parish House on May 13. The exhibition committee reported the schedule for the fall show in progress and that special prizes had been offered from the following firms: C. H. Totty, Bon Arbor Chemical Co., Scott Bros., Wm. F. McCord, Weeber & Don, Burnett Bros., Alphano Humus Co., A. N. Pierson, Inc., J. M. Thorburn & Co., John Wilk, Julius Roehrs Co., Henry A. Dreer. We expect to have the preliminary schedule out by the middle of June. We had as our guest Wm. Tricker, Arlington, N. J., who gave a very interesting talk on the culture of water lilies during the past 25 years and what gardeners are doing and what they have done for the water lily. Many questions were asked which Mr. Tricker answered promptly as there are few if any in this country who are so well versed on this subject. The society held its Ladies' Evening on April 16, when there were present over 100 gardeners, their wives and friends; a good program was gone through which was enjoyed by all present. The society holds its Annual Ball on May 29.

THOS. WILSON, Secy.

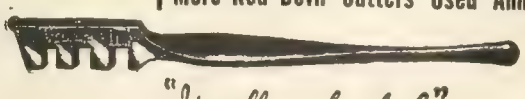
AMERICAN PEONY SOCIETY.

Representatives of the American Peony Society, Horticultural Society of Chicago and the Chicago Florists' Club held a meeting at the Hotel Sherman, Chicago, May 14, to complete arrangements for the great annual exhibition of the American Peony Society, which will be held in Chicago this year under the auspices of the above organizations. Those in attendance included Wm. A. Peterson, of the Peterson Nursery; Carl Cropp, of Vaughan's Seed Store; Arnold Ringier, of the W. W. Barnard Co., Thomas Wallis and M. Barker. The Art Institute was selected for the exhibition, which will be held June 12-13, this date being subject to change as weather conditions affect the local crop of peony flowers, making it earlier or later. Many experts will show their choicest novelties and standard sorts in their best form at the coming exhibition, which from all advance information obtainable will be the largest and most complete of its kind ever held in this or any other country. The most successful growers of peonies will tell about their methods in meetings to be held in connection with the exhibition.

C. W. Johnson, 2226 Fairfax avenue, Morgan Park, Ill., was appointed manager of the exhibition, and all inquiries referring to premium list, prizes, etc., should be addressed to him.

M. BARKER, Sec'y Pro Tem.

MAY FLOWER SHOW.



The May Flower Show of the Massachusetts Horticultural Society, held on Saturday and Sunday, May 16 and 17, was not as large as in previous years, but the quality of the exhibits was unusually good. The attendance of the public was large particularly on Sunday afternoon. Calceolarias were shown in fine form by E. A. Clark and Mrs. J. L. Gardner. Wm. Whitman was the principal contributor of narcissi and pansies. He also showed fancy pelargoniums. A collection of 36 varieties of scented leaved geraniums from H. S. Rand, attracted considerable attention and a certificate of merit was awarded. A silver medal was given F. W. Fletcher for Antirrhinum Nelrose and honorable mention to Miss Marion R. Case for double Anemone nemorosa. Other exhibits included Miss Cornelia Warren, Calceolaria Golden Gem; Mrs. J. L. Gardner, collection of orchids; E. A. Clark, pair laburnum in bloom; E. A. Clark, standard Hydrangea Otaksa; Mrs. J. L. Gardner, Gloriosa Rothschildiana; Thomas T. Watt, petunias; Mrs. J. L. Gardner, Clarkia Salmon Queen; Patten & Co., Carnation Princess Dagmar; Miss Cornelia Warren, carnations, poppies and gladiolus Blushing Bride; Mrs. M. W. Chadbourne, display of cut shrubs; Mrs. E. M. Gill, cut flowers; Lowthorpe School, Groton, cut flowers. There was an excellent display of vegetables.

A CHARMING ESTATE.

[A view in the water garden of this estate appears as cover illustration in this issue.]

The writer recently had the pleasure of a journey (with a big J) over the Converse estate at Marion, Mass., accompanied by Superintendent Roy. For nearly two hours he guided us from one point of interest to another until all realized that a wonderful development had taken place in the last few years in the eighty acres of the then undeveloped country comprising this estate. From the moment you enter the gate until you leave the grounds there is a continual panorama of changing scenes. Of special interest at this season one might mention the daffodil walk winding its way among beautiful oaks from the entrance to the greenhouses and massed on either side with innumerable groups of daffodils of various kinds. Emperor and Empress displayed wonderful adaptation to this location. Again one must not forget the glorious display in the formal garden where the eye is feasted

The Sensational New Yellow CACTUS DAHLIA GOLDEN GATE

NO grower or florist can afford to ignore the wonderful Dahlia Golden Gate and be up-to-date. The public today craves for Dahlias for either garden or floral use and they simply go wild when they see the Golden Gate Dahlia in bloom.

Examine an old catalog of any of the large seed houses of say ten or more years ago, note the few varieties of Dahlias listed; not much doing in Dahlias at that time. By examining any of today's seed house catalogs, you will find several pages devoted to Dahlias; some houses issue special Dahlia catalogs, which all goes to show the great demand for this popular flower.

Look up any trade paper of Fall, 1913, see market quotations, compare Chrysanthemum prices of 1913 with prices of 1912, note low prices for 1913. Mr. Totty of Chrysanthemum fame, in his Presidential address before the members of the Chrysanthemum Society of America at Chicago, last November, stated that the public's demand for Dahlias caused the slump on 'Mums; result, 'Mum growers began to sit up and take notice of Dahlias. Watch them and growers of other kindred stock for the coming season. Why not follow suit? Start right! Plant Golden Gate Dahlia, the queen of them all. After having grown Dahlias twenty years for cut flowers and for the last five years have grown hundreds of novelties, we have yet to see a Dahlia that has the good qualities of the Golden Gate. Most of the visitors to our grounds last year were of the millionaire class, who, as a rule, grow all the Dahlia novelties; one and all declared the Golden Gate the most wonderful of them all.

John Lewis Childs
Flowerfield, L. I., N. Y.

Mr. Wm. A. Finger, Jr.
Hicksville, L. I.

Dear Sir:

From all appearances, up to the present time, you have in Dahlia Golden Gate one of the best varieties that have come under my attention. The character and habit are ideal, and the color is one of the richest I have seen.

Without a doubt you have one of the best Seedlings that have been raised in this or any other country, and I believe that there will be a great future for it.

Yours very truly,
I. S. Hendrickson

We wish to call your attention to the testimonial of Mr. I. S. Hendrickson, formerly President of the Gladiolus Society, whose world-wide experience and reputation as a bulb grower make his judgment very convincing. Mr. Hendrickson has been watching this Dahlia for years and was one of the first to book an order with us.

The Golden Gate Dahlia is insect and blight proof. They will bloom in spite of the tarnish bug, white fly, drought or mildew.

Testimonials sent on request, telling of the Golden Gate blooming alone among dozens and hundreds of other varieties that failed to bloom on account of the above causes. This Dahlia is to Dahlias what King Humbert is to Cannas, or the American Beauty is to Roses. Don't fail to try the Golden Gate this season, you will never regret it.

Price to the trade for field-grown tubers (not pot-grown), **$1.00 each postpaid; $2.75 for three postpaid; $10.00 per dozen.** No tubers sent out that do not show sprouts.

DISSEMINATED BY

LONG ISLAND DAHLIA GARDENS Wm. A. Finger, Jr. Prop. Hicksville, L. I., N. Y.

with a gorgeous display of about 8000 tulips, hyacinths and narcissi.

When we visit a greenhouse we naturally expect to see something exceptional and in this we were not disappointed. The real display house was that containing a full set of specimen plants of the new Hydrangea Hortensis. These plants in full bloom, augmented by magnificent specimens of pink and white spireas, made a sight not soon to be forgotten. The rose garden has been doubled in size and judging from the number of new varieties to be seen there will be an unusually fine display in June. An interesting feature of the rose garden is the summer house entirely covered with Dorothy Perkins roses. This house was built last fall, the roses moved in January with a ball of frozen earth and the long growths not shortened. At this time it looks as though the experiment would be very successful. WM. F. TURNER.

Cambridge, Mass.—John McKenzie, has leased his greenhouses on Whittemore avenue and will hereafter give his attention solely to his retail flower store at 1927 Massachusetts avenue. The lessees of the greenhouses are two Japanese who now have a business in Stoneham. One of them formerly worked at the Harvard Botanic garden. They will take possession June 15.

EBEL AT THE BAT.

Editor HORTICULTURE:

I trust you will indulge us for another inning, for I do want to set your Philadelphia correspondent right on what is generally regarded as a union in the sense that it has been employed in our discussion. In referring to the "unionizing" of a profession, there was nothing mentioned to convey the impression that it pertained to the organization of a profession, but, that it meant, to unite it in the form of a union for the regulation of labor conditions. Using the word literally, the Bar Association is a union of members of the legal profession, just as the National Association of Gardeners may be considered a union of members of the gardening profession; but they are quite a contrary union to what the word generally implies when applied to organization. And the principles of the associations named are quite of a different order than those of most "unions."

Just another word on that wage scale. Now, why persist on making $50 appear as the standard of the gardeners' salary? For, should it reach the eyes of the estate owner he may take it seriously and some real harm may come of it. Candidly, at this present writing I find it impossible to fill several vacancies for assistants at $40 per month, including board and lodging. A comparison of mechanics wages at 62½c. per hour, with that of the gardeners' salary, is, as a well known Philadelphian would himself argue, "imcompetent, irrelevant, immaterial" and misleading, for the gardener's pay goes on, rain or shine, whereas, the best mechanic, working under a union wage scale, I am satisfied would discount his opportunity for the year at $15 to $18 per week. In fact many large estates employ the best of them at $15 per week.

The education of the estate owner, as to what should constitute a proper compensation for the efficient gardener is in motion, is gaining in momentum, and has already given evidence of bearing good fruit. But no organization, or union, will ever be able to dictate what shall, or shall not be paid. That must always remain to individual adjustment, as is the case with all professions.

Friend Watson, why confuse the issue and state that you never knew of any secrets within the N. A. G.? Of course you didn't, nor did any one else know of any, because there are none. The whole affairs of this association are probably more widly heralded than those of any other like body; and still there are members who profess that they do not know that we ever get together, even in the face of the publicity that comes to us.

I am glad that you concede that the transformation horticulture is undergoing is really a condition and not a theory, even though you charge it to an origination of the mind; but from where else could it emanate? Certainly without some condition of the mind progress would never be evolved, and there surely has been progress in all departments of horticulture since I have come into it. Now do not jump at conclusions hastily and hold me responsible for it, for I lay all the blame on a natural growth through an aroused interest on the part of our people in horticultural pursuits.

After all, no matter whatever views you, I, or others may finally entertain over our discussion, none will ever ascribe to us the words of Dante.

"Seated upon down
Or in his bed, Man cometh not to fame,
Withouten which, whoso his life consumes,
Such vestige of himself shall leave,
As smoke in the air, and in the water foam."

M. C. EBEL.

Strain Tests of Tomatoes.

Bulletin 129 of The Pennsylvania Agricultural Experiment Station is entitled "Strain Tests of Tomatoes," but the facts shown by it are applicable to other farm crops. The bulletin is a summary of a more extensive article which is being published in the Annual Report of the Station. It shows the variation in strains of six varieties of tomatoes. The test has in most instances, been conducted for four years and the figures given are the average. Thus variations due to seasonal conditions are largely eliminated. The tests have shown variation in yield between strains of a variety of more than thirteen tons per acre of marketable fruit. It likewise shows pronounced variation in the period of maturity. The author attributes these differences in yield to heredity rather than to environmental conditions, and emphasizes the importance of the factor in the production of farm and garden. The bulletin may be had free of charge by addressing the Director of the Experiment Station, State College, Pennsylvania.

Bridgeport, Ct.—William Willis has purchased the Currier Seed Store, 97 Wall street.

FARMING 156 YEARS AGO.

They may have been a little shy on woman suffrage and T. A. B. in those old days, but they knew the merits of clover, timothy and blue grass all right. Read this interesting ad:

Philadelphia, 3d July, 1758.

To Be Lett For a Term Of Years.

A Plantation generally known by the name of the great island, lying and being within about half a mile of the boroug of Bristol, in the County of bucks, and exactly opposite to Burlington. The island itself contains about two hundred acres of land, about one of which is bank madow and will be in the fall almost wholly in fine timothy, clover, and blue grass very well cleared, the other hundred acres on the island is pretty levell upland, about fifty-five acres of which is cleared, and fitt for clover fields, 20 acres of which is already put in clover and the rest may easily be made by fothering on it there is also about 40 acres more upland belonging to the plantation, which lyes just at the end of the bank, which is now almost all cleared, and will be plowed this summer, there is a good farm house on it, with a barn and stables, and a very neat milkhouse and granary, with a large garden and young orchard.

Any person inclined to rent the aforesaid plantation, may know the terms by applying to William M'Ilvaine, merchant in Philadelphia, near the corner of walnut street in front street.

Philadelphia, July 4th.

Note that blue grass was here then and it was not imported from Kentucky either, where many people suppose it is native. G. C. W.

CATALOGUES RECEIVED.

Colprit's Nurseries, Arlington, Mass. —Folder of timely nursery stock.

J. K. Alexander, East Bridgewater, Mass.—Catalogue of the Dahlias offered by the East Bridgewater Dahlia Gardens. A very full and up-to-date dahlia list.

Yokohoma Nursery Co., Ltd., Yokohoma, Japan, 1914-1915 Descriptive List of Plants, Bulbs and Seeds. Profusely illustrated and exceedingly interesting in its text matter. Typical Japanese cover, silk fastened and in bright colors.

Alonzo J. Bryan, Washington, N. J. —Wholesale Price List of Flowering, Decorative and Vegetable Plants. A business document for the trade, indispensable after you once get a copy. Send for it.

PUBLICATIONS RECEIVED.

Report of the Park Commissioners of Wilmington, Del., for the year 1913. With a population of about 90,000 Wilmington has a park area of 472 acres, one acre to each 195 inhabitants. The several full-page illustrations given in the report show that these public reservations are well cared for and well adapted to their purpose.

Tennessee State Board of Entomology. Vol. III, No. 1, of the Ninth Annual Report of the State Entomologist and Plant Pathologist. This 120-page pamphlet is a model of useful, practical literature. That the great agricultural and horticultural interests of the State of Tennessee are well cared for is well evidenced in the contents of this publication, every line of which is of direct value to the soil tiller, nurseryman and gardener.

WASHINGTON NOTES.

Decoration Day observance by the Fire Department of the District of Columbia last week brought considerable business to the local florists and one order alone was for ninety-six wreaths, placed with Gude Bros. Co. In addition to these there were the many individual tributes.

Hereafter hucksters and storekeepers who occasionally sell flowers at retail along with other commodities usually handled by them, will not be required to take out a license as a florist according to an opinion rendered by Corporation Counsel Syme. During the past month or so, a large number of men selling flowers have been arrested because of their not having the regular license of a florist.

The Senate, by a vote of 32 to 21, struck from the agricultural appropriation bill the item for the distribution of free seeds by the members of Congress. The vote came on an amendment to the House bill offered by the agricultural committee. In his remarks upon the clause, Senator Kenyon declared that the farmers of his district considered the distribution of free seeds as a cheap attempt to curry favor.

George Burnap, landscape architect of the office of public buildings and grounds, left this city last week for New York, from which place he will sail for Europe, he being under orders to visit Italy, France and Germany to inspect the famous parks and gardens in those countries, with a view to securing ideas for the development of the park system of the District of Columbia. His trip will keep him away from Washington for more than four months.

Dr. Beverly T. Galloway, who has been in the employ of the Department of Agriculture since 1888, has resigned as assistant secretary of the Department to become dean of the faculty of the Cornell College of Agriculture at Ithaca, N. Y. Dr. Galloway entered the service as vegetable pathologist. After two years in that capacity he was made chief of the bureau of plant industry. About two years ago, due to the hard work and close application he had given to his duties, his health broke down and he was sent upon a trip around the world to recuperate. He spent some little time in Japan, China and Siberia, making full reports on the agriculture of these countries. At the beginning of the present administration he was made assistant secretary of agriculture. Since the announcement of Dr. Galloway's resignation as assistant secretary considerable interest has been manifested as to the selection of his successor. Many names have been mentioned for the position, but Secretary Houston has refused to discuss the matter, the letter of resignation having not yet reached him. However, it is said that William A. Taylor, who suceeded Dr. Galloway to the position of chief of the bureau of plant industry, when the latter was promoted, has quite a good show.

Lincoln, Ill. — Carl Hembreiker has resigned his position at Gullett's greenhouse to enter partnership with his brother, Otto Hembreiker, who has purchased the West End Greenhouse. He has had charge of the rose department at Gullett's and his resignation will take effect about the first of June.

CHICAGO NOTES.

The People's Florist of 47th St., has given place to the Morton Park Florists, 5437 W. 25th St.

A. Wiegand is taking as a side line the sale of bead necklaces, made of flower petals in California.

Miss Laura White, for 15 years bookkeeper for C. A. Samuelson, is now with the Mead Cycle Co.

John Walters has retired from the active management of the West End Floral Co. at 4035 W. Madison street. John J. Freely will take charge.

Announcements are made of a new paper known as The Retail Florist, to be published by the Chicago retail florists. The first number is promised for May 23.

The placing of southern peonies in cold storage is practically over, though an occasional large shipment has to be disposed of in this way The quantity now in storage is approximately one-third of that of last year.

The Sunday Tribune had a picture of Virginia Poehlmann displaying her talent as a fancy dancer. Miss Virginia is the daughter of Mr. and Mrs. August Poehlmann and is frequently called upon to furnish entertainment at social events.

Phil Schupp calls attention to the fact that it is much more difficult to secure a good rose grower than a good grower of carnations, something worth considering by young men learning the business, or entering the horticultural departments in the colleges.

One of the oldest and most efficient growers in this locality is Richard Prescott, born in England. He is proud of his sixty years of active work and is now as he has been for thirty years, in charge of the Northrop place at La Grange, Ill., where his work is both that of private gardener and commercial grower. He is as enthusiastic as ever and is an example of the man who does not grow old as the years pile up.

J. A. Budlong finds it more to his advantage to grow roses than carnations and in his large plant he will next year reduce his range of carnations by six houses and increase the area of glass devoted to roses, accordingly. About six tried and true varieties of carnations, Mr. Budlong considers the right number and says the varieties must be those that the individual grower has found that he can grow the best. White Perfection, Enchantress, Winsor, Aristocrat, Victory and Afterglow are his.

A PUNGENT CRITICISM.

Aren't florists rather over-doing the matter in some directions? The demand for pinks for Mothers' Day and for McKinley Day has been worked up and encouraged by them until large numbers of our citizens are inclined to yield to the excellent impulse that originated the movements, and now when there is a tendency to observe the days the florists, not satisfied with the greatly increased demand which in itself would mean vastly increased profits, place almost prohibitive prices on their goods. They are taking the best possible way to kill out all desire to celebrate the occasions. The one thing in particular which the public resents is the suggestion that it is satisfied to be imposed upon.

It will be a profitable wind-up for the season if you handle it well. We have the goods you will require, up-to-date in fashion, satisfactory in quality and price

H. BAYERSDORFER & CO.

The Florists' Supply House of America, 1129 ARCH ST., PHILADELPHIA, PA.

BOSTON NOTES.

The display of tulips in the Boston Public Garden, has been unusually good this year. Last Sunday the brilliant scene attracted many thousands of admiring visitors. The entire sweep of the garden presents a vision of loveliness from any point of view. The grass is in healthy condition, the walks have been resurfaced, the trees are sending forth their buds and leaves, and, as an innovation, an old-fashioned flower garden has been laid out, eighty feet in length.

The W. W. Edgar Company at Waverley, Mass., have a wide repute for the high quality of their product grown under the skilful management of Herman H. Bartsch. The accompanying picture shows one of their houses just before last Easter. No sooner is the Easter supply exhausted than the houses are filled up with stock for Memorial Day and just at present the display is as brilliant and tempting as it was at Easter time. We wager the prediction that the houses will be again emptied and once more filled up within ten days. Idle space is the abhorrence of the prosperous plant grower.

One mile of street or road will be planted to shade-trees at least seven feet in height, by the Massachusetts Forestry Association in the town or city which properly plants this spring the greatest number of shade-trees on its streets in proportion to its population based on the census of 1910.

For those who travel over the public highways of Massachusetts it will be some satisfaction to know that from the first of next January all brush cut along the roadways must be disposed of. The Association procured a law this year requiring all slash made in the future to be cleared away. This will beautify the roadsides and prevent many wasteful fires.

The "Forest Taxation" bill and the "State Forest" bill have each been favorably reported largely through the efforts of the Association, but they still need careful watching in the House and Senate.

An Easter Plant House at Waverley, Mass.

The gentlemen of the Burpee party from Philadelphia consisting of W. Atlee Burpee, David Burpee, W. Atlee Burpee, Jr., Howard M. Earl and Alex. B. Scott, accompanied by W. J. Stewart, visited the Arnold Arboretum on Friday, May 15 and spent several hours that they will never forget inspecting the attractions of that wonderful institution under the inspiring guidance of Jackson Dawson. Like the majority of the horticultural craft, outside of a limited number who have been privileged to visit this place in the past, the party from Philadelphia found a tremendous surprise awaiting them and it is safe to say that they will, every one, be frequent pilgrims to this Mecca of American horticulture. The pyruses were just bursting into bloom at the time and at this writing they make a picture full of spring glory. The Wilson novelties from China have made an excellent record of hardiness throughout the severe winter.

FLOWERS AND PARTISANS.

The Record protests against the abuse of floral emblems by parties and groups — suffragists, anti-suffragists and others. It was deemed of sufficient importance to be telegraphed from Washington that:

> During the afternoon Senator Weeks wore a red rose, expressive of his sympathy with the anti-suffragists.

That was on the occasion of the suffrage parade, and proper enough, as the custom has been established; but it is an ominous custom. Those who elect to believe in suffrage for women are not rightfully to be debarred from wearing red roses, nor are those who elect to oppose such suffrage rightfully to be debarred from wearing yellow jonquils, marguerites, etc. The red rose and the yellow jonquil mean no partisan affiliation, except on such special occasions as last Saturday in Washington, or a weak ago Saturday in this city. Flowers are for everyone, every day—if they can get them. Keep as near to that as possible. Beauty is not to be pre-empted.—*Boston Record.*

Flower Market Reports

BOSTON The market is very inactive this week. In fact, there is no market worthy of the name. Monday started off at a pretty fair pace but since then everything has been discouragingly dull. There is no item on the list that is not in supply beyond any present demand. Carnations are, perhaps, in the worst predicament. Very many are being picked every day and they are accumulating badly. Of course, Memorial Day will use up all that are fit to use, but it looks now as if there would be a lot of holdover stock that will be a dispiriting drag on an otherwise spic-and-span market. Daffodils are about finished and only the late flowering tulips, such as gesneriana, Darwins and some of the doubles are left. Sweet peas are badly overstocked. Outdoor lilacs will be all right for Memorial Day from present indications.

BUFFALO Weather conditions were bad, but business was generally good during the past few days, but the receipts have shortened considerably and the market has practically been cleaned up daily. The demand has been good on everything especially carnations, sweet peas, iris, baby gladioli, lily of the valley and daisies and prices have ruled good. The Beauty business has opened and the sales have been more satisfactory than for weeks previous. Lilies are still on the heavy supply list, but have taken well. There is no outdoor material to speak of except Poeticus narcissi and a few tulips. Home-grown lilac is expected soon.

CHICAGO The peony season is upon us. The early flowers are limited in quantity and many of the southern peony farms have yielded a much smaller supply than in former years. The chief difference will be in the cold storage offerings later on, as the home grown plants now give promise of the usual yield. Prices at this time are from five to eight cents. Carnations have recovered from the heavy demands of Mothers' Day and there are enough to go around, but prices hold firm. Roses are shortening up, partly because they are off crop and partly because of replanting. American Beauties are getting scarce especially in the best grades, but there are enough to meet all regular demand. New ferns from the south have appeared and are welcomed for local trade, for they sell for $2 while old ferns are twice that amount. They are yet too soft for shipping trade. Tulips from near-by points are keeping the market well supplied with much fine stock and in every variety. Lily of the valley is used up each day. Lilies are still a steady factor in the market and there is a good variety of miscellaneous stock. There is a good supply of daisies, always so much in demand at this time. Green seems in good supply everywhere.

CINCINNATI Practically all the stock coming into the market is cleaning up readily. The supply is good but not large and is meeting with a demand that is very active. The rose supply is adequate and mostly high quality, but some of the stock is badly mildewed. American Beauty receipts are normal and there is a good call for them. Good carnations all clean up each day. Fine iris and large gladioli have been added to the list during the current week. The sweet pea supply is easily more than sufficient for needs. Lilies are still somewhat in an oversupply but the glut has abated. Very fine callas and rubrum lilies are to be had. Lily of the valley are in a very large supply and of high quality. Orchids plentiful but find a rather ordinary market.

Flower Market Reports

(Continued from page 777)

NEW YORK A fair trade is reported from the wholesale districts, which is encouraging considering that the outdoor planting and bedding department claims the attention of the suburban florist almost to the exclusion of all other interests just now and already the preparations for Memorial Day are a disturbing factor in the daily routine. Stock cannot be said to be overplentiful. Some things that have had a leading part in loading down the market, such as spring bulb stock, are now past their power to help or to hinder. Outdoor lilacs are now at their height and will in due time be succeeded by the peonies. Gardenias are scarce and cattleyas are also shortening up. Lilies have got back to normal values as price quotations show. Smilax continues in short supply but adiantums are much too plentiful. Roses command a little better figure than they did last week. The quality has been good, generally, the cool weather favoring them much. Carnation quality is hardly up to recent standard.

PHILADELPHIA There was a good volume of business, especially towards the latter part of last week, but prices generally ruled low. This depressed standard of values was true of the higher grade of stock as well as in the shorts. Carnations fared rather better than other staples as the market was clear to start with after the Mothers' Day rush. But buyers could find all the good stock they wanted as low as two cents, which was quite a contrast from the previous week. Roses are tremendously plentiful. Local Beauties are now supplemented by some nice stock from Northern growers, which show marked color and finish. Russell and Sunburst are also very good. The supply of cattleyas has dropped off a little and with fair demand prices have hardened considerably. No change in the gardenia situation. Callas are fewer, but there is still a big over-supply of Easter lilies. The gladiolus market has been supplemented with some nice stock of the "baby" type, like Peach Blossom, Delicatissima, etc. Peonies are more plentiful and some of the choicer varieties are now appearing. Snapdragon and sweet peas of fine quality are in great supply. First cuts of blue cornflower now in.

ST. LOUIS The market is still almost overloaded with stock of anything in season. Demand has been rather slow which causes the surplus to pile up from day to day and prices have dropped greatly. Better trade is looked for this week, several large conventions and a number of social events being in prospect. For Decoration Day all outdoor stock should be very plentiful and no advance in prices is looked for.

WASHINGTON The flower market has been very puzzling and unstable during the past ten days. The heat forced the life out of the flowers one day and the cold held them back during the next three or four. All stock has moved fairly well, but prices continue low. Snapdragon at the present time is meeting with but a very moderate demand. The market for sweet peas has improved and the ordinary varieties are bringing up to $6 per thousand while Spencer type bring considerably more. Roses are quite plentiful and move well in small quantities at small prices. Heliotrope and gladioli form another addition to the usual stocks and peonies have just made their appearance.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending May 16 1914	First Half of Week beginning May 18 1914
Cattleyas	15.00 to 25.00	10.00 to 25.00

Snapdragon at the present time is meeting with but a very moderate demand. The market for sweet peas has improved and the ordinary varieties are bringing up to $6 per thousand while Spencer type bring considerably more. Roses are quite plentiful and move well in small quantities at small prices. Heliotrope and gladioli form another addition to the usual stocks and peonies have just made their appearance.

PHILADELPHIA NOTES.

A careful survey of the peony farms in this locality by one of the leading distributors tends to the conclusion that there will be a good supply for Memorial Day, notwithstanding the lateness of the season. Of course a good deal will depend on the weather. If it continues bright and warm everything will be all right.

The Michell store was gay on the 14th and 15th inst. with a fine display of May flowering tulips. Prizes had been offered and the gardeners came out in good force and gave the public a fine idea of the possibilities of this magnificent class of flowers. Shows like this are good for horticulture and good for business. Hundreds of varieties were shown and were a revelation to most of the visitors in their wealth of form and color.

E. J. Fancourt of the Pennock-Meehan Co. just returned from a trip west, reports good trade all along the line and comments especially on the tremendous business being done in Pittsburgh, Cleveland and other cities, in celebrating Mothers' Day. All kinds and colors of both flowers and plants are used and the occasion is assuming such proportions as to compare with Easter. This in marked contrast with Philadelphia where some of the leading retailers have been openly hostile to the whole thing. Which may be good sense, but not good business.

Visitors:—W. G. Badgley of Badgley, Riedel and Meyer, N. Y. City; A. P. Dewar, representing R. & J. Farquhar & Co., Boston, Mass.; Joseph A. Manda, West Orange, N. J.

VISITORS' REGISTER.

Washington, D. C.—Mr. and Mrs. Will Rehder, Wilmington, N. C.

Boston: J. B. Urquhart, Newport, R. I.; I. Rosnosky, representing H. F. Michell Co., Phila.; J. J. Karins, representing H. A. Dreer, Philadelphia, Pa.; William Tricker, Arlington, N. J.

Greenhouse Foreman on Private Place. Must be First Class Grower of Roses, 'Mums, Carnations and General Greenhouse Stock, of good personal habits and able to produce references to that effect. Wages $65.00 per month and room. Apply by letter only, enclosing copies of recent references, to

C. W. KNIGHT
Westbrook Gardens, Oakdale, L. I., NEW YORK

WANTED—Head Gardener; married man; Scotch or German preferred, without family. Must have thorough experience in greenhouse and outside gardens. Permanent situation. Gardener's cottage provided. Address "F. H. B.," P. O. Box 1723, Boston.

WANTED—A good pot plant grower to work under foreman. Reply, stating age, experience and wages expected, to THOMAS ROLAND, Nahant, Mass.

SITUATIONS WANTED

DO YOU NEED FARM HELP?

We have many able-bodied young men, both with and without farming experience, who wish to work on farms. If you need a good, intelligent, sober man, write for an order blank. Ours is a philanthropic organization and we make no charge to employer or employee. Our object is to encourage farming among Jews.

THE JEWISH AGRICULTURAL SOCIETY,
174 Second Avenue, New York City.

FOR SALE

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

BARGAIN — Greenhouse, residence and stock; no competition; live village, 30 miles from Buffalo, excellent shipping facilities. Write ELLIS BROS., Springville, N. Y.

St. Louis — The Geo. M. Garland Company of Des Plaines, Ill., greenhouse builders, has opened an office here in room 1208, Fullerton building, which is in charge of C. C. Shafer.

OBITUARY.

Eric Bonevier.

Eric Bonevier, proprietor of the Butcher Greenhouses, Providence, R. I., died on May 9th, after a long illness. He leaves a mother in Sweden.

Walter Wellhouse.

Walter Wellhouse, one of the best known fruit men of Topeka, Kan., died May 2, aged 65 years. He was secretary of the State Horticultural Society since 1906, besides being affiliated with many other societies. He is survived by a widow and two sons.

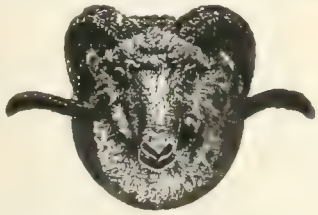
Julius White.

Julius White, who for twenty-two years conducted a florist business in Skaneateles, N. Y., passed away on Sunday, May 10, at his home in that village after a long illness. Mr. White was 64 years old. He was born in Somersetshire, England, and came to America in 1866. He is survived by his widow, one son, and has several brothers and sisters in this country, England and Australia.

UNIVERSITY OF ILLINOIS NOTES.

At the meeting of the Floricultural Club held Wednesday evening, May 4, Mr. James Hutchinson, a member of the staff of instruction, gave a very interesting and instructive talk on Orchid Culture. He supplemented his talk with numerous photographs. Mr. Hutchinson is an experienced grower. The entire membership of the club "turned out" to hear him speak.

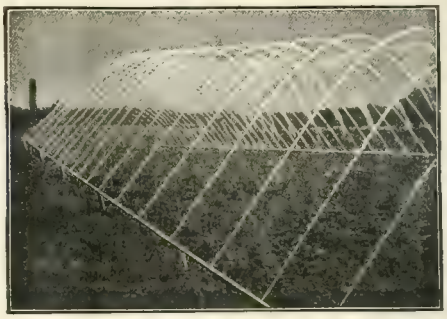
The class in floral decorations in charge of Prof. H. B. Dorner returned Sunday evening from a two days' inspection trip to the establishment of F. Dorner & Sons Co. at Lafayette, Ind. The object of the trip was to study flower shop and work-room arrangement with reference to the retail trade.



The members of the class availed themselves of the opportunity, and visited the Dorner greenhouses, Purdue University and the battleground of Tippecanoe. While at Lafayette the visitors were royally entertained by Prof. Dorner.

CINCINNATI NOTES.

Milton Alexander called on his trade in this city last week.



Hardesty & Co. and Julius Baer utilized fine large iris to good advantage in their window displays this week.

C. P. Brunner and A. C. Leedle of Springfield, Ohio, were in the city on Monday. The purpose of their visit was to see the Reds wallop the Giants.

Manufactured by THE KENTUCKY TOBACCO PRODUCT CO., Incorporated, Louisville, Ky.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

EASTERN CHEMICAL CO, BOSTON

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

When writing to advertisers kindly mention HORTICULTURE.

FRAMINGHAM - - . MASS.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel. wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

British Distributors: British and American Fertilizing Co., Liverpool, Eng.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

GREENHOUSE GLASS
OUR PRICES WILL PROVE THIS. CHICAGO, ILL.

Greenhouse Shading

AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.

My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.

Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.

E. A. LIPPMAN, MORRISTOWN, N. J.

A Range of Greenhouses on Top of a New York Store 200 Feet Above the Street

FAR above the noise of noisy, bustling New York Mr. [illegible] has his range of houses on top of Bloomingdale Bros. store at Fifty-ninth Street.

Eighteen years ago we built the first houses and have continued adding to them. Two, we just completed, 26 feet wide and [illegible] feet long.

We consider this a pretty good recommendation for our construction—eighteen years of hard usage. There is probably not another greenhouse in the world that has had the number of people visit it. This means wear and tear on the structure.

Today, outside of minor repairs the original houses are as good as the day they were built.

Here the flowers are grown that are sold in the flower shop on the ground floor. This flower garden on the roof gives people a chance to see how flowers and plants are grown. It also gives a prospective purchaser of a greenhouse a chance to see a greenhouse built in its entirety. It shows you the superstructure, plant benches, and heating apparatus. It also shows you the plants growing, as well as how the plants are taken care of.

Besides running this shop and range of houses, Mr. Trepel also runs the flower store at Abraham & Strauss in Brooklyn; Gimbel Bros., 33rd St., and 6th Ave., New York, and has recently opened a new one at 89th St. and Broadway.

We tell you all this just to show you the variety of greenhouse building problems we are continually solving successfully.

Incidentally, we hope that when you are ready to build, you will think of us as the builders. When you are ready to talk it over,—say when and where and we'll be there.

Lord & Burnham Co.

FOUR SHARP GIMLETS, HOW TO GET THEM

A gimlet, as everybody knows, is a sharp pointed tool to bore holes in wood.

Facts, are gimlets that fill untruths full of holes. We have made four particularly sharp gimlets for boring right into the untruths of greenhouse construction and estimates. They are in the form of four pithily, pointed pieces of printed matter (one is a booklet). Two of them have already been mailed to several thousand whose names are on our mailing list.

Here are the names of these four gimlets:

1. **No Use Trying To Get Along Without Me.**
2. **Putting Your Finger On The Spot.**
3. **A Pair of Dividers.**
4. **The Holes In The Arguments.**

How about you—did you get the first two? If you didn't, then sign the coupon below: tear it off and mail to us and we will see that you get all four of the gimlets. Every one will have a sharp point so you can put it to work at once.

Cut this off here, mail it to us and along will come the four gimlets.

Headquarters for HARDY PHLOX

One year old, field-grown plants now established in three inch pots. General Collection of Standard Varieties.

HARDY PHLOX

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers, with faint aniline-red eye.
Aglae Adanson (Medium). Large snow-white with violet-rose eye.
Antonin Mercie (Medium). Light ground color, upper half of each petal deeply suffused bluish-lilac, large white halo.
Bacchante (Tall). Tyrian rose, with crimson-carmine eye.
B. Comte (Medium). Brilliant French purple, with crimson-carmine shadings. 85 cts. per doz.; $6.00 per 100.
Bridesmaid (Tall). White, with large crimson-carmine centre.
Caran d'Ache (Medium). Geranium-red, with old-rose shadings and white eye; very effective.
Champs Elysee (Dwarf). A very bright rosy magenta.
Colibri (Tall). White, with crimson-carmine centre, very late.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye. 85 cts. per doz.; $6.00 per 100.
Danton (Medium). Scarlet, pure red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Diadem (Drawf). A fine dwarf, pure white.
Eugene Danzanvillier (Tall). Lilac, shading white toward the edges; large white centre.
Frau Dora Umgeller (Medium). Solferino red, shading to carmine-crimson at centre.
General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
Goliath (Very tall). Rich carmine, shading to a deep centre.
Helena Vacerasco (Dwarf). Large pure white.
Henry Marcel (Medium). Pure red, with bright salmon shadings.
Henry Murger (Tall). White, crimson-carmine centre.
Henry Royer (Medium). Tyrian rose, with lighter shadings.
H. O. Wijers (Tall). White, with bright crimson-carmine eye.
Jeanne d'Arc (Tall). A good standard late white.
Jules Cambon (Medium). Bright rosy magenta, with large white centre and light halo.
Kucken (Medium). Bright carmine-rose shaded salmon.
La Vague (Medium). Pure mauve, with aniline-red eye.
Le Mahdi (Medium). Deep reddish-violet, with darker eye.
Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.
Louise Abbema (Dwarf). Very large dwarf, pure white, fine form.
Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Mrs. Jenkins (Tall). The best tall early white for massing.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Pacha (Dwarf). Deep rose pink, suffused with solferino-red and carmine-purple eye.
Pierre Bayle. Crimson-carmine, overlaid with orange scarlet.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet.
Prosper Henri (Tall). Pure white, large decided rosy magenta eye.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Medium). Tyrian rose suffused carmine-lake and bright carmine eye.
Von Lassburg (Medium). The purest white in cultivation, individual flowers larger than any other white.

Price. Any of the above varieties, except where noted otherwise, 75 cts. per dozen; $5.00 per 100; $40.00 per 1000.

New Varieties of Phlox

Asia. One of the most valuable recent introductions, a delicate shade of mauve, with a crimson-carmine eye.
Braga. Mauve-rose, more or less suffused with salmon; large white eye; a distinct and pleasing color combination.
Europa. A white variety with very decided crimson-carmine eye; the individual flowers as well as the trusses are very large, entirely distinct.
Manzelbrunner. A very large bright soft pink, with a large white eye.
Rynstrom. An improved form of the popular variety Pantheon; fine for massing, of a Paul Neyron Rose color.
Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.
Rheinlander. A beautiful salmon-pink with flowers and trusses of immense size, the color of the flower is intensified by a very decided eye of a deep claret-red. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Wanadis (Medium). Entirely distinct, a mottling of white and light violets, reminding one of Phlox Divaricata Canadensis. The color is intensified by a bright reddish-purple eye. 30 cts. each; $3.00 per dozen.
W. C. Egan. One of the best and largest flowering varieties in our collection, panicles of immense size, of a delicate pleasing soft shade of lilac which is illuminated by a large bright solferino-red eye. 30 cts. each; $3.00 per doz.; $20.00 per 100.
Widar. A splendid improvement on Edmond Rostand; in color a light reddish-violet, with very large white centre, which intensifies the color.
Tragedie. Deep brilliant carmine with blood-red eye. $1.50 per doz.; $10.00 per 100.

Price. Any of the above varieties, except where noted, $1.00 per doz.; $6.00 per 100; $50.00 per 1000.

The prices quoted above are intended for the trade only.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY NEW YORK BOTANICAL GARDEN.

Antirrhinums for Winter Flowering

These half-hardy perennials have been the aristocrats of the flower garden and now they are working their way to become the same under glass. If plants are wanted to bloom well through the winter, lose no time in getting cuttings into the sand. Make a careful selection of any strain that showed up well during the past winter. See that they have protection from the sun, and use every precaution to prevent wilting. Water them freely until rooted and when they have rooted get them potted as soon as possible and keep shaded for a few days until they become established, when they should be given a bench in a cool house, with fullest light and ventilation. These plants can be plunged in a frame where you can get at them with the hose. When they have filled their pots with roots shift them into 4 or 5-inch pots which will hold them until they are planted out in the benches.

Care of Adiantums

Plants which are grown in large sized pots and which had a little rest during the winter will now have a dense crop of young fronds and any not repotted will be benefited by weak doses of manure water once a week. Sometimes there is an opportunity to plant out narrow benches of adiantum, and in six inches of good loam they soon develop into strong plants. To keep the fronds of a uniform dark color, additional shading will be now required on the glass. Where snails are troublesome, baits of lettuce or cabbage leaves or sliced potatoes will attract many. A dusting of fine salt or lime among the pots will kill many. Do not keep them too warm as it tends to make the fronds very soft. A temperature of about 60 degrees, with 10 to 15 degrees higher with sun is enough for Adiantum Croweanum and A. cuneatum. Adiantum Farleyense will want not less than 65 degrees —70 degrees would be better. Give ventilation on all favorable days, but not to such a degree as to lower the temperature.

Chrysanthemums

When growing show plants it is a better plan to start enough of them so that if a few kinds turn out faulty you can afford to discard them. For the growing of exhibition blooms great care should be taken from the time the cuttings are struck until they have their last shift. The plants should never be allowed to get pot bound. As soon as the pots are well filled with roots repot into 3-inch and on up into 8 or 9-inch pots. A good turfy loam with one-third well-rotted cow manure and a sprinkling of bone is a good compost to use. Mix it thoroughly and let it stand for a few days until needed. Be careful after potting not to overwater, and as they get well-rooted never allow them to want water. Syringe every sunny morning and again in the afternoon on every warm day. Plants intended for exhibition should now be growing rapidly, and must have every attention in the way of watering, ventilation, pinching and tying up. Look out carefully for aphis and fumigate regularly.

Growing Asparagus plumosus

In any retail establishment of some size a bed of this most useful green in one of the houses will always be highly useful. There are many greenhouses not well adapted for growing cut flowers which answer admirably for asparagus. Thrifty plants, out of 4-inch pots, are the right sort of stock to use in the making of a new asparagus bed. In the replanting of old beds the soil, to a depth of at least six inches, should be renewed, and the lower layer loosened with spade or fork before the new compost is placed on top. A good mixture for this culture is prepared by thoroughly intermixing in equal parts, a rather heavy loam and old cow manure, and enough of sand to keep the shovel bright. A layer of eight or nine inches of this compost is none too much for asparagus. The plants should be set from ten to twelve inches apart and the distance between the rows should be from sixteen to eighteen inches.

Tuberous-rooted Begonias

Tubers are inexpensive and it is not too late even now to start a batch. They will start to bloom within a couple of months. Tuberous begonias want a cool, airy greenhouse and the shade must not be too heavy or it will make the plants drawn and soft. They are liable to be attacked by thrips in the early stages and either a weekly fumigation, or spraying must be given to keep them in check. When in active growth and well pot-bound, liquid manure can be given twice a week with benefit. Tuberous-rooted begonias are perhaps the most useful of all summer-flowering plants of a moderate size and as they are persistent bloomers no florist can go far wrong in growing a good lot of them. As bedding plants their sphere is somewhat limited unless partial shade can be given, although they succeed well in the open at seaside resorts where the nights are cooler and the atmosphere softer than inland.

Outside Work

The florist who has different crops planted outside will have to give them plenty of attention from this out. You will have to go over them often in order to keep down the weeds which grow so fast now. Where the ground is kept well cultivated every week you will not have much trouble with weeds. Give all rank growing crops some good fertilizer sowed between the rows and cultivated in. This will help greatly in their growth.

Stocks

Mr. Farrell:

Dear Sir Can you please inform me why Beauty of Nice and Princess Alice stocks don't do as well now as in the winter? The past three years I've been having good

plants in 8 inch pots at Christmas, yet the same variety in February only throw the one stem and flowers while in 4 inch pots. They have the same treatment in each case and are potted before they become pot-bound.

Yours sincerely,

H. L.

Conn.

Beauty of Nice and Princess Alice do not do as well from April up to now, as they do from the middle of January up to the middle of March. To have this stock in bloom at Christmas the seed should be sown the end of April and grown on by shifting until in whatever size desired using rich compost. There is no better place to care for these plants during the summer than a cold frame. Here they can remain until late in the fall. They can be kept pinched and will form good bushy plants which should throw quite a few flowers. When housing them give a cool house, place where the temperature at night is from 45 to 48 degrees. They like plenty of ventilation and will not stand any forcing. Read my article in the issue of May 16th.

Mr. Farrell's next notes will be on the following: Outdoor Sweet Peas; Palms; Bay Trees; Poinsettias; Orchids; Spraying and Syringing.

Selenipediums

Among the subtribe Cypripediæ, the section Selenipedium forms an interesting and useful group together with its many hybrids. Among the species we find the curious S. caudatum with its large flowers and very long petals, which latter sometimes attain a length of 30 inches, S. longifolium, S. Schlimmii, S. caricinium and numerous others, all well worth a place in any collection of orchids.

Many beautiful hybrids between the various species have been raised artificially and one can have flowers nearly all the year around by having a collection of the different species or hybrids. The flowers are produced on long, stout stems for a long time in succession and while the individual flowers do not last so long as those of the Cypripedium insigne section, a strong plant will remain in bloom three or four months at the time. As soon as or before one flower is ready to drop, there will be another to take its place.

In the accompanying picture will be seen in the upper left hand corner a good specimen of S. × calurum Rogersii, with its lovely rose colored flowers and broad dark green foliage; a noble plant even when not in bloom. In the center of the background is S. conchiferum, and towering above it is a strong branched inflorescence of S. Urgandeae with five flowers. On the right side of the picture is S. cardinale; just below and in front of this is S. candidulum and S. Sedeni; these last three varieties are in reality forms of one, being crosses of the same two species. Two flowers of S. Roezlii can be noticed to the left and below S. calurum Rogersii. The cypripediums in the group are, reading from left to right, C. Siebertianum, C. callosum, C. Harrisonianum superbum, C. Polletianum and C. tonsum.

Selenipediums are best grown in a warm, light greenhouse where the temperature does not go below 58 degrees or 60 degrees at night. The warmest end of the cattleya house makes an ideal place if room can be found for them. They enjoy more sun and light than the cypripediums from India, such as the C. insigne and C. barbatum section. Osmunda fibre with a few lumps of fibry loam intermixed makes a good compost for them and when in active growth they will be greatly benefitted by a weekly dose of weak liquid manure water.

SELENIPEDIUMS WITH CYPRIPEDIUMS IN FOREGROUND.

Repotting is best done when the new growths are starting to root. After repotting keep on the dry side until root action starts in again. Well established plants require a good deal of moisture at the root and can be sprayed overhead on bright warm days. Air should be admitted on all favorable occasions, as a stagnant atmosphere is very apt to cause the young growth, and sometimes with it the young flower spike to rot off.

Publicity among the kind of readers reached by this paper is THE SORT OF PUBLICITY THAT PAYS.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Watering

Make sure that the plants have all the water that they need this warm dry weather, for if they are allowed to suffer from lack of water they will not produce the flowers, especially the Beauties which will likely become stunts and finally go blind. See that there is enough mulch on to keep the sun from heating up the soil too much, for this would hurt a large number of the roots, and would kill all the small and tender feeders that are continually working out in search of food. Water the edges of the benches twice if necessary. Be careful in using liquid manure, for it must not be applied if the soil is at all dry. Better water with clear water first.

Cleaning

There is no reason why the plants should not be kept clean, for the houses will still have some time to live. See that they do not become infested with red spider as that would be bad for the next season, as a large number of the rascals will remain on the benches, and will manage to get at the young plants as soon as these are set on the benches. The same is true of greenfly. Keep this out of the houses at all costs.

Parcels Post

Many places will receive quite a few orders to be shipped by parcels post and this line of trade can be worked up so that it will pay very nicely. The main part of it is to see that the roses shipped in this fashion arrive at their destination in good shape. To do this they must be well hardened before they start, and should have the stems mossed, and then they should be tied to the bottom of the box, so as to make it impossible for them to slide around in the box while they are handled and thus become bruised and broken. We always use a wrap around the outside of the box, as then the box itself will remain clean, and will be presentable when the outside wrap is removed. Mark the box so that anyone can tell it contains flowers and it will be handled a little more carefully at least.

Shipping

It is a very poor policy to put all the roses into the box. All the bad, or too far open ones should always be discarded, for they only pull the price down on the good ones. If there are too many to throw away, put them in a lot by themselves and then they will bring something, and you will receive a better price for the good grades. If this has not been done all along it will take a while for the buyers to get wise, but once this is done, and the stuff is always packed good, the stock will usually be sold before it reaches the city. Try it and see.

A Query

Mr. Ruzicka:

Dear Sir—Will you kindly advise me when to set out rose bushes in greenhouse for late fall and winter flowering, and what kind of drainage to use in benches that are about four inches deep with tile bottom, also how long to leave shading on house after planting to get good results? I am,

Yours respectfully,
M. C.

New York.

As you do not specify any varieties, we take it for granted that you intend planting some of the regular greenhouse varieties. You also mention bushes. We could advise you better if you would be a little more explicit in your letter. Roses for winter blooming can be planted any time now, and if young plants are used they will have plenty of time to develop before roses are cut from them. If your benches are raised you will require no drainage at all, save spaces between the tiles, or holes in the same. If, however, your benches are solid we would advise at least four inches of crushed stone under the tiles. It would be of little use to put broken stone into the bottom of the benches as the stone would soon fill up with soil, and then the drainage would be poor. If your soil is heavy you can allow more open space between the tiles, and if your soil is light, put them closer together. Use a little straw or hay, or any material like that, which is not too coarse, in the bottom of the benches to keep the soil from sifting through. Do not use too much soil in the benches, as you can always add a little more whenever the plants need it. As your benches are four inches deep we would fill them not quite full, say up to within a half an inch. This will give the plants plenty of soil to root in, and make them easier to control. As for shading, we never use shading for roses after planting. We might shade the houses a little to make them more comfortable to work in, but that is all. This is generally only a little mud and water and will wash off with the first rain that comes along. If the plants used are potted stuff they should never feel that they have been planted except that they will start and grow much better at once. They should never wilt if they are planted right, hence there is no use for shading, as it only tends to make the plants soft and more subject to disease.

As an Advertising Medium Horticulture has NO superior. Because they ALL read it. And they read it ALL.

Publicity

The building of greenhouses and extension of facilities for the production of flowers for commercial purposes shows no diminution but rather an increase from season to season, as a perusal of our column devoted to the weekly record of greenhouse building will show. This is pleasing evidence of a widespread confidence in the stability and future growth of commercial floriculture which seems well justified. The effect of the augmented quantity and improved quality of the product is, however, increasingly apparent each year in the large centers where flowers are wholesaled and the progressive thinking men whose business interests and prosperity are involved are coming to see the necessity for concerted action to develop a broader and more craving demand from the public for the goods. And this is what is behind the recent agitation of "Publicity."

Restricted ideals

Publicity is a term of very elastic meaning. In its application to the flower trade, in the few years since the word came into prominence as a somewhat vague and nebulous "open sesame" to business improvement, such expedients as window placarding and joint newspaper advertising, general reading notices in the public press, etc., seem to mark the limit of the average conception of what would constitute a practical trade publicity policy. But does this really get to the root of the proposition? While recognizing all these resources as useful factors in increasing and developing business HORTICULTURE has very decided convictions as to the ultimate value of expenditure in such directions unless well supported by a general adherence to certain fundamental principles, and thus in our sincere desire to help along the good work, as we see the light, we have, in these columns from time to time expressed sentiments and views seemingly at variance with the judgment of local publicity committees and others whose well-meant efforts have appeared to fall short of what might have been accomplished with a more mature consideration of the problem.

Two kinds of publicity

In further explanation of the foregoing we submit that persistent effort to popularize the using of flowers for a myriad purposes every day in the year is far better than sporadic advertising for special occasions when the demand will to a great extent develop itself. Again, all the beneficial effect of placarding and advertising at such times will be more than neutralized if, as is usually the case, its sequence is a dissatisfied public imbued with a well-defined belief that they have been subjected to a hold-up by the florist. We feel that "publicity" under such conditions becomes just plain "notoriety" and is purchased at a frightful cost to the flower business. Ideal publicity—the kind under which the florist trade will grow and prosper—is whatever will help to properly standardize flower values, increase the use of plants and flowers in the thousand and one daily affairs of life, help to elevate the business to a position of honor as a commercial enterprise of stability and good repute and place those who are engaged in it on the highest pinnacle in the public estimation. All this cannot be brought about in a day or a year—perhaps it is a hopelessly Utopian proposition but the only way to strike high is to aim high. We would here repeat what we have urged on several occasions before, that constructive energy, foresight and executive ability of a high order will be indispensable, especially for the initiatory period, in the flower publicity committees appointed by the various florists' organizations if any permanent benefit is to result from their work.

SOME MAY FLOWERING SHRUBS.

From Arnold Arboretum Bulletin No. 54.

The Korean Viburnum Carlesii is uninjured by the winter. This is one of the most beautiful of the exotic Viburnums and is particularly interesting from the fact that the flower-buds are bright orange-red while the inner surface of the corolla is white, and as the flowers open the color of the outer surface gradually fades to pink and then to white. As the buds do not always expand at the same time there are in the flower-cluster pink buds among the white flowers; the flowers are very fragrant. This plant, although it is still comparatively little known, well deserves a place in every collection of shrubs.

As usual, the earliest Barberry to flower in the Arboretum is Berberis dictyophylla which, although it comes from the southern part of China, is perfectly hardy here. The flowers are solitary or occasionally in pairs in the axils of the leaves, rather less than half an inch in diameter and pale primrose yellow in color. The peculiar beauty of the plant, however, is in the leaves, which, although not large, are silvery white on the lower surface and in the autumn turn brilliant scarlet on the upper surface while the lower surface retains its spring and summer color.

Prinsepia sinensis is uninjured by the winter and the plant has flowered more profusely than ever before. This north China shrub is one of the first plants in the Arboretum to unfold its leaves in the spring, and when these are nearly fully grown the clear yellow axillary flowers appear. This beautiful and interesting shrub does not seed at all freely in the Arboretum and is still rare in American collections.

Fothergilla, which is a genus of the Witch Hazel Family, confined to the southeastern United States, has furnished gardens with some beautiful shrubs. All the species bear small white flowers in compact clusters, at the ends of the branches, and handsome leaves resembling those of the Witch Hazels; they are now in bloom. Fothergilla major and F. montana are large, vigorous and very hardy shrubs, while Fothergilla Gardeni, which is a small plant and a native of the coast region, is less hardy than the mountain species.

The form of Rhododendron praecox known in gardens as "Little Gem" is usually the first of the evergreen Rhododendrons to flower in the Arboretum. The pale rose-pink flowers are too often injured by late frosts, and this year the flower-buds have been killed by cold, so that this spring the earliest Rhododendron in flower is a dwarf plant received several years ago from Germany under the name of R. Jacksonii, a name which does not appear in catalogues. It is evidently one of the forms or hybrids of R. caucasicum, although it flowers two or three weeks before any of the other forms of this species in the Arboretum. It is a low compact plant with clusters of large pale pink flowers and has not been at all injured by the winter. They are well worth the attention of lovers of dwarf early flowering Rhododendrons.

A VISIT TO HAWTHORN HALL.

Friday, May 22, was a delightful holiday for the members of the Horticultural Club of Boston, when they visited South Lancaster as the guests of Mr. and Mrs. Bayard Thayer at their beautiful estate, Hawthorn Hall. This estate which we described in part last year on the occasion of the visit of the Gandeners' and Florists' Club of Boston, comprises about 1000 acres the villa occupying an elevation commanding views of wooded hills and valleys and typical New England villages for many miles. Crataeguses are a feature of the decorative planting about the house and from these comes the name Hawthorn Hall. Of equal importance and interest are the lilacs of which a vast number of old and new varieties have been planted and an idea of their luxuriance may be drawn from our cover illustration in this issue.

There are extensive nurseries in which tens of thousands of pines, kalmias, callunas, etc., are raised for planting on the estate. 1000 white pines have been set out this season; A field of 12,000 2-year-old Rhododendron Vaseyi, all to be planted in the woods was especially admired by the visitors.

At this season the tulips and late narcissi are the dominant features of the flower garden. German irises in many varieties and lilies will quickly follow. We described these tulip beds quite at length last year. They are simply gorgeous and the plantings this year are an improvement over last year's arrangement. Exochorda Wilsoni, which came in for so much admiration last year is again a sight worth a long trip to see. William Anderson, the superintendent is recognized as one of the most competent and skillful gardeners in outdoor and indoor work and he is as popular as he is skillful. He escorted the visitors all over the grounds and none will ever forget the delightful stroll, through meadows and glades, sparkling with myriads of Poet's narcissi growing at random through the grass.

Luncheon was served on the veranda and everything possible to make their guests happy was done by Mr. and Mrs. Thayer.

The place was thrown open to the public from 2 to 6 o'clock last Saturday afternoon and there were no less than 3000 visitors from all over Worcester County. 600 autos were there by actual count.

THE MOSSES.

"Mosses—meek creatures! the first mercy of the earth, veiling with hushed softness its dintless rocks; creatures full of pity, covering with strange and tender honor the scarred disgrace of ruin, laying quiet finger on the trembling stones to teach them rest. No words that I know of will say what these mosses are. None are delicate enough, none perfect enough, none rich enough. How is one to tell of the rounded bosses of furred and beaming green—the starred divisions of rubied bloom, fine filmed, as if the rock spirits could spin porphyry as we do glass—the traceries of intricate silver, and fringes of amber, lustrous, aborescent, burnished through every fibre into fitful brightness and glossy traverses of silken change, yet all subdued and pensive and framed for simplest, sweetest offices of grace? They will not be gathered, like the flowers, for chaplet, or love token; but of these the wild bird will make its nest, and the wearied child his pillow."—*Ruskin.*

SPOTS ON CHRYSANTHEMUM FOLIAGE.

Dear Sir:

Will you please tell me in the next number of "Horticulture" or by mail all about the dark brown spots on the leaves of young chrysanthemums and how it can be prevented from spreading? I am a reader of HORTICULTURE.

Very truly yours,

California. W. W.

In regard to the brown spots on the chrysanthemum, the conditions in California are quite different from those in the east, so that the diseases also differ greatly. The only black spot we have here on the chrysanthemum come on in the fall on greenhouse plants when they are grown too closely together. This spot is known as Cylindrosporium. It seldom affects potted plants or where the leaves receive sufficient light and air. The spots may occur singly or cover a large part of the leaf, and they are always confined to the older, lower leaves.

I should advise writing to the pathological department of the University of California, Berkeley, California, for advice. Yours very truly,

(Dr.) G. E. Stone,

Mass. Agri. College,
Amherst, Mass

A CONFESSION.

What a glorious profession is that of the true gardener!

He enjoys all the beauties of nature which his employer only glimpses between times!

He gets all the effulgence and none of the worries of paying for it!

I have been crying like John the Baptist for more pay for the gardener. I take it all back.

The gardener ought to work for nothing and pay a premium!

G. C. Watson.

CARNATIONS.

(Margaret Widdemer in May Everybody's.)

Carnations and my first love! And he was seventeen,
And I was only twelve years a stately gulf between!
I bought them on the morning the school dance was to be,
To pin among my ribbons in hopes that he might see;
And all the girls stood breathless to watch as he went through
With curly crest and grand air that swept the heart from you!
And why he paused at my side is more than I can know
The shyest of the small girls that all adored him so. . . .
I said it with my prayer times I walked with head held high—
"Carnations are your flowers!" he said as he strode by.

Carnations and my first love! The years are gone a score,
And I recall his first name, and scarce an eyelash more;
And those were all the love words that either of us said
Perhaps he may be married—perhaps he may be dead.
And yet . . . to smell carnations, their spicy, heavy sweet
Perfuming all some sick room, or passing on the street . . .
Then still the school light flickers, and still the lancers play,
And still the girls hold breathless true while he goes his way,
And still my child heart quivers in that first ecstasy—
"Carnations are your flowers!" my first love said to me!

CLUBS AND SOCIETIES

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Convention Garden of 1914.

The Boston reports on all Convention preparations are most satisfactory and very promising, thanks to the well united efforts and labors of the Boston organizations which are hard at work to make the coming convention a great success.

The Convention Garden, as planned and prepared by our enthusiastic brothers of our horticultural and otherwise well-known and progressive Convention City, offers a splendid opportunity for the growers of all kinds of outdoor plants to display their goods and their skill. The garden is situated in one of the principal and most frequented parks of the city within easy walking distance of the Convention Hall. The general layout is very effective and the surroundings are most ideal. The grounds and their care are in the hands of most able experts, which, together with the favorable climatic conditions, assures successful culture of every plant that is sent there for exhibition or decorative purposes.

The Minneapolis Convention Garden was a success in every respect and has brought the aims and achievements of our profession and our organization nearer to the public than any other thing the S. A. F. has ever done, outside of its National Flower Shows. The people of Minneapolis feel deeply grateful towards our National Society for the beautiful garden they planted for them and for the lessons it has taught them. The education of the public in this practical manner has already made itself felt amongst local florists, which is proof that such educational exploitation is at the same time practical advertising. Our daily press insisted that the garden be continued in a similar way in the future and the display of 140,000 spring-flowering bulbs, which was at its best a few days ago, brought out the following editorial from the Minneapolis Tribune of May 21st:

OUR TULIP BEDS.

Is there in another city of the world a sight so brilliant as the garden beside our Minneapolis armory? There it stands, the property of the poorest child as well as the richest grown-up who passes by. In every such life it is playing a part today—warming the soul with the richness of splendid color, quickening in it the love of nature, lifting it above the dusty drab of the day's business. Nature is a bold artist. Were any mere man to splash colors from a paint box in such gorgeousness, to parallel scarlet with canary yellow, to mottle pink and orange in the same blossom, the eyes would close tightly with the hurt. But the very splendor of these gay colors in the tulip beds makes them magnificent. It is as though nature laughed at our futile attempts to rival her and yet gave to us opulently of her most brilliant treasures. It is not so long since such a public garden would have been found far from the center of any American city if found at all. Men and women thought themselves "practical" in those days; in reality they were only short-sighted. Today the dweller of the American city sees farther — and he makes his children richer than he was with a succession of clean and wholesome interests as the best possible offset to the day's temptations.

Our tulip beds are something more than a passing delight this spring. They are a brilliant certificate of our widening vision and our nearer approach to fullness of the spirt.

To what better aims can we devote our professional labors and skill than to the recognized motives outlined in that editorial, and of what could we justly be more proud and happy, than to feel that our endeavors and achievements are deserving of such favorable impressions, comments and recognition.

What has been started successfully last year can now be greatly enlarged upon in Boston, and a splendid beginning has been made. May I be accorded the privilege to ask every grower, florist and gardener to do his full share towards the success of our Boston Convention Garden, through active participation as an exhibitor. The Garden is all ready for planting, and all that is now required is the plants to fill it. We want you all to help us in this educational work, and we want you to share alike the happiness, the pride, the glory and other manifold benefits of this progressive undertaking. Planting time is here and passing fast, so write to James B. Shea, Chairman, Convention Garden, 33 Beacon street, Boston, Mass., for information and space. *Do it now!*

THEODORE WIRTH.
President, S. A. F. & O. H.

Convention Boston, August 18th, 19th, 20th, 1914.

Applications for space in the Trade Exhibition are coming in rapidly showing the great interest being manifested in this Convention which will be a record breaker. You can get choice in the matter of accommodation now not possible later.

Among those who have secured space are:

S. A. Anderson, Buffalo, N. Y.; H. Bayersdorfer & Co., Philadelphia, Pa.; Lemuel Ball Estate, Wissinoming, Phila., Pa.; Robert Craig Co., Philadelphia, Pa.; Arthur Cowee, Berlin, N. Y.; John Lewis Childs, Flowerfield, N. Y.; A. H. Hews & Co., North Cambridge, Mass.; Hitchings & Co., Elizabeth, N. J.; Jos. Heacock Co., Wyncote, Pa.; Jackson & Perkins Co., Newark, N. Y.; King Construction Co., No. Tonawanda, N. Y.; Kroeschell Brothers Co., Chicago, Ill.; Knight & Struck Co., New York, N. Y.; Lion & Co., New York, N. Y.; Lord & Burnham Co., New York, N. Y.; W. A. Manda, Inc., South Orange, N. J.; N. F. McCarthy & Co., Boston, Mass.; H. F. Michell & Co., Philadelphia, Pa.; F. R. Pierson Co., Tarrytown, N. Y.; J. A. Peterson, Cincinnati, O.; Pennock-Meehan Co., Philadelphia, Pa.; Reed & Keller, New York, N. Y.; Wm. Reiff, Jamaica Plains, Mass.; A. T. Stearns Lumber Co., Boston, Mass.; Schloss Brothers, New York, N. Y.; Vaughan's Seed Store, New York and Chicago; Jas. Vick's Sons, Rochester, N. Y.

JOHN YOUNG,
Supt., Trade Exhibition.

CHANGE IN EXHIBITION DATES.

It has been decided by the Committee on Prizes and Exhibitions of the Massachusetts Horticultural Society, on account of the backwardness of the season, to make the dates for the June exhibition as follows:

Rhododendron Show—June 13 and 14.

Peony Show—June 20 and 21.

Rose and Strawberry Show—June 27 and 28.

WM. P. RICH.

NURSERYMEN'S CONVENTION.

The nurseryman who fails to attend the thirty-ninth annual convention of the American Association of Nurserymen at Cleveland, June 24-26, will not only do himself an injustice but will exhibit a great lack of appreciation of the benefits he has derived from the work of the Association. The attendance is going to be large, but the accommodations at the Hollenden Hotel, the convention headquarters, will be ample, and there are very comfortable quarters for the meetings on the hotel premises. The committees are determined nothing shall be wanting to make this a notable occasion.

Perhaps the question of railroad transportation demands more attention just now. Therefore we strongly urge all to see their own local agent now as to routes, tourist, excursion and other rates. Demand the fullest information regarding each, for the routings and rates are so varied that almost any personal wish can be met. For instance, tickets will be on sale from all points in Texas to Pittsburgh, Pa., and return at a fare of $46.65 from Denison. Those tickets can be routed via Big Four from St. Louis to Cleveland, the holder having option of return trip from Cleveland, or of taking what might be termed a free trip from Cleveland to Pittsburgh and return. Also that any one from the southwestern territory desiring to go to Buffalo or New York can obtain a reasonable round trip ticket allowing stop-over at Cleveland. Then, too, eastern passengers will be glad to learn that the Cleveland & Buffalo Transit Co. offers attractive rates between Buffalo and the convention city. In our announcement circular we gave brief synopsis of rates in force from the Pacific Coast, and also from prominent eastern points.

The Badge Book will be ready to mail to members in sufficient time to be received before leaving home for the convention. Those whose membership renewals are not received in time to be admitted into the Badge Book should, however, lose no time in sending fee to the secretary, so that it may appear in the published Proceedings of the Association.

JOHN HALL, Sec'y.

FLORISTS' CLUB OF WASHINGTON.

The next regular meeting of the Florists' Club of Washington will be held on Tuesday evening next and it is said that those who fail to attend will miss an entertainment such as has never before been produced by the club. Just what the program will be will not be given out by the entertainment committee for all numbers are to be surprises to the members and guests. President Cooke has arranged for some good stunts, in connection with the regular business of the club. A promise has been made by one of the members of a lawn party and this will probably take place the latter part of the month. The present corps of officers are doing their utmost to make this a banner year in the history of the Club.

WOMAN'S AGRICULTURAL CONFERENCE AT AMBLER, PA.

A very remarkable gathering of men and women took place at the School of Horticulture for Women on May 16, when the Woman's National Agricultural and Horticultural Association held its first conference. Over 400 enthusiasts flocked to the spot to listen to the speakers of national note and see the workings of this school, the first of its kind in the country. The meeting was held in the large stone barn and the quaint hay-filled mows decked with dogwood, wild honeysuckle and lilacs made a fitting background for the earnest, practical speakers, while the barn swallows and pigeons added their low accompaniment.

The meeting was opened by Mrs. H. B. Fullerton, a vice-president of the Association and Chairman of the Conference Committee. She said:

"There is but one cloud on our beautiful day, and that is the illness of our President, Mrs. Francis King, of Alma, Michigan. She sends greetings to you all and trusts the day will prove to you all she and her co-workers have striven so hard to make it. There are many societies and clubs in this country devoted to the interest and betterment of gardens, both flower and vegetable, but this association of ours has a larger and wider scope. It is formed with the sole purpose of helping women help themselves earn their living in God's sweet, beautiful, ever-changing out-of-doors.

"This somewhat new profession holds out many advantages over so-called clerical and office work, for it combines home and possessions with remunerative labor, calls forth the mother instinct and demands common sense; incidentally it will give to our nation a race of hardier, truer, better men and women.

"The Association is national and although it is but a few months old, it counts its members in twenty states. Anything that will further agricultural education for women, that will help to bring land owner and land worker in touch, that may bring producer and consumer into closer relation, that will spread abroad the knowledge of the vast army of women already intrenched in the agricultural profession, the Association intends to do."

Miss Hilda Loines then read Mrs. King's paper on the true role of the horticultural society, which was a translation from the French of Jacques Delafon. This author's idea of making the societies truly practical and spreading good reading matter among the people appealed very strongly to the audience. The next speaker was Walter P. Stokes of Philadelphia, whose topic "Seed Growing for Women" was one looked forward to with the keenest of interest; he said that seed growing offers a fine field of work for women and in Europe nearly all the work on the vast seed farms is done by women, though they do not own them. Women being more careful about details than men stand a greater show of success.

Mrs. J. Willis Martin, President of the Garden Club of America, in speaking of the co-operation of her club and the National Association, said that we can both do much to help beautify our country by working together for civic betterment, and we can help raise the standards of American gardens by having color charts as a guide to planting. A huge sigh of disappointment escaped from the audience when the chairman announced that Mr. David Fairchild of the U. S. Department of Agriculture could not be present. Mr. Fairchild's letter, however, left a feeling of his earnest desire to co-operate with the Association and his personal regret that he could not attend. He sent 100 udo plants to each one of which was attached a very attractive department bulletin fully illustrated with half tones. These were distributed among the audience as far as they would go and Mr. Fairchild further assured us "if anyone wants more plants they can obtain them by writing to me."

SOME OF THE SPEAKERS AND OFFICERS WOMAN'S NATIONAL AGRICULTURAL AND HORTICULTURAL ASSOCIATION CONFERENCE

Standing, Left to Right: Miss Martha Van Rensselaer, Mr. Walter P. Stokes, Miss Jane B. Haines, Mrs. B. Hammond Tracy, Mr. Geo. T. Powell.
Seated, Left to Right: Miss Hilda Loines, Mrs. S. H. Vollmer, Miss Jessie S. Morgan, Mrs. H. B. Fullerton, Miss Louisa G. Davis.

The meeting adjourned for an hour and a half recess. Luncheon was served in the farm home of the school, and the visitors had an opportunity to inspect the greenhouses, seed beds, nursery rows, berry fields, orchards, vineyards, carpenter shop, poultry houses and apiaries, where the twenty-six women students are doing such fine practical work. At 2 o'clock the meeting was resumed, a pleasant interchange of telegrams between the president and the Conference being read, when Geo. T. Powell, President of the Agricultural Experts Association of New York City, spoke on "Small Fruit Culture for Women." He emphasized the fact that women have always been and always will be successful farmers, and fruit growing is especially adapted to them because so much can be done on a small acreage. In speaking of strawberries he said there were three essentials—growing a variety adapted to your soil, a variety of high quality, and the command of sufficient labor to harvest the crop.

Mrs. H. B. Fullerton at the Speakers' Stand in the Barn in Front of the Hay Mow.

Miss Morgan, Director of the School, and One of the Students, Seated.

In introducing Miss Martha Van Rensselaer, of Cornell University, the chairman said: "Too many times women become so enthused with the idea of the out-door work, they forget we have to eat three times a day. Miss Van Rensselaer is here to keep our feet on the earth, and point the way to better farm housework and its needs."

Miss Van Rensselaer said that many letters come to her office asking for a home-making woman to join in partnership with a farming woman, but she cannot find them. This association should be able to do much to help find these women and the colleges stand ready to give them the instruction they need in the short courses. Housework must be brought up to the recognized standard of economic efficiency that stenography and bookkeeping have attained, and this must be done through women themselves making house work an art and not a menial, enslaving position.

W. P. Hartman, Chief of the Bureau of Markets and Information of Pomona Grange of Suffolk County, New York, spoke next on the object of this bureau and the work it had already accomplished. Prof. David E. Warner of State College, Pa., spoke on "Broilers for Profit." In introducing Mr. Bertrand H. Farr, of Wyncote, Pa., the iris expert, the c[illegible] like a child in saving the best for the last, for Mr. Farr's topic, "Raising Rainbows" held a great charm and allurement.

Mr. Farr's address was a beautiful word picture which we wish we could reproduce here. The whole day was worth a very long trip, and is a harbinger of conferences to follow.

SOUTHAMPTON HORTICULTURAL SOCIETY.

At the last meeting of the Southampton, N. Y., Horticultural Society, the soliciting committee reported fine success and the schedules will be ready in a few days. The prizes offered this year amount to nearly $750.00 besides several silver cups and other special prizes. The lunch and dinner table competition is open only to the ladies of the cottage colony. All other competition is open to all. Among the special prizes each year is one of $20.00 given by Mr. Samuel Parrish for filling and caring for ten vases on his art museum grounds. These are divided into two classes with first, second and third prizes in each class. They are drawn by number at the May meeting and must be filled by June 1st. They are inspected three times by a special committee appointed from the residents of the village, the last inspection on the first day of the exhibition when the prizes are awarded. The judges of vases this year are:—David J. Gilmartin, William Malcom and Ormiston C. Gardner. There is a prize for vegetables grown and exhibited by boys of the Union School. Mr. Parrish's art museum and grounds are open to the public and consequently the vases are viewed by many of the people of the village and add to the beauty of the park grounds, as well as create an interest in garden adornment generally.

NEW YORK FLOWER SHOW, 1915.

The Flower Show Committee held a meeting at the Grand Central Palace on Thursday, May 21st. The presidents of the different local horticultural societies had been invited to a conference to assist in the preparation of the schedule, especially as to the classes provided for the private growers.

The meeting was largely attended and the schedule was prepared as far as possible and will be completed at the next meeting, Tuesday, June 2nd, and they will be distributed immediately. The local societies are requested to have their representatives present at this meeting.

The Flower Show Committee is much pleased with the progress made and the great interest that is being taken in the coming exhibition. Several special prizes have already been offered. Contracts in the Trade Section for almost $3,000.00 worth of space have already been signed up and the guarantee list now amounts to over $3,000.00. The retailers have practically all agreed to support this exhibition. Secretary John Young will be pleased to furnish any information regarding same.

JOHN YOUNG, Sec'y.
53 W. 28 St., New York.

DATE OF PEONY MEETING AT CHICAGO.

A continuation of the present hot weather at Chicago where the annual exhibition of the American Peony Society has been scheduled for June 12th and 13th, may render it necessary to advance the date for the show several days or even a week. The dates will be fixed definitely June 1st and sent to all the weekly trade papers in time for publication in next week's issue.

M. BARKER, Sec'y Pro. Tem.

CLUB AND SOCIETY NOTES

The Gardeners' and Florists' Association of Holyoke, Mass., will hold a picnic sometime in the early part of July.

The St. Louis County Growers' Association will hold its regular monthly session on next Wednesday, June 4th. President Vennemann has returned home from his bridal trip and will preside. Some entertaining is looked for and a large turnout is probable.

The St. Louis Retail Florists' Association held a poorly attended meeting at the Washington Hotel on Monday, May 18, and it was decided that during the months of June, July and August the association hold no regular meeting unless specially called by the president.

Secretary Beneke, of the St. Louis Florist Club, says that the meeting on June 11th will be a most important one, as State Vice-President Robt. J. Windler has made a call for members of the S. A. F. in eastern Missouri to meet with the Florist Club on that date. The trustees are preparing to entertain all the visiting S. A. F. members.

The annual outing of the New York and New Jersey Association of Plant Growers will be held at the Hotel Kittatinny, Delaware Water Gap, Pa., on June 23. The Committee has this year arranged for a three day outing. Members and friends will leave on the Delaware, Lackawanna & Western Railroad from Hoboken on the "Lackawanna Limited" at 10.15 A. M. arriving at the "Gap" at 12.03 noon. Returning the party will leave the "Gap" at 5.25 P. M., June 25, arriving at New York at 7.30 P. M. Special Cars for the exclusive use of the party will be attached to both trains.

At the monthly meeting of the Tarrytown Horticultural Society, May 20, a beautiful display of hardy shrubs and herbaceous flowers was staged, 1st prize going to D. G. Reid, supt. A. Golding, and 2nd to Miss B. Potter, supt. G. Wittlinger. A cultural certificate was awarded to D. G. Reid, gard. T. Morris, for vase of Mrs. Hugh Dickson sweet peas, and one to W. B. Thompson, supt. S. R. Candler, for Cattleya gigas, and a certificate of merit for a sport of Marguerite Mrs. Sander. C. Wilson received honorable mention for pink snapdragons and a vote of thanks was extended to Mrs. A. Golding for wild flowers. Owing to the late spring the date of the June show will not be decided on until June 5. Refreshments will be served at the next meeting. THOMAS A. LEE.

An unusually effective and brilliant display of tulips, lilacs, primroses, and dogwood was exhibited by W. C. Mason, Friday evening, May 22, at the meeting of the Conn. Horticultural Society. Walter E. Cook representing Stumpp & Walter Co., who was a visitor, stated that the exhibit of tulips was an unusually fine one, also comparing conditions at Hartford with those at Lenox and Trenton. The chair named Mr. Cook, George B. Baker and George T. Whitten judges, and they awarded the exhibit a first-class certificate. George H. Hollister, superintendent of Keeney Park, spoke concerning the elm-leaf beetle. He said that this insect spent the winter in all kinds of dry places, such as belfries and attics, where as long as it kept dry it remained uninjured by very low temperatures. He recommended the use of arsenate of lead at the rate of about three pounds to fifty gallons of water. ALFRED DIXON, Secy.

NEMATODES AND CLUB FOOT.

Editor HORTICULTURE:

I have been getting letters recently from peony growers relative to nodules formed by nematodes on peony roots. Some are apprehensive that they are identified with the French club foot disease, which is fatal. Now the two are no more related than the chicken pox and the deadly typhoid. Peonies with the club foot have no fibrous roots. They can neither grow nor bloom. Specimens have been sent to different experiment stations, and about every one gives a different answer. One professor received specimens with harmless modules on them and said "Destroy all the roots and disinfect the ground." Bosh! I have raised peonies over thirty years, and for the last sixteen years have made a specialty of them. This professor can give theory and jump at conclusions, but I give cold facts. One year, in rich ground, I saw some of my peonies were making a very robust growth and the leaves were bright and healthy. I had occasion to dig them up and found they were overwhelmed with nematode modules. On close examination subsequently I found Marechal Valliant, Gandiflora Rosea, one of the most floriferous of all, and Andre Laurias were almost always in this condition, and I made up my mind from the vigor of the plants that these bacteria were doing for the peony what the same or kindred bacteria were doing for alfalfa. In all my experience and careful researches I never knew any injury from them. Of course, for the looks, in selling we strip them off. Now these are bare, cold facts. There are other causes for deterioration which perhaps have been wrongly charged to these. One is planting on the same ground; another is leaving the roots too long without dividing.

The imported club foot French disease is incurable. I have planted them in slacked lime to no purpose. Then one fall I got a washtubful and poured in strong lye and let them soak a week. I effectually cured them all; the disease could not possibly survive, but I killed every root. I give this sure cure. There is no patent on it and I know it will work.

So let me say to peony growers don't get things mixed. Some time ago I sent both kinds of roots to Prof. Bessey at Miami, Florida, and he said he found *no nematodes whatever* on the club-footed ones, and that the two were entirely distinct.

C. S. HARRISON.
York, Nebr.

The governor of Massachusetts has signed the bill appropriating $210,000 to the college at Amherst for the construction of an agricultural building. It will have an assembly hall that will accommodate 800 to 1000 men and will relieve the college, by a year from next fall, from the crowded conditions that exist in the present chapel.

HYDRANGEAS

EXTRA LARGE PLANTS IN TUBS AND BARRELS FOR SUMMER FLOWERING

We make a specialty of hydrangeas, and have a very large stock of plants which have been kept backward and which are now just beginning to set buds. They are in fine shape for shipment, and will bloom from June to August. Plants are heavily budded, and are exceptionally good value.

We have always made a specialty of large hydrangeas for summer-blooming, and we never had such a fine stock as we have at this time. We have a very large stock, especially of the plants in barrels, and can supply carload lots.

Fine plants in tubs.....$2.00 and $3.00 each.
Extra fine specimens in half-barrels.....$5.00, $7.50 and $10.00 each.

F. R. PIERSON COMPANY
TARRYTOWN-ON-HUDSON, NEW YORK

A TARRYTOWN SHRINE.

We predict that it will become a veritable shrine for the florist fraternity from all over the country—that imposing and altogether unique flower building which F. R. Pierson has under construction and which is now approaching completion. Its fine proportions, classic architecture and pergola approach command attention and make it easily the most conspicuous business structure in Tarrytown and as a floral establishment, nothing in the country can compare with it in its every appurtenance and detail. The frame is of steel throughout, the exterior of a sparkling artificial stone, the lofty interior of Caen stone, the window and door frames of copper, the floors of tile wainscoting of marble and there is a show case which cost $2500 to construct. In short, every detail has been worked out with the purpose of making it the best conceivable. In the near future we hope to be able to show an illustration of this building and give some further details.

DEFENDING THE ENGLISH SPARROW.

The Women's Welfare Club of Marquette, Mich., has adopted a memorial, addressed to the Legislature, asking the repeal of the law which provides for the payment of a bounty of two cents a head on English sparrows during the months of December, January and February. Women's clubs, suffrage associations, D. A. R. chapters and various other organizations will be requested to cooperate in the movement.

The memorial recites the belief of the club that "the damage done by the English sparrow—either by his alleged untidy habits or by his belligerence toward other birds—has been greatly exaggerated, and his good qualities as an insect destroyer and weed eater have been underrated.

The action of the Women's Welfare Club followed closely on a visit to the city of J. H. McGillivary, Deputy State Forestry Warden. Mr. McGillivary consulted with a committee of the club and addressed a large assemblage at the Northern State Normal School.

It is his opinion that the law allowing bounty for English sparrows is a detriment to useful bird life and to the country.

In the State of Michigan there are at least 24 kinds of sparrows other than the English sparrow. The average boy is unable to distinguish the different species, and as a result all suffer alike.

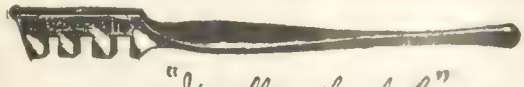
THE USE OF FORMALDEHYDE.

Review of Bulletins 369 and 370, New York Agricultural Experiment Station.

Formaldehyde, in liquid or gaseous form, has been recommended and much used as a substitute for corrosive sublimate in disinfecting potato tubers used for seed. The gas treatment is very convenient and has until very recently been considered both safe and effective; but in treating a lot of tubers at the Station at Geneva in 1912, serious injury was caused by the gas. Subsequently, many tests were made to ascertain the reason for this unexpected trouble, which was finally found to be due to the use of too large a disinfection room for the amount of tubers treated. The gas collects on the surface of the potatoes by absorption; and if the amount in the room be out of proportion to the surface of the potatoes, the absorbed gas becomes so powerful that it destroys the tissues of the tuber, particularly about the eyes and lenticels.

The tests also gave opportunity to study the effectiveness of the gas on the fungus Rhizoctonia, which causes several potato troubles; and it was found that the treatment is not as reliable as had been supposed.



The authors advise the gas treatment only where it is impracticable to use either liquid formaldehyde solution or corrosive sublimate. The formaldehyde solution may be used where the potatoes are infected with scab only; but if Rhizoctonia is present the corrosive sublimate should be employed. Where the gas treatment must be used the disinfection chamber should not be so large that it contains less than 10 lbs. of potatoes to the cubic foot.

The bulletins will be sent free to those who request them.

Montreal—A press dispatch states that because he is an American citizen, T. McG. Black of Pittsburgh, park superintendent of this city, has been reduced in office to be temporary assistant park superintendent by Mayor Mederic Martin and Dr. Gadbois, a French Canadian, was appointed superintendent in his place.

"I will not have a foreigner drawing a salary of $2500 a year in Montreal," said the Mayor, when told that Mr. Black had been recommended for the post by influential citizens. "English, Scottish, Irish or Canadian, but not foreigners," he insisted.

YOUNG ROSE STOCK

GRAFTED AND OWN ROOT.

Our Roses are famous all over America, and our young stock of Roses is in wide demand among those who wish to bench the finest, strongest, healthiest plants in the market. We never have had finer young stock than this season. We offer as follows:

GRAFTED STOCK.

	Per 100	Per 1000
Killarney, 2½-inch	$12.00	$100.00
White Killarney, 2½-inch	12.00	100.00
Milady, 2½-inch	12.00	100.00
Killarney Queen, 2½-inch	12.00	100.00
Mrs. Aaron Ward, 2½-inch	12.00	100.00
Mrs. Taft (Bulgarie or Antoine Rivoire), 2½-inch	12.00	100.00
Richmond, 2½-inch	12.00	100.00
Milady, 3½-inch	15.00	135.00
Mrs. Geo. Shawyer, 2½-inch	12.00	100.00
Killarney Brilliant, 2½-inch	30.00	.....
Mrs. Geo. Shawyer, 3½-inch	15.00	135.00
Mrs. Taft (Bulgarie), 3½-inch	15.00	135.00
Killarney Queen, 3½-inch	15.00	135.00

OWN ROOT STOCK.

Killarney, 2½-inch	6.00	55.00
Mrs. Taft (Bulgarie), 2½-inch	6.00	55.00
Mrs. Aaron Ward, 2½-inch	6.00	55.00
Milady, 2½-inch	6.00	55.00
Sunburst, 2½-inch	7.50	70.00
Killarney, 3½-inch	8.50	75.00
Mrs. Ward, 3½-inch	8.50	75.00
Mrs. Geo. Shawyer, 3½-inch	8.50	75.00
Milady, 3½-inch	8.50	75.00
Richmond, 3½-inch	7.50	65.00
American Beauty, 2-inch	7.50	65.00

2,500 or more at $62.50 per 1000.

CHRYSANTHEMUMS

ROOTED CUTTINGS, 2½-INCH.

SMITH'S ADVANCE AND CHRYSOLORA

We do an immense business in Rooted Cuttings and 2½-inch pot Mums because the stock is strong and healthy and because our list of varieties includes only the bread-winners—the tried and true varieties. We list only the varieties that have proved money-makers for us in our cut flower business.

Rooted Cuttings ..... $2.50 per 100; $22.00 per 1000
2½-inch pots ..... 3.00 per 100; 27.00 per 1000

WHITE—Smith's Advance, October Frost, Lynnwood Hall, Timothy Eaton, W. H. Chadwick, Elise Papworth.

YELLOW—Chrysolora, Crocus, Bonnaffon.

PINK—McNiece, Enguehard, Maud Dean, R. E. Leoben, Wells' Late Pink. Per 100
Alice Salomon, white, rooted cuttings ..... $ 7.00
Chieftain, pink, rooted cuttings 12.00
Golden Salomon, yellow, rooted cuttings 20.00

POMPONS.

Rooted cuttings ..... $3.00 per 100
2½-inch pots ..... 4.00 per 100

WHITE—Waco, Kemmitt.
YELLOW—Krut, Skibo, Madge, Baby, Big Baby, Quinola.
BRONZE—Mme. Laporte, Mrs. Beu.

NEW SINGLES.

MENSA—This is the splendid white that attracted so much attention at the Fall Flower Shows, and is considered the best single white on the market. Rooted Cuttings, $8.00 per 100.

PAULINE—Dark single bronze.. This variety sported with us, and is easily the best single bronze for commercial use. Rooted Cuttings, $8.00 per 100.

PARKINSON, single yellow.
Dark Single Pink.

POEHLMANN BROS. CO.

Box 127 MORTON GROVE, ILL.

EMULATION.

Springfield is ambitious to possess a rose garden that will rival and even surpass the celebrated garden at Elizabeth park in this city. This is a praiseworthy ambition. Rivalry in matters of this kind is bound to prove more helpful than harmful, and the word from Springfield that it is to become a competitor is a forewarning of which due notice may be taken. Springfield estimates that seven years will be sufficient to develop a mature garden in full beauty. Meanwhile, Hartford's garden, barring unforeseen happenings, will not remain at a standstill, but, instead, become seven years better. The lead is a long one, and the task of keeping it will not be easy.—*Hartford (Conn.) Times.*

Pittsburg has adopted the dandelion as the "flower" symbolic of Fathers' day. This looks as though it was intended there to make light of Fathers' day. Nothing could have been named that grows out of the ground that father detests as heartily as he does the dandelion. It has ruined more lawns and more tempers than any other pest that ever afflicted humanity.—*Rochester Democrat and Chronicle.*

ORCHIDS FRESHLY IMPORTED

We have unpacked the following in fine condition. **CATTLEYAS: Percivalliana, Gaskelliana, speciosissima. DENDROBIUMS: Formosum, Wardianum, nobile, densiflorum, Schuitzii. VANDAS: Coerulea, Batemannii, Luzonica, Imschootiana. PHALAENOPSIS: amabilis, Schilleriana. Spathoglottis plicata.**

GARDENERS.

Editor Horticulture:

With your permission I would like as a professional gardener, to "butt in" upon the correspondence in connection with gardeners' salaries especially with regard to the paragraph which appears in your issue of May 16, under the head of Philadelphia Notes; also to add some thoughts upon the professional situation generally.

As a member of the executive board of the N. A. G., I venture to think that no one upon that board would for a moment entertain any movement having for its object the degradation of the Association into a labor organization. Nothing in the present day is more detestable, more devoid of every right principle and more degrading to those connected with it, than trade unionism. It is a movement of tyranny unexampled in the world's history, a tyranny which thousands of working men—using the term in its popular sense—would be only too glad to throw off.

A minimum wage has little in its favor in any case, and the idea is certainly out of place when applied to a profession like gardening where it is not the amount of work but knowledge and skill in directing others which make for efficiency. The men calling themselves gardeners who as your correspondent states are only receiving fifty dollars a month are no doubt getting all, and probably much more, than they are worth as such. And there is also no doubt that were these fifty dollar jobs filled by men thoroughly proficient in all branches of their profession at double or treble the salary, their employers would find themselves actually cash in pocket, to say nothing of results. But as long as there are some employers who are ignorant and short-sighted enough to think that a low-priced man, however incompetent, is the cheapest, so long will the fifty-dollar gardeners exist. In this connection a good deal of the fault lies with some of the seedsmen. Any man who has ever bought packets of seed of some firms can get recommended for a position without inquiry into his antecedents. This is one of the places where the employment bureau of the N. A. G. comes in. Before a man can get upon its books a very searching and exhaustive investigation is made into his ability and character, not by people who are looking for the man's trade when he gets a job, but with the one idea only of seeing that the man is thoroughly competent to fill the vacant position.

I have, however, very strong reasons for believing that the bulk of private estate owners take a different stand upon the matter than one of your correspondents appears to think. They are not, as a whole, congratulating themselves that they can get men at whatever price they choose to offer, but on the contrary are complaining of the absolute dearth of first-class professional men with executive and business abilities and a knowledge of the scientific principles of their profession, expert in all branches of estate management. It is, I believe, a fact that men of this latter class have little, if any, trouble in getting positions at a reasonably good salary.

Recently a young man wrote to me stating that he was looking for a position to take charge of a private estate but all he could advance in his own favor was that he had given satisfaction in the only position he had held in this country, which was three years in a private greenhouse. This very prevalent and narrow idea of the requirements of an estate manager is a great blot upon the profession and it is standing in the way of its taking the position to which it should be entitled. Good florists can be easily obtained by the hundred, but among them it would be difficult to find five per cent. with a thorough knowledge of hardy plants, shrubs and trees.

Years ago, not after all so very many, wealthy people were contented with a mansion upon, for instance, Fifth Avenue, and their only conception of flowers was what they bought at the florists. When the idea of a country estate in addition began to materialize, the production of these same flowers upon their own place was about as far as their knowledge permitted them to go, supplemented by a few beds of things like geraniums stuck about their lawns. As in those days professional gardeners in the real and widest sense were almost unobtainable in this country, men trained in florists' establishments were the only resource. Today the better education of estate owners has given them wider ideas causing them to require a garden in its real sense. Fortunately for artistic gardening the "bedding out" system is dying out and people are at last becoming educated to the beauties of old-fashioned flowers—as hardy perennials are sometimes called—used in a natural manner, and which give variety both of form and color as well as abundance of flowers for cutting during the greater part of the year, without the expenditure of an ounce of coal.

While ideas of gardening have advanced to a far higher and more artistic level of late years it is to be regretted that the profession as a whole has not kept pace with the advancement. A member of one of the largest firms in the country supplying private estates with seeds and plants said a few months ago that there is a positive dearth of gardeners who are well up in hardy plants and shrubbery, and that he knew many estate owners who were much discouraged in consequence. It is astonishing that so many of the so-called landscape architects (a class which has recently sprung up like mushrooms and judging from their work, their existence will be quite as ephemeral) are frequently quite as ignorant. Recently the writer had the opportunity of seeing plans for laying out two estates in neither of which was any provision made for hardy perennials. A few years ago an estate owner, who was sensible enough not to allow his place to be under the bedding out system, after repeated efforts to get a reasonable amount of attention to be given to hardy flowers, pulled down practically the whole of his glass as he would rather be without flowers in the winter than in the summer. After all it does not require much glass to furnish sufficient cut flowers for an odinary-sized dwelling house from November to April.

Returning to our muttons, it appears to me unreasonable to expect an estate owner to pay a large salary to a one-sided man however expert he may be in one thing, especially if the employer wants more of another which the manager understands little or nothing about. Of course one is not blind to the fact there are first-class all-round men who do not receive the appreciation they should. To the average professional man in the real sense of the term, his work is a labor of love to which he gives his entire self. Many men are discouraged and prevented putting forth their best by the want of encouragement on the part of their employers. A man goes to his work day by day with renewed vigor and energy if he feels that he is appreciated; that his constant striving after more and better results are recognized and that his position as a professional man is acknowledged. This kind of thing goes much further than an increase in salary. No amount of salary will supply the want of appreciation especially when coupled with a policy of petty pinpricks and a constant inculcation of the idea that he is nothing more than a servant.

If the profession wishes to obtain that full and complete recognition to which its requirements and knowledge entitles it, still further steps must be taken to place itself in the professional class by acknowledging the value and necessity of scientific attainments. Men are graduating every year from agricultural colleges who on that account consider themselves fitted for the position of private estate managers. Employers, too, are in many cases under the impression that a college man is necessarily better than one without college education, and so he is, if all other things are equal, but they are not so. The college man lacks as a rule, practical experience, and generally the man with long practical experience lacks scientific knowledge. Although plenty of instances can be found where college men have fallen down when they have attempted to run either a farm or garden this has not been because of, but in spite of, their college education. To produce the best results practice must be combined with science so that a man may have a knowledge of the why and how of what he does. A man with practical experience who will take the trouble to acquire a working knowledge of the scientific principles of his profession can do so with greater ease and apply them with greater benefit to his practise than a man starting to learn these principles without any practical knowledge whatever. A practical man is capable, or he should be, which a college student is not, of distinguishing between the facts of science and the theories of scientific men; the latter are frequently wrong, the former never. Whatever value the experienced gardener may himself place upon the knowledge and skill gained through years of study and practical work he must make up his mind that scientific education has come to stay and act accordingly.

In Britain the profession has also some grounds for complaint in connection with the existence of ignorant and incompetent men calling themselves gardeners, (although not to the extent as here, because there employers have more horticultural knowledge themselves) who sometimes manage to get positions upon the smaller places. The profession there are consequently welcoming the initiation by The Royal Horticultural Society of England of a scheme whereby a National Diploma in Horticulture may be gained by those

who pass the Preliminary and Final Examinations which will be required. The examination will be practical, viva voce and written. The practical part will be held in suitable gardens at different centers and entrants will be required to carry out under the examiners' eyes any work which may be required of them. Employers in that country are encouraging, and in many cases expecting, their gardeners to try for this diploma, and no doubt in a few years' time a man seeking a position as gardener upon any estate of consequence will, all other things equal, stand a very poor chance unless he holds this diploma.

As our much-respected secretary, Mr. Ebel, said, the National Association is not directly concerned with the question of salaries. Its aim is rather at the general uplift of the profession gardener and estate superintendent, and the recognition by employers of the profession as such; believing that the question of salaries will adjust itself; in other words a good man will have no trouble in getting a good salary.

It is no doubt a truism that there are black sheep in every flock, both amongst employers and employed. One of the duties of the association is to see that its members are all white. Further the professional ability of its members should be unquestionable, and to this end it is to be hoped that the Association will initiate a movement such as that which has come to fruition in the old country so as to enable members of the profession to obtain a diploma under such safeguards as will procure its recognition as evidence that its holder possesses ability of a far higher nature than a pass certificate from a college.

On the other hand those who think that the N. A. G. should become a trades union had better start one as a separate organization. They will then be able to recruit to themselves, like other unions, all the least competent of the profession and draw out all the black sheep, and thus save the trouble of sorting.

ARTHUR SMITH.

SUMMING IT UP.

Mr. Ebel now admits that educating the employer up to the point where he will pay his gardener a decent salary is not "a fallacy" as he at first claimed. In fact, he claims that that very thing is now being done. Glory be. That is what he started the controversy about, so all's well. The other points are mostly personal and of no importance. It may be mentioned, however, that the writer never said anything about unions, trade or otherwise, except to answer Mr. Ebel's question: "Had he ever heard of a profession being successfully unionized?" Anyone who has read Aristotle knows that that form of government is best which is best administered. If the gardeners' society is well administered it will be a good trade union. And if it takes a leaf from the lawyers' trade union it will not admit anyone to its bar without passing an examination and it will reserve the right to disbar for cause. There are "kail gardeners" just as well as "shyster lawyers."

G. C. WATSON.

THE GLAD HAND

GLADIOLI—GLADIOLUS—GLADIOLUSES

Which is right? The only way to find out is to plant some of our stock and if planted now or even later, they will bloom when the earlier planted stock is passed; which means higher prices for the flowers and is good business.

We offer the following varieties less 5 per cent if cash accompanies the order:

Boddington's Quality Gladioli

AMERICA (Our Specialty). This beautiful new Gladiolus has produced as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh-pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet."

Selected Bulbs, 2 to 2½ inches.....$1.50 per 100, $12.00 per 1000
1st size, 1½ to 2 inches..... 1.25 per 100, 10.00 per 1000
2nd size, 1¼ to 1½ inches..... 1.00 per 100, 9.00 per 1000

	100	1000
HOLLANDIA (The Pink Brenchleyensis). Flowers well arranged on a spike which attains a height of about 4 feet. Often as many as 30 blooms of a charming pink shade tinted yellow are open at one time. First size bulbs.....	$1.75	$15.00

PEACE. The flowers are large, of good form and correctly placed on a heavy, straight spike. They are a beautiful white, with a pale lilac feathering on the inferior petals. "Peace" is not an early bloomer, but rather medium to late, and planted at the same time with other stock, it is in its best condition when most other varieties have passed blooming. Per doz., $1.25; per 100, $9.00; per 1000, $85.00.

Grand Novelty Orchid-flowered Gladiolus

	Doz.	100
MRS. FRANK PENDLETON, JR. Order early to procure Mrs. Frank Pendleton, Jr. Awarded First-Class Certificate of Merit by the Massachusetts Horticultural Society of Boston and by the American Gladiolus Society at Baltimore, 1911. Its color is the most exquisite salmon-pink with a very conspicuous blood-red blotch in the throat on the lower petals. Per doz., $5.00; per 100, $40.00.		
PINK AUGUSTA. Color a lovely soft pink. This variety is especially suitable for forcing under glass, for which purpose it is especially recommended. Per doz., 35c.; per 100, $2.50; per 1000, $20.00.		
I. S. HENDRICKSON. A beautiful and irregular mottling of white and bright, deep pink; in some the pink and in others the white predominates. Flowers and spikes very large and fine.....	$.75	$4.75
MADAM MONNERET. Delicate rose; late bloomer..... Per 1000, $26.75..	.50	2.75
BRENCHLEYENSIS (true). Fiery scarlet.		
Top roots, XXX, 2 and 2½ inches.....	1.50	14.00
First size bulbs, XX, 1¾ to 2 inches.....	1.25	12.00
Second size, X, 1 to 1¾ inches.....	1.25	10.00
BODDINGTON'S WHITE AND LIGHT.		
First size, XX, 1¼ to 1½ inches.....	1.25	12.00
1900. Nothing finer for florists' use. Flower is of a rich shade of red, with very prominent white spots on three lower petals.....	1.75	15.00
MRS. FRANCIS KING. Color of flower is a light scarlet of a pleasing shade.		
First size, XX, 1¼ to 1½ inches.....	1.75	16.00
PRINCEPS. Color rich crimson, with broad white blotches across the lower petals. Flowers can be grown to nearly 8 inches in diameter under stimulating culture.....	3.75	35.00
GROFF'S HYBRIDS (Originator's strain).		
First size, X, very fine mixture.....	1.00	9.00
SHAKESPEARE. White and rose.....	4.25	40.00
AMERICAN HYBRIDS. XX. A mixture of the choicest varieties of Gladiolus in equal proportion; very fine.....	1.00	9.00
AMERICAN HYBRIDS. X. Very fine mixture.....	.85	7.50
STRIPED AND VARIEGATED.....	2.25	21.50
PINK AND ROSE SHADES.....	1.75	16.00
ORANGE AND YELLOW SHADES.....	3.50	32.00
SCARLET AND RED SHADES.....	1.50	14.00
LEMOINE'S HYBRIDS.....	1.50	12.00
CHILDSII. First quality, mixed, dark shades.....	1.75	16.00
Good quality, mixed; light shades.....	2.50	22.50

For Large Quantities of Gladioli, write for Special Prices. For a more general list see our retail catalogue, mailed free.

ARTHUR T. BODDINGTON

SEEDSMAN

342 W. 14th Street, NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

American Seed Trade Association.

Notice is hereby given of the 32nd Annual Convention, which is to be held at Washington, D. C., June 23, 24, 25, 1914, with headquarters at The Raleigh, corner of Twelfth and Pennsylvania Avenue.

Special rates on the European plan have been granted as follows:

Single rooms, without bath $2.00, with bath $3.00 per day and upward.
Double rooms, without bath $3.00, with bath $4.00 per day and upward.

The National Capital of itself, should attract a large attendance, but there are two subjects on the program that should especially appeal to all members who are concerned about the future of the Seed Trade, that of our counsel on "The Use of the Disclaimer" and of Mr. Bruggerhof on "The Cental System." These two subjects are apropos because of the noticeable trend of legislation along these lines and it is therefore hoped that there will be a full attendance to fully discuss these matters. Program is as follows:

Opening Sessions, June 23, 10 o'clock A. M.

Selling Seeds at Wholesale—Salesmen—Catalogues—Surplus Lists and Circulars. Watson S. Woodruff, Orange, Conn.

Printer's Ink Advertising — Farm Journals—General Advertising. A. E. McKenzie, Brandon, Man.

Trial Grounds and Their Advantages to Seedsmen. Dr. W. W. Tracy, Washington, D. C.

The Cental System of Selling Seeds and Its Advantages. F. W. Bruggerhof, New York.

The Proper Use of the Disclaimer. Curtis Nye Smith, Boston, Mass.

Overhead Costs System. Max Fischer, Washington, D. C.

Social Features—Tuesday Evening, Annual Banquet. Plans are being made for a trip to Mount Vernon, Arlington and the City of Washington and also for a Reception to the Ladies.

C. E. KENDEL, Secy.

J. Bolgiano & Son of Baltimore, have established in connection with their seed business a Free Employment Department under the management of Claude B. Ramsay. Several hundred people have already found profitable and healthful employment through this department with no cost either to the employer or the employe. Mr. Ramsay stated he finds among the applicants mostly men who have been born and reared on the farm; but, from tales of the wealth that could so easily be acquired in the big cities, they had been lured from a good livelihood in the country to the city in search of some of the so easily gotten wealth. With the majority, it takes but a very limited time for them to find out their mistakes and they are more than glad to have another opportunity in the country. Every applicant's past record is carefully searched and only those who are found to be honest, reliable, sober, capable men of good character are given consideration. With the employer it has been found to be a mighty great help, as by simply applying to this Department, they are furnished with help that can be relied upon and are, thereby, relieved of the trouble, worry and annoyance occasioned in order to get help of this character.

GOVERNMENT ACQUIRES PISGAH FOREST.

The beautiful mountain estate of the late George W. Vanderbilt crowning the Alleghany mountains in western North Carolina, 86,700 acres in extent, will soon become a part of the national forest reserve. The national forest reservation commission approved at Washington Thursday the purchase of the vast Pisgah forest tract at an average price of $5 an acre, which brings the total cost to $433,500, a considerable discount from the figure at which Mr. Vanderbilt was willing to dispose of the property, even with the federal government for his purchaser. The tract includes portions of Transylvania, Henderson, Buncombe and Hayward counties in North Carolina. It covers the entire eastern slope and considerable portions of the northern and western slopes of the Pisgah range, one of the most picturesque of the southern Appalachian mountain chain.

In accordance with Mrs. Vanderbilt's expressed wish the commission will retain the name of Pisgah forest. It also purposes to make of it a game refuge for the preservation of the fauna of the eastern mountains. It is particularly well suited to this purpose, as it is already well stocked with game and fish, including deer, wild turkey and pheasants, and in the streams are rainbow and brook trout. The members of the commission regard the acquisition of the Pisgah tract as the best purchase yet authorized because the forest is in the finest possible condition. With this purchase and with others approved Thursday the sum total of acreage of the new Appalachian forest reserve is now approximately 1,077,000 acres.

OBITUARY.

Prof. Bert C. Georgia.

Prof. Bert C. Georgia, who, since February, 1913, has been at the head of the market gardening department of Massachusetts Agricultural College, Amherst, died suddenly on Sunday, May 24, at Orient Springs, where he had gone with a week-end party. His body was removed to Ithaca, N. Y., on Monday. Through his genial manner and pleasing personality, Prof. Bert had won many friends among the students in the brief period he had been connected with the college.

A correspondent of The Garden, London, suggests the planting of chionodoxa bulbs in June or July instead of in late fall as is the usual custom. He states that if planted in summer and at a good depth they will produce flowers equal to those that have been planted a number of years.

MICHELL'S SEED HOUSE

Dept. Q. **518 Market Street, Philadelphia, Pa.**

SWEET PEA TRAINER OR SUPPORT.

I found last year the best support for sweet peas, running up to 8 feet or 10 feet, is to run chair cane, the unpolished or second-class kind, between posts on each end of the rank at intervals of 6 inches in height to the top, which may be a bar of wood not too heavy, and to tie upright strands to these horizontal ones at the same intervals from the top to the bottom. This cane is cheap—about sixpence a quarter of a pound — is warmer than wire, and does not sag like string. It lasts for years. If soaked in water for ten minutes it's as easily tied as string, and stiffens when dry. The size of the cane I have used is No. 3 and No. 4. The strands run about 15 feet or 16 feet long.—E. RIGHTON in *The Garden.*

AMHERST NOTES.

The seventh session of the summer school of agriculture and country life at the Agricultural College at Amherst, Mass., will open June 29. Four hours of class work is arranged for each forenoon. Laboratory work, educational trips and excursions, and class conferences will occupy the afternoons. The evenings will be devoted to lectures upon vital subjects by men of national repute and to social gatherings. John R. Boardman, of New York City, Dr. G. Walter Fiske, of Oberlin, O., and William C. Landon, of New York City, are included in the faculty. The summer school bulletin may be procured from William D. Hurd, Amherst.

New York.—R. Willburger has sold out his business at 530 Third avenue to John H. Meyer, who has been in his employ for 30 years. The transfer was made on May 1, but was not made public until May 25.

Max Schling, the enterprising New York florist who is forever doing something that no other florist ever thought of or attempted, has issued a catalogue comprising about a dozen illustrations in natural colors of beautiful plant and flower arrangements. "Nature's Place of Art," is the title. All the illustrations are made from the original creations by Mr. Schling and are excellent examples of modern floral art. We understand that any one wishing duplicate plates can so arrange by consulting Mr. Schling.

WASHINGTON NOTES.

Mr. and Mrs. J. Henry Small, Jr., Washington, D. C., are visiting their son in Cleveland, O.

Henry Pfister is giving up his store at 118-120 Connecticut Avenue, Northwest, due to an inability to renew the lease thereto. No information has as yet been given out as to Mr. Pfister's plans for the future.

George H. Cooke, of Connecticut Avenue and L streets, is being forced to look for a new location due to the proposed tearing down of the building in which he is now located. The new building will occupy the site of several of those in the block and upon the completion of the work Mr. Cooke will have the second store from the corner of L Street and facing on Connecticut Avenue. Mr. Cooke has not as yet completed his plans covering the intervening four months, but in all probability he will take a store in the vicinity for that period.

It is reported that W. A. Taylor has been selected to succeed Dr. B. T. Galloway as assistant secretary of agriculture when the latter leaves for his new duties at Cornell University, the latter part of August. Mr. Taylor, prior to becoming connected with the bureau of plant industry, of which he is at present the chief, was an assistant pomologist. Three years ago, when H. G. Powell was acting chief of the bureau of plant industry, Mr. Taylor became his assistant and later he became the permanent assistant chief. About a year ago upon Dr. Galloway's appointment to his present position. Mr. Taylor was made chief of the bureau. He is a man of wide experience in technical agricultural work and has had considerable experience in the department as an administrator.

CHICAGO NOTES.

Guy French, president of the Chicago Florists' Club, states that their car known as the "President's Special", going to the S. A. F. convention over the Lake Shore R. R., has many florists now booked and Pres. Wirth and the Minneapolis florists will be in their party.

All kinds of accessories to the florists' stock show an increased demand rather than otherwise. The wreaths of magnolia leaves and prepared materials also gain in popularity each season. At Poehlmann Bros., T. Waters of the supply department states that the sales of these wreaths have been very large.

A feature of the American Beauty Section at Poehlmann Bros. this week is a large house of that rose, grown on purpose for short-stemmed flowers, always in such demand for Memorial Day. The plants are a mass of buds, on stems ranging from ten to fifteen inches, and the grower says this crop of Beauties was timed as carefully as the long ones for other occasions.

Worcester, Mass.—The florist shop of C. L. Midgley & Co., 209 Main street, has been bought by Carl Everberg, Woburn. Mr. Everburg is now in possession of the shop, although Mr. Midgley will remain for a time longer in general charge of the business, which he has conducted there for several years.

FROM FATHER TO SON.

George M. Stumpp, New York's well-known florist, turned over to his son, George E. M. Stumpp, on May 16th, the business at 58th street and Fifth avenue. George Stumpp established himself at 58th street and Madison avenue, thirty-four years

GEORGE E. M. STUMPP.

ago. Eighteen years ago he moved to the palatial store on Fifth avenue, which he has occupied ever since. He has been prosperous from the start and nobody who knows him will envy Mr. Stumpp his well-earned retirement from business cares. He goes to Germany on the Kaiser Wilhelm II., on June 2, and will not return until late fall. George E. M. Stumpp, whose portrait appears in this column was brought up from boyhood in the florist business. He developed a rare taste and originality in the arrangement of flowers and is at all times ready with new ideas in decorative effect. Visitors to the New York spring flower show will recall the rich arrangement there shown, all the handiwork of this versatile young man. He is a worthy successor to his father and can be depended upon to uphold the prestige of the name.

PHILADELPHIA NOTES.

Most of the stores here close about noon on Memorial Day except in the outlying district where there is plant and wreath business to be done.

Mr. Gracey reports that things are progressing favorably for the Florists' Club outing. The date will be June 16th, instead of the 10th, as at first intended.

The attraction at the next meeting of the Florists' Club is expected to be P. D. Barnhart, editor of the "Pacific Garden," California, who arrived in this city on the 26th. He will speak informally on things Pacific.

Visitors: Mr. Barnhart, editor of "The Pacific Garden," Los Angeles, Cal.; Jno. W. Coy, representing Chas. Sharpe & Co., Steaford, England; F. Apt, The Hammond Co., Richmond, Va.; Will Rehder, Wilmington, N. C.; William F. and Adolphus Gude, Washington, D. C.

A CORDIAL INVITATION
Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

H. BAYERSDORFER & CO., 1129 Arch Street **PHILADELPHIA, - PA.**

BOSTON NOTES.

One hundred and twenty varieties of lilacs are blooming at the Arnold Arboretum.

C. B. Johnson has recently added another big house to his carnation establishment at Woburn. He proposes to hold over a house of carnations for a second season.

McAlpine & McDonald, the most recent addition to the Boston wholesale establishments, seem to have "caught on" from the start and are doing a fine local and shipping trade.

Progress in planting the Boston Convention Garden is very rapid now. W. A. Manda has taken the entire section marked D on the layout and will make a record exhibit of hardy and tender garden material.

Among the plants which suffered severely in the recent winter are the Moutan peonies. Charles Sander, gardener at Holm Lea, states that he lost no less than 400 of them. Climbing roses were killed back almost to the ground and outright in some places, we understand.

Frank Edgar is high liner on candytuft for Memorial Day week. We have never seen a finer showing of splendid blooms of this useful bouquet flower. Stocks are also a main crop for this occasion. Mr. Edgar bought and grew the Zvolanek novelties in winter-flowering Spencer peas, at $128.00 a pound for the seed and has now a good lot of seed ripening up, which appears to be a pretty profitable crop.

North Beverly has a record for good carnations that reaches far beyond the confines of Boston as some of the carnation exhibitors in other centres who have run up against A. A. Pembroke's flowers in the exhibitions realize. Commodore, handsome flower as it is, has proved a poor winter grower here, more's the pity. Benora is unbeatable in its class, and Rosette has won out as a good one. Thirty-two thousand plants is the capacity of Pembroke's big 60x450 house.

Another crack carnation grower, just next door to Pembroke's, is Chas. E. Caldwell. White Wonder and Pink Delight are his long suit. Having been brought up in the truck business Mr. Caldwell knows the game of rotation crops and the wastefulness of empty houses, so tomatoes follow carnations in the cutting house and cucumbers and lettuce have their alternate innings. Tons of cucumbers are now hanging on the vines which were planted only two months ago.

NEWS NOTES.

Dayton, O.—The firm of Peter Jergens' Sons have dissolved partnership.

Fort Wayne, Ind.—W. J. & M. S. Vesey have purchased a 58 acre tract of land on Huntington road, and plan to build thereon a range of 400,000 ft. of glass.

Baltimore, Md.—J. George Sturgeon, for the past eighteen years well known to the trade in Philadelphia, has opened up a wholesale brokerage business in seeds, plants and bulbs.
four and a half acres and Mr. Millang intends to use the ground as a nursery for his Flushing store. He will build several greenhouses and have them ready for fall planting.

Kingston, N. Y.—A law case of Grace Silverman against Anders H. Anderson resulted in a jury verdict of $750 for Mrs. Silverman. Mrs. Silverman had sold her greenhouses and stock to Anderson and afterwards remained in his employ and the altercation, which is said to have been a very lively scrimmage, was the result of some misunderstanding as to compensation.

John Tiplady, well known as a leading private gardener at Lake Forest, Ill., has graduated into the commercial class, in the Chicago Feed and Fertilizer Co. at 810 Exchange avenue, Chicago.

THE "FOUR-HUNDRED" PLAY FLORIST.

From a horticultural or trade news point of view the pleasant pastime of the society ladies in fashionable Rittenhouse Square, Philadelphia, opening on the 20th inst., may be of small interest outside of local circles. But it marks an interesting departure of the idle rich in providing entertainment for themselves—and certainly a more wholesome one than the tango, or the dress parade. The affair was a great "go" and got reams of pictures and publicity from the local press. Most of the local trade was laid under contribution for cash, labor, or merchandise—retail, wholesale, and growers. And, of course, much of the supplies came from the private estates of suburbanites, and the gardeners of these were on hand to help the good work along. In an indirect way the affair, we believe, will help the fine idea of John Burton: "Spreading a love of flowers among the people." We cannot have too much of that. We have not nearly enough of it now. The masses are always prone—the world over—to ape the educated, refined and wealthy, and, as we have said, this "society" function will really tend in the long run to a good end which may have been entirely lacking in the people who promoted the affair. The receipts were for two hospitals and the Rittenhouse Improvement, supposedly one-third for each. But whatever the guiding motive—show or fun—it will all redound to the good of horticulture in the end.

Flushing, N. Y.—The old home of James A. Gray on Whitestone avenue, has been purchased by August Millang for $10,000. The house is on a plot of

Flower Market Reports

BOSTON

Never in the memory of the oldest followers of the flower market has there been such a huge descent of flowers of all descriptions on this market for Memorial Day. At present the wholesale marts are buried under the accumulation. Business is as good as ever for this occasion, but it makes but little impression on the heaps of stocks, roses, sweet peas, lilies, etc., all of which are in unprecedented congestion as well as badly enervated by the heat of the past few days. Carnations alone show any indication of stiffening price and then only in the case of fresh, crisp goods. There are tens of thousands of carnations, but only a few of them will command any extra figure. As usual the colored varieties have the best chance in this respect. Astilbe, which has usually been a big factor at Memorial Day is here in very small quantity and does not appear to have been grown to the extent of past years. The shipping trade is seriously handicapped by the dilapidated condition in which goods are received on account of the sweltering weather, but shippers are doing their best under the circumstances and as cooler temperatures are promised, perhaps the situation may improve yet. Peonies are in from Pennsylvania and bring all the way from $4 to $8 per 100.

CHICAGO

Memorial Day situation is unusual. The cut of all kinds of flowers has been larger for many days than could be worked off. The high temperature which prevails and the strong southwest winds from off the prairies takes the life out of much of the stock. Nothing can be held back and next to nothing can be sold. Ice boxes are filled and counters likewise and buyers have disappeared to wait until later in the week. Cooler weather is promised and with it better stock and better trade is looked for. All reports are to the effect that the orders now on the books will average well with other years. The only scarcity appears to be in long American Beauties, which are never in demand for this day. There are plenty of peonies and the prices range from two to six and occasionally eight cents. Sweet peas and carnations are among the worst sufferers, any amount of them having to go to the barrels, many arriving in unfit condition. There is good demand for green and every kind brings a very good price. Outdoor stock is fast deteriorating in the hot winds. At this writing, May 26, florists are kept guessing as to the big day at the end of the week.

CINCINNATI

The supply for Decoration Day will be very large. Besides the usual output of the various growers there will be large cuts of outdoor roses and other flowers from the gardens. Of course these last will come into direct competition with those from the professional florists and may interfere with the demand for stock generally. Everything seasonable in a floral way is in a good supply. Throughout the past fortnight the weather has been very favorable and has caused a general increase in the average size of the daily cuts. The demand has at times been very good while at others it was very poor. During this period it has never been large enough at any one time to cause a general clearance of the flowers in the market. The peony cut is large and should be able to take care of all demands upon it. The same is true of roses, lilies and carnations. Quite a large number of double Narcissus poeticus and jessamines are expected for the Decoration Day business. Lily of the valley is fine and in good supply but has only a fair market. Sweet peas are better than they were but

Flower Market Reports

(Continued from page 813)

move rather slowly. The antirrhinums that come in are not as large and fine as they were. Orchids are in good supply. Other offerings include iris, gladioli, corn flowers, daisies and feverfew. Business in new ferns is very good.

NEW YORK The deluge of flowers which overwhelmed this market last week has been heavily reinforced this week by the action of the sudden high temperatures and the market is completely stagnated. In addition to the usual standard varieties there are peonies in great heaps, stocks ditto, lilacs in barrel lots, etc., etc., but whether outdoor or indoor product, nobody wants to buy. Cattleya Mossiæ and gigas of superb quality are quoted as low as $15.00 to $35.00 but they stay in wholesalers' possession. Roses, carnations, lily of the valley, sweet peas and lilies are in big accumulation on all sides, and there is not much confidence in the outlook for a Memorial Day unloading. There may be a famine later on, though.

PHILADELPHIA There is little of change to report on last week's market. Material of all kinds is arriving in immense quantity with demand anything but brisk. This being Memorial week promises better things, but it is too early yet to prophecy. This particular holiday is more largely a bedding plant and wreath festival than a cutflower occasion, so it is needless to look for any boom in cut flowers, especially with the market overstocked as it is. Of course, there will be the usual demand for decorative material such as peonies, for suburban and distant points. The only thing the market is asking a better price for is the carnation. Everything else is offered at normal. And it is open to question if much more can be got for carnations. There seems to be a larger supply of these this year than in other seasons. In greens, dagger ferns and smilax seem to be the only items on the scarce side. The new crop dagger ferns are arriving slower than usual, probably on account of the late season.

ST. LOUIS The local market is in about the same condition as reported in the last issue, everything plentiful and the demand for large lots slow. The retail business is nothing to boast of. The present week should mark a good business as two great events will take place—the Pageant and Decoration Day. Stock of all kinds has been coming in heavy and prices are low. The offerings comprise everything that is accustomed to be in bloom outdoors or indoors at this date. Fancy ferns are scarce but in other greens everything is plenty.

NEW YORK QUOTATIONS PER 100. To Dealers Only

" " & Sprn (100 bunches)	15.00 to 35.00	20.00 to 35.00

WASHINGTON There are more flowers of all kinds than the market can readily handle. During the past week business in the retail stores has been much better than for some time, as this is the graduation season in the many private schools. From the outlook of the early part of the present week, there will be plenty of flowers for the Decoration Day business. The supply of peonies has greatly increased. Roses are very plentiful and fair for this season. Carnations are in good supply and more gardenias are appearing on the market than can be utilized. There is but a very moderate demand for orchids and the supply is limited. Gladioli are somewhat more plentiful and of better quality, and the price has decreased slightly. Good America gladioli can be had at from $6 to $8. Daisies are in but little demand and the bulk of the retail sales are being made by the street men.

Bar Harbor, Me.—Edward Kirk, the well-known manager of the George W. Vanderbilt estate, has purchased the Northeast Harbor branch of the Mount Desert nurseries, consisting of three acres of land, with greenhouses, office building, outbuildings, implements, tools, etc. The greenhouses are full of bedding plants of many varieties. The business has been established at Northeast Harbor 15 years as a branch of the Bar Harbor concern. Mr. Kirk will carry on a general nursery business as well as doing outside contract work. Mr. Kirk has been manager of the Vanderbilt property here for the past 23 years.

FIRE.

The entire settlement known as Cummingsville, two miles from Woburn, Mass., was threatened with destruction just after midnight this morning by a fire that wiped out a large barn and three greenhouses and damaged the house of Everett C. Cummings and of William Connolly, an employee. Mr. Cummings declared that he is certain the fire was incendiary, as there was nothing in the barn, where it first broke out, that could have started it. For an hour the whole city of Woburn was lighted up by the burning buildings. The loss is estimated at $12,000.

Determined to check the ravages of the tent caterpillar, Calvin H. Huson, N. Y. state commissioner of agriculture, at Albany, has issued a formal order requiring all owners or persons in possession of plants infested by tent caterpillars to destroy the nests before June 1, 1914.

HELP WANTED

WANTED—A good pot plant grower to work under foreman. Reply, stating age, experience and wages expected, to THOMAS ROLAND, Nahant, Mass.

SITUATIONS WANTED

DO YOU NEED FARM HELP?

We have many able-bodied young men, both with and without farming experience, who wish to work on farms. If you need a good, intelligent, sober man, write for an order blank. Ours is a philanthropic organization and we make no charge to employer or employee. Our object is to encourage farming among Jews.

THE JEWISH AGRICULTURAL SOCIETY,
174 Second Avenue, New York City.

SITUATION WANTED—Intelligent young man with some college training in Floriculture desires position as assistant gardener with intelligent employer. Address C. G., care HORTICULTURE

FOR SALE

FOR SALE

Lot of land, 248 feet by 106 feet, with 3 iron construction green houses 175 x 20 feet each, potting shed, some frames in fine condition. Located on three streets, trolley passing the front, in a town of 40,000 inhabitants, close to New York. Excellent place suitable either for local trade where all the products could be readily sold or for wholesale shipping to New York or Philadelphia. Low price, terms to suit purchaser. Address Chance, care HORTICULTURE.

FOR SALE—Fresh from factory, new; 10 x 12, 16 x 18, 16 x 24, double thick. A and B qualities. Market dropped. Now is the time to buy and save money. PARSHELSKY BROS., INC., 215-217 Havemeyer St., Brooklyn, N. Y.

BARGAIN — Greenhouse, residence and stock; no competition; live village, 30 miles from Buffalo, excellent shipping facilities. Write ELLIS BROS., Springville, N. Y.

PEIRCE PAPER FLOWER POT

Replaces clay pot for transferring and delivery of plants without damage.

Under ordinary growing conditions will last two months or more in a greenhouse, making them available for growing many small plants.

Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.

Only paper pot ever so recognized.

Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.

Samples furnished free.

NICOTINE MFG. CO. . . . . ST. LOUIS, MO.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

SHEEP MANURE

A Natural Product

100 lbs. $2.00

WM. ELLIOTT & SONS

42 Vesey St., New York

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N.Y.

Cocoanut Fibre Soil

This is the Real Nature's Humus. Put it on your lawn this spring. Don't let it burn up, or stand all summer hose in hand.

Order now in 100 lb. bags.

IF YOU ONLY KNEW what a good eave the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

Greenhouse Shading
AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.
My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.
Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.
E. A. LIPPMAN, MORRISTOWN, N. J.

Steel Tubular Boilers are Costly and Difficult to Install. Burnham Cast Iron Sectional Boilers are Easy to Handle and Inexpensive to Erect

Steel tubular boilers require expensive chimneys. The foundation work, building of a fire box or bricking-in is also a big expense. The moving of a tubular boiler from the cars to your cellar is an engineering problem of no small size. Then there is the frequent expense of retubing that's always hanging over your head.

Burnham Cast Iron Boilers have no tubes to replace—resist destructive rusting—require no expensive chimney or masonry work — the sections are so easy to handle that two or three men with a monkey wrench and a screw driver can set them up. These are boiled down facts. Small ranges cannot be economically heated by steel tubular boilers. Owing to the number of boilers required to heat a large range of greenhouses, cast iron boilers are not economical.

We will advise you frankly which you should have and sell you either kind you want. Write us.

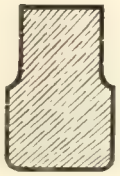
AN ERROR CORRECTED

IN our advertisements of last week concerning the greenhouses, operated by C. C. Trepel, on top of Bloomingdale Bros. store, New York; it was stated that Mr. Trepel also ran flower stores at Gimbel Bros., New York, and Abraham & Straus, Brooklyn.

It seems that the Abraham & Straus store is not, and never was, operated by Mr. Trepel, and we hasten to correct the error, and state that Mr. Trepel does, however, operate the flower store at Frederick Loeser & Company's, Brooklyn.

Lord & Burnham Co.

Why the U-Bar



Look at the wheels of a bicycle—see what slender little, wire-like spokes they have—yet what strong, sturdy wheels they are. Surely no one would think of going back to the clumsy, old wooden spoked wheel.

By the same token did you ever stop to think how like the bicycle wheel, U-Bar greenhouses are?

No heavy wooden roof bars or large iron framing members—but in their place a complete, all steel frame of U-Bars as light and strong in proportion as are the bicycle spokes.

The cypress core bar is steeped in a chemical preservative before it is placed in the U-Bar.

THE CORE BAR
It is made of Cypress steeped in a chemical preservative.

The galvanized steel U-Bar completely protects the core bar from the inside moisture of the house.

The drip does not drip. It follows down the bottom of the U-Bar, to the purlin lead-offs, or to the cast iron sill. No drip grooves to get stopped up.

Then there's the curved eave — everybody knows the U-Bar curved eave was the original curved eave. It is admitted to be the most practical and attractive of all curved eaves.

No reinforcements of the curved parts of the U-Bar are needed —no heavy iron members to break the view from the inside looking out; or show a heavy line from the outside, looking in.

There's only one U-Bar curved eave, and that's the eave **MADE WITH THE U-BAR.**

THE U-BAR
It is made of steel, heavily galvanized and then aluminum painted.

Others may look like it, but that's **THE ONLY WAY** they are like it. We tell you these things as a matter of protection to yourself. If you want the finest greenhouse sold today, for private estates, public institutions or florist show houses—you want the U-Bar. See to it that you get it.

HYDRANGEAS

EXTRA LARGE PLANTS IN TUBS AND BARRELS
FOR SUMMER FLOWERING

We make a specialty of hydrangeas, and have a very large stock of plants which have been kept backward and which are now just beginning to set buds. They are in fine shape for shipment, and will bloom from June to August. Plants are heavily budded, and are exceptionally good value.

We have always made a specialty of large hydrangeas for summer-blooming, and we never had such a fine stock as we have at this time. We have a very large stock, especially of the plants in barrels, and can supply carload lots.

Fine plants in tubs.....$2.00 and $3.00 each.
Extra fine specimens in half-barrels.....$5.00, $7.50 and $10.00 each.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, $2.00 per 100; 7 to 9 in. circumference, $3.00 per 100; 9 to 11 in. circumference, $6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, $2.50 per 100, $22.50 per 1000; Single Mixed colors, $2.25 per 100, $20.00 per 1000; Double Separate colors, $4.50 per 100, $40.00 per 1000; Double Mixed colors, $4.00 per 100, $35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, $4.00 per 100, $35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, $9.00 per doz.; 24 in. high, 12 to 14 buds, $12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, $35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, $3.50 per dozen, $25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, $1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at $1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, $12.00 per 100.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Outdoor Sweet Peas

Sweet peas will now need the hoe or cultivator at least every ten days. Over a large portion of the country the spring and early summer rainfall becomes deficient, so watering during dry weather becomes necessary as sweet pea revels in plenty of moisture at the roots. See that they are kept well up to the supports, for when they are allowed to fall over the flower stems become crooked. When the flowers begin to appear a good mulch of well rotted manure will be found of great benefit to them. If you doubt as to the real good which comes out of this, do a little experimenting and let part of a row go without any. When they begin to bloom keep all the flowers picked off so they will not form pods. This will keep them in flower longer. It is always better to pick the flowers early in the morning or late in the afternoon.

Palms

Air freely, now that the days are so warm, and keep plenty of moisture in the atmosphere. A couple of hosings overhead on clear days should also be given with a carefully directed pressure, which will not only help to keep the foliage clear of dirt, but also will assist materially in preventing the spread of scale. If there are large palms that need repotting this is an excellent time to do this work, as nearly all the palms and other decorative stock make a heavy growth during the summer and the more they are encouraged the better. If larger pots are not required remove some of the old soil from the roots and replace with a fresh compost of fibrous loam three parts, well rotted cow manure one part, and about a 5-inch pot of bone meal to a barrow load. If rains have washed off considerable of the shading applied to the glass some time ago it will be necessary to use some more whitening on the roof as many palms are quite easily scorched. Select some of the tougher leaved kinds and stand them outdoors.

Bay Trees

Bay trees that have not been potted for three or four years will need some attention now in the way of a shift or a top-dressing. Where they need repotting give them a good heavy soil three parts, well rotted cow manure one part, with good sprinkling of bone meal. See that the compost is well rammed all around the ball as they like the soil good and firm. For bays that do not need repotting it is a good plan to remove all the top soil down to the fine roots and renew with a rich compost. Place them where they will be handy for water as they should get a good syringing often. During the summer they will enjoy an application of liquid manure about every ten days. This treatment can be given to all pot or tub evergreens, such as English yews, aucubas, araucarias, laurels, hollies, etc.

Poinsettias

Poinsettias that were started growing about May 1st will now have sent out plenty of young growths, which root readily. Such as are rooted now will produce bracts a foot or more in diameter and be suitable either for benching or making up later into large pans. Poinsettias root at any time from spring until fall provided they are not allowed to wilt from sun or neglect of water. They must be shaded on all bright days and faithfully kept wet in the propagating sand. In very hot or bright weather, once a day may not be enough. Water the sand copiously twice a day. Don't be afraid. Another critical time is just after potting off from the propagating bed. For the two weeks there must be no neglect. Be as careful with shading and watering as you were while the cuttings were in the sand. After once making roots in the pots they endure the brightest sun and must have it.

Orchids

During their growing season a high degree of moisture must be maintained in the atmosphere of the house, the amount and frequency of the watering and sprinkling of the floors, etc., of the house being largely regulated by the weather. Ventilation must also be carefully regulated, avoiding cold draughts and sudden changes. Shading should be attended to but give all the light possible; this in nine cases out of ten, is overdone. This refers to all orchids. As the season advances the temperature in this department will require more air to be given, consequently more frequent damping with syringing overhead once or twice a day will be necessary; air should be left on during damp weather to prevent the young growths from rotting. The plants should be all sponged over to remove any thrips, scale or insects before the young growths appear. Varieties such as Cattleya Trianæ, Percivaliana and others, starting action in poor material, should be repotted. Cœlogyne cristata and its varieties will now have finished blooming and will soon start into new growth and root action. A free, cool atmosphere, with spraying overhead once or twice a day, and all the sun during winter is necessary to ensure good flowering plants of this very useful orchid for cutting purposes.

Spraying and Syringing

When we get warm summer weather that makes the thermometer register anywhere from 80 to 90 degrees in the shade, all such plants as carnations, chrysanthemums, palms, ferns, roses, etc., will be greatly helped by syringing. Do not let the houses have a dry atmosphere. Keep the paths damp at least three times a day.

Mr. Farrell's next notes will be on the following: Bouvardias; Newly Planted Chrysanthemums; Cyclamen; Outdoor Roses; Summer Treatment of Potted Roses; Sowing Late Annuals.

Build up

While delighted to record commendable activity in local preliminary work for a successful convention in Boston we are moved to call general attention to the necessity of something more than efficient local preparations, a large attendance and a good time. If we are to arise fully to the occasion and its opportunity and if the convention is to go into history as the most successful and memorable event in the chronicles of horticultural development in America there are many serious matters that must be carefully discussed and acted upon now. The work of the S. A. F. at this epoch of its existence should be essentially constructive in character, and it should be the endeavor of the horticultural interests individually and collectively to so direct the forces of this great agency that it will contribute in the most effective manner to the building up of the horticultural and allied industries which are, beyond any question, still in their propagating bench in this counrty. So we hope that you will all come to Boston with something on your mind besides the vacation spirit—something that you feel needs to be done and that can be done for the general cause—and with something practical to impart as to how the needed forward step may be accomplished and the prosperity and happiness of your fellow-craftsmen promoted through the power of efficient organization. If, perchance the S. A. F. has not sized up in the past to what you think it should have done, forget it, for perhaps you misjudge it unfairly. Shakespeare said:

"The fault-finder—it is his nature's plague to spy into abuses; and oft his jealousy shapes faults that are not."

The present time is no time for picking flaws or overturning what has been done. When, in the future, we look back and record our estimate of the convention of 1914, its points of excellence will be computed not so much on what we captiously pulled down as on what we manfully built up.

An ominous manifestation

Did you hear anything drop about Memorial Day? Seems to us from what we observed in certain flower markets and what we learn in reports received from others that the antiquated idea of winter prices on flowers at the end of May has suffered a knockout blow—one which we hope will finish it for good. Of the various forms of business suicide which prey on the prosperity of the flower trade this is one of the most mischievous. Just one year ago we wrote editorially as follows in reference to the scareheads circulated in the daily papers regarding alleged prospects of a flower famine and high prices for Memorial Day material:

"Consider, you growers who rail against the sale of artificial flowers, how many metal wreaths were purchased as a result of these announcements flashed in the faces of 100,000 readers!"

Such warnings and entreaties we are well aware, have no more effect on "the system" than has the throwing of water on a duck's back. It takes bitter experience to drive home the truths they seek to convey. When we see the cemeteries strewn with thousands of dried and artificial wreaths while, for the entire week, wagon loads of natural flowers are rotting in wholesale markets, something is wrong from the standpoint of the flower grower. It is no exaggeration to say that thousands of dollars went into the pockets of the manufacturers of imitation material last week which might have been gathered in by the growers of fresh flowers if an aggressive rational policy had been established and the issue had been squarely met by those whose interests were most at stake. The problem is one of many angles and on the way it is finally solved depends much of the future well-being of the flower industry. The experience of Memorial Day is one angle. There are others.

CRATAEGUS AND ARONIA.

(Extracts from Bulletin No. 56, of The Arnold Arboretum.)

In the collection of Hawthorns (Crataegus) on the eastern slope of Peter's Hill there are now flowering or soon to flower six hundred and thirty groups, including a few duplicates and a few Old World species. This collection of American Hawthorns is the result of work carried on by the Arboretum during the last fourteen years. During this time most of these plants have been discovered, and many of them have been named and described. They have all been raised from seeds at the Arboretum, and thousands of the young plants have been distributed to cultivators in the United States and Europe. This Crataegus investigation has meant many thousand miles of travel by officers of the Arboretum and by its correspondents and friends, and in the last forty years American Crataegus seeds under thirty-two hundred different numbers have been sown, seeds of widely distributed species collected in different parts of the country having been sown in order to show possible geographical variation in the seedlings. This investigation has brought to light a large number of beautiful hardy trees and shrubs well suited for the decoration of the parks and gardens of cold temperature regions; and the collection on Peter's Hill, already interesting, should before many years have passed be one of the spectacular features of the Arboretum in spring and autumn. American Hawthorns are distributed from Newfoundland and the northern parts of the Province of Quebec to Florida and Texas, and to the Pacific Coast in the northwest. The largest number of species grow together probably on the streams which flow into Lake Ontario both from the north and south, in southern Missouri and in southern Arkansas. The genus has few species in the Rocky Mountains, and these are small in size and not numerous in individuals, and in the northwest there are only a few widely distributed species. Some of the American Hawthorns are trees which in the rich bottom-lands of the Mississippi valley attain a height of thirty or forty, or even fifty, feet with tall straight trunks and widespreading branches, many are shrubby in habit, and there is one group *(Intricatae)* in which nearly all the species are small shrubs rarely more than three or four feet high. These small shrubs bear large and showy flowers followed, in the case of many of the species, by large, bright colored and abundant fruits. They are valuable and interesting plants therefore for small gardens. In spite of all which has been done at the Arboretum to discover and introduce these plants, the investigation must be considered as not more than fairly begun, for there are still thousands of square miles of territory in North America where Hawthorns grow which have not been explored with reference to these plants.

Aronia, a genus of the Rose Family, confined to eastern North America, sometimes considered a section of the genus Pyrus, contains valuable plants for the garden shrubbery. There are three species, all widely distributed in the eastern part of the country, *Aronia melanocarpa*, *A. atropurpurea* and *A. arbutifolia*. They all have small white flowers with rose-colored anthers borne in erect compound clusters, showy fruits and handsome foliage. What is believed to be the type of *A. melanocarpa* is a shrub twelve or eighteen inches high, with stems spreading into a broad mat. There is a form of this species (var. *elata*), however, which is much more common and grows into a shrub from six to ten feet tall, and another form (var. *grandifolia*) with broader leaves; this is also a tall shrub. The fruit of this species is black and lustrous, and drooping on long stems hangs on the plant during the winter. *Aronia atropurpurea* is also a tall shrub, in general habit and foliage like the var. *elata*. The fruit, however, is dark, vinous red and ripens and falls earlier. The leaves of these two species turn orange and red in the autumn before falling. *Aronia arbutifolia* is a tall, slender shrub of irregular habit, with flowers which open later than those of the other species, smaller leaves, covered with white down on the lower surface, and erect clusters of small, bright scarlet fruits which remain on the plants without change of color well into the winter. The brilliant fruit and the bright scarlet of the autumn leaves makes this late in the season one of the most beautiful of all our native shrubs. Less common in the north, perhaps, than the other species, *Aronia arbutifolia* is a very common plant in all the southern states where it is very generally distributed, often growing in great abundance on the margins of small depressions in the Pine woods which in spring are filled with water. All the forms of Aronia are easily cultivated and are now in flower in the Shrub Collection.

VANILLA POMPONA.

A handsome climbing orchid, native of tropical America. Vanilla pompona differs from V. planifolia from the seed pods of which is produced most of the vanilla of commerce, in its shorter and thicker foliage and seed pods and its more profuse blooming. The flowers are larger also, yellowish in color and last but two days in perfection. The plant from which the photograph was made is at the orchid establishment of Julius Roehrs Company, Rutherford, N. J. It is particularly interesting from the freedom with which it sets its seed pods here, something which is very rare in European cultivation. The Vanillas are the only orchids having any economic value so far as we know.

THE HAPPY GARDENER.

Oh! the glorious profession
Of the gardener—for just see
How he holds in his possession
All flowers, vines, shrubs and trees.

Even charms of old dame, nature
He claims are his by right,
And he for higher wages
Now fain would go on strike.

In regard to compensation,
Well may the gardener smile,
For a balance in equation
Shows boss behind a mile.

Enjoying constant pleasure
While boss gets scarce a peek
At dame nature's golden treasure,
It may be once a week.

So to equalize life's burdens
I, George, the plan suggest,
That the gardener pay a premium,
He is so highly blest.

The foregoing lines were suggested by George C. Watson's remarks on the subject in the last number of HORTICULTURE. Let some one else give us the other side.

ALEXANDER MACLELLAN.

Newport, R. I.

CLUBS AND SOCIETIES

LANCASTER COUNTY FLORISTS' CLUB.

The meeting on May 21 was the first slimly attended meeting the club has had, partly owing to the business of the season and partly to the fact that the notices contained no intimation of the paper by Mr. Nagle, but even with these two handicaps the attendance reached about one-third of the membership.

The Co-operative Buying Committee reported good progress all along the line and urged the members to make full use of the privileges that have been extended to us locally.

The Flower Show Committee reported progress and promised to have further details for next meeting. The date for the show is definitely fixed (Nov. 6th and 7th) and any out-of-town exhibitors might as well begin to get busy.

The Picnic Committee have arranged for a picnic at Mt. Gretna about the 16th of July, with a special train from Lancaster, at a total cost of less than $2.00 per person for all expenses including two meals (good ones).

Mr. Nagle's paper on Bedding Plants was an excellent paper recommending a greater variety of plants for bedding purposes and greater care in the preparation and planting of beds, to give better service to the buyer.

Lancaster is strong on the Service question. Every club of which the writer is a member has made this a slogan, "Give the best service possible for the money." The Young Business Men, The Advertisers' Club, The Florists' Club are all using every effort to keep this before their members and through these clubs all of the civic organizations are taking it up.

The next meeting will be June 18th, with papers on Asters by Chas. M. Weaver of Ronks, and on Gladioli by Ira H. Landis of Paradise. This latter city is the home of gladioli in this section and we are looking forward to a treat intellectually, as Mr. Weaver is an authority on asters and sweet peas. He does not believe in spreading his efforts over a wide area, but in keeping them to one or two things and doing those well.

ALBERT M. HERR.

FLORISTS' CLUB OF PHILADELPHIA.

P. D. Barnhart, editor of the "Pacific Garden," gave a delightful talk on the glories of the "garden of Eden" known as Southern California, at the regular monthly meeting held on the 2nd inst. He held a large audience spellbound for nearly two hours and then stopped only on the advice of his wife. At the conclusion the club voted as one man to move out to Los Angeles. Commodore John Westcott was appointed chairman of the committee on transportation for the Boston Convention in August. The outing committee were indorsed as to their plans for the 22nd, already reported in these columns. Theodore Shober reported that he hopes to be able to get a team of bowlers for the Convention, although the enthusiasm does not seem to be very hot so far. This is a sad fall-down from the fire-and-ginger of the ancient days. Where's Anderson and all the rest of the old war horses? We fear the good bowlers never really appreciated what a good committee meant. They have been laboring under the belief that their talent was what made all the noise. Not unless there were some good gardeners back of it to usher the bud into bloom. Never forget the Commodore's dictum: "If you are going to hold school you must get the scholars." You will not get the scholars if there's no prospect of some play in between. This bowling and sporting matter is of great importance, taken in that light. Get the attendance. The rest follows.

DATE OF PEONY SOCIETY SHOW.

The dates of the Chicago Show of the American Peony Society have been advanced from June 12-13 to Tuesday and Wednesday, June 9-10.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that Peter Henderson & Co., 35-37 Cortlandt street, New York City, offer for registration the Geranium described below. Any person objecting to the registration or the use of the name proposed, is requested to communicate with the secretary at once.

Raiser's description: A "sport" from Geranium Double Gen. Grant. Habit and foliage same as the parent variety, flowers deep salmon. Name, General Funston.

The United States Nursery Co., S. W. Crowell, manager, Roseacres, Mississippi, offer for registration the Rose described below. Any person objecting to the registration or the use of proposed name, is requested to communicate with the secretary at once.

Raiser's description: A sport from Climbing American Beauty. Identical with the parent in growth, foliage and general appearances, except the color, which is a deep pure pink. The variety is very floriferous, and the flowers maintain their color until the petals fall.

Name, Climbing Pink American Beauty.

Failing to receive objection to the registration, the same will be made three weeks from this date.

As no objection has been received or filed to the registration of Laeliocattleya Tuttleæ, by Mrs. B. B. Tuttle of Naugatuck, Conn., same becomes complete. JOHN YOUNG, Sec.

May 29, 1914.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Special prizes to be awarded at the Annual Convention and Exhibition of the Chrysanthemum Society of America in conjunction with the State Florists' Association of Indiana, at The German House, Indianapolis, Ind., November 6, 7 and 8th, 1914.

Chrysanthemum Society of America silver cup, for the best 10 blooms, long stems, any variety.

Elmer D. Smith & Co. prizes, for 15 blooms, considered from a commercial standpoint, 3 varieties shown in one vase, seedlings permissible, artificial supports prohibited. 1st, $15.00; 2nd, $10.00.

A. N. Pierson prize, for the best 25 blooms Indian Summer. $25.00.

Philip J. Foley prize, for the best 10 blooms Chrysanthemum not disseminated. $10.00.

Chas. H. Totty prizes, for 6 blooms Mendon. 1st, $10.00; 2nd, $5.00.

Wm. Wells prizes, for 2 blooms James Fraser. 1st, gold medal; 2nd, silver medal; 3rd, bronze medal.

Henry A. Dreer prize, open to private gardeners only, for the best 10 blooms Chrysanthemum, one variety introductions 1913 and 1914.

Lord & Burnham Co. prize, for 6 vases, 6 varieties, three blooms of each on long stems. Gold medal.

President Wm. Kleinheinz prize, for the best 10 blooms white. Silver cup, value $25.00.

H. E. Converse prize, for the best 10 blooms H. E. Converse. Silver cup, value $25.00.

H. F. Michell prizes, for 12 blooms, 12 varieties, 1 flower each, short stems. 1st, $15.00; 2nd, $10.00.

Hitchings & Co. sweepstake, for the most meritorious exhibit in the exhibition. Silver cup.

CHAS. W. JOHNSON, Secretary.

AMERICAN SWEET PEA SOCIETY.

The preliminary schedule of the Sixth Annual Exhibition and Convention of the American Sweet Pea Society has been received from Secretary H. A. Bunyard. The exhibition will be held under the auspices of the Horticultural Society of New York at the Museum of Natural History, New York City, on Saturday and Sunday, June 27 and 28. Besides the open and miscellaneous classes there are sections for private gardeners, private gardeners and amateurs, amateurs, retail florists and school children. Very many of these prizes are specials by individuals and firms, and the table decoration premiums are contributed by the New York Florists' Club. In addition there is a section in which prizes amounting to $200 are offered by the Horticultural Society of New York.

The final schedules will be ready for distribution June 20.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The regular meeting of the club on June 2nd, was not largely attended, but nevertheless was very interesting.

P. T. Barnes, connected with the Entomological Department of the Board of Agriculture of Pennsylvania, gave a talk on spraying. He had a number of specimens of twigs and branches showing the work of the various scales, and also pictures as an aid in identifying them. The Lime-Sulphur wash is still the standard

remedy, he says. In speaking of the rose chafers, and the difficulty of poisoning them, he recommended that the arsenical solution be slightly sweetened to induce them to eat more of it.

Letter was read from Richard Vincent, Jr., in regard to making the trip to the S. A. F. Convention in Boston by way of Baltimore and steamboat up the coast to Boston. This seemed to strike some of the members favorably, and Vincent's letter was reinforced by Robert Hunter, Commercial Agent of the Merchants' & Miners' Transportation Co., who was present and gave the rates from Pittsburgh to Boston via Baltimore and boat. In anticipation of the demand, Mr. Hunter said he had reserved ten staterooms for use of the Pittsburgh party. It was finally left that those who wished to make the trip via Baltimore and boat, should arrange with Mr. Robert Hunter, 1004 Bessemer building, Pittsburgh.

The exhibition of flowers was small and I can only account for it on the theory that the members were embarrassed with the richness of the material about them. Such crops of out of door flowers have perhaps never been known in the vicinity of Pittsburgh. The rose crop is abundant and the peony crop is marvelous for its abundance and fine quality. Peonies were shown by H. C. Knauff, Alleghany; laelias by T. Tyler, German iris by Mr. Alker, and tulip tree by Carl Becherer, Dixmont, Pa.

H. P. Joslin, Sec'y.

CLUB AND SOCIETY NOTES.

The next meeting, the closing one for the season, of the New York Florists' Club will be held at the Club rooms next Monday evening, June 8.

The Cincinnati Florists' Society will hold its regular meeting on Monday evening, June 8th, at the club rooms in the Flower Market. The special business will be the nomination of officers as well as taking up the question of the annual outing.

The Chicago Retail Florists' Association met June 1st and over sixty were in attendance. The chief topic of discussion was the first issue of their little publication which they are offering free to the trade. Plans are under way for an outing later on.

The monthly meeting of the Nassau County Horticultural Society was held May 13th at Glen Cove. Prizes for the fall shows were received from J. M. Thorburn Co., John Wilk, Cottage Gardens Co., Pierson U-Bar Co., Lord & Burnham Co., Titus & Bowne, Kohler Bros., F. B. Edmonds and C. A. Coffin. Mrs. F. S. Smithers presented for competition a set of valuable books. Awards for exhibits were made as follows: Darwin tulips, H. Gaut; flowering shrubs, F. Honeyman; lettuce, J. McCarthy. Cultural certificates to H. Gaut for clarkia and J. Robinson for lilium. Honorable mention to A. Fournier for Darwin tulips. The annual Rose Show was postponed to Tuesday, June 16th. Mr. Gommersall, of Nyack, gave an inspiring address on Hardy Gardens and Perennials.

Harry Jones, Cor Sec.

HORTICULTURAL CLUB OF BOSTON ON A VISIT TO SOUTH LANCASTER, MASS.

Left to Right, Standing—W. A. Manda, P. Welch, Jas. F. M. Farquhar, John K. M. L. Farquhar. Seated—Wm. J. Stewart, Wm. Sim, Jos. T. Clarke, S. J. Goddard, Thos. Roland, Alex. Montgomery, E. Allan Peirce, Jos. Fuller, M. A. Patten, Peter Fisher, Wm. Anderson, Fred A. Wilson, Jackson Dawson, J. B. Shea.

On the occasion of the visit of the Horticultural Club of Boston to the Bayard Thayer estate at South Lancaster, Mass., described in our last issue, a brief tour was also made of the neighboring John E. Thayer place, under the escort of Mr. Thayer and his superintendent, Mr. Clarke. It was here that the accompanying group picture was taken.

The John E. Thayer place is older than that of Bayard Thayer and the trees and shrub plantation are more mature. There are some noble evergreens and the pyruses blooming at the time of this visit presented a scene of floral beauty the equal of which had never been seen by any of the visitors. Tulips, daffodils and other spring flowering bulbs, etc., were scattered over the grassy slopes in myriads and the impressive vistas opened here and there from suitable vantage points, commanding views of a wide expanse of country, were enthusiastically admired.

THOSE NEMATODES AGAIN.

Fifteen years ago there was little doing with peonies; since then they have grown in importance and the sales are enormous.

It is very unfortunate that a baseless scare should come in to injure the business. I have a right to speak. I have been raising peonies thirty years, and for the last sixteen years have made it an especial business. I have published two editions of the peony manual and have had one of the Nebraska experimental stations for a number of years. We have probably handled more peonies than any other firm. I have watched these plants as a doctor would his children, and have noted their diseases and described them in my last manual.

The French club foot disease is a mystery—a root infested with it is incurable and should be thrown away. To get at the bottom of this theory I sent two roots, one of the club foot and one with nematodes, to Dr. Ernest Bessey, son of Dr. Charles Bessey, one of our most renowned scientists. Dr. Ernest Bessey is in charge of the pathological department of the U. S. station at Miami, Florida—the highest authority in the land. He says: "You see that I confirm the correctness of your observation that the two diseases are entirely different." He found no nematodes in the club foot.

I have often found my most robust and vigorous plants infested with these nematodes and the roots often enlarged by nodules. The rankest growing ones—like Andre Saures, Marechal Vaillant and Grandiflora rosea, almost always have more or less. These are all robust growers and prolific bloomers. Now if these nematodes are dangerous, I surely ought to know it. In selling we usually strip off the nodules. For my own planting I don't care whether they are on or not. I think that they are often more of a benefit than an injury and just like the nodules on the alfalfa that increase the root power of the plant.

Peonies should never be replanted on the same ground, not on account of the ground being infested, but because the plant is a rank grower and exhausts the food necessary. You cannot plant potatoes year after year on the same ground. Now if you want to find robust and vigorous peonies come to my place where I can show you as fine plants as you can see anywhere, some of them well lined with nodules.

C. S. Harrison

York, Neb., May 29, 1914.

RHODODENDRON (AZALEA) VASEYI.

This beautiful early-blooming American azalea has passed through the exceptionally severe winter unscathed and made a lovely show along the Riverway and the shores of Jamaica Pond in the Boston park system where it was abundantly planted by the late Mr. Pettigrew. While the flower buds of the Kaempferi and other deciduous rhododendrons have this spring been very generally blighted, Vaseyi shows up without a scar. The view shown in our cover illustration was taken on the Riverway, overlooking Ward's pond.

NEW CORPORATIONS.

Ann Arbor, Mich.—Ann Arbor Greenhouse Co., capital stock, $25,000.

San Francisco, Cal.—Western Evergreen Company, Inc., nursery and floral business. Capital stock, $10,000.

Dover, Del. — Greenhouse Garden Products Co., capital stock, $50,000. Incorporators, W. I. N. Lofland, W. F. P. Lofland, William Boyd.

PERSONAL.

L. H. Read has been appointed postmaster of Deer Park, Ala.

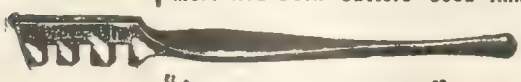
Bernard Greeley, lately gardener for Gen. Miller, Franklin, Pa., has accepted the position of head gardener for Mr. J. W. McCahan, Moorestown, N. J.

PANSIES AT KENILWORTH.

One of the prime attractions of Kenilworth, N. J., is the pansy farm of Charles Frost, whose name is well-known to HORTICULTURE's readers as an advertiser of choice pansy seed each season. Mr. Frost had been long established as a truck farmer when a few years ago his interest was diverted to pansy culture, since which time his attention has been given entirely to this work, purchasing distinct and desirable new varieties whenever they appeared abroad and, by careful selection and breeding, aiming to produce reliable strains in the various show and bedding classes.

The place occupies about five acres, the greater part of which is devoted to the pansies, which are planted in long beds of separate colors, forms and markings, some of the more valuable being isolated as much as possible with a view to insuring immunity from disturbing pollen. A list of the classes segregated would make a long catalogue. There are Kenilworth Giant, Kenilworth Show, Kenilworth Cut Flower Mixture, Masterpiece, Princess, Orchid Flowered, Madam Perret, Giant Zebra, Adonis, Pres. McKinley, Psyche, Rainbow, etc., and a legion of self-colors, five blotched, silver-edged and gold edged, the bronzes, oranges and red shades being especially numerous and attractive. Mr. Frost is doing a good service for the pansy industry and doing it thoroughly and conscientiously.

A FINE TULIP DISPLAY.



Those of our readers who attended the S. A. F. Convention at Minneapolis will recognize in the accompanying picture the site of the Convention Garden. So pleased were the Minneapolis people with that feature of the florists' visit that it was decided to adorn the grounds permanently as a show place and this spring's initial display is shown in the picture. The long bed at the left is planted with White Hawk and Artus tulips; at the right is La Reine and in the oval bed is Yellow Prince. No finer beds of tulips can be imagined and in this unfavorable season when so much complaint of poor flowering of tulips is rife it must be exceedingly gratifying to A. T. Boddington who supplied the bulbs, to see how excellent in quality his bulbs are here shown to be.

PUBLICATION RECEIVED.

We have just received from The Cornell University, Bulletin No. 342 upon sweet peas. This is the most ambitious monograph to our knowledge upon the sweet pea, containing a list and description of nearly 700 varieties. This will be sent by Secretary Bunyard to all members in good standing. It contains about 150 pages, also much valuable information apart from the descriptions and history of the different sweet peas above mentioned. There are many full page portraits of special varieties and a complete index gives added value to this indispensable publication in which Prof. Beal has done much painstaking work.

Hillsdale, N. J.—In the violent storm of May 27, the corner of Charles Follette's greenhouses was carried away by the wind.

SMITH & HEMENWAY CO., . . 161 CHAMBERS ST., NEW YORK

E PLURIBUS UNUM.

The editor of HORTICULTURE has done many fine things during the ten years he has conducted his unique journal; but among them nothing finer than the finds he has made among eminent horticulturists who could write.

Men like Jenkins, Farrell, Pope and many others, have been a revelation to us and have been the means of setting a new pace and a new standard in horticultural literature and practice. This service is beyond money and beyond price. It has elevated the standard of thought and action to an extent little realized by the man who has only time to skim the headlines—too busy to sit down and think things over.

The latest find of HORTICULTURE, to my mind, is Arthur Smith. I have no idea where he came from, but his article in last week's issue on the gardener's problem is fine and indicates more than local training. That is the kind of literature we are badly in need of in the United States. He discusses things from a broad and experienced point of view, and it is a great pleasure to hear from him. Let us hope we may hear from him some more.

One of the most pleasing things to the writer is that he advocates all the things the writer has expressed himself on. The things he disagrees with are the things other men set up as straw men—when they are short of argument. So you see Mr. Smith and yours truly are on an even keel and can have a little friendly talk without getting warm on any point. That postulate is always essential when any question is to be thrashed out.

Now then, in all good humor; about this "E Pluribus Unum" business. (United we stand, divided we fall.) What did we fight and bleed and die for in 1776 but for E Pluribus? If we grocerymen get tired cutting each other's throats in this year 1914 and get together to agree on a living price—where's the harm? If we lads with our only commodity—labor—get together in the same way, where's the harm? Parenthetically it may be well to emphasize the fact that labor is the commodity the laborer has to sell and is subject to the law of supply and demand—like all other commodities. If E Pluribus is good for one commodity it is good for all. The prophet, priest and king; the professor, scientist or philosopher, are no exceptions, any more than the merchant or the laborer, to this rule.

Now, another small point. About the seedsmen. Granted, some seedsmen are too busy to exercise that discretion and judgment (which I think they should) about the thousands of men who call on them for jobs and which houses like Farquhar, Henderson and Dreer positively do, and always have done, what then? Where is the obligation? They are business men. They have their rent, wages and taxes to pay; and their first duty is to pay their just debts. If they should be generous enough to become an altruistic institution for the benefit of the gardener the gardener ought to be thankful. I am not defending the seedsmen. They need no defence. If some of them are high-minded and good-hearted far beyond ordinary business practice that is a matter for glorification of such who do, but not for condemnation of those who don't.

Now about those "exams" and the diploma; is the gardeners' society big enough yet to handle that? It is by no means on a plane with the Royal Horticultural Society so far as I can see it.

But anyway, the ice has been broken and further discussion will be of educative value and helpful to all interested. And everyone in the trade—florist, seedsman, nurseryman, all the trade—is interested in the gardener, directly or indirectly. Let us hear from some others. And let every one stick to fundamentals and forget personalities. I submit this as the next question. Are not low wages the cause of the scarcity of first-class gardeners? GEORGE C. WATSON.

THE VERDICT.

Editor HORTICULTURE:

Mr. Watson, in summing up our discussion which has now occupied space in your columns for some weeks past, charges that "Mr. Ebel now admits that educating the employer up to the point where he will pay his gardener a decent salary is not "a fallacy" as he at first claimed. In fact he claims that same thing is now being done."

Mr. Ebel has admitted nothing of the sort! I have never declared that such education, of which I am a strong advocate, is "a fallacy;" but I have declared that "All credit for promulgating the fallacy that those who may require the services of gardeners can be educated that the gardeners' minimum wage scale must be $100 shall go to those who foster it."

I will contribute $100 to any worthy cause that Mr. Watson may name, if he can show, or that anyone else may name who can show how, what I am charged with stating can in any wise be construed into an identical meaning with anything I really did state.

As Pope says:

"Words are like leaves and where they most abound,
Much fruit of sense beneath is seldom found."

M. C. EBEL.

BRITISH HORTICULTURE.

The Chelsea Show.

In brilliant weather the spring show of the Royal Horticultural Society was opened at Chelsea on Tuesday, May 19th. The orchids, of course, made a magnificent display, the chief exhibitors being the Duke of Marlboro, Sir Jeremiah Colman, Sander & Son and Charlesworth & Co. The number of novelties placed before the judges numbered over two hundred; ten received first-class certificates and twenty-four awards of merit. Nine of the certificates were given to orchids. A collection of irises, shown by W. R. Dykes, attracted considerable attention. One of the best (Gold Crest) received an award; it is a hybrid between Pallida and Cengialti. Professor Bayley Balfour sent from the Edinburgh Botanic Gardens a number of new Chinese Alpines. Koster & Co. contributed a new race of azaleas, derived from crossing the white Occidentale with the garden varieties of Mollis. Messrs. Bees, Ltd., had a number of new Chinese plants of dwarf habit; Primula secundiflora was given an award; this is similar to P. sikkimensis. Awards were also made to Blackmore & Langdon for a new begonia, Lady Carew, and to C. Engelmann for carnation Scarlet Carola.

Some Interesting Features.

There was a splendid array of rock gardens, each replete with endless suitable subjects. Ornamental trees and shrubs made a fine show. John Waterer & Sons exhibited a grand selection of rhododendrons. Clipped trees by Cutbush & Son, Japanese maples from Fromow & Sons, and trained fruit trees from Laxton Bros., were other notable features. In the open there were some admirable examples of artistic garden planting. Gold medals were awarded as follows: Sir Jeremiah Colman, Charlesworth & Co. and Sander & Sons for orchids; L. R. Russell for trees and shrubs; Barr & Son, tulips; Blackmore & Langdon, begonias; Cutbush & Son, roses; May & Son, ferns; Sutton & Sons, florists' flowers; Veitch & Sons, stove plants and azaleas; Webb & Sons, flowering plants; F. Cant & Co., roses; Dobbie & Co., sweet peas; Sir Everard Hambro, alpines and primulas. W. H. Adsett.

AN UNIQUE AZALEA COLLECTION.

An interesting fact in connection with the collection of azaleas advertised in this issue by K. J. Kuyk, is that the set was the result of many years collecting by Mr. Kuyk for the purpose of making a record display at the great Ghent centennial exhibition. It received a gold medal award on that occasion. There are 100 plants, 100 varieties, uniformly trained, and selected to bloom all at the same date, each with a circumference of about nine feet. The collection comprises the cream of the modern introductions.

The six weeks' drought which has held all crops back and done incalculable damage in Alabama was broken on the 27th by copious showers, and it is hoped that they may continue so that belated crops may be able to recover.

THE GLAD HAND

GLADIOLI—GLADIOLUS—GLADIOLUSES

Which is rignt? The only way to find out is to plant some of our stock and if planted now or even later, they will bloom when the earlier planted stock is passed; which means higher prices for the flowers and is good business.

We offer the following varieties less 5 per cent if cash accompanies the order:

Boddington's Quality Gladioli

AMERICA (Our Specialty). This beautiful new Gladiolus has produced as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh.pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet."

Selected Bulbs, 2 to 2½ inches.....$1.50 per 100, $12.00 per 1000
1st size, 1½ to 2 inches..... 1.25 per 100, 10.00 per 1000
2nd size, 1¼ to 1½ inches..... 1.00 per 100, 9.00 per 1000

	100	1000
HOLLANDIA (The Pink Brenchleyensis). Flowers well arranged on a spike which attains a height of about 4 feet. Often as many as 30 blooms of a charming pink shade tinted yellow are open at one time. First size bulbs	$1.75	$15.00

PEACE. The flowers are large, of good form and correctly placed on a heavy, straight spike. They are a beautiful white, with a pale lilac feathering on the inferior petals. "Peace" is not an early bloomer, but rather medium to late, and planted at the same time with other stock, it is in its best condition when most other varieties have passed blooming. Per doz., $1.25; per 100, $9.00; per 1000, $85.00.

Grand Novelty Orchid-flowered Gladiolus

MRS. FRANK PENDLETON, JR. Order early to procure Mrs. Frank Pendleton, Jr. Awarded First-Class Certificate of Merit by the Massachusetts Horticultural Society of Boston and by the American Gladiolus Society at Baltimore, 1911. Its color is the most exquisite salmon-pink with a very conspicuous blood-red blotch in the throat on the lower petals. Per doz., $5.00; per 100, $40.00.

PINK AUGUSTA. Color a lovely soft pink. This variety is especially suitable for forcing under glass, for which purpose it is especially recommended. Per doz., 35c.; per 100, $2.50; per 1000, $20.00.

	Doz.	100
I. S. HENDRICKSON. A beautiful and irregular mottling of white and bright, deep pink; in some the pink and in others the white predominates. Flowers and spikes very large and fine	$.75	$4.75
MADAM MONNERET. Delicate rose; late bloomer. Per 1000, $26.75	.50	2.75

	100	1000
BRENCHLEYENSIS (true). Fiery scarlet.		
Top roots, XXX, 2 and 2½ inches	1.50	14.00
First size bulbs, XX, 1¾ to 2 inches	1.25	12.00
Second size, X, 1 to 1¾ inches	1.25	10.00
BODDINGTON'S WHITE AND LIGHT. First size, XX, 1¼ to 1½ inches	1.25	12.00
1900. Nothing finer for florists' use. Flower is of a rich shade of red, with very prominent white spots on three lower petals	1.75	15.00
MRS. FRANCIS KING. Color of flower is a light scarlet of a pleasing shade. First size, XX, 1¼ to 1½ inches	1.75	16.00
PRINCEPS. Color rich crimson, with broad white blotches across the lower petals. Flowers can be grown to nearly 8 inches in diameter under stimulating culture	3.75	35.00
GROFF'S HYBRIDS (Originator's strain). First size, X, very fine mixture	1.00	9.00
SHAKESPEARE. White and rose	4.25	40.00
AMERICAN HYBRIDS. XX. A mixture of the choicest varieties of Gladiolus in equal proportion; very fine	1.00	9.00
AMERICAN HYBRIDS. X. Very fine mixture	.85	7.50
STRIPED AND VARIEGATED	2.25	21.50
PINK AND ROSE SHADES	1.75	16.00
ORANGE AND YELLOW SHADES	3.50	32.00
SCARLET AND RED SHADES	1.50	14.00
LEMOINE'S HYBRIDS	1.50	12.00
CHILDSII. First quality, mixed; dark shades	1.75	16.00
Good quality, mixed; light shades	2.50	22.50

For Large Quantities of Gladioli, write for Special Prices. For a more general list see our retail catalogue, mailed free.

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

A Criticism of Agricultural Department Methods.

Editor HORTICULTURE:

Strictly speaking, I think that government should (a) collect taxes equitably (b) expend them equitably for strictly public purposes (c) prevent the strong from overpowering the weak. To adopt the language of the Carpenter: "Whatsoever is more than these cometh of evil."

I am inclined to this thought by a contemplation of page 1 of the bulletin from Office of Information, U. S. Department of Agriculture, released June 2nd, 1914. The instances on the first page of this bulletin give me the impression that the autocratic Department of Agriculture is exceeding the proprieties (P. 1) in punishing a manufacturer whose percentage of nicotine is 8.47 instead of 10, a difference which might easily occur because of the lapse of time. In the second paragraph the Department is not frank with the public. It fined the shipper because his nicotine was "less than 45 per cent." How much less? Probably another trifle. The third paragraph also lacks frankness. The shipper is fined fifty dollars ($50.00) because the goods "contained less nicotine than was claimed to be present." How much less? Perhaps another trifle.

The business looks like persecution, a result to be expected when government undertakes business which should be left to the individual. This is what the Department of Agriculture has been doing through many administrations. There should have been a cleaning-out when the democrats took hold; apparently there has not been. The Department still arrogates to itself prosecutor, judge, jury and executioner. The accused has little show for defence, however innocent he may be. These bureaucrats seem to think they must make a show to hold down their jobs, even at the expense of hurting innocent people.

SAMUEL MILLIKEN.

The Newport, Philadelphia.

Notes.

Atlanta, Ga.—A new seed store has been opened by the Smith Bros. Seed Company at 127 Whitehall street.

Flora, Ill.—The business of Borders, Chaffin & Co. has been purchased by the Louisville Seed Co., of Louisville, Ky.

Schenectady, N. Y.—The Schenectady Seed Store, Orlop & Ladeau, proprietors, have commenced business at 140-142 Clinton street.

Eric Sutton, son of Leonard Sutton, Reading, England, with Edward Tufnail, flower seed manager of Messrs. Sutton & Sons, are visiting the trade in this country. They were guests of Howard M. Earl at the Burpee Buildings, Philadelphia, and Fordhook last Friday. On Monday the party started for the west, Mr. Earl making his usual annual trip to California and Messrs. Sutton and Tufnail going to the Coast by way of Denver, and later on will visit the Burpee sweet pea cultures at Floradale, Calif.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

Prof. James G. Pray, director of the graduate school of Landscape Architecture at Harvard University, was the speaker at the Landscape Art Club Friday evening, May 22. Prof. Pray told of the opportunities open to men who had completed graduate work in landscape architecture. He declared that the field is far from being crowded, giving statistics of the average salaries paid such graduates to prove his point. In closing, the speaker pointed out some of the things that can be done in civic betterment.

The M. A. C. Country Life Club has its regular meeting Wednesday evening (May) of each week. The club, but recently formed, is making rapid strides forward. Its objects are to study all problems of country life, rural education, rural sociology and rural economics.

President Butterfield announced, recently, the signing of the bill by Governor Walsh for the agricultural building. This means that after a history of over fifty years, M. A. C. will be an agricultural college with an agricultural building to house that department.

The senior class in Landscape Gardening spent several days in visiting private estates in Lenox and Great Barrington, Mass. They visited sixteen places in all. The chief features of landscape importance were the magnificent views and the formal gardens. It was especially noted how well the estates were kept up and the splendid condition of the roads in that part of the state.

W. H. HATFIELD.

Warren, R. I.—James Rodger, formerly head gardener for Fred. Peck, of Barrington, has purchased the Vernon street greenhouses in this town and intends to put before the public a first-class line of plants and flowers. Mr. Rodger is an expert landscape gardener and is well known for his good work.

PHILADELPHIA NOTES.

Two old veterans have most unexpectedly come to my assistance. John Westcott and John Burton both declare that they have retired from gardening but that they are now glad to pay a premium to be allowed to wield the hose as of old and stand the thirsty plants a drink. So you see my little joke hit an echo in unexpected places.

Hail to good old Lancaster! Maybe you think that the virile red blood that flows along the banks of the good old Conestoga is getting sluggish with age. Forget it! And so they are going to have a flower show in Lancaster next fall. And we here in Philadelphia are all with them! The flower show's the thing. Beats all the newspaper talk. Come on everybody and help either with cash or exhibits.

Mr. Gracey reports that the date for the Florists' Club outing will not be the 16th after all but the 22nd. The changes from time to time are consequent on the Schuetzen Park being private club grounds and the arrangements of various members of which club and their affairs had to be consulted, and it was found difficult to make their dates and the dates suitable for the florists chime in. The games will start promptly at 3 p. m.

Mr. and Mrs. Wm. Kleinheinz leave for a trip to Europe about July 1st, and will return sometime in September or October. What will happen to Europe is not stated; neither are we in the confidence of America as to what might happen because! But we have much faith in the good lady; and with fair winds, and the Goddess of Good Fortune—we will welcome back our Wilhelm in due course. We cannot do without him.

Next Sunday the National Farm School people are to hold their annual spring festival. They will dedicate trees. They will give prizes to the most successful boys in horticulture. They will have speeches from distinguished men from far and near. They will have one grand old day for their multitude of admirers and sound on the harp with a thousand strings. They will have a Wiener lunch all day long. Dr. Washburn and Professor Fancourt will be everywhere and everyone can spend an interesting and enjoyable day. Train leaves Reading Terminal 9.30 A. M. and stops at all city stations. Return tickets $1.00. No other charge. Take the whole family with you. No pleasanter day imaginable. It will be a revelation in what is possible in farming and gardening if gone about in the right kind of way.

One of the events of the week is the rose and peony show at the Dreer double store on Chestnut street. All the finest varieties of these now in season are shown and the public are flocking to gaze, admire and buy. Mr. Thilow, Mr. McKubbin, Mr. Rothe and all the other well-trained and erudite employees are kept busy telling the visitors the interesting features of the different varieties. One of the "ferlies" of the rose show was the Daily Mail rose (Mme. Ed. Herriott); certainly very unique as to color and form. Another wonder was the yellow Paeonia lutea. Never saw it before; looked like a big double buttercup, the diameter of a dollar. The gem of the peony show, however, was that magnificent variety Mary Agnes Kelway, blush guard petals, cream center, immense in size and particularly perfect in form and substance. Calot, Wellington, Verschaffelt, and many other gems were there also in fine form. A show like this is a splendid public educator and good business besides. We can't have too much of it.

CHICAGO NOTES.

The florists' vocabulary sums up the condition of the wholesale market this week in one word.

Additional office help has been necessary at the Foley Greenhouse Mfg. Co.'s plant to take care of their orders.

The S. A. F. Convention at Boston is the objective point of many vacations this summer, judging from the comments heard everywhere.

Miss Loretta Foley recently distinguished herself in the play given by the Chicago Normal School Dramatic Club, of which she is president. Miss Loretta graduates in June.

The superintendency of Lincoln Park passes this week into the hands of Edward Kanst, Jr., who was formerly assistant landscape gardener of the South Parks. Lincoln Park will be in good hands and it is also a position to call forth Mr. Kanst's best efforts, being closest to the down-town district and preeminently the people's park on account of its easy access, its proximity to Lake Michigan and its magnificent "Zoo" of nearly two thousand animals.

Plant trade, always a large factor here, is showing still further increase this season. The augmented call for window and porch boxes and vases has made material for filling these greatly in demand, especially bright geraniums, ivy and vincas. Owing to an early frost last fall, which cut off the geranium plants before much of the stock was taken, the supply has been shortened and scarcely equal to the demand. An unusual amount has been sold without showing color. Trade in bedding plants in general has been very good and is not yet over. At the florists' stores, the greenhouses, the cemetery gates, &c., the season is still on. The department stores have also used enormous quantities of stock.

TEXAS NEWS NOTES.

Austin.

This section has had up to date 21 inches of rain since January 1st, and at this writing it looks as if more were coming. The earth is saturated and springs of long ago, that have been dry many years, are now supplying babbling brooks and rippling rill that the children have not known. Our prairies are aglow with the maroon and yellow of the gaillardia, bright with coreopsis and the many varieties of the primrose, the callirhoe, sepachys and castilleja, with here and there a fine blue cluster of Salvia farinacea and the fragrant bee blossoms of hymenopappus. Oh, a central Texas prairie in May is a dream, an ecstacy, a thing almost too beautiful to be real, and while it induces a love for them, it makes them so common as to demoralize the public as a purchasing power, but the spring will pass and this riot of flowers will disappear and the florist come back as a public necessity with his line of dependable staples. H. B. BECK.

Pres. Austin Florist Club.

Houston.

H. H. Kuhlman reports a very profitable business on gladioli. He intends to make extensive improvements on his plantation, consisting of several hundred acres, and expects to erect a modern range of glass in the near future.

The Houston Florists' Club met Monday night, May 18th, and several matters were taken up regarding the Flower Show. Also amendment to the By-laws and Constitution, that gave a broader field to the work, was adopted.

Mr. Hewitt, the new manager of the Brazos Hotel Greenhouses, is making several changes and with his new grower expects to have every thing in nice shape by fall. Mr. Hewitt has had a great deal of experience in the florists' business and will evidently make a splendid showing.

Already extensive preparations are being made for the flower show to be held in Houston, in November. This will be the first real state flower show that has ever been had but from present prospects it is going to be one of the great attractions of Texas for the year. There will be a big premium list and every branch of the floral industry is expected to be represented at this the first annual show. There have been to date five local florists' clubs organized in the state and each of these clubs have taken particular interest in the flower show and will do all they can to make it a great success.

Fort Worth.

It is gratifying to note the splendid progress that is being made by the florists throughout the entire state of Texas. In many instances old houses are being torn down and new ones are taking their places. Usually the old houses are left standing and new ones erected nearby. The latest order placed for a new house that has been called to our attention is that of J. E. McAdam, 815 Main street, Ft. Worth. This new structure is to be 27 by 200 ft. When this building shall have been completed it will afford much added space which Mr. McAdam has been in need of for some time.

Flower Market Reports

BOSTON

The story of last week, Memorial Day, and the present week in Boston is one from which very little comfort can be extracted by anybody. As predicted in these columns, there was an inundation of flowers for the floral holiday the equal of which never before encumbered this market. The peculiar sequence of weather vagaries during May all tended to a seemingly premeditated deluge of material, early things being delayed and late things hastened so that there was one grand conglomeration of outdoor and indoor products such as never happened before on one day. Growers and dealers who had the privilege of establishing prices for the stock paid little attention, however, to these portentious conditions which were plain to the eyes of anyone not purposely blind and proceeded to set figures just the same as if no accumulation existed. In the meantime the dealers in florists' supplies successfully executed a maneuver which beat all records and submerged the town under an avalanche of wreaths of prepared magnolia foliage with artificial flowers, very attractive to the eye of the average Memorial Day customer and at prices that were irresistible. With few exceptions the retail dealers went very heavily into these things. They extolled the keeping quality of these "most appropriate cemetery tributes" as compared with the soft, wilting, natural flowers at "extortionate" prices and certainly took full advantage of the opportunity to get even with the wholesale flower trade for many an old sore. Department stores, grocers, fakers and "hole-in-the-wall" merchants all joined in the game and the belated visitor to the cemeteries saw little else but preserved magnolia wreaths on all sides. It will be superfluous to attempt to draw a word picture of the wholesale flower markets under such conditions or to describe the fate of the mountains of roses and carnations, barrels of lily of the valley, stocks, sweet peas, candytuft, lilies, tulips and spiræs which were thrown upon this market last Friday and Saturday, so we shall ring down the curtain and give ourselves over to deep thought.

BUFFALO

The week previous to Memorial Day was rather a dull one, receipts heavy and sales at a low ebb. There was an over-supply on everything except possibly good colored carnations. Peonies, outdoor lilac, tulips, lily of the valley, narcissi, irises, deutzias and other stock helped break the market and still the outlet had not come. There was no sale for peonies till Friday and no season has yet been recorded where there were so few sold and at such low rates, the high figure being $5 per hundred for the best peonies, but the greater part sold for far less. The hot weather brought about a heavy supply of carnations, mostly white and Enchantress, and a greater portion had to be moved quickly, the weather had such a telling effect. The Beauty and other rose growers thought it was some other holiday than Memorial Day and roses of all grades, buds that never open and others that were full blown when taken from boxes were had in heavy supply. Sweet peas galore, lilies came in like Easter week, and there was the heaviest supply of any Memorial week than can be remembered. It can not be said that the volume of business was light, although the prices were away below previous years and in many cases the stock had to be forced on the buyers and at closing time on Saturday the coolers were still carrying a heavy supply.

It is very true that

Theodore Roosevelt

Put Oyster Bay on the map as far as knowledge of it to the outside world is concerned.

It is equally true that

The Pennock-Meehan Co.

Put Philadelphia on the map so far as the wholesale cut flower business is concerned.

It is equally true that we have many competitors but we are not jealous. There is room for us all in **THIS BIG WORLD.**

Get under the Pennock-Meehan Flag and March on to Prosperity.

CHICAGO

Unusual to a marked degree were the conditions Memorial week. Those who had anticipated quantities of stock were not disappointed but no one had expected such a glut of all kinds of flowers. The extreme temperature of the preceding week and the hot winds had rendered the carnations soft, and quantities of them were dumped from their boxes to the waste

Flower Market Reports

(Continued from page 844)

pile. Even much of so-called fancy carnations, shipped out in good faith were sleepy when received and Monday's mail brought protests from hundreds of out-of-town customers. Prices on the best carnations did not stay at five cents as quoted but were gladly moved for three, and Memorial Day made a record for low prices in all kinds of stock. For the retailers the conditions were somewhat reversed. They could limit their stock, which the wholesaler could not, and the lower prices pleased their customers and made ready sales. Sunday was counted as a part of the big day and sales in the retail stores kept up well until noon. The market on Monday was the scene of a general cleaning up and barrels of waste stock were thrown out. Today (Tuesday) every bucket and vase is filled to the limit and nothing short of a carnival could work off the stock. Peonies are going the way of the rest and it is unlikely that many of them will bring express charges. An enormous crop of roses is now on and sweet peas are coming in in great quantities while the usual miscellaneous flowers add to the supply. Cape jasmine is coming from the south. There is a fair supply of orchids. Very good lilies are also in. Lilacs and other out-of-door flowers are gone.

CINCINNATI Decoration Day proved to be far different than was expected. Most of the growers kept on sending in advance reports as to the prospective cuts for that day, so that while we all hoped for a very big supply we were expecting at the best only an ordinarily good one. Cuts were so large, however, that the market could not begin to use them all. Prices fell very rapidly from good ones to buyers' prices in job lots. The glut that was left over after the day is so large that the wholesalers are almost ready to pay you to take it away. Eventually they will have to pay when a large part of it is hauled to the dump. The hot weather also put a very big crimp in the demand for flowers. All the outdoor roses and other blooms blossomed out in all their glory and the people used these instead of buying flowers from their florists. Farmers and gardeners also came in with the crops from their gardens and sold them at any figure they could get for them. As far as having stock left over is concerned most retailers suffered as well as the wholesalers. A considerable number of flowers arrived in an unsalable condition. Happily some much needed showers on Monday brought cooler weather and as soon as this glut passes away market conditions will be back to their normal point.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS	Last Half of Week ending May 30 1914	First Half of Week beginning June 1 1914
Cattleyas	15.00 to 35.00	10.00 to 35.00

Lily of the Valley	.50 to 2.00	1.00 to 2.00
Snapdragon	1.00 to 3.00	2.00 to 3.00
Mignonette	.50 to 2.00	1.00 to 2.00
Daises, white and yellow	1.00 to 2.00	1.00 to 2.00
Sweet Peas (per 100 bunches)	2.00 to 6.00	2.00 to 6.00
Gardenias	10.00 to 25.00	10.00 to 25.00
Adiantum	.50 to .75	.35 to .75
Smilax	10.00 to 16.00	10.00 to 16.00
Asparagus Plumosus, strings (per 100)	35.00 to 50.00	35.00 to 50.00
" " & Spren (100 bunches)	15.00 to 35.00	20.00 to 35.00

NEW YORK There was no noticeable advance in prices for Memorial Day in this market. The volume of flower receipts was tremendous, and then there was not the amount of carnations shipped out as has been the usual case. Carnations were especially very plentiful, selling from $1.00 to $3.00 per hundred. Last year the prices were double. Peonies arrived in lots of thousands of dozens, fine quality of the best varieties, and sold only fairly well at 25c. and 50c. per dozen. Best lily of the valley did not realize more than $20.00 per 1,000. Roses went from $5 per thousand to $5 per hundred for the best. This was the situation all along the line. There was also an enormous abundance of outdoor flowers—snowballs, spireas, etc., all of which helped to overload the market and keep the prices on other stock down. Summed up, one might say that a tremendous amount of flowers were sold, but the average prices obtained were low as compared with former years. Again the growers repeated their folly of holding back their cut in order to have heavy shipments on the holiday. Imagine, for example, holding back carnations a week in the very hot weather prevailing the early part of the week. Box after box of carnations were noticed with blooms all dried up. At present the market is still overstocked with all seasonable flowers. Poenies are overplentiful and do not clean up even at $12.50 and $15.00 per thousand. Business is very moderate, and one half of the supply would easily fill all demands, but it may be that, some of the outdoor stock being finished, and some of the growers throwing out to replant, a stiffening up of prices and a better cleanup of the daily receipts may be had.

PHILADELPHIA Not in the memory of the oldest wholesaler has there been such a redundancy of supply in the cut flower market as last week. The whole world was full of flowers, and all the country people seemed to think Philadelphia was crazy for every out-door blossom. One wholesaler said that he had been in the business for twenty-eight years and that during all those years he had never seen anything like it in the way of plethora. Every man in the wholesale centers worked five times as hard as he had ever done before in Memorial week and shipped out five times as much stock as he had ever done before, but when it came to dollars and cents there was very little to show for it over previous years. Commissions are based on high prices, and when prices go to pot the commission dealers are practically working overtime for nothing. They must increase their charges for marketing or else go broke! Up to May 25 things looked all right. A hot spell brought not only the avalanche, but it made the flowers soft so that their shipping qualities, no matter how freshly cut or how carefully packed, were impaired. And the retailers at distant points—did they have common sense or courtesy? In many cases they ordered shipments returned, causing double expressage when a telegram might have saved the situation. Isn't there such a thing as being a good business man and being a gentleman at the same time? Of course everything suffered—indoor stock as well as outdoor stock. Peony Festiva maxima that was selling for ten to twelve cents a bloom a few days before was being offered on the street Saturday—nice freshly cut blooms—twelve for a nickel. A sad story. The "surplus devil" reigned supreme.

"Non-Puncture" Auto Tires

Guaranteed 7,500 Miles Service

These tires bear the greatest known mileage guarantee, yet are sold at a price even less than tires of ordinary guarantee. This guarantee covers punctures, blow-outs and general wear. Guarantee covers 7,500 miles service against everything except abuse. These tires are intended for most severe service.

Orders have been received for these tires for use in United States Government Service.

As a SPECIAL INTRODUCTORY offer, we will allow the following prices for the next ten days.

TIRES—TUBES

	Tire	Tube
28x3	$9.20	$2.00
30x3	10.25	2.30
30x3½	13.50	2.80
32x3½	14.05	3.00
34x3½	15.25	3.20
31x4	17.00	3.25
32x4	18.00	3.30
33x4	19.50	3.40
34x4	20.10	3.60
35x4	21.00	3.80
36x4	22.00	3.90
35x4½	26.00	5.00
36x4½	27.00	5.10
37x4½	27.50	5.15
37x5	32.60	5.40

All other sizes. Non-Skids 20 per cent. extra. 5 per cent. discount if payment in full accompanies order and if two are so ordered, shipping charges will be paid by us. C. O. D. on 15 per cent. of amount of order. Our output is limited, so we suggest early ordering. We sell direct only, giving purchaser the advantage of all middlemen's profits.

NON-PUNCTURE RELINERS.

Use our famous reliners, they eliminate blow outs and 90 per cent. of punctures besides giving many thousand more miles service to each tire. When in your tires you ride without worry or tire troubles.

NON-PUNCTURE RELINERS

For all 3 inch tires	$1.95
For all 3½ inch tires	2.20
For all 4 inch tires	2.60
For all 4½ inch tires	2.75
For all 5 inch tires	2.90
For all 5½ inch tires	3.00

NON-PUNCTURE TIRE FACTORY

Dayton, Ohio

FIRES.

A three-story wooden and iron-covered storehouse at A. H. Hews & Co.'s pottery, North Cambridge, Mass., was gutted by a menacing three-alarm fire early Monday morning, June 1. Frank Fellows, a night watchman, discovered the fire shortly after 2.15 A. M. and sent in an alarm. When the firemen arrived the entire building was in flames and a third alarm was given. Several dwellings were threatened and the occupants made a hasty exit, carrying their children. The loss is estimated at $8,000.

Arlington, Mass. — The greenhouse of John Lyons on Brooks avenue was damaged by fire on the evening of May 27th. The damage amounted to about $200.

Flower Market Reports

(Continued from page 847)

ST. LOUIS Decoration Day business this year fell off somewhat. From reports gathered from some of the leading florists throughout the city, there was not the same feeling displayed as in former years, and we can attribute it only to the fact that too many out-door flowers were in this year, as the displays at the cemeteries plainly showed. The wholesalers had great piles of stock all week long and prices did not change any except only on extra quality stock and there was very little of this to be had, as the extremely hot weather hurt the quality in roses, carnations and sweet peas. Cape jasmines and gladioli were fine, so were peonies; all these were in abundance. A great deal of cheap out-door truck was sent in which were sold in baskets for grave decorations.

Obituary

Anson Wheeler.

Anson Wheeler, aged 50, died on June 1 of diabetes at his home at Nine Acre Corner, Concord Mass. Mr. Wheeler, who was born in Concord, leaves a wife, two sons and three daughters. He gained wide repute as a greenhouse farmer, having one of the largest plants in the state. He was a member of the Boston Market Farmers' Association and was prominent in town affairs.

Van Teylingen.

One of the Holland bulb salesmen has made his last visit to the American trade and he will be missed by the trade, with whom he was a general favorite. For many years Mr. Van Teylingen has made a yearly visit in the interest of Van Zanten & Co. of Hillegom, Holland, and the firm is sending out announcements of his death on May 7th, stating that they consider their loss as that of a brotherly friend as well as of an able business assistant. He leaves a wife and four children.

Tarrytown, N. Y.—Informed that the I. W. W. and other free speech advocates from New York planned to stage a demonstration on June 3, "Rockefeller's town" was active early to meet the threatened invasion.

Scores of special constables, clubbed and armed, were on duty ready for an instant call, every road into the town was watched and—crowning device—the whole of Fountain Square, the town's forum, was covered with fresh asphalt.

"There will be no free speech meeting, or any other kind of meeting in the square today," Village President Pierson said. "If any gathering is attempted we'll break it up with clubs and if that doesn't do we'll turn on the fire hose. Cold water, I guess, will bring calm."

LEMON OIL CO'S STANDARD SOLUBLE IN WATER INSECTICIDE NO ODOR NO POISON

POISON **KIL-WORM** POISON

Destroys Worms, Ants, &c., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to snails. Does not **injure** grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants). One gallon Kil-Worm makes 50 gallons liquid when mixed with water. 1 quart, $1.00; 1 gallon, $3.00; ½ gallon, $1.75; 5 gallons, $13.50.

POISON **KIL-WEED** POISON

A scientific Weed Destroyer free from odor. An unsurpassed preparation for the removal of grass, weeds, vines and bushes from paths, &c. Saves expense of several men; can be applied with an ordinary sprinkling can. One gallon Kil-Weed makes 30 to 35 gallons liquid when mixed with water. 1 quart, $0.35; ½ gallon, $0.60; 1 gallon, $1.00; 5 gallons, $4.00; 10 gallons, $7.50; 1 barrel, per gallon, $0.65.

RAISE PIGEONS

THEY PAY DOLLARS WHILE CHICKENS PAY CENTS

The young, 20 to 25 days old, sell for 40 to 60 cents each (according to the season). The city markets are always clamoring for them.

Each pair of Pigeons will raise 18 to 22 young a year.

They will clear you, above all expenses, $5.00 a year per pair. They breed the entire year. Twenty minutes daily will care for 100 pairs.

Always penned up out of the way. Very small space required

All this is fully explained in this month's issue of our Journal; send for it; price 10 cents.

Reliable Squab Journal, Versailles, Mo.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

27 & 29 OCEAN ST., - BEVERLY, MASS.

Unequalled for Greenhouse and Landscape Fertilizing

THE PULVERIZED MANURE CO.

31 Union Stock Yards, Chicago

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

When writing to advertisers kindly mention HORTICULTURE.

Aphine

The Insecticide that kills plant Lice of every species

The Recognized Standard Insecticide.

W. N. Craig writes in Florists' Review (March 5th, 1914): "Scale on greenhouse plants is not easy to get rid of, as doses which are sufficiently strong to kill the scale will usually disfigure the plants at the same time. I have found APHINE a first-class remedy for scale, and if you will apply it according to directions you will kill and loosen the scales, although they will not fall off, as will some other pests."

It will only require the hose to wash off dead scale.

A remedy that is efficient in destroying scale, will destroy green, black, white fly, red spider, thrips and mealy bug.

$1.00 per quart—$2.50 per gallon.

FUNGINE will destroy mildew, rust and bench fungi.

75c per quart—$2.00 per gallon.

VERMINE will destroy root maggots, eel wire and cut worms in the soil.

$1.00 per quart—$3.00 per gallon.

SCALINE will destroy San Jose and all hard scale and red spider on fruit and ornamental trees and bushes.

$1.50 per Gal—10 Gals. $10.—50 Gals. $37.50

NIKOTIANA—a 12% nicotine for fumigating over small lamps or by painting on steam pipes.

$1.50 per quart—$4.50 per gallon.

For Sale by Seedsmen.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

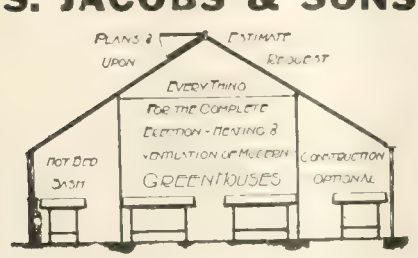
Greenhouse Shading



AFTER many years of experience in greenhouse work with Lord & Burnham Company, in the glazing and painting department, I am convinced that what is needed most is a good shading, and I am pleased to tell you that I have the real thing which you are all looking for.

My shading is beneficial to the painted wood, as it contains nothing but pure linseed oil; it is also beneficial to the glass. You will be surprised by the brilliancy left in the glass when the shading is removed. It is very easily applied by spray or a soft brush; I prefer the brush.

Made up in gallon cans. Colors; light green, blue and pure white. If you will give it a fair trial I am sure you will agree that it has proven its worth.

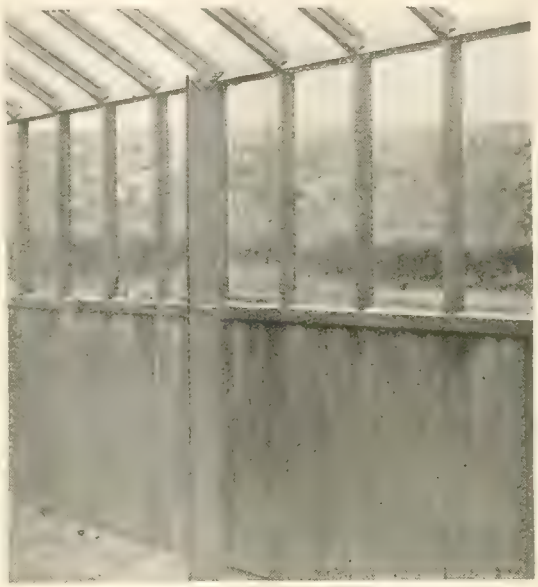
How Our Greenhouse Posts Save You Money



THEY save you money by making you spend less money. Putting it the other way about—you do actually spend more at the very start—but that's the end of it.

Listen to this. 30 years ago we put up some houses for the Piersons at Scarborough, N. Y., and used wrought iron posts. Five years ago in replacing the base board they dug down around the post just to see how it was, and found it practically as good as the day it was put in. But listen once more—these posts were **wrought iron**—not steel.

Wrought iron is hard to get these days. You may **pay** for wrought iron; but that's no surety that it's not steel. The firm you buy it of might buy it of a firm who **"said it was."** We don't take anybody's "say so" for anything we buy—**we test everything.** It's the only safe and sure way.

Of course, we would like to sell you materials for your entire house, but if you are not quite ready for that yet, then why don't you try our guaranteed wrought iron post and patented galvanized Ice Clearing Eave Plate with roof bar clasps attached? It would **be** sure enough a good start in the right direction.

Tell us the length of your house and we will tell you exactly what the guaranteed wrought iron posts and galvanized eave plate and clasps will cost.

Our wrought iron one ought to last a half century or more.

Lord & Burnham Co.

SALES OFFICES:

NEW YORK 42nd Street Bldg. | BOSTON Tremont Bldg. | PHILADELPHIA Franklin Bank Bldg. | CHICAGO Rookery Bldg. | ROCHESTER Granite Bldg. | CLEVELAND Swetland Bldg.

TORONTO, CANADA, 12 Queen St., E. FACTORIES: Irvington, N. Y. Des Plaines, Ill.

Some of the Special Features of Construction in the N. F. McCarthy House at Montrose, Mass.

IT is 60 feet wide and 250 feet long. Height of ridge 23 feet 3 inches. The rafters and side posts are in **one piece** from the ground line to the top of the "I shaped" columns at which point there is a **special** combination splice plate and column top fitting. You will be interested to know that the bend of the rafter at the eave **is not welded,** but one continuous piece, bent when at white heat.

This eave needs no reinforcing plates and is neat and light, yet strong, being absolutely practical in every particular. The weight of the roof is supported by two "I shaped" columns across the house. The trussing is the compression type. The sides are 8 feet. The continuous ventilating sash, directly under the eaves, is 2 feet 6 inches, below which are 3 feet of fixed glass. The sash sill is bolted to an angle iron to which is secured our Patented Sliding Shaft Ventilating Aparatus. The entire run of over 230 feet of this sash is operated with perfect ease by only one gear which is **placed at the extreme end.** Every sash opens absolutely alike. It works on a direct push and pull principle. No lost motion.

The ridge ventilating apparatus is equipped at the hand wheel with a tell tale device that shows you at a glance exactly how many inches the sash is open. Last Winter the big snow and blow that took so many houses down, came on this house just after it was glazed and no **heat in.** The weight of the snow was something terrific. The loosening of a very few lights of glass at the eaves was all the damage done. It's just another case of being able to depend on depending on Hitchings houses. And we go anywhere for business.

HYDRANGEAS

EXTRA LARGE PLANTS IN TUBS AND BARRELS FOR SUMMER FLOWERING

We make a specialty of hydrangeas, and have a very large stock of plants which have been kept backward and which are now just beginning to set buds. They are in fine shape for shipment, and will bloom from June to August. Plants are heavily budded, and are exceptionally good value.

We have always made a specialty of large hydrangeas for summer-blooming, and we never had such a fine stock as we have at this time. We have a very large stock, especially of the plants in barrels, and can supply carload lots.

Fine plants in tubs.....$2.00 and $3.00 each.
Extra fine specimens in half-barrels.....$5.00, $7.50 and $10.00 each.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

LIBRARY
NEW YORK
BOTANI
GARDEN

Bouvardias

Nice stock out of 2 inch or 2½ inch pots planted out now will give the plants for benching in September. Allow about 12 inches of room each way, making use of a good mellow loam for planting. Flowers are not wanted on them at this season and the shoots should be kept pinched back whenever they run away and show an inclination to flower. Keep the ground well cultivated about them and if the weather becomes dry keep them watered and their growth will not be checked. There is no more to their culture than other plants, such as roses or carnations, require and you can have them in flower from October on to the last of March. These flowers come in very handy during the winter. The only thing they want is good rich soil and a light house, where the temperature can be kept at about 60 degrees during the night.

Care of Newly Planted Chrysanthemums

While the chrysanthemum is considered quite easy to grow, it will require good attention from now and until the flowers are cut. In watering the benches it is a better plan to water only just around the plants until they have made new roots when the whole bed can be watered. On bright days give them a good syringing getting well under the foliage. Do not allow the benches to become overrun with weeds. Keep the soil well cultivated between the plants which will help to keep the compost sweet while heavy syringing is needed. Chrysanthemums are air-loving plants so do not coddle them at all, but give them all the ventilation possible. Do not leave them too long without supports as the syringing is very liable to knock them about.

Cyclamen

An important plant that is often neglected at this busy season. In the coming three months they will either make good plants or be failures. Be certain that they do not become potbound, or chances of their doing well are much lessened. Cyclamen will now be ready to go into 4-inch pots and there can be no better place for them between now and the end of September than cold-frames, where the plants will not be kept too close to the light. The glass should be shaded by lath coverings which also keep the plants cooler. Keep the sashes open, both top and bottom all this time. This is easily arranged by making a temporary wooden framework a few inches high and standing the sashes on this. This allows a current of fresh air to strike the plants constantly.

Outdoor Roses

Some of our best roses always suffer more or less from mildew at about this time, notably moss roses, some varieties of the hybrid perpetual class and nearly all of the multiflora section, of which Crimson Rambler is the most striking example. However, it can be kept in check to a considerable extent by a timely use of such remedies as ammoniacal copper solution, grapedust and powdered sulphur, in mild but frequent applications. The June bug is one of the early callers and a marauder that defies the common tactics of the rose grower. Dustings and sprayings of deadly decoctions are of little avail in its case. Gathering the bugs by hand is the best way to bring about a noticeable scarcity of June bugs. Roses out of doors are hardly ever troubled by red spider, if well attended to, but when once infested it will be found that the evil is much harder to fight in the open than under glass. Syringing, forceful and often, in any event a great help to roses in hot and dry weather, is the remedy here as well as indoors.

Summer Treatment of Potted Roses

I have found that potted roses intended for next winter's forcing or for the plant trade in the spring, do better if kept constantly in the greenhouse during the hottest part of summer than they would anywhere out of doors. There is no doubt that roses grown in pots all summer are much easier to manage and give greater satisfaction when forced the following winter than roses grown in the open field and potted up in November. These make a steady and most rapid growth up until about the middle or end of August. By that time they have undergone the last of the many shiftings from pot to pot that are necessary to keep them in good shape, and at a rapid headway. When growing fast they need a deal of water and a sprinkling once or twice a day. The essence of advancement in any trade lies in the production of a better article from year to year, not in the searching for or finding of easy methods alone, especially not when this tends to decrease the commercial value of the output.

Sowing Late Annuals

Now and up until the last week in this month is a good time to sow a number of annuals for cutting. These are all suitable to sow: Clarkias, candytufts, calendulas, coreopsis, larkspurs, lupines, Shirley poppies, etc. The only trouble is to get the seed to come up good, on account of the dry weather, so it is well to sow where they can be handy for water. Use the hoe freely between the rows.

Mr. Farrell's next notes will cover the following: Calceolarias; Eucharis amazonica; Ferns in Frames During the Summer; Orchids; Pruning Shrubs; Watering.

Among the master spirits

Three events of national importance and interest are yet on the program for June. They are, the annual gatherings of the American Seed Trade Association at Washington, D. C., June 23, 24 and 25; the American Association of Nurserymen at Cleveland, Ohio, June 24, 25 and 26; the American Sweet Pea Society, New York City, June 27 and 28. The programs of the seed trade and sweet pea meetings we have already published and in this issue we now present the program which has been prepared for the nurserymen. As usual, it provides a veritable feast of good things from which no progressive nurseryman can afford to absent himself. If you are interested in the nursery trade don't fail to read this prospectus through carefully and we believe you will heartily agree with us that it is well worth the cost of a trip to Cleveland. We have always considered the privilege of a visit to Storrs & Harrison's at the neighboring town of Painesville and an hour or two in company of Robert George alone worth the trip to Cleveland. The nurserymen of today are well skilled in the art of interweaving relaxation and amusement with serious business and we are almost envious as we think of the good time ahead in Cleveland.

"Special days" as show promoters

Those of our readers who took especial interest in the recent Spring Flower Show at the Grand Central Palace, New York City, may recall that one day in the week was set apart on the initiative of the Brooklyn florists, as Brooklyn Day and that as a consequence the Brooklyn press whooped it up heartily and the Brooklyn people and the Borough officials turned out with much enthusiasm on the afternoon and evening of that day. Anyone who attended the show on Brooklyn Day was given plenty of reason to realize most emphatically that Brooklyn is "on the map." The report of A. L. Miller (who was a prime mover in the affair), before the New York Florists' Club last Monday night, was received with much approbation and favorable comment and the suggestion that other places, such as Jersey City, Newark, etc., might well follow the example of Brooklyn at the next show, was heartily applauded. The idea has so much to commend it that we feel called upon to draw attention to it in our editorial notes with a view of possibly awakening a wider interest in this most excellent means of publicity and increased popular support for flower shows, in New York or elsewhere. Its availability as a stimulation for flower shows, in the direction in which flower shows are proverbially weak, is easily apparent. But, if you are disposed to try it out, remember that you must have a few hustlers who will take off their coats and work unselfishly, with absolutely no thought of personal or trade advantage.

The regal family among shrubs

A most valuable contribution to gardening knowledge is the extract which we publish this week, from the Arnold Arboretum of Popular Information on the hardy evergreen rhododendrons. The evergreen rhododendrons are indisputably the regal family among garden shrubbery wherever climate and soil are adapted to their culture. As is commonly known, they will not thrive in limestone soil but we believe, nevertheless, that they might be much more generally cultivated than is the case. Much of the prevalent ideas concerning the unreliability of rhododendrons as hardy garden subjects is due to the planting of tender varieties or of hardy varieties grafted on tender stock, enormous quantities of which are imported from Europe every year for forcing purposes, for auction sales or department stores. The list of varieties given in the Bulletin might safely be enlarged by the addition of quite a number of equally trustworthy varieties, but it is a good reliable one and the sorts mentioned are all in perfect form this season in the neighborhood of Boston after a winter of great severity, the thermometer registering at times fifteen to eighteen degrees below zero. The copious late rains of last fall are believed to have been a great help to these plants. Some shade from the rays of the morning and noon sun is a requisite for the rhododendron and a generous mulch of leaves every fall, which is allowed to remain and decay, is another requirement. We think a mistake was made in omitting from the Arboretum list that old champion Caractacus. For hardiness, rapid growth and profusion of bloom it has no superior thus far, and if we were to select but three, this would be one of them.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Fires

With the prices of the roses down, so that they are cheap, it is often a case for some thinking whether or not to give the houses the heat they may require early in the morning on some days when it is real chilly. We would advise keeping the temperatures up to the mark, for even though the cost of production may thus be increased the returns will be greater in the long run. There is such a thing as working up a strain of roses that will produce flowers of a better quality, and in greater numbers. To do this will require several years good care and constant attention. Here is where all the good care points will count, no matter how small the little things are. We would not close the ventilators up tight, thus to save a little coal,—we would rather keep them open, a little at least, and give the houses the amount of heat they may require. To help keep mildew at bay we would not allow the thermometers to drop below 64 degrees F. as the days are warm, even hot, and too great a difference between the day and night temperatures is not good for the plants, to say the least. Where steam is installed it will take but little coal and trouble to keep a pipe going in each house, and that will be all that is necessary.

Damping Down

Damping down in the rose houses? We never do it, although many will claim it must be done. We tried damping down twice a day through several houses one time and we could not get rid of blackspot through this section. We gave it up and never attempted it again. It is all right in its place, and when tender crops are forced they could not do without it. Roses, we find, will only get soft and will be more subject to disease if this system is used. Where too much concrete has been used through the houses, and it gets very hot, a coat of ashes over the walks will help keep the houses cool and at the same time keep the atmosphere damp enough to encourage plant growth, instead of hindering the same. Keep the newly planted plants wet enough at the roots, taking care of course not to overdo it, and they will require very little moisture in the air to thrive good.

Red Spider

Keep after this pest all along, and see that it does not have a chance to get at the young plants at all. Syringe as often as possible, taking care not to get the benches too wet for this would encourage plant growth, while the roots would sit still. Get the roots there first, and when these are well formed, water and feed will make the plants move. When there are no roots—then of course the growth will not be very prolific, for there will be nothing to transform manure, water and chemicals into leaves, stems and flowers, which are so badly needed on the plants.

Fumigating

Growers who have kept their houses real clean and free from insects of all kinds will have no occasion to worry because they will not be able to fumigate regularly. Where there is fly to contend with, however, the case is different, and should it be impossible to fumigate because of heat, use some good spray and see that all parts of the plants are reached.

It is not necessary to drench the plants, for it is far better to merely fog them; the spray is then equally effective and far less harmful to the plants, also only about one-third of the amount used the other way will be required.

Liming

Where the plants are showing the least traces of soft growth, and a weak appearance all the way around, a light dose of lime will be very beneficial. This will also help dissolve all the food that may be in the soil, and the plants will then make use of it, allowing little if any to go to waste.

Do not use too much lime at a time, and do not use ground limestone for it is far too slow in action. Use only quick burnt lime that has been air slacked, as that will give you immediate results and that is what we not only want, but must have in our business.

A NEW VOLUME OF HORTICULTURE

BEGINS JULY 1

¶ That will be a good time for new subscribers to get in line. Old subscribers can confer a favor on their friends, as well as on "Horticulture" by recommending this paper. Once a subscriber always a subscriber is usually applicable to those who read "Horticulture," as our office records show. If not already a member of "Horticulture's" rapidly growing family, you cannot make better use of a dollar, than by starting in now.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS

THE CONVENTION GARDEN.

The open air garden of the Boston S. A. F. Convention to be held in August, now bids fair to being the greatest event of its kind ever held in this country. The late spring and a rather slow response on the part of the growers made the outlook somewhat dubious at first, but such a generous response has been made during the past week from the active work of the Executive and Garden Committees, that a very large portion of the garden—nearly 30,000 square feet—has already been planted. Deputy Park Commissioner Shea, who is chairman of the Garden Committee, ably assisted by the other members, Patrick Welch, John K. M. L. Farquhar, Thomas Roland, E. Allan Peirce, Wm. J. Kennedy, and Wm. J. Stewart, have done energetic work and a great success is assured. However, more exhibits are needed yet to bring it up to the standard hoped for. It is a great mistake not to be represented, as the occasion will be one long remembered in Horticulture and productive of great results to those who participate, as it is estimated that over 500,000 people will view the garden during the summer. The time is growing short and those who have not already taken space at the small cost required, should do so at once. Many fine plots from $10 and up for the season are still available. This includes all costs of planting, preparation, and maintenance. All goods should be shipped to James B. Shea, Chairman Convention Garden, Back Bay Fens, Boston, Mass. For particulars, address James B. Shea, 33 Beacon Street, Boston.

Among those who have already taken large spaces are: Robert Craig, Inc., Knight & Struck, Arthur Cowee, A. H. Hews & Co., Bidwell & Fobes, A. T. Boddington, A. N. Pierson, Peter Henderson & Co., F. W. Fletcher & Co., R. & J. Farquhar & Co., John Lewis Childs, William Tricker, W. A. Manda, Henry A. Dreer, Carter's Tested Seeds Inc., James Vick's Sons, E. E. Stewart, Samuel J. Goddard, B. Hammond Tracy, Mt. Desert Nurseries, Harry Quint, The Conard & Jones Co., Henry R. Comley, W. W. Edgar Co. and William Sim.

BOSTON CONVENTION HOTELS.

Boston is noted as a great convention city, and it is anticipated that the 1914 S. A. F. Convention will pull out the strength of the society. From all over the country letters are coming in from the members, announcing their intention of attending this convention.

The Hotel Committee has made excellent arrangements and, with but few exceptions, can hold reservations until August 15th. It will be best to write direct to the hotel for reservations, but the Committee would suggest intending visitors sending duplicate announcements to the office of General Secretary, 120 Boylston street, Boston, Room 702, as a record, as it is the desire to help members in every way. Besides the hotels below listed there are a number of other excellent family hotels in the vicinity of the garden and hall and innumerable first-class furnished rooming houses and reasonable priced restaurants.

People intending staying at Back Bay hotels (these are designated by a *) or looking for furnished rooms, should leave trains via N. Y., N. H. & H. R. R. and Boston & Albany R. R. at the Back Bay and Huntington Avenue stations of those roads, and also have their baggage checked accordingly. For the down-town hotels the South Terminal Station will be equally convenient. Patrick Welch, 226 Devonshire street, Boston, is chairman of the Hotel Committee.

List of Hotels.

The Copley Plaza, Copley Square. Selected by the Executive Board as Official Headquarters. One block from the Back Bay and Huntington Avenue R. R. Stations (250 rooms.)

With bath, one person, $3.00, $3.50, $4.00, two persons, $5.00, $6.00, $8.00 per day.

Copley Square Hotel (250 persons), 49 Huntington Ave., close to Exhibition Hall. Single room, with bath, $1.50 to $3.00 per day; $1.00 per day additional for two persons in one room.

*Hotel Lenox (150 rooms), Boylston and Exeter Sts. (Close to Hall, ten minutes to Garden.)

Single room, $1.50, $2.50; with bath, $2.50, $3.50 per day. Double room, $2.50, $3.00; with bath, $3.50, $5.00.

*Hotel Nottingham (75 persons), 25 Huntington Ave. (Close to Hall, ten minutes to Garden.)

Room, one person, $2.00, $2.50, with bath, $3.50, $4.50, $5.00 per day. Each additional person in room $1.00 day extra.

Young's Hotel (50 rooms), Court Square (Twenty minutes from Garden and Hall.)

With bath, $2.50 to $6.50 per day; without bath, $1.50 to $4.50 per day.

Hotel Bellevue (25 rooms), 21 Beacon St (Half hour from Garden and Hall.)

Without bath, $2 to $3.50 per day; with bath, $3.50 to $6.50 per day.

New American House (150 people), Hanover St. (Half hour from Garden and Hall.)

With bath, $2 to $4.50 per day; without bath, $1 to $2.50 per day.

*Hotel Somerset (250 people), Commonwealth Ave. (Close to the Convention Garden.)

With bath, $3 to $4 per day, without bath, $2.50 to $3.50 per day.

*Hotel Thorndike, Boylston St. (Fifteen minutes from Garden and Hall.)

Without bath, one person, $1.50 to $2.50 per day; with bath, $2 to $4 per day.

Hotel Touraine (25 rooms), Tremont and Boylston Sts. (Fifteen minutes from Garden and Hall.)

Without bath, $2.50 to $4 per day; with bath, $3 to $6.50 per day.

Adams House (50 rooms), 553 Washington St. (Fifteen minutes from Garden and Hall. Shopping district.)

Without bath, $1.50 to $4 per day; with bath, $2.50 to $5 per day.

Parker House (50 rooms), School and Tremont Sts. (Twenty minutes from Garden and Hall. Business district.)

With bath, $2.50 to $4.50 per day; without bath, $1.50 to $3 per day.

Hotel Essex, near South Station. (Forty-five minutes to Garden and Hall. Poor connections.)

With bath, $2.50 per day and upwards; without bath, $1.50 per day and upwards.

*Hotel Brunswick (150 rooms). Ten minutes to Garden and Hall.

Without bath, $1.50 per day and upwards; rooms with baths, $2.50 per day; when occupied by two persons, $1 per day extra.

Hurlburt's Hotel, Washington St. (Twenty minutes to Garden and Hall. Business and shopping district.)

Without bath, $1 to $2.50 per day; with bath, $2 to $3 per day.

*Westminster Hotel (30 rooms), Copley Sq. (Ten minutes to Garden and Hall.)

Room and bath, $1.50; two-bed rooms and bath, four in rooms, $2.

CLUB AND SOCIETY NOTES.

H. A. Bunyard will lecture before the Michigan Garden Club at Detroit, about June 24, with a fine set of stereopticon views of herbaceous garden plants, etc.

Harry A. Bunyard lectured before the Staten Island Garden Club, at Dongan Hills, L. I., N. Y., on Saturday afternoon, June 6. His subject was a broad one—hardy perennials, sweet peas and rhododendrons—and the sixty laides who made up his audience were appreciatively demonstrative.

At the Chicago Florists' Club meeting, June 4th, M. Barker, chairman of the Peony Committee, announced that owing to the extreme warm weather the Peony Show would be held June 9th and 10th in the Art Institute, instead of June 12th and 13th as originally planned. The Transportation Committee made its report on rates, etc., for the trip to the Boston S. A. F. Convention, via Lake Shore R. R. The Picnic and Sports Committee were instructed to make arrangements for the regular yearly picnic. Poehlmann Bros. exhibited some very nice carnations. J. B. FOLEY, Secy.

The schedule for the annual rose show of the Nassau County (N. Y.) Horticultural Society has been prepared. The exhibition is to be held at the Nassau Country Club on June 16, at 2.30 P. M. Thirty classes are provided for, among them ten for roses, ten for other outdoor flowers, six for vegetables, three for fruit and a class for table decorations, which will be a feature. A. G. Hodenpyl offers a cash prize for a collection of 12 kinds of vegetables. Among the prominent exhibitors will be W. V. Hester, Herbert L. Pratt, W. E. Kimball, Mrs. F. S. Smithers, A. G. Hodenpyl and Mrs. B. Stern.

At the meeting of the New Bedford Horticultural Society, held June 2, dates were fixed for the June shows as follows: Peony show on the 17th and the rose show on the 24th. Additional prizes amounting to $50 were received from Chase Brothers Nurseries. These exhibitions are free to the public. Premiums were offered in both the amateur and professional classes for the person making the most successful exhibits at the regular meetings of the society. The speaker of the evening was Thomas J. Grey, the veteran seedsman of Boston, who entertained the members with an interesting recital of his experiences in his trip to Minneapolis to attend the annual meeting of the Society of American Florists.

CLUBS AND SOCIETIES

AMERICAN ASSOCIATION OF NURSERYMEN.

Program for the Annual Convention, at The Hollenden, Cleveland, Ohio.

Wednesday, June 24, 1914, 9:30 A. M.—Invocation: Rev. C. S. Harrison, York, Nebraska; Address of Welcome, Hon. Newton D. Baker, Mayor of Cleveland. Response, J. W. Hill, Des Moines, Iowa. President's Address, J. B. Pilkington, Portland, Oregon. Report of Secretary, John Hall, Rochester, N. Y. Report of Treasurer, Peter Youngers, Geneva, Neb.

Committees—Entertainment, W. B. Cole, Painesville, O.; Legislative, East of Mississippi River, Wm. Pitkin, Rochester, N. Y.; West of Mississippi River, Peter Youngers, Geneva, Neb. Tariff, J. McHutchison, New York; Transportation, C. M. Sizemore, Louisiana, Mo.; Co-operation with Entomologists, L. A. Berckmans, Augusta, Georgia; Root Gall, E. A. Smith, Lake City, Minn.

Paper, "The Mission of Beauty," C. S. Harrison, Harrison's Select Nursery, York, Neb.

Wednesday Afternoon, 2 o'clock—"Some Reminiscences," Ethan Allen Chase, Riverside, California.

"Pecans for Profit," W. C. Reed, Vincennes, Indiana.

Uniform Legislation (Report of Committee), William Pitkin, Secretary to Committee.

Discussion—Prof. J. G. Sanders, State Entomoligist, Madison, Wis.; Prof. E. L. Worsham, State Entomologist, Atlanta, Ga.

"Roses." Illustrated with Lantern Slides. Robert Pyle, Pres. The Conard & Jones Co., West Grove, Pa.

"Ohio Nurseries." Illustrated with Lantern Slides. N. E. Shaw, Ohio State Inspector, Columbus.

Wednesday Evening at 7.30—Meeting of American Nurserymen's Protective Association. Thomas B. Meehan, secretary.

At 8.30—Meeting of American Retail Nurserymen's Protective Association. Guy A. Bryant, secretary.

Thursday Morning, 9 o'clock—Report of State Vice-Presidents.

"Competition." John H. Dayton, Sec'y Storrs & Harrison Co., Painesville, Ohio.

"Water." Jim Parker Tecumseh, Okla.

"Trade Conditions in the Dominion." F. Hogg, Toronto, Ontario.

"How to Secure a Uniform and Correct System of Nomenclature in Nurserymen's Catalogs." Prof. E. R. Lake, U. S. Pomologist, Department of Agriculture, Washington, D. C.

"Where are Our Trees Going?" Jefferson Thomas, Pres. Thomas Publicity Service, Jacksonville, Florida.

"Fitting Trees to Climate and Soil." Henry Hicks, Hicks Nurseries, Westbury, Long Island, N. Y.

Friday Morning, 9 o'clock—"What Can the Nursery Interests do to Help Solve Some of the Problems of a Commercial Nature that Confront the Producers of Orchard Products?" George C. Roeding, Pres. Fancher Creek Nurseries, Fresno, California.

"Problems of Marketing our Products." J. R. Mayhew, Pres. Waxahachie Nursery Co., Waxahachie, Texas.

(Subject not named.) J. W. Hill, Pres. Des Moines Nursery Co., Des Moines, Iowa.

Entertainment — The arrangements include an automobile ride on Thursday afternoon through the parks and boulevards of the city, after which light refreshments will be served at Shaker Lake. On the evening of Thursday, also, there will be a boat ride on Lake Erie on steamer State of Ohio, from 8.30 to 10.30. The ladies will be specially provided for in the matter of afternoon entertainment features.

Exhibits—The Committee on Exhibits will endeavor as far as possible to find a place for all exhibits that will be of interest to the nurserymen or visiting delegates. As the space for exhibits will be free to the exhibitor, he is expected to install his exhibit and take charge of it. We have four large rooms assigned us by the hotel management, which the committee think will be ample space if not, more space will be available. Implements and machinery will have to be crated or taken apart so they will pass through an ordinary door, there being no freight doors. Application for this space should be made by exhibitor to any member of the committee, namely: T. B. West, Perry, Ohio; Thomas B. Meehan, Dresher, Pa.; W. N. Scarff, New Carlisle, Ohio; Edward George, Painesville, Ohio.

FLORISTS' CLUB OF WASHINGTON.

That the smoker tendered by President George H. Cooke to the members and guests of the Florists' Club of Washington was a success was readily evident from the way every one entered into the spirit of the evening and did his share to make it a most enjoyable one. While the smoker was held in connection with the club's regular meeting the latter was made as short as possible. The members then adjourned to the grotto where a buffet luncheon was served. It seems that some of the cigars which were passed around were loaded and the occasional flashes of red and blue fire created considerable merriment. Several numbers were played by the orchestra, the florists joining in the chorus. Others gave recitations and songs. They were putting out the street lights when the last of the florists wended his way homeward. A queer thing about the meeting was the lack of speakers; no one seemed willing to take a chance of being declared an orator and the toastmaster was hard put to find someone to start the ball going. William F. Gude gave a very short talk on organization and co-operation, someone else said "Them's my sentiments" and seconded the motion, and when it came George Cooke's time to speak he would rather sing a song, and sing a song he did.

Present at the meeting was Martin Witt, a grower of Itzehoe, Holstein, who is visiting his sons, members of the club.

A vote of thanks was extended to Charles C. Stevens, who acted as toastmaster, and to others who, although not members of the club, did so much to make the evening a memorable one.

AMERICAN ROSE SOCIETY.

The members of the American Rose Society are invited as a body, or as many as can conveniently do so, to visit Elizabeth Park Rose Garden, on June 19, to meet at 11 a. m. in the Union Station, Hartford, Conn. Programme will be to take lunch there, then go out to the Park. The roses will be in good condition at that time. Alex. Cumming, Chairman of the American Rose Society's Rose Garden Committee reports back that at this writing everything looks most inviting. Not only the members of the American Rose Society are invited, but any one who takes an interest in roses.

The affiliation effort of recent months has resulted in a membership of some 300 persons. Wallace R. Pierson, President of the American Rose Society says—"give the matter all the publicity possible and invite any rose lover to come with us."

BENJAMIN HAMMOND, Sec'y.
Beacon, N. Y.

NEW YORK FLORISTS' CLUB.

The last meeting for the season was unusually well attended on Monday night, June 8. Reports of various committees constituted the greater part of the business transacted. A. L. Miller made a report as a Brooklynite on the success of Brooklyn Day at the recent spring show, March 24. A goodly sum of money was collected among the Brooklyn florists for the event and was spent in publicity work which the Brooklyn newspapers and local authorities had enthusiastically seconded, and another, even greater, Brooklyn Day is planned for next year's show. Mr. Totty made approving remarks on the subject and suggested that other neighboring cities and communities should be encouraged to emulate Brooklyn's good example. It was announced that about $4,000 had already been subscribed to the guarantee fund for next year's show and $4,000 worth of exhibition space sold.

F. H. Traendly recommended for the Transportation Committee that the official route to the Boston Convention be via Eastern Steamship Company's outside line, leaving New York 5 P. M., Monday, August 17, and arriving in Boston 8 A. M., Tuesday. The recommendation was unanimously adopted and an appropriation of $100 was made for the use of the committee. 100 staterooms are reserved for the New York party until ten days before sailing.

W. E. Marshall, reporting for the Outing Committee, said that Glen Island had been selected for this year's outing on July 1. Tickets, $3.50 for gentlemen, $2.50 for ladies, $2.00 for boys and girls 12 to 16 years, $1.00 for children under 12. No effort will be spared for the comfort and enjoyment of the picnickers.

J. Harrison Dick, J. B. Deamud and Mr. Losey, recently elected members, were called upon for speeches and responded acceptably. Wm. Plumb made an encouraging report on progress in the horticultural department of the Panama-Pacific Exposition. P. W. Popp made an exhibit of Salvia Greggi and Schizanthus Bridal Veil. Resolutions on the death of J. F. Slimon were adopted as follows:

The New York Florists' Club desires to record—with sincerest sympathy for his bereaved family—the passing on of its beloved fellow member, Jas. F. Simon, and takes this opportunity of expressing its loss and sorrow. Mr. Simon was universally esteemed as a gentleman of unsullied character and enjoyed the respect and affection of all who intimately knew him. His faithful attention to his business, his recognized ability, his devotion to his family and his never-failing courtesy were characteristics known to all with whom he was associated.

Be it resolved, that this tribute to his memory be recorded on the minutes of the Club and a copy of these resolutions sent to his family.

DATES OF BOSTON SHOWS.

The rhododendron show will be held Saturday, June 13, and the day following. The peony show will be held June 20 and 21, and the rose and strawberry show, June 27 and 28.

AMERICAN PEONY SOCIETY.

A very creditable exhibit was staged by the American Peony Society, in cooperation with the Horticultural Society of Chicago and the Chicago Florists' Club, at The Art Institute, June 9 and 10. The greater part of the flowers were shown by the three local firms, Peterson's Nurseries, W. W. Barnard Co. and Vaughan's Seed Store. B. H. Farr, from Wyomissing, Pa.; E. A. Reeves, Cleveland, O., and A. P. Saunders, Clinton, N. Y., came, bringing their exhibits with them, and the flowers came through in excellent condition, notwithstanding the extreme weather.

The fifty blooms of Mons. Jules Elie sent by Martin Kohankie from Painesville, O., won first prize, and were by far the largest blooms staged. The American Peony Society's gold medal again went outside of Chicago, this time to B. H. Farr. To the local growers belongs the credit of maintaining the show and so warm is the weather that at this writing, the afternoon of the first day, it is predicted that many petals will fall before morning. The large vases of blooms that made such a showing last year have given place to more and smaller ones, somewhat diminishing the apparent size of the exhibit, but the number of blooms shown is probably just as large, and the number of varieties larger than last year.

Prize Awards.

OPEN CLASSES

Class 1.—Collection of not less than 100 named varieties, one of each: Gold medal, B. H. Farr; silver medal, A. P. Reeves.

2.—Display of blooms: 3rd, W. W. Barnard Co.

3.—Largest display of blooms of any one variety: 1st, Vaughan's Seed Store; 2nd, W. W. Barnard Co.

4.—Vase of 100 blooms arranged for effect: 2nd, W. W. Barnard Co.

5.—Collection of 50 double in 20 named varieties: 1st, B. H. Farr.

6.—Collection of 25 named varieties, double, one bloom of each: 1st, Peterson's Nurseries; 2nd, Vaughan's Seed Store.

8.—Fifty blooms, white double, one variety: 1st and 2nd, Peterson's Nurseries; 3rd, Vaughan's Seed Store.

9.—Fifty light pink, double, one variety: 1st, 2nd and 3rd, Peterson's Nurseries.

10.—Fifty dark pink, double, one variety: 1st, Martin Kohankie; 2nd, Vaughan's Seed Store; 3rd, Peterson's Nurseries.

11.—Fifty red or crimson, with stamens, double, one variety: 1st, 2nd and 3rd, Peterson's Nurseries.

12.—Fifty red or crimson, without stamens, double, one variety: 1st, Peterson's Nurseries; 2nd, Vaughan's Seed Store; 3rd, W. W. Barnard Co.

13.—Fifty blooms any combination of two or more shades, double: 1st, Vaughan's Seed Store; 2nd, Peterson's Nurseries; 3rd, W. W. Barnard Co.

14.—Collection of 12 distinct named varieties, double, one bloom of each: 1st, Vaughan's Seed Store.

16.—Twelve white, double, one variety: 1st, 2nd and 3rd, Peterson's Nurseries.

17.—Twelve light pink, double, one variety: 1st, 2nd and 3rd, Peterson's Nurseries.

18.—Twelve dark pink, double, one variety: 1st and 3rd, Peterson's Nurseries; 2nd, Vaughan's Seed Store.

19.—Twelve red or crimson, with stamens, double, one variety: 1st, 2nd and 3rd, Peterson's Nurseries.

20.—Twelve red or crimson, without stamens, double, one variety: 1st and 2nd, Peterson's Nurseries; 3rd, E. A. Reeves.

21.—Twelve blooms, one variety, any combination of two or more shades, double: 2nd, Vaughan's Seed Store.

HARDY PERENNIALS—CUT BLOOMS

Class 22.—Collection of Hardy Perennials, other than peonies: 1st, Vaughan's Seed Store.

Amateurs and Private Gardeners Only.

Class 23.—Collection of blooms, variety, quality and quantity to be considered: 3rd, A. P. Saunders, Clinton, N. Y.

25.—Collection of 10 named varieties, double, three of each: 3rd, A. P. Saunders.

HARDY PERENNIALS—CUT BLOOMS

Class 33.—Collection of hardy perennials, other than peonies, quality and variety considered: 1st, A. P. Saunders.

CINCINNATI FLORISTS' SOCIETY.

The Florists' Society's regular meeting was held at J. A. Peterson's home on Monday afternoon and evening in the birch pergola in front of the house. The nominations to be balloted upon at the annual meeting next month were as follows: President, Jas. Allen, Ed. Schumann; vice-president, Max Rudolph, Fred Backmeier; secretary, Alex. Ostendarp, Chas. Murphy; treasurer, Chas. H. Hoffmeister, Gus Adrian; trustee, J. A. Peterson, Frank Volz. The outing committee appointed consists of J. A. Peterson, C. E. Critchell, Wm. Murphy and Max Rudolph. During the late afternoon Mr. Peterson showed his guests through the greenhouses, and everything was found to be fully up to the reputation of this place. After the meeting the company adjourned to the house, where a little spread was enjoyed and Mrs. Peterson and Clarence Peterson showed lantern slides of pictures taken by members of the family on their various trips to the different conventions and meetings, about this city during the flood of 1913 and of various flowers. These pictures, except most of those of the flood, were of persons and events intimately connected with the trade and consequently were very interesting. At the close of the programme E. G. Gillett, on behalf of the members of the Society, thanked Mr. and Mrs. Peterson and their family for their kind and elaborate entertainment.

ROSE AND PEONY SHOW, PHILADELPHIA.

"Rose and peony show" rolls trippingly off the tongue, ergo the heading; but it was really more of a peony event, although there was an interesting display of roses also. The rotunda and the lower hall were well filled with these, also with a fine showing of hardy perennials, on the 4th inst.—this being the annual June event of the Pennsylvania Horticultural Society at Horticultural Hall.

Joseph Hurley had a rich display of twelve of the best of the sixty-five varieties in the Hunter collection of peonies. Some of the most charming of the twelve we made a note of and pass the list along: Marie Durex, Mme. de Bettencourt, Mme. Farrell, Etienne Mechin, Mme. Le Graye and Livingston. A fine pink marked Duke of Wellington in this collection was shown at the next table by Dreer and was a **sulphur white.** One of the finest peonies in the show for size and beauty was exhibited in another collection and had no name on it at all. And yet we profess to believe that a flower show is held to educate the public. Forget that. Flower shows are held so that the gardeners may gather in some prize money. No exhibit, however meritorious, should get a premium unless properly named. Show management that permits such crudeness and provincialism is open to criticism.

Samuel Batchelor exhibited in the same class as Mr. Hurley and put up a fine showing. Dreer had sixteen handsome roses nearby but not for competition. One of the finest of these was Agnes Mary Kelway, but it was not shown at its best, the blooms being rather passé. In the classes for smaller quantities there was good competition, there being from five to six entries in each. The varieties, however, were largely the same as in those already mentioned, as was the case also with the big mixed vases.

In outdoor roses there was a fairly good showing. William Robertson staged thirty-seven varieties of hybrid teas, Axel Lindroth twenty and David Aiken forty-one varieties, for the Huey prize. The gems in this competition were white Killarney, Killarney Queen, Caroline Testout, Mme. Segund Weber, Ophelia, and General McArthur. Among the lot was our old friend La France—bull-nosed as ever. There was only one showing for the Dreer prize of twenty new H. T.'s, but that one was fine and proved one of the features of the exhibition. This was staged by Robertson, one bloom of each only, but enough to show the beautiful novelties, as they were all in splendid form and finish. Among the notable ones were Bianca, Mrs. F. Grey, Duchess of Sutherland, Willowmere, Earl Gosford, Marcella and British Queen. The showing of H. P's was very meagre, Jacqueminot, Mrs. John Laing, Captain Hayward, and Prince Camille de Rohan being about the only items to be seen.

The display of hardy perennials was very interesting, Robertson and Batchelor both staging fine collections. Among the choicer items in this connection were Siberian iris, gaillardia, digitalis, oriental poppy, Spirea aruncus, dicentra, delphinium, pyrethrum, coreopsis, aquilegia, valerian, eremurus, and fraxinella. One of the seldom-seen things was Clematis recta from a bush six feet in diameter and five feet high. This may be best described as a bush C. paniculata flowering from June to August. A fine thing. I mean to have one in my garden when I make my fortune in the seed business and retire to my farm.

One of the features of the show was an artistic staging by Thos. Meehan & Sons of a few seasonable gems full of interest. Mr. Matthews who had charge of this exhibit is an artist at staging. Pterostyrax hispidum (the Japanese wistaria tree) was a revelation to most of us. The parent tree is now forty feet high and the young ones for sale are so scarce, as yet, that few of us know what a beautiful thing this is. The real Styrax japonica was also shown and a blush pink seedling from same with smaller flowers. Tamarix gallitzia, Phlox argillacea, a silvery pink midway between the subulata and decussata in flowering. A new oriental poppy, Princess Ena, Hemerrocallis Meehani, a new hybrid very large and very bright yellow, two fine varieties of Penzance sweetbriars and a nice lot of Paul's Carmine Pillar rose, were all notable features of this small, but excee lingly interesting exhibit.

THE CHERRY-BLOOM.

By Yae Kichi Yabe

Life begets charms; it brings bliss and joy, it procreates pleasure and delight. The heart becomes exhilarant, the spirit gets exultant, and the mind is elated. To live then is worth while.

The fascination cast by the sight of beautiful blossoms, enticement created by the presence of fragrant bloom, indeed is a cause of profound gratification. It is unique and sublime, exciting one's esthetic feeling to a high pitch.

Nothing strikes the sense with so alluring an effect as does the delicate pink of the cherry. The exquisite form of its petals, the freshness and unstained purity of its hue and liveliness of its bearing merit intense adoration.

The flowers cover the tree from the extremeties of its boughs and twigs to the pinnacle of its trunk and branches. It is pleasing to view these rich, magnificent sights. A grove or row of such trees discloses an imposing scene, a pile of clouds or of thick mist at a distance, a mass of shining snow upon the trees as nearer beheld, and huge sheets of gorgeous vividness when seen at the spot.

Strolling an avenue of the trees or beneath the dense vaults of the blossom-laden branches, bathed in the bright, sprightly sun that permeates through in a soft, pellucid radiance, tinting the atmosphere with a pink and snow-white shade, one is apt to be completely bewitched.

The *sukura*, the Japan cherry, has been adored with an almost fervent passion by the Japanese from time immemorial and its beauty glorified in poetry and prose. Some of the most subtle, loftiest sentiments of the people, those peculiar emotions which are excited at the grandeur of nature, were expressed almost invariably in association with the virtue of the cheery-bloom.

The cherry thus constitutes a favorite theme of the Japanese artist, who in depicting a spring view never omits it. And it has come to be the emblem of spring just as the moon has been made to represent autumn. Nor our admiration ceases in this, for we have honored it and come to speak of it as the Flower of Spring or the Flower of flowers.

But the blossom of the *sakura* is not only the cause of our highest artistic gratification. Fair and superlatively beautiful as it is, the flower is likewise the course of our loftiest moral inspiration.

Brilliant is the career of the cherry-bloom, glorious is the life it pursues. But more brilliant and more glorious is the end it faces.

For the bloom tarries not till its beauty fades, its fame departs. It lingers not on the branch till its stalk is rotten, and it corrupts and falls amid shame and disgrace. It bravely meets its doom ere it loses the adoration it acquired.

Like a gallant, intrepid hero, walking unflinchingly into the gulf of danger and death the blossom of the *sakura* falls, leaving behind it a sweet fragrant air and a radiant reminiscence.

The cherry thrives for a brief time; but its fame survives long. Man lives but one generation, yet his name lasts for ages. It is a cause of our profound satisfaction, sullen, yet exalted, to be crushed a precious stone and die, rather than, to remain a worthless brick and live.

For sweet is the thought to the serious-minded race that the future generations will ever remember us with a revering and cherishing memory when we are dead and gone.

We shall leave this world, if not today, then tomorrow, if not this year, the next year, or in decades hence. Sooner or later we are destined to face our doom, that stern promise which every life is called to fulfil. We desire thus to live a life that shall be as noble and sumptuous, as exalted and splendid, as the conditions allow. We covet as bright and as worthy a career as we are permitted to follow.

But it is likewise our wishes that our end should be as brilliant and bright a scene as our career has been. Nobly had the cradle of man been rocked, nobly has he played the little game of life; he deserves to be laid on his grave with befitting honor and splendor.

The blossom of the cherry in its brief course teaches us the loftiest lesson of life and death, a precious spiritual aspiration of the people. It is the source of the moral strength, the spring of the exalted acts of self-denial, loyalty and patriotism.—*Japan.*

HARDY EVERGREEN RHODODENDRONS.

(From Bulletin No. 57 of the Arnold Arboretum.)

The number of species of Rhododendrons with evergreen leaves which can be successfully cultivated in this climate is not large. The four species of eastern North America, *Rhododendron maximum*, *R. Catawbiense*, *R. carolinianum* and *R. minus* are all perfectly hardy, as are *R. Smirnowii* and *R. caucasicum* from the Caucasus, *R. brachycarpum* from Japan and *R. micranthum* from China. The flower-buds of the last, however, have been destroyed by the cold of the past winter. The two European species, *R. ferrugineum* and *R. hirsutum*, are not very satisfactory plants for this climate, and unless exceptionally favorable positions can be found for them they are not long-lived here. In recent years *R. maximum* has been largely planted in this part of the country, but the common Rhododendron of American gardens belongs to a race of hybrids which originated in England many years ago and are known as Catawbiense hybrids because they have been produced by crossing *R. Catawbiense* of the high summits of the southern Appalachian Mountains with *R. ponticum* of the Caucasus, and with *R. arboreum* and other Himalayan species. These hybrids are valuable in this country in proportion to the influence on them of *R. Catawbiense*, and it is found that varieties with broad leaves like those of the American plant are always hardier than the narrow-leaved varieties which show a greater influence of *R. ponticum* and the Indian species. The number of these hybrids, however, which are really hardy in this climate is not large; among them Atrosanguineum (very early), Charles Dickens and H. W. Sargent (late) of red-flowered varieties are good plants; among the pink-flowered varieties none have proved so satisfactory as Mrs. Charles Sargent and Henrietta Sargent, similar in general appearance, but the latter with smaller and more compact flower-clusters and flowers of not quite such a perfect pink. Among the varieties with rose-colored flowers, Roseum elegans and Lady Armstrong are hardy and satisfactory; and among the varieties with dark purple flowers Purpureum grandiflorum, Purpureum elegans and King of the Purples are all hardy. Of the varieties with light purple flowers Everestianum is the best and one of the hardiest and most satisfactory of all these hybrids. Among the white-flowered varieties Catawbiense album (very early), Album elegans and Album grandiflorum can be safely used. Most of the hybrid Rhododendrons in American gardens are of English origin, but a few years ago the Arboretum obtained in Germany a number of these hybrids raised in that country. These have proved very hardy and some of them promise to be valuable additions to the Rhododendrons which can be successfully cultivated here. The most distinct, perhaps, are Viola, with white flowers, Albert, with pale pink flowers, and Bismarck, with white flowers with small brown dots on the inner face of the corolla. The last has flowered profusely now every season for the last three years; the foliage and habit are good, and as it flowers early this variety is particularly valuable, for there are not many early white-flowered Catawbiense hybrids. Among the hybrid Rhododendrons which have been raised between *R. catawbiense* and *R. maximum* the best known is Delicatissimum. This blooms later than the Catawbiense hybrids; it is a large plant, of good habit, with long lustrous leaves and pale pink and white flowers, and one of the best Rhododendrons which can be grown in this climate.

The experience of another year confirms the good opinion which the Caucasian *Rhododendron Smirnowii* has made for itself here. It is a large plant with pale green leaves covered below with a thick mat of nearly white wool and large clusters of bright pink flowers. It grows best in partial shade as the hot sun of our summer causes the leaves to curl. A number of hybrids have been obtained in Europe by crossing this species with some of the Catawbiense hybrids. Some of these hybrids are established in the Arboretum and have flowered for several years, but the cold of the past winter has destroyed their flower-buds. *Rhododendron caucasicum* and its hybrids or varieties should be more often found in our gardens, in which the form of this species known as Boule de Neige is the only one usually seen. Like the other forms of *R. caucasicum* it is a small compact plant which covers itself with clusters of large white flowers which open earlier than those of most of the Catawbiense hybrids. This earliness, its good habit, and its handsome pure white flowers make this a desirable garden plant in this climate. Another plant of this race with pale yellow flowers, known as *R. coriaceum*, is now in flower and is also a hardy and desirable plant. A smaller plant of this race, Mont Blanc, is interesting as the flowers, which are bright pink when they open, become at the end of a day or two pure white. On some of the dwarf forms of *R. caucasicum* the flower-buds have been injured this year for the first time, but in spite of this these plants can be recommended for New England gardens.

Rosa Hugonis has been in flower in the Shrub Collection for the first time in the Arboretum. It is a native of western China, with clear yellow single flowers and neat pale foliage.

MOUNTAIN LAUREL.

KALMIA AND WHITE PINES

Kalmia time is now with us and the dainty flowers of this loveliest of American broad-leaved evergreens are seen in the wholesale markets in great quantities. It is pleasing to see natural growths of kalmia protected against the cutting and slashing which is rapidly exterminating the plant in many localities. The accompanying picture shows a bit of the extensive natural woodland of white pines with undergrowth of kalmia, on the estate of F. S. Moseley at Newburyport, Mass. It is beautiful to contemplate at any season of the year, but when in bud and bloom it makes a picture never to be forgotten.

More Red Devil Cutters Used Annually Than All Others Combined

SEND FOR BOOKLET ANYHOW.

SMITH & HEMENWAY CO., . . 161 CHAMBERS ST., NEW YORK

There are not many yellow-flowered Roses hardy in New England, and *R. Hugonis* promises to be a valuable addition to the number.

DODDER ON SWEET PEA.

Miss Hazel Smith of Nashua, Iowa, sends the following letter in regard to a parasite found on sweet peas.

"I am enclosing a specimen of my sweet peas, which are being attacked by some foreign growth, in hopes that you can tell me how to rid them of it before it is too late. I had the same trouble last year and tried to keep those tendrils picked off, but it did no good and they took the life all out of the peas. They grow very rapidly and twine all around them. The lettuce next to the peas is bothered in the same way."

The following is my reply to Miss Smith.

The sweet peas are attacked by dodder. The species I cannot name; it may be either the clover dodder or field dodder. It was undoubtedly introduced with some dodder seeds with the sweet pea or has escaped from the clover field. The following method will be found of use. First, the herbicidal treatment. For this purpose a liberal application of a 10 per cent. solution of copper sulphate will be found efficacious.

It is advisable to mow the patch if it is a small one, to rake the material into a pile, and after allowing it to dry to burn it. The field should be watched carefully, for if the seed is formed, young dodder plants will make their appearance upon the new growth of clover. It is best therefore to follow the mowing by hoeing if the spot is a small one and continuing this for several weeks until all danger of infection is passed. Dewey recommends keeping the soil stirred for about two inches and not allowing any young plants to come in contact with the clover. L. H. PAMMEL.

Iowa State College,
Dept. of Botany.

PYRUS FLORIBUNDA.

Known also as Pyrus Malus floribunda and Malus floribunda, the tree which is the subject of our cover illustration this week, still holds its place as one of the showiest and best small trees for decorative planting, although it is now nearly half a century since its first introduction from Japan. The leaves appear with the flowers but so numerous are the latter that the foliage is entirely obscured when the blossoms are fully expanded as is well shown in the picture. The buds are luminous rose-pink and the fully opened flowers are pale and finally white. The tree is most beautiful when about half the flowers are opened, the bright rosy buds giving an exquisite effect amongst the white.

THRIPS ON GRAPE VINES.

Editor HORTICULTURE.

Would you kindly publish in your paper a remedy to check thrips in a grape house, started in February?

A SUBSCRIBER.

This is a pretty hard problem at this stage. I presume the grapes have started to color by this time. The only thing to do now to keep them in check is to give them a good syringing with cold water, being very careful not to injure the bunches any more than possible. ED. KIRK.

THE GLAD HAND

GLADIOLI—GLADIOLUS—GLADIOLUSES

Which is right? The only way to find out is to plant some of our stock and if planted now or even later, they will bloom when the earlier planted stock is passed; which means higher prices for the flowers and is good business.

We offer the following varieties less 5 per cent if cash accompanies the order:

Boddington's Quality Gladioli

AMERICA (Our Specialty). This beautiful new Gladiolus has produced as great a sensation as the now famous Princeps. The flowers, which are of immense size, are of the most beautiful flesh.pink color, and, as a florist who saw it said, it is "fine enough for a bride's bouquet."

Selected Bulbs, 2 to 2½ inches.....$1.50 per 100, $12.00 per 1000
1st size, 1½ to 2 inches..... 1.25 per 100, 10.00 per 1000
2nd size, 1¼ to 1½ inches..... 1.00 per 100, 9.00 per 1000

	100	1000
HOLLANDIA (The Pink Brenchleyensis). Flowers well arranged on a spike which attains a height of about 4 feet. Often as many as 30 blooms of a charming pink shade tinted yellow are open at one time. First size bulbs	$1.75	$15.00

PEACE. The flowers are large, of good form and correctly placed on a heavy, straight spike. They are a beautiful white, with a pale lilac feathering on the inferior petals. "Peace" is not an early bloomer, but rather medium to late, and planted at the same time with other stock, it is in its best condition when most other varieties have passed blooming. Per doz., $1.25; per 100, $9.00; per 1000, $85.00.

Grand Novelty Orchid-flowered Gladiolus

MRS. FRANK PENDLETON, JR. Order early to procure Mrs. Frank Pendleton, Jr. Awarded First-Class Certificate of Merit by the Massachusetts Horticultural Society of Boston and by the American Gladiolus Society at Baltimore, 1911. Its color is the most exquisite salmon-pink with a very conspicuous blood-red blotch in the throat on the lower petals. Per doz., $5.00; per 100, $40.00.

PINK AUGUSTA. Color a lovely soft pink. This variety is especially suitable for forcing under glass, for which purpose it is especially recommended. Per doz., 35c.; per 100, $2.50; per 1000, $20.00.

	Doz.	100
I. S. HENDRICKSON. A beautiful and irregular mottling of white and bright, deep pink; in some the pink and in others the white predominates. Flowers and spikes very large and fine	$.75	$4.75
MADAM MONNERET. Delicate rose; late bloomer. Per 1000, $26.75	.50	2.75
	100	1000
BRENCHLEYENSIS (true). Fiery scarlet.		
Top roots, XXX, 2 and 2½ inches	1.50	14.00
First size bulbs, XX, 1¾ to 2 inches	1.25	12.00
Second size, X, 1 to 1¾ inches	1.25	10.00
BODDINGTON'S WHITE AND LIGHT.		
First size, XX, 1¼ to 1½ inches	1.25	12.00
1900. Nothing finer for florists' use. Flower is of a rich shade of red, with very prominent white spots on three lower petals	1.75	15.00
MRS. FRANCIS KING. Color of flower is a light scarlet of a pleasing shade.		
First size, XX, 1¼ to 1½ inches	1.75	16.00
PRINCEPS. Color rich crimson, with broad white blotches across the lower petals. Flowers can be grown to nearly 8 inches in diameter under stimulating culture	3.75	35.00
GROFF'S HYBRIDS (Originator's strain).		
First size, X, very fine mixture	1.00	9.00
SHAKESPEARE. White and rose	4.25	40.00
AMERICAN HYBRIDS. XX. A mixture of the choicest varieties of Gladiolus in equal proportion; very fine	1.00	9.00
AMERICAN HYBRIDS. X. Very fine mixture	.85	7.50
STRIPED AND VARIEGATED	2.25	21.50
PINK AND ROSE SHADES	1.75	16.00
ORANGE AND YELLOW SHADES	3.50	32.00
SCARLET AND RED SHADES	1.50	14.00
LEMOINE'S HYBRIDS	1.50	12.00
CHILDSII. First quality, mixed; dark shades	1.75	16.00
Good quality, mixed; light shades	2.50	22.50

For Large Quantities of Gladioli, write for Special Prices. For a more general list see our retail catalogue, mailed free.

ARTHUR T. BODDINGTON

SEEDSMAN

342 W. 14th Street, NEW YORK CITY

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Chas. C. Massie, Minneapolis, Minn.; 1st vice-president, J. M. Lupton, Mattituck, N. Y.; 2nd vice-president, W. F. Therkildson, Painesville, O.; secretary, C. E. Kendel; assistant secretary, S. F. Willard, Jr., both of Cleveland, O.

The Adulteration and Misbranding of the Seeds of Kentucky Bluegrass and Redtop.

During the calendar year 1913 seeds of Kentucky bluegrass and redtop were secured in the open market in accordance with the following paragraph in the act of Congress making appropriations for the Department of Agriculture:

Where such samples (seeds of grasses, clover, or alfalfa) seemed in the open market to are found to be adulterated or misbranded, the results of the tests shall be published, together with the names of the persons by whom the seeds were offered for sale

In carrying out the provisions of this act, 1,021 samples of the seeds mentioned above were secured and analyses made under the direction of Mr. E. Brown, Botanist in Charge of the Seed Laboratory, Bureau of Plant Industry, and publication has been made of the analyses of the 127 samples found to be adulterated or misbranded, together with the names of the seedsmen by whom they were sold or offered for sale.

Of the 438 samples of Kentucky bluegrass seed obtained, 15, or less than 4 per cent., were found to be either adulterated or misbranded. Of these, 9 samples contained less than 2 per cent. of Kentucky bluegrass. One sample was a mixture of redtop, timothy, Canada bluegrass, and Kentucky bluegrass.

Of the 583 samples obtained as redtop seed, 112 were found to be adulterated or misbranded. Of these, 110 samples contained timothy; 1, Kentucky bluegrass and wood meadow grass; 1, Canada bluegrass; and 1, Kentucky bluegrass, Canada bluegrass and meadow fescue.

Seed Trade Needs.

New faces appear as the younger generation grows up. This season we find at Waterer's an Annan; at Dreer's a Laird—both Scots of good address, good training, and fine promise in the seed business. Good seedsmen are far too few in America. No business in the world requires so much as the seed trade the three essentials:

(1) A high sense of honor.

(2) A deep love of truth.

(3) Unsubduable courage in defense of both.

It is a business where confidence in integrity is absolutely fundamental.

G. C. W.

Chicago Seed Trade Notes.

Seed houses are now balancing accounts and a fairly successful season is reported, with nothing remarkable to go on record. The onion set sales were good up to the close of the season and none were left out of a large crop, while prices held at a profitable figure to the last. So far the prospects for seed crops for next season are favorable. The Leonard Seed Co. report the unusual rainfall of the past month to have been generally favorable to seed crops, though some damage has been done in certain localities. This firm will probably be represented at the coming meeting of the American Seed Trade Association at Washington, D. C., by S. F. Leonard and F. S. Bennett.

PHILADELPHIA NOTES.

Mrs. Edward Campbell and daughter Jeannette, of Ardmore, with party of six, sailed on the "S. S. Haverford" on the 6th inst. for a trip to the old country. They will return in September. Bon voyage. It keeps your scribe busy these days keeping track of the pilgrims.

The Laird of Lansdowne, alias Sir Edward Reid, of Ranstead street, is proudly showing to his friends a magnificent silver cup, the premier trophy in the Reliability Run, Philadelphia to Stone Harbor. Seventy cars started—all of them new, fast and up-to-date. The Reid car, under the masterly handling of its owner, was simply irresistible. Hence the cup. Wonder if Mr. Reid knows what a cup is for?

John Burton and Mrs. Burton started on an up-state auto trip for nowhere in particular on Friday. John's idea is to just keep on going—and programs be hanged. This is a real wayside wandering. Stop or go on as the spirit moves. The last heard of him was at Gettysburg, with nowhere to lay his head. We hope he meets David Grayson on the way to help him out in these "Adventures of Contentment."

What's the matter with Brother Ebel now? After abandoning the "fallacy" proposition he now starts in about the "minimum." Everybody knows that raising the minimum necessarily raises the maximum—no matter whether one reason from induction or deduction. Far be it from us to make claims, but we may be pardoned for thinking that as a rule we use words that convey a clear meaning. Involved or wobbly sentences are as much out of place as crude thinking. Alexander Pope is a pretty good model but there were other good prophets and heralds of modern gardening that it would do no harm to study—Bacon, Milton, Addison, Kent, and Horace Walpole—for instance.

The transportation committee of which John Westcott is chairman held a second meeting on the 9th inst. From all we can hear the committee will recommend Philadelphia to Boston via Reading and Metropolitan Steamship, rate $5.80 each way; stateroom and meals extra. Pier 18 N. R., New York, 5 p. m., arrival in Boston 7 a. m.—which means the party will leave Philadelphia from the Reading Terminal sometime Monday forenoon, probably about 10 a. m. This program is only tentative, of course, and is not final until endorsed by the Club at its regular meeting July 7. Meantime, get busy making arrangements for the most glorious trip ever—Monday August 17, to Boston.

The fine lawns that abound in and around Overbrook in the most fashionable section of Northern West Philadelphia are a reminder to the traveler of the lawns one sees in Holland and in some parts of Ireland. Possibly much of the beauty of the verdure is due to the grass seed with which these fine lawns are planted that is secured and sold in tons by George C. Watson, seedsman, who represents Messrs. Barenbrug, Burgers & Co., of Arnhem, Holland. Mr. Watson is a Scottish-American and is an acknowledged authority on seeds and bulbs. The writer has known him for many years and knows he is fully equipped to represent these seed growers of Holland, where the finest grass seed is secured and which is the home of the bulb families known to horticulturists. Mr. Watson has also written several papers on the growing of plants in America, and also on the many variegated species of the tulip family. He is a bon vivant and a good talker, which naturally makes him a good salesman.

Philadelphia Despatch.

Fierce things like the above are liable to be done to a fellow if he happens to be a member of the pen and pencil club.

The Michell peony show opened on the 3rd inst. and was well attended. The main store was a blaze of beauty with all the popular varieties and the west window was particularly attractive with a good collection which compelled attention from the passers-by. Among the varieties that struck us as among the handsomest in the general display were: Alice Crousse, Faust, Gigantea, Solfaerre, Alexander Dumas, Anemonæflora Rubra, Caroline Allaine, Flora Treasure, Octavia de May Brefonneau, General Boisdeffre, Nana Sahib, Mme. de Verneville, Augustin d'Hour, Marguerite Gerard. There was also a good showing of the ever-popular favorites such as Festiva maxima, Louis Van Houtte, Madame Crousse, etc. The display was not competitive, grown mostly at the Michell nurseries at Andalusia. From both an artistic and business standpoint the show was a big success. Mr. Farr, the peony

West Roxbury, Mass.—An automobile truck of the New England Telephone & Telegraph Company ran away all by itself Monday afternoon, June 8, down the steep incline of Lorraine street, and wrecked a greenhouse belonging to O. A. Knight. The truck crashed into the greenhouse and plunged through without hesitation, in a zigzag course, demolishing most of the flowers, amid a great splintering of glass. Then the machine leaped over the intervening space to a second greenhouse and plowed into that structure until the forward wheels sank in the soft soil below. Fortunately no one was injured.

A SERVICEABLE FLOWER DELIVERY CAR.

The picture accompanying shows a convenient little auto for anyone having need for such a vehicle. It is used by Chas. Millang for carrying flowers from the greenhouses in Bayside to his New York store each morning and has proved a handy and inexpensive adjunct for many uses during the day. There is a door which opens in the back and a hood to protect the seat in rainy weather.

CHICAGO NOTES.

Aster growers say their plants are already forming buds. This means that the stems will be short which in turn means the returns are likely to be the same.

The friends of Robert Northam, for many years sales-manager for George Reinberg, are pleased to learn that he is reported out of danger at the Washington Park Hospital, where he underwent an operation for appendicitis June 4.

Kroeschell Bros. go on record for the best business in their history. Fred Lautenschlager says that at no previous time has the demand been so general for greenhouse boilers and fittings, showing that the past year must have been financially satisfactory to flower growers.

Hoerber Bros. say that not a complaint was received from all their shipments of roses and carnations Memorial week. Certainly their carnations look very wide awake, but the trouble is that even the grower cannot tell why his carnations are sleepy or why they are not, so his experience does not help him much for the next time.

The opinion is frequently expressed that floral pieces are no longer used at large funerals, but the facts did not bear this out at the Art Institute last week when the body of Director French lay in state. The floral offerings were very many and a very large proportion were of the made-up order, beautiful and imposing and more easily handled than loose flowers could have been.

The meeting of the General Federation of Women's Clubs at the Auditorium this week, gave opportunity for a very pretty stage decoration. Chicago had been exploited as an ideal summer resort and the "weather man" had been depended upon to make good these claims, but with the fickleness for which Chicago weather is noted, the opening day was a sweltering one. To offset this the large theatre stage was transformed into an Italian garden. A large white pergola was on either side, over which vines were draped, and under which walks led to the sides of the stage. Overhead the entire effect was that of a forest and as a suggestion of coolness the result was admirable. A hedge formed the borders of the stage and urns filled with plants added to the out-of-door effect.

WASHINGTON NOTES.

An examination will be held in Alexandria, Va., on June 29, for the purpose of securing eligibles for the position of landscape architectural draftsman under the Department of Agriculture.

George H. Cooke is giving up his store at Connecticut avenue and L street, N. W., and will take temporary quarters in the block below. The building in which he is at present located will be torn down and a modern structure erected. When this has been done Mr. Cooke will again take a store there.

All unlimited telephone service in business houses has been discontinued in the District of Columbia, despite the protests of the merchants, and beginning with June 1, all bills will be rendered on the message rate basis. This decision of the telephone company will add materially to the overhead expenses of the florists.

A letter has been sent out by Mr. Gude in connection with the Smith Memorial plans, which reads: "The committee appointed at the Chicago convention, has been continuously at work since its appointment, and has decided that the monument should take a form useful as well as ornamental in the shape of a memorial building to the father of our charter. The Committee, therefore, asks that you now send in your subscriptions to William F. Gude, chairman, 1214 F street, Northwest, Washington, D. C., so that the memorial may take tangible

form at the earliest possible date." The letter further states that it is the hope of the committee that the contribution will be a liberal one in order that the florists of the United States may show the world their appreciation of a man who did so much to promote and uplift our calling.

The parcel post system in Washington will hereafter render service similar to that of the expresses, for a telephone call to the main or branch offices will cause the sending of a wagon to pick up all parcel post packages exceeding ten pounds in weight. In the down town section the teams will make eight trips a day. Collectors are also authorized to accept insured parcel post packages, and as each wagon will be equipped with a scale, no difficulty will be experienced in ascertaining the amount of prepay charges.

Manufacturers of all Kinds of

WIRE DESIGNS and FLORISTS SUPPLIES

1008 Vine St., PHILADELPHIA, PA.

Personal

Arthur E. Thatcher, manager of the Mt. Desert Nurseries, and Miss Nancy Abigail Butterfield were married at Bar Harbor, Me., on Tuesday, June 9.

Somers Point, N. J.—Thomas Walker, who has been in the employ of Robert Craig Company for over 27 years, is now manager of the Colonial Greenhouses.

John F. Ward, has closed up his florist business in Shelburne, Falls, Mass., and has gone with his family to Farmington, Ct., where he has taken a position as manager of a greenhouse.

Genevieve Frances Roy, daughter of David F. Roy, superintendent of "The Moorings," and Dr. Ernest R. Humphries will be married at "The Moorings," Marion, Mass., on Thursday, June 25.

David Lumsden for several years assistant in Floriculture at Durham, N. H., leaves the New Hampshire College on June 11, to take up his new duties as Assistant Professor of Floriculture at Cornell University.

Edmund James Welch, eldest son of Patrick Welch, Boston, was married to Miss Anna Adeline Welch, at St. Patrick's Church, Roxbury, Mass., on Wednesday, June 10. The church, which was elaborately decorated with lilies, climbing roses, hydrangeas and gladioli, was filled with the friends of the bride and groom. A trip to Europe is in the honeymoon program.

Ed. Asmus, who has been managing the Closter, N. J., establishment since the death of his father, Ernst Asmus, will, after July 1, also assume charge of the West Hoboken place hither run by his brother. Percy W. Richter, who has been salesman for Phil. Kessler in the Coogan Building, New York, will now resume his former position as salesman for the Asmus establishments.

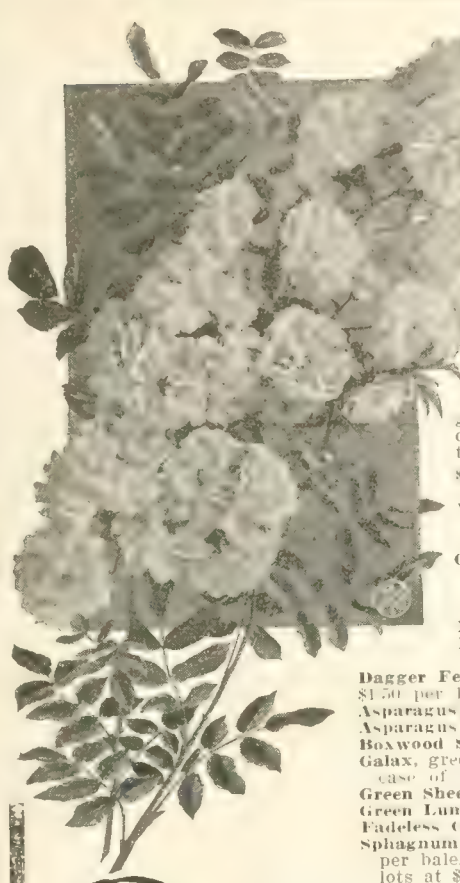
Flower Market Reports

BOSTON

Business is below normal for this date, but is somewhat better than it was last week. There is a heavy stock of everything in the market and prices in quantity are necessarily low. In roses the best sellers are Double White Killarney, Killarney Queen, Cardinal and Sunburst. Lily of the valley is also a lively subject this month. Of the things that are not quoted in our regular price columns, but which are having a fair demand just now, there are peonies from $4 to $8 per 100; cornflowers at 75c. to $1; gladioli at $4 to $8. Peonies from a distance are weather beaten and bedraggled but the local crop which is just opening, is all right as to quality.

CHICAGO



The condition of the Chicago market remains a great disappointment to those who are accustomed to having a good business in June, as a sort of preparation for the dull months following. There does not seem to be any basis for hope of a change in the near future, the government thermometer registering 93° and a strong, hot wind from the southeast taking the life out of the stock. The Saturday trade, though nothing like a normal week-end business, was a little more encouraging than the balance of the week, but this week unless stock is excellent, it does not move at all. A few really good carnations are seen but the great bulk are soft and sleepy. There is some demand for a good quality of roses for June weddings and commencements, but stock is apt to be small and weak-stemmed. A fair supply of Beauties are coming and these sell, especially the longer ones. Shipping is light. Peonies have proven unsatisfactory as a whole and many growers will face a loss.

CINCINNATI

This city and vicinity is still in the throes of the hottest spell of the year. Last week we had a brief respite but this week the sun came out again with all and more of its former fury. The rural districts need rain badly. Flowers are in a very heavy supply but a large part of them are showing the effect of the hot weather. The demand ranges from slow to ordinary. Last week was commencement week and resulted in a fair call for flowers. Most of the florists came in for their share of this business. Blooms mostly sought after were yellow roses, American Beauties, corn flower and coreopsis. At the time of this writing all seasonable flowers may be had in quantities.

NEW YORK

Complaints of dull demand and unprecedentedly low figures on staple cut flowers are prevalent in the wholesale market district again this week. The Memorial Day slaughter left the market in a most demoralized condition from which there has been no recovery thus far. Receipts of flowers have continued very heavy, peonies, lilies and roses predominating. Sweet peas also are far in excess of the capacity of the market. Mountain laurel in bloom is being sent in from the country and helps to increase the burden. Quantities of pyrethrums, sweet williams and similar products of the herbaceous garden are also in the way. Lilies have never been offered so cheap but even at $15.00 to $20.00 a thousand they remain unsold. Many outdoor Jacqs and other June blooming roses are seen on all sides. Carnations are not so plentiful as they were and are evidently receding rapidly, but like everything else, they bring very little. Cattleyas are superb and there are lots of them — gigas of great beauty being now at their height. Whatever one may think of the relative value of the other material which floods the market in June there can be but one opinion of the intrinsic worth of these splendid cattleyas, that it is far more than the price at which they must be sold at present. Lily of the valley is really the best seller on the list and will probably hold its own for some time to come. Receipts are heavy and quality fine. Roses show the enervating effects of the recent hot wave. The cut is still enormous

Rose Sprays

For beautiful decorative effects there is nothing handsomer or choicer than the long graceful sprays of the many varieties of Ramblers, pink, white and red. The first cuts will come from our Washington store, then Baltimore, Philadelphia and New York, giving us a longer season to supply our customers than any other house in the country.

$5.00 to $25.00 per 100, according to the length of sprays.

Flower Market Reports

(Continued from page 878)

but it will soon begin to dwindle and this fact together with the finish of the peonies, which is not far off, will soon relieve the market of its unwieldy load.

PHILADELPHIA

First week of June, which in this market is usually very good, suffered a sort of aftermath from the congested Memorial week conditions. There was a fair amount of business done, but the tremendous oversupply was still very much in evidence, especially the first few days. Later in the week things picked up a little. American Beauty roses are among the most satisfactory items. The quality is very good for the season. Prices held firm with an upward tendency. Carnations were under grade and there was little regular demand. Much of the stock went to the street at absurd prices.

"Count that day lost
Whose low descending sun
Sees prices shot to shreds
And business done for fun"

Sweet peas are very fair quality and hold their own about as good as anything. The outdoor crop is now the mainstay and they are much harder and keep well—far ahead of the forced material. In the cattleya market Gaskelliana, Mendeli and gigas now hold sway; Mossiae is about over. Easter lilies still very plentiful and very moderate in price. In regard to general conditions, the next week or two will see a big shortening up in crops. Even now the tendency is noticeable in some things. The warm weather we are now experiencing hits both quantity and quality. Peonies still in their glory. Rambler roses, cornflower, coreopsis, iris, delphinium, xerophyllum, and many other outdoor items add variety and interest to the situation, but we fear the returns for same must be rather disappointing to the shippers. Old Iron Face is having the time of his life.

WASHINGTON

The bottom having long since dropped out of the local flower market it is now a case of "How much will you give," rather than the asking of a price for anything other than perhaps lily of the valley, which is in great demand because of the large number of wedding bouquets, and orchids. Roses, carnations, gardenias, sweet peas and every other variety of flowers can be had in quantities for a song; the market is overloaded and the scrap heap in the wholesale and commission houses grows by leaps and bounds each day. There is but little call for anything and sales, other than decoration work, are made only when the customer at retail desires something exclusive, then he visits the stores. At the market one can get 75 sweet peas for as low as five cents at retail and the gardeners have to throw away large quantities even when offering them at that price. But when it comes to including sweet peas in a corsage or bridal bouquet, that's another story. A remarkably good quality of indoor sweet peas of the Spencer type are to be had at about $1 per hundred. Gladioli are in fair demand at about $6 per hundred. The week opened with intense heat, unbearable because of the cool weather which has heretofore prevailed.

ST. LOUIS

The market is still in an overcrowded condition, everything plentiful and small demands. The retailers say they had a very disappointing week. All flowers displayed at the wholesale markets show plainly the effects of the hot, dry weather. Roses come in bad and carnations are small. Sweet peas are in abundance and so are cape jasmines. Candidum and longiflorum lilies are fine, but too many. Gladiolus stalks, too, are coming in heavy. Everything in greens can be had in plenty, except ferns, which have been very scarce of late.

Obituary

H. L. Murdock.

H. L. Murdock for 35 years in the florist business, died at his home 67 Pine St., Gardner, Mass., Tuesday, June 9, after an illness of three months, of heart failure. He retired from business about eleven years ago and the business has since been carried on by his son, F. W. Murdock. His wife died in February, since when he has been in failing health. Mr. Murdock was one of the sterling men in the florist business in New England and during his long business career enjoyed the confidence and respect of the trade to the fullest extent. His age was 75 years.

C. M. Stark.

Louisiana, Mo., June 1.—Clarence McDowell Stark, for thirty years head of Stark Nurseries in this city, under whose management the establishment became the largest nursery in the world, died suddenly Saturday afternoon at a sanitarium in Jacksonville, Ill., where he had been on account of his health. He was found dead between 4 and 5 o'clock, a few minutes after he had gone to his room for a short sleep.

Mr. Stark succeeded his father who was the founder of the big plant, as head of the Stark Nurseries. For thirty years he directed the business, placing it at the very top of its line. In this time he became known as one of the leading horticulturists in the United States. He was actively identified with the growth and progress of this city in the past third of a century. In 1904 he retired from the presidency of the nursery company.

His widow and three children survive.

H. Schmalzel.

Hans Schmalzel, florist and proprietor of the West End Green House, Lincoln, Ill., was found dead in bed on Wednesday morning, May 20, by his family, when called for breakfast. Death had occurred several hours previous to discovery of the body, and the attending physician stated death was due to heart failure.

Hans Schmalzel was born in Spietzholl, near Reginsburg, Bavaria, on March 26, 1860, and was 54 years and 2 months of age.

He came to America at an early age and settled in Canada, later coming to the United States, where he settled in Kansas. In 1898 he located in Lincoln, where he has since resided. For ten years he has conducted the West End Greenhouse and was one of the best florists and designers in the city. Recently the green house was sold, and plans were being completed for the erection of a new plant, and a stock company had already been formed. Surviving are the wife and three children, Carl F., Susie H. and Kurt, also two brothers in Germany.

VISITORS' REGISTER.

New York.—L. J. Reuter, Westerly, R. I.; Emil Glauber, Montclair, Colo.

Philadelphia: — Mrs. John Wolff, and daughter, Savannah, Ga.; George Klinges, Atlantic City, N. J.

Boston.—Leonard Barron, Garden City, N. Y.; Ormister H. Roy, Montreal, P. Q.; Wm. Cotter, Montreal, P. Q.; E. Dorey, New York City; Reginald Beal, of Carter's, London, Eng.; H. C. Neubrand, representing A. N. Pierson, Cromwell, Conn.; Wm. Tricker, Arlington, N. J.

Holm Lea, the beautiful estate of Prof. C. S. Sargent in Brookline, Mass., was opened to the public Saturday afternoon and all day Sunday, June 7. The rhododendrons, azaleas and other flowers were in their best bloom.

WANTED—By married man, position as working superintendent on private estate. Thoroughly competent with poultry, dairy and gardens. For full particulars, apply to JOHN T. WITHERS, Landscape Architect, 1 Montgomery St., Jersey City.

INFORMATION WANTED

WANTED names and addresses of foremen seeking positions on commercial places January and February, 1913. Address "J. L.," care HORTICULTURE.

POISONOUS SPRAY ON APPLES.

The London press has recently printed communicated articles relating to the presence of copper sulphate (blue vitriol) on imported apples, deposited there, it is assumed, in the course of spraying the trees against attacks of fungi, etc. It was said that this poisonous substance is employed as a spray in one American State, and that its use may seriously affect the British importation of apples therefrom. This matter has been referred to the United States Department of Agriculture.—*(Consul General John L. Griffiths, London, England.)*

FERTILIZER EXPERIMENTS

At the Floricultural Experiment Station, University of Illinois. By F. W. Muncie, in Charge of Fertilizer Experiments.

The experimental work upon fertilizers and methods of growing floricultural crops conducted at the University of Illinois at the present time may be summarized as follows:

1. The Advisability of Fertilizing With Acid Phosphate.

Experiments which have been completed have shown (1) that dried blood, supplying nitrogen to the plant, has resulted in an increase in the number of flowers without causing a deterioration in the quality in the culture of carnations and roses, in case the amount applied is not so excessive as to result in injury from overfeeding. Applications of acid phosphate and sulphate of potash have not given beneficial results when applied alone. The conclusion seems to be that nitrogen is the element most necessary to apply. During the present year, a test has been made to see whether acid phosphate when applied together with ample amounts of a nitrogenous fertilizer would cause a further increase in production. For this purpose the amount of nitrogenous fertilizer (sulphate of ammonia in this case) has been kept the same in all sections, but ample enough to supply the plant, while the quantities of acid phosphate have been varied from none to 43 lbs. on carnations and 100 lbs. on roses per 100 sq. ft., six sections, each containing successively larger quantities of acid phosphate constituting the experiment. As would be expected from an experiment extending over only six months, the results are not yet conclusive, but results to the present date may be given.

CARNATIONS* (120 plants).

*10 lbs. sulphate of ammonia per 100 sq. ft. applied to date. Acid phosphate in lbs. per 100 sq. ft.

The inconsistencies here may be due to the short duration of the experiment, or, as seems quite likely, to the fact that the soil at the experiment station is fairly rich, and does not need fertilizers until later in the year when the stock of available food in the soil has become comparatively exhausted. An observation that sections both of roses and carnations which have received no fertilizer during the fall and winter seem to be in excellent condition, would point out that the well-known adage of "not feeding until the turn of the year" is worth investigating.

(To be continued)

POISON KIL-WORM POISON

Destroys Worms, Ants, etc., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to Snails. Does not injure Grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants.)

One gallon **Kil-Worm** makes 50 gallons liquid when mixed with water.

1 qt., $1.00; ½ gal., $1.75; 1 gal., $3.00; 5 gals., $13.50.

POISON KIL-WEED POISON

A scientific Weed Destroyer—free from odor. An unsurpassed preparation for the removal of Grass, Weeds, Vines and Bushes from paths, etc. Saves expense of several men; can be applied with an ordinary sprinkling can.

One gallon **Kil-Weed** makes 30 to 35 gallons liquid when mixed with water.

1 qt., 35c.; ½ gal., 60c.; 1 gal., $1.00; 5 gals., $4.00; 10 gals., $7.50; 1 barrel, per gal., 65c.

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.
Bag of 100 lbs. $3.50.
Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N.Y.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

BELGIAN HOTHOUSE GRAPES.

(Vice Consul General Charles Roy Nasmith, Brussels.)

Hothouse grapes are raised extensively in Belgium, principally in the villages of Hoeylaert, Overyssche, and La Hulpe, situated about 8 miles outside the city of Brussels. They are also raised in small quantities at Wayre, Ste. Catherine, Contich, Duffel, Vilvorde, and Ypres, Belgium.

This industry first started at Hoeylaert 50 years ago and has developed steadily. Now there are 15,000 hothouses in which grapes are grown, and the total annual production is 4,000,000 to 5,000,000 kilos (8,818,500 to 11,023,100 pounds). New hothouses are being constructed each year and the industry is becoming more and more important.

The Belgian statistics show exports of these grapes to the different countries in 1912 as follows, in pounds: To England, 1,043,227; Germany, 317,466; United States, 211,203; Netherlands, 100,090; France, 3,968; other countries, 40,786; total, 1,716,740 pounds. The records of this office show that in 1912 the exports of grapes invoiced at the Brussels consulate general for shipment to the United States aggregated $64,977. In 1913 the declared exports of grapes from this district to the United States were some $4,700 less in value, the shipments by quarters last year being: March quarter, $16 802; June quarter, $13,463; September quarter, $4,226; December quarter, $25,782; total, $60,273.

Varieties Grown—Description of Hothouses.

The principal varieties of grapes grown in hothouses are especially the Franckenthal, the Gros Colman, and, in less quantities, the Black Alicante, also the following white grapes: Muscat blanc d'Alexandrie, Gris Dore, and the Forster. The principal variety exported to the United States is the Gros Colman which stands transportation much better than the other varieties.

The average dimensions of a hothouse in which the grapes are grown are 65 feet long, 26 feet wide, and 7 to 9 feet high. They are heated through large tile pipes, by hot air that comes from furnaces built underneath at each end. It costs about 100 francs ($19.30) a month to heat one of these hot houses during the forcing season. The coal used is anthracite. In each hothouse there is a cistern of about 10 cubic meters (2,642 gallons) full of water, which is used for watering the vines. One hothouse of the dimensions mentioned will contain 60 grapevines or 10 peach trees. The construction of a hot house costs about 1,500 francs ($290). The wages paid workmen average 3.50 francs ($0.675) per day. The average production of a hothouse is 350 to 450 kilos (771 to 992 pounds).

Peaches, pears and tomatoes are also grown in quite large quantities in the same hothouses. One house can contain 800 pots in which tomatoes are grown. Out of season—commencing in September and finishing in April—many salad plants are grown with the grapes in the hothouses, especially lettuce, spinach, and sweet cicely, also radishes, and some of these products are exported to Germany.

Trade Susceptible of Expansion.

Belgian growers of hothouse grapes who have visited hothouses in the United States consider the methods used in Belgium for growing these grapes, and especially the constructions of the buildings and the system of heating, far superior to the American way. Also some of the growers here are thinking seriously of establishing hothouses in the United States, as they consider the opportunities for making money in this way to be especially good.

At present transportation facilities between Belgium and the United States are entirely insufficient on the steamers of the Red Star Line sailing from Antwerp, about 30 miles away. All the available refrigerator space has been taken by a few growers, and other exporters of hothouse grapes are compelled to ship by way of Rotterdam or by steamer from Antwerp to Southampton, and then by steamer to New York. One grower gave it as his opinion that ten times the amount of grapes now sold in the United States could easily be disposed of if they could be delivered, and all the shippers agree that there is no difficulty in finding a market for their grapes.

401 Oaks Road
Waltham, Mass.

IF YOU ONLY KNEW what a good eave the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the give is made with a lug to prevent the glass from slipping. Let your next house be built with a Metropolitan Patented Iron Wall Construction. You will never regret it. Our price and service are right.

The Practical Side of a Parallel Layout of Greenhouses

RIGHTLY located and properly spaced apart; the growing conditions in such a layout can be of the best. With the workroom in a central location, there is a decided economy in working the houses. The heating is economical and easily under control. A combination of narrow and wide houses can be carried out both practically and attractively. You can start by building part of the plan and enlarge from time to time—advantageously. You can enlarge and enlarge almost endlessly and still have a **compact, practical** layout.

If you would like to talk things over with us—say when and where and we'll be there.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Calceolarias.

These can be sown any time now and up to the last week in July and will make fine plants for next year. Prepare well-drained pans with plenty of crocks in the bottom and on this some coarse material, topped with a mixture of new soil three parts, leaf mold two parts, and sand one part. Fill up to within half an inch of the rim, press the compost firmly and soak it through with water. When they are drained sow thinly over the surface and press the seed gently into the fine mixture. Place in shade and when the seedlings are large enough to handle they can be pricked off into flats and placed in frames where they should be kept as cool as possible. Be careful as to watering, as calceolarias are very susceptible to damping off. When they are large enough pot into small pots, using a richer compost.

Eucharis amazonica.

Any grower who has not grown Eucharis amazonica should try a few. The culture is not at all difficult, and for anyone wishing to secure a few plants the present is a good time to begin. Eucharis can be cultivated in beds, benches or pots. For compost use fibrous loam, lumpy, dried cow manure, broken brick, charcoal and coarse sand. It it best to shake out the finer soil as what is needed is a porous soil through which water will pass readily. Established plants, started in midwinter and now coming out of 3 or 4 inch pots, are to be preferred. The plants must be shaded during the summer months and, except in the coldest winter weather, a light shade should be used, as bright sun turns the leaves a pale color. Pot-grown plants are best where only a few are to be grown. These can be rested easily and two crops yearly, and occasionally three, can be secured if they are treated rationally. In summer the pots do well plunged in frames. They make much finer growth here than in the greenhouses.

Ferns During the Summer.

All such ferns as Adiantum Croweanum, cuneatum and gracillimum; any of the pteris, cyrtomiums, polypodiums, davallias and nephrolepis—to say nothing of other varieties—will make much better growth in frames than greenhouses and will be more compact and stocky. Not only are the frames valuable for growing cyclamens, primulas, tuberous begonias and other flowering plants, but they are equally good for quantities of foliage plants, while for ferns of almost any kind they are away ahead of greenhouses. Try a few sashes of ferns this season and you will be so well pleased with the results that you will want to grow more in this way another year. If the needful head room does not exist it is easy to dig out the bottoms a little. Then give a light coating of fine coal ashes. To reduce watering they can, if necessary be plunged in partially decayed leaves, cocoanut fiber or coal ashes. The sashes, of course, must be well shaded, ventilation carefully given and the plants never allowed to suffer from lack of water.

Lycaste.

Lycaste Skinneri is the most lasting of orchids, as the flowers in winter will keep in good condition on the plants for from eight to twelve weeks. It is a terrestrial orchid and grows better in an equal mixture of fibrous loam and fern fiber than in one of pure fern fiber. Pots are the best receptacles and a winter minimum temperature of 50 to 55 degrees will be found about right. Lycaste Skinneri is an old orchid and not often seen in good condition. It is of easy culture and when reasonably well grown is far superior to many of the newer and more costly varieties of orchids which are being constantly placed on the market. Maintain a free circulation of air, keeping the atmosphere as cool and moist as possible and give them plenty of ventilation. Plants will now advance very rapidly, and in all weathers they must have every encouragement to promote quick growth by giving water liberally at the root and frequent damping down. No more shading should be used than is absolutely necessary to prevent burning.

Pruning Shrubs.

The proper time for the pruning or cutting back of overgrown shrubs as spiræas, lilacs, almonds, snowballs, etc., is right after blooming. All the spring-bloomers flower from the shoots made the previous season while the late summer and autumn flowering sorts require new young shoots for blooming. The pruning of the first named division consists of cutting out much of the older shoots, but not all, which will cause fresh growth for the next year's blooming. But the althaea, hydrangea, etc., should be well pruned in winter or early spring that strong new shoots may be produced. To do this properly takes considerable time and requires a good man. Many fine plants are spoiled by having some one trim them instead of pruning. Don't make the top of a plant look like a new broom.

Mr. Farrell's next notes will be on the following: Care of Violets; Cibotium Schiedei; Ferns for Ferneries; Primulas; Seasonable Repairs; Propagating Scented Geraniums.

A moribund show

The annual "Rhododendron Show," which was held at Horticultural Hall, Boston, last Saturday and Sunday, while it was a very attractive and brilliant display of seasonable garden flowers, was a rhododendron show in name only. This annual event which some years ago was a superb array of hardy and tender varieties has now dwindled down until the name might as well be discontinued. Although a majority of the best rhododendrons were already past, this year, yet a grand showing might have been made if the spirit to do so had been alive. There are rhododendrons in and around Boston sufficient to cover the entire building with blooms, but unfortunately there are but few H. H. Hunnewells and F. B. Hayeses, aided and abetted by such rhododendron enthusiasts as the late F. L. Harris and James Comley. We should like to see the old interest revived. There is no subject more worthy of special attention than the rhododendron.

Wanted—a square deal

There will be a hearing before the Federal Horticultural Board at Washington June 22 on the proposition to extend the lines of the quarantine zone against the interstate shipment of nursery stock and greens from New England points and to include under the existing restrictions, during certain months, herbaceous plants and greenhouse-grown stock. A well-defined suspicion is growing in nursery trade circles in Massachusetts that a vein of sectional feeling underlies these repeated agitations and attacks upon the nursery shipping trade of New England. We trust the assumption is unfounded. There is business enough for all in this big country and the nurseries of the quarantined districts of New England will compare favorably with those of any other section of the country in cleanliness and freedom from insects or fungous pests. Federal inspectors have recently discovered brown-tail moths in importations from France to New York and gypsy moths in a shipment from Japan. Make a note of that. Massachusetts thoroughly believes in rigid inspection laws but most strenuously objects to being singled out for special castigation.

The tent caterpillar invasion

The entire country seems to be suffering from one of those periodic invasions of tent caterpillars which no scientist has been able to account for so far as we know. Welcome news comes from various sections in Massachusetts that the caterpillars are dying in their nests, by thousands, from the "wilt disease" which has proved so effective in checking the increase of the gypsy moth. We have also noticed in our own home garden that the birds, especially those two much condemned ones—the blue jay and English sparrow—are taking a lively part in clearing the trees of these caterpillars as well as also the canker worms which were plentiful this year. Thus Nature comes to the aid of man in his efforts to suppress these destructive pests. Our attention has been called to a poster recently issued from the office of the Secretary of the Massachusetts State Board of Agriculture in which the cutting and burning of "all useless apple and wild cherry trees" is advised as a means of warfare against the tent caterpillar. Perhaps those who advocate this course know what they are talking about and maybe we don't. But, in our way of thinking, the logical effect of destroying the useless apple trees would be to drive the moths to those trees that are *not* useless. That moth has to lay her eggs *somewhere*. The same line of argument applies to the wild cherries. The cherries don't *breed* the caterpillar but are selected by the egg-laying moths as a favorite breeding and feeding place. Allowed to grow freely along the roadsides would these trees not serve as an inducement to the pests to congregate where they can be easily despatched with poison sprays or other summary treatment? We have been interested in a report of the tent caterpillar egg-mass destroying contest started last November by the Connecticut Agricultural College. The winner of the $25 prize was a girl who collected 116,000 egg masses. Second and third scores were 101,100 and 94,290. The pupils of one school collected 229,920 egg masses, thus winning a summer-school scholarship for their teacher. As near as can be estimated, over 10,000,000 egg masses were collected through the efforts of the pupils of the state. These egg masses average 250 eggs each.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ružička

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Planting

With the middle of June already past, planting will be in full swing on most places. To have the work go along without a stop is the ambition of all, and how much better we do feel when the last wheelbarrow load of soil is put into the benches, and the last plant placed! In emptying the benches see that all old soil is removed. Scrape out clean under the benches, and carry all this out with the old soil. As soon as the benches are all emptied, wash them out thoroughly with the hose. It is best to follow with the whitewash as soon as the benches are washed, and while they are still wet. It is surprising how much easier it is to whitewash a bench that is wet, than one that is dry. The work does not wear out the brushes so much either, and it can be done in less time, with better work as a result. When the benches are whitewashed dry, there will always be some spots left that will not receive their coat of lime, and it will be just spots like these that will breed fungus to start at the young plants.

Copper Sulphate

Use a little copper sulphate in the lime, or else throw a few handfuls of sulphur into the lime barrel when it starts to slack. This should be stirred in well, and will help wonderfully in cleaning out the disease germs and fungus that may be hiding in the benches. The copper sulphate is very corrosive, and had better be dissolved in an earthen crock, and then added to the lime as it is needed.

Straw for the Benches

The straw that was saved (?) from the pot crates will come in real handy now to put into the benches to keep the soil from sifting through the cracks between the boards that form the necessary drainage. If no straw is on hand, grass will do, so will salt or bog hay, anything that is clean. It is not necessary to use very much of this material, just enough to cover the bench bottom very lightly.

Depth of Soil in Benches

This is very important, and should never be overlooked when the benches are filled. To have the benches too full may mean ruin or something almost as bad, and yet some growers are quite careless when it comes to this. We would never use more than four inches of good soil, with plenty of sod in it, and about one-third of the bulk in good, well rotted cow manure. In filling the bench have two men leveling, and see that the coarsest stuff goes to the bottom leaving at least one-half of an inch of fine soil on top. It is not necessary to have this too fine, as that would not be of any benefit, on the contrary may prove harmful. Firm the soil well right next to the bench sides. If this is not done, it will settle after a while, and will leave holes here and there. Where the houses are shaded in the winter as sometimes happens when they are built quite close together we would advise using even less than four inches of soil. More can be added at any time, when it is needed, but none can be taken away. When too much soil is used, the plants will be too wet biggest part of the time, and will not have the root system that plants which are easily controlled in watering, will have. Then when the foggy fall weather comes, the soil is very apt to turn sour, and will not dry out. This means soft and poor growth which will as likely as not get a dose of mildew.

Distribution of Plants

When setting the plants on the benches just before planting, see that the smallest and weakest of the lot are set in the first row, placing the next size in the next and so on, until the largest are placed in the very last row. If this is not done and the plants put in haphazard, there may be some regrets on the growers' part, for the plants will not start off the same, and will be more difficult to handle. Where it is possible to have them all the same size, there is nothing better, for then it is a very simple thing to water and feed and all the rest of the little happenings that fall to the plants' lot. It is a great mistake to plant the small plants among the big ones, thinking they have a better show. Put them by themselves somewhere, and give them a little extra care. If you mix the two the big strong vigorous plants will be held back by the poorer ones. Growers who grow a few more than they really need are wise, for they can then select the very best, and throw the rest away. It pays in the end to do this, too.

A NEW VOLUME OF HORTICULTURE

BEGINS JULY 1

¶ That will be a good time for new subscribers to get in line. Old subscribers can confer a favor on their friends, as well as on "Horticulture" by recommending this paper. Once a subscriber always a subscriber is usually applicable to those who read "Horticulture," as our office records show. If not already a member of "Horticulture's" rapidly growing family, you cannot make better use of a dollar, than by starting in now.

CLUBS AND SOCIETIES

AMERICAN PEONY SOCIETY.

Secretary A. P. Saunders' Address.

Mr. President, Fellow Members:

I congratulate you and the society as a whole on the completion of another successful year. Our membership is growing, our finances are improving, the reputation of the society is steadily widening, and peonies are as lovely as ever. Last year we added sixteen to our membership; the year before, thirteen; the year before that, eight. This year we shall add twenty. So not only does our membership grow, but even the rate of growth grows.

New American Varieties Needed.

I wish that in America we might have a larger and more ardent band of raisers of new sorts. There is still so much to be done. Lemoine and Dessert, to mention no others, are at work all the time, and give us wonderful new varieties once in a while; but there is need of a hundred such enthusiasts. I wish we might have seedling peonies raised here as they raise seedling narcissi in England, where amateur and professional raisers have their sensational novelties ready for the spring shows every year. Think what Richardson produced—one man working on a tiny plot of ground. Why should we not do at least much better than we are doing? This society might, I believe, do much to encourage the raising of new sorts. I should like to see a good substantial prize offered every year for the best new variety—say $50 at the least; not with the idea that we should have to pay it out every year, but under the intention that it should be given only for the occasional really good things, to be awarded, let us say, only to such varieties as the Nomenclature Committee would wish to put into their list of best sorts. Very few American kinds that I know of could get in on such a requirement, but such recognition as that would mean the reputation of the variety ready made.

Adopt a High Standard.

I believe we might foster in that way this infant industry and raise it up to a stage of importance in the horticultural community. The tradition of Richardson is bearing fruit in the neighborhood of Boston, where the Massachusetts Horticultural Society from time to time puts its stamp of approval on a new sort. But we cannot all get to the Boston shows, nor would the dates fall right for many of us if we could. Our own shows moving year after year north, south, east and west, offer an opportunity to almost everyone once in a while to bring out what he has. We have, I know, in the past suffered from an over-production of new kinds, or rather from an over-naming of new kinds. And our Nomenclature Committee has spent a good deal of time in examining and describing kinds that might much better have been confined to the originator's own premises. But I think those days are over, and it is just by setting up a high standard that we can prevent them from recurring.

Encourage the Amateur.

Now I know that the professional man often feels that he cannot be bothered with a batch of seedlings every year—they take too much attention. That may be true for him, but certainly for the amateur who does not have to look to his garden as a source of profit, it is always possible to set aside a corner for the "youngsters." Only it cannot be too often said that if he will avoid disappointments he must be very particular as to the source of his seed, and take only the very best.

These thoughts of the amateur's garden bring to my mind the fact that we have this year lost from our society one of its most enthusiastic amateur members, Wilton Lockwood, painter and lover of flowers. I suppose very few of us had ever met him. I do not think he had attended one of our meetings in many years; there were reasons why he could not come. But he was a garden lover of rare enthusiasm. Mr. Lockwood was famous not only as a painter of portraits, in which line he achieved great distinction, but particularly as a painter of flowers, peonies especially; and one of the notices of the memorial exhibition of his paintings held last spring in New York, speaking of his passion for the peony, says, "these flowers had a peculiar fascination for him, and canvas after canvas is given up to a study of their fragile loveliness." We cannot all have such gardens as Mr. Lockwood's, but the beauty of the peony we can all enjoy, and indeed I do not know what else has brought us all here today, except "their fragile loveliness."

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Ladies' Night was duly observed by this club on Tuesday evening, June 16. Considering that this was the date of Class Day at Harvard and other events of interest to different club members, the attendance was very good, over 200 being present. The lecture hall was used for the entertainment and dancing, and the large exhibition hall for the strawberries, cake and ice cream, which were served in generous quantities. The only address was made by President Kennedy who briefly voiced the welcome of the club and referring to the great coming event of the year, asked every member to constitute himself a committee of one to help make the S. A. F. convention a credit to Boston and to make the visitors who will come on that occassion feel at home. Mr. Singer contributed songs and two young ladies gave some fancy dances, after which dancing was participated in by the young folks until midnight. The affair was a great success.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

There was a large attendance at the monthly meeting of this society, held in Greenwich, Conn., June 12th. Letters were read from several friends of the society, offering substantial cash additions to the premium lists of the Summer and Fall Exhibitions. M. C. Ebel, who was present, gave an address on the National Association of Gardeners and after discussion it was unanimously decided by those present to co-operate with this body and support any movement tending to the advancement of horticulture and the profession generally. The president appointed a committee of three members who will endeavor to look after local conditions and work in conjunction with the national co-operative committee.

An interesting feature of this meeting was the competition open to assistant gardeners only for the silver and bronze medals offered by the H. F. Michell Co. for the best arranged centerpiece for dinner table. There were four contestants, each displaying tasteful and artistic work. First prize was awarded to David B. Ridpath of Mamaroneck, N. Y., assistant to James Stuart; 2nd to Andrew P. Clarkson of Portchester, N. Y., who is with Alex. Marshall. A hearty vote of thanks was awarded to Neil MacInnes of Mamaroneck, and to Adam Smith, of Rye, N. Y. The judges made the following awards to the other exhibits: Cultural certificates to Alex. Marshall for Miltonia vexillaria and cut spray of Cattleya Mendelli. Thos. Aicheson highly commended for Oncidium Wentworthianum. P. W. Popp, vote of thanks for Climbing American Beauty, a novelty of recent introduction. Next meeting July 10th. P. W. Popp.

LENOX (MASS.) HORTICULTURAL SOCIETY.

The regular monthly meeting of the above Society was held on Saturday evening, June 6th. A committee of three was appointed to cooperate with the National Association of Gardeners, namely: A. J. Loveless, E. Jenkins and S. W. Carlquist. Thos. Proctor was awarded a certificate of merit for Clarkia Queen Mary and a diploma for Clarkia Salmon Queen. Burton N. Gales, assistant professor in bee keeping at Massachusetts Agricultural College, gave a very interesting lecture entitled, "More Bees for Massachusetts." The speaker mentioned how valuable bees were to the fruit grower for fertilization of various fruits, such as melons, cranberries, etc. John Mair. Asst. Secy.

ST. LOUIS FLORIST CLUB.

The florist club meeting, June 11, was poorly attended. The trustees reported that all arrangements were complete for the anniversary banquet for Wednesday, June 24th at the Jefferson Hotel in the Floral Hall. State V. P. Windler of the S. A. F. reported as to the work he was doing and urged the members to make the trip to the convention at Boston. The Sunday

SANDER & SONS ORCHID GROUP, CHELSEA SHOW, LONDON, 1914.

The accompanying illustration conveys only a faint idea of the magnificent group of orchids by F. Sander & Son at the late Chelsea Show. They were awarded the gold medal, two first-class certificates, two awards of merit, and the Davidson cup, the latter being for the best Cattleya species in the exhibition (Cattleya Schroderæ var. Queen Empress).

The centre of the group consisted of specimens of Brasso-Cattleyas, in splendid varieties, many of them carrying 8 and 10 flowers, and on each side was a mass of soft rose and white color, produced by home-raised plants of Miltonia vexillaria, M. Bleuana, M. Hyeana, M. v. Solum, M. v. Laelia Sander, M. v. Dreadnought, M. v. Our Princess, etc. There were also splendid specimens of Laelio-Cattleya Hyeana splendens, and others. Scarlet and scarlet and white Odontiodas, arranged with white Phalænopses, and at the end masses of Cattleya Schroderæ, including C. Mendelii, C. Mossiae, etc., formed an admirable contrast to the red Renanthera Imschootiana, of which there were many splendid specimens.

Odontoglossums were dispersed throughout the entire group, of both species and hybrids, many of them new forms. The many hybrids raised by this firm attracted much attention, especially the Miltonia Warscewiczii crosses, including Odontonia Laelia Sander, O. St. Alban, O. Magali Sander, and O. Roger Sander. The charming white Trichopilias, suavis alba, and Backhouseana, in front of the group were very lovely in contrast with Renantheras, Miltonias and Phalaenopses.

closing question was brought up for discussion. The good and bad features were fully discussed and finally on a vote it was decided that the club indorse the movement of Sunday closing and that every one present should urge his neighbor to sign the petition. At the next meeting, July 9, nomination of officers, will take place.

CLUB AND SOCIETY NOTES.

Frank G. Cuthbertson, with C. C. Morse Co., San Francisco, will read a paper at the Sweet Pea Convention in New York, on "Sweet Peas—Past, Present and Future."

On June 12, M. C. Ebel, secretary of the National Association of Gardeners, gave an instructive address on "The Gardeners' Co-operative Movement," before the Westchester and Fairfield Horticultural Society at Greenwich, Conn.

The eighth annual exhibition of the Southampton Horticultural Society will take place at the Park Grounds, Southampton, N. Y., on Wednesday and Thursday, July 22d and 23d. One-half the net proceeds will be given to the Southampton Hospital. The schedule of prizes has been issued and copies may be had by writing to the secretary, Wm. Fitzpatrick.

The monthly meeting of the New London Horticultural Society was held Thursday 11th, when Miss Amy Cogswell presented an interesting paper on Old English Gardens and Old New England Gardens, the latter being chiefly those in Salem, Mass., which she said were well worth anybody's time to visit. Miss Cogswell gave an account of how the Old English gardens grew under the different kings and queens up to the time of Cromwell, who laid waste lots of gardens. The tables were well filled with flowers from the local gardens. The rooms were well filled by the members. Schedules can now be obtained for the coming shows by applying to Mr. Humphries, 38 Main street, New London.

H. LICKMAN.

Waterford, Ct.

At the monthly meeting of the Nassau County Horticultural Society, held June 10th at Glen Cove, N. Y., special prizes were received from Mr. A. G. Hodenpyle, Locust Valley, and Hitchings & Co. and John Scheepers & Co., the latter donating $50 for Darwin tulips for next spring's exhibition. Awards were made as follows:

F. Hoffman, 1st for H. P. roses; H. Jones, 1st for strawberries, and 1st for peonies. Honorable mention to H. Gaut for sweet peas, H. Boettcher for sweet peas and Aquilegia, Cutys after W. Cole, for asparagus. Cultural certificate to John Scheepers & Co. for peonies.

James Duthie, of Oyster Bay, gave an interesting and instructive address on Dahlias, which was very much enjoyed. Exhibits for next meeting, July 8th—12 white, 12 pink and 12 any other color sweet peas.

HARRY JONES, Corr. Sec'y.

This week the Pacific Coast Association of Nurserymen is in annual convention in Vancouver, B. C., the dates being June 15-18. The prospectus sent out by the Secretary-Treasurer said among other things the following:

"It is the expressed wish of the Oregon members that delegations from California, Nevada, Arizona, Utah and other sections will route via Portland, Seattle and Victoria, reaching the first mentioned not later than Sunday morning, June 14, 1914, that at least the major portion of the delegations from this side of the border will make the remainder of the journey in a body. The visitors are due to arrive at Victoria on the morning of the 15th where the entertainment committee of the British Columbia Association of Nurserymen will meet them and the delegation will be the guests of the public-spirited citizens of Victoria for the day, spending the interim in sightseeing, and in the evening will be entertained by a banquet at the Empress Hotel. From Victoria the party will take boat at 12 o'clock Monday night, arriving in Vancouver the following morning in readiness for the first session of the convention. Every day while in Vancouver there will be entertainments galore, including boat trips, auto trips and other things too numerous to mention."

Who wouldn't be a nurseryman?

Woodside, N. Y.—The greenhouses formerly used by Frank Weinberg for succulent plants is now being conducted by Malandre Bros., New York retailers.

MASSACHUSETTS HORTICULTURAL SOCIETY RHODODENDRON SHOW.

The exhibition given at Horticultural Hall, Boston, under the above name, on Saturday and Sunday, June 13 and 14, was a brilliant spectacle, filling the large exhibition hall with glowing color, but the display of rhododendrons was exceedingly meagre, the more prominent subjects being the German irises, peonies, hemerocallises and pyrethrums. Walter Hunnewell showed a table of one hundred vases of Rhododendron delicatissimum, a hybrid of maximum and Catawbiense, well known as one of the most reliable hardy sorts. T. C. Thurlow's Sons Co. showed six varieties, one truss of each and those were all.

Magnificent and extensive groups of hardy garden material were arranged by R. & J. Farquhar & Co., whose display won a silver medal, Mt. Desert Nurseries, which won honorable mention, Eastern Nurseries, which took first prize offered for twenty-five species and varieties—a tastily arranged and commendably labelled group, Old Town Nurseries and others. In all these groups the irises were a prominent component and in addition there were varied and beautiful iris collections from T. C. Thurlow's Sons Co., E. M. Dumphe and J. K. Alexander. Among the most lovely of the German irises included in these collections were Pallida Dalmatica in several varieties, Dalmatica purpurea being especially showy; Mme. Paquitte, claret rose; Mme. Chereau, white with blue edge; Clio, light and dark purple, falls white edged; Mrs. H. Darwin, white; Victorine, white and violet mottled; King of Iris, yellow and maroon; Lorelei, blue and cream; Rhein Nixe, white, with violet blue falls bordered with white; Gajus, crimson falls, with bright yellow edge; Gracchus, crimson and white; Maori King, crimson and yellow, falls margined gold; Garrick, Jenny Lind, Rose de Chine, Nibelengin and many other gems. Visitors flocked about the iris tables, busy with pencils and note books. Peonies were prominent on all sides and, besides appearing in the mixed groups, were shown separately by Mrs. J. L. Gardner, Wm. Whitman and Jas. McKissock, collections of seedlings being staged by Walter Hunnewell, Dr. Chas. Minot and G. W. Page. Seedling hemerocallis by G. W. Page, canterbury bells by Mrs. Fred Ayer, aquilegias in the Farquhar exhibit, eremuruses in the Mt. Desert group and pyrethrums and dianthus in the Old Town Nurseries display were all worthy of special notice: Jackson Dawson staged an interesting group of flowers of hardy rose species, seedling climbers, etc., which was awarded a certificate of merit. Miss Cornelia Warren, gard. Henry Stewart, showed a fine hydrangea group.

In tender material orchids were the principal factors. First and second prizes went to Mrs. J. L. Gardner, gard. Wm. Thatcher, for very extensive groups strong especially in Cattleyas, Miltonias, Phalaenopses and Calanthes. F. Dolansky showed a gigantic specimen Cattleya Mossiæ and two plants of Mossiæ Warneri. E. A. Clark, gard. Alex. McKay, was in with Dendrobium thyrsiflorum and Miss Warren staged a group of big Oncidium flexuosum, which was a show in itself.

There was the usual appetizing display of choice vegetables, a cultural certificate being awarded to Frank Wheeler for asparagus.

STONE AGE HUMOR.

There's an editorial note in last week's HORTICULTURE which I think is worthy of passing comment. You mention the happy way in which the members of the Nurserymen's Association mix relaxation with business. The editor seems to think well of it. I agree with him. It is a fine art. Most of the big successful concerns of the country have made it a study and the effectiveness of their putting the idea into practice has been the G. E. R. (generation equals results) or else there's something wrong. It is far from easy to put a correct theory into correct practice. James Watt tried all his life to put his theory of the steam engine into practice, and he vastly improved as the years rolled by. His successors are still improving on the practice, but the theory remains the same, and that theory of the steam engine has revolutionized the world. It has shortened distance and multiplied production during the past hundred years to the extent that few of us trace to its source—James Watt's theory. This is merely by way of illustrating that the theory of mixing relaxation with business is one of the finest of fine arts and only the highest intellects in our profession have a clear conception of it. The idea of a committee of a trade club putting at the end of their outing circular "anyone who talks business will be fined five dollars." That's silly and shows a lack of understanding of human nature. If I share joys with my brothers I must also share in their sorrows. There is no picture without light and shade. Consequently when we go to a picnic the thing to do is to be natural and talk about whatever sufficiently interests us. There is just as much enjoyment to be found in talking business as there is to be found in talking religion or politics or sport. But I presume the remark I refer to was not directed at a moderate well balanced personality that takes everything in moderation, but at those men who carry whatever they do to excess. Some eat to excess; others dress to excess; some push business to excess. They will try to sell a man a bill of goods on the picnic grounds with no more manners than a curbstone peddler. Fortunately there are few like that in our trade bodies and the small percentage there is does not justify any committee in stigmatizing the majority of the members who are well balanced and know better. The remark was probably put in as humorous. If so—it was of the stone age brand.

P. S.—Your scribe passed through Michell's this afternoon. Fred. Michell, Junior, is one of the committee whose name is signed to that $5.00 fine rule for talking business at the picnic. A bundle of bags and a wheelbarrow wanted the right of way. We courteously stepped aside. The youthful Fred. explained these items were for the sack and wheelbarrow races at the outing. The bags were stamped in letters nearly a foot high, "Michell's Reliable Seeds." If that isn't talking business in large caps, what is it? And by one of the committee, at that! The blaze on the bags blinded us for the minute, so we did not see the name on the barrow, but no doubt it was equally fineable. Two fives, please. Cough up!

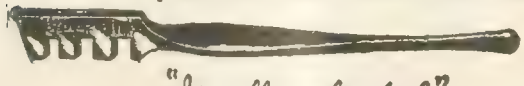
GEORGE C. WATSON.

WAR ON CATERPILLARS.

There was a great clean-up of moths and caterpillars in Revere, Mass., on Saturday, June 13. The presence of these pests on private grounds and in orchards became a positive nuisance and the new Civic Club of Revere perfected plans to form an organization to war on the insects.

The principal of every school centre was made a field secretary and the town was blocked out in squares. Companies of 10 were next chosen, with a leader for each company. The Scout Masters had supervision of their respective territories.

At 8 o'clock in the morning the war began and at noon thousands of nests of caterpillars were destroyed. It was the greatest clean-up ever made in Revere and will, undoubtedly, benefit the owners of orchards, as well as the farmers, many thousand dollars.



HOW TO CHECK THRIPS ON GRAPE VINE.

Referring to the query, on this topic, on page 869, issue of June 6, a well-informed gardener gives the following additional advice.

First buy from your seedsman vaporizing fumigator and lamp. Half fill the lamp with wood alcohol. Light and place on the floor at the lowest point. Place the shield with cup on top over your lamp. Then fill the cup with nicoticide, taking care not to over fill, otherwise it will boil over and catch fire. The small size lamp will fumigate 2,000 cubic feet, the large size will fumigate 5,000 cubic feet. Repeat this for two nights, and be sure the house is closed tight.

A postal from James McHutchison, dated at Melbourne, Vic., reads as follows: "Best wishes from this fine city with the beautiful gardens—better, I think, than any I have ever been in.

TARRYTOWN HORTICULTURAL SOCIETY.

The Sixteenth Annual June Exhibition of the Tarrytown Horticultural Society was held in F. R. Pierson's new floral building on the 16th inst. The exhibition opened to the public at 2 P. M., and remained open until late in the evening. The exhibits of roses, strawberries, and hardy outdoor flowers were particularly fine. In the strawberries, a variety called Barrymore was the largest and finest shown. In addition to the display of roses and sweet peas, which were up to the usual standard of excellence, there were exhibits of numerous hardy perennials, and palms and ferns supplied by F. R. Pierson. The vegetable exhibits, also, were very fine.

The Society is greatly indebted to Mr. Pierson for the use of his new building in which to stage the exhibits. It made a magnificent setting for the flowers, enhancing their beauty to a very great extent. The attendance was the largest in the history of the Society. People were present from all parts of Westchester County, and even from New York City. It is estimated that a thousand passed through the building from the opening to the close of the exhibition. For a place the size of Tarrytown, this was a remarkable attendance, showing the interest of the public in an exhibition of this kind.

The Garden Association in Newport and the Newport Horticultural Society will hold their second annual open-air flower show on the grounds of Hon. George Peabody Wetmore, Bellevue avenue, Newport, R. I., on Wednesday, Thursday and Friday, June 24, 25 and 26, 1914. The show will open on Wednesday at 2 p. m. and close daily at 8 p. m. Premium list may be had on application to William Gray, care of Mrs. Leeds, Bellevue avenue. Admission, Wednesday, $1, Thursday and Friday, 25c. Music and tea each day, from 4 to 5 p. m.

Obituary

Stanley Knaflewski.

Stanley Knaflewski, of the Hamilton Floral Company, 2321 North Hamilton avenue, Chicago, Ill., committed suicide on Sunday, June 7th. Business troubles prompted the suicide. He was forty-two years of age and married.

Cornelius A. Sullivan.

Cornelius A. Sullivan, for many years an employ in the florist establishment of Louis Menand, Albany, died on June 3 at Saranac Lake, at the age of 45 years. He was a native of Albany and well known and highly regarded in the local florist trade.

William F. Bassett.

William F. Bassett, 89 years old, a well-known dahlia grower and one of the pioneer residents of Hammonton, N. J., died on June 7. He had been in fair health until Sunday morning, when he was found dead in a chair by his wife when she returned from church.

For 70 years he has been engaged in the growing of dahlias. He was the originator of many of the new varieties of the last 30 years. His widow, a daughter and two sons survive.

HYDRANGEAS

EXTRA LARGE PLANTS IN TUBS AND BARRELS FOR SUMMER FLOWERING

We make a specialty of hydrangeas, and have a very large stock of plants which have been kept backward and which are now just beginning to set buds. They are in fine shape for shipment, and will bloom from June to August. Plants are heavily budded, and are exceptionally good value.

We have always made a specialty of large hydrangeas for summer-blooming, and we never had such a fine stock as we have at this time. We have a very large stock, especially of the plants in barrels, and can supply carload lots.

Fine plants in tubs.....$2.00 and $3.00 each.
Extra fine specimens in half-barrels.....$5.00, $7.50 and $10.00 each.

SEED TRADE

The Convention.

We assume it is generally understood that the American Seed Trade Association convenes in Washington Tuesday next, continuing Wednesday and Thursday. Those who have not secured rooms should lose no time in doing so, for as Congress is still in session, the leading hotels will be well filled. If next week will be as delightfully cool as the week just ending it will add greatly to the comfort of the delegates. Our Washington friends have assured us that their city is a very fine summer resort, with a most equable climate, and we expect them to prove it.

The Canners in 1915.

Speaking of conventions, our Canner friends seem to be experiencing much difficulty in locating their 1915 convention. Up to the time that San Francisco was eliminated no other city had received any consideration, and it was necessary to investigate the facilities of each one extending an invitation to test their hospitality in 1915. Because of the lateness in the season and the difficulty in getting the committee on location together, matters have apparently been drifting, and up to this date no selection has been made. We learn that New York City is a bidder and the difficulty in ascertaining just what facilities our great metropolis has to offer has been one of the factors in delaying a decision. It is reported that many of the members, comprising the three associations, which make up the annual Canners' Convention, are very much dissatisfied by the delay of their committee in locating the convention, but we feel justified in saying that they have had an unusually difficult problem to solve.

Crop Conditions.

We have been endeavoring to secure information from seed growers, both in this country and Europe, and are able to give general conditions at this date, which we believe to be substantially accurate: Peas: the acreage planted for seed is materially smaller than a year ago, and while general conditions are favorable, there has been a frost in Idaho sufficiently severe to kill all tender vegetation, and to quite seriously damage all peas in blossom or where the pods had already set. Where these crops are grown under irrigation it has been learned that a prompt application of water following a freeze will largely counteract the effects, and the results of the recent frost cannot be known for some weeks to come. It may be taken for granted, however, that more or less damage has resulted. It is not unusual for frost to visit these northern states in midsummer, but it is seldom that a killing frost is experienced in June. It is to be hoped that the annual July frosts will not appear this year. Beans: No estimates are possible on beans, as they are hardly more than out of the ground, but fortunately not many are grown in the northwest where most of the seed peas are grown. Corn is much in the same condition, or class as beans, and it will not be

BODDINGTON'S QUALITY FLOWER SEEDS

SELECTED SEEDS SUCCESSFULLY SOWN SECURE SURE, SAFE AND SERVICEABLE SATISFACTION

IT has been, is, and always will be our policy and intention to disseminate only the very choicest strains of flowering seeds (or any other varieties of seed), giving special attention to the class known as **Florists' Seeds**, and intending customers need have no hesitation in buying or fear of disappointment when they bloom. No expense has been spared to secure the finest types as to habit of plant, form of flower, color and breeding of our **Quality Strains of Primula, Cineraria, Cyclamen, Calceolaria, etc.**

ASPARAGUS

PLUMOSUS NANUS. True greenhouse grown. 50 cts. per 100 seeds; $1.00 for 250 seeds; $3.50 per 1000 seeds.

PLUMOSUS NANUS. California grown. 50 cts. per 100 seeds, 75 cts. for 250 seeds; $2.50 per 1000 seeds.

SPRENGERI. 25 cts. for 250 seeds; 75 cts. per 1000 seeds, $3.00 for 5000 seeds.

CALCEOLARIA HYBRIDA

BODDINGTON'S PERFECTION. The herbaceous Calceolaria is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colors there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. ½ pkt., 60 cts.; pkt., $1.00.

Boddington's Matchless CINERARIAS

BODDINGTON'S MATCHLESS CINERARIA. A combination of the three most famous English strains, which we can recommend to those wishing to grow the best. **Tall,** ½ trade pkt., 60 cts.; trade pkt., $1.00. **Dwarf,** ½ trade pkt., 60 cts.; trade pkt., $1.00.

CINERARIA STELLATA (Star-flowering Cineraria). Tall growing, 4 to 5 feet; excellent as a single specimen for table decoration, or for grouping with splendid effect in corridors and conservatories. ½ trade pkt., 60 cts.; trade pkt., $1.00.

CANDYTUFT (Iberis) H. A.

BODDINGTON'S GIANT HYACINTH-FLOWERED. Large, pure white, spiral spikes. The finest variety for growing under glass. Trade pkt., 35 cts.; oz., $2.00.

MIGNONETTE H. A.

BODDINGTON'S MAJESTY. The finest of all the fancy varieties of Migonette; an improvement on Allen's Defiance. Seed saved from select spikes under glass. Trade pkt., 60 cts.; ⅛ oz., $1.00; oz., $7.50.

BODDINGTON'S POT MYOSOTIS

Forget-Me-Nots are delightful subjects for flowering indoors at Christmas time, and as they are everywhere welcome, the practice of growing plants in pots is rapidly increasing. Sown in July and potted on, the strain we offer produces fine, free-growing specimen plants. Trade pkt., 50 cts.; 3 pkts. for $1.25.

SCHIZANTHUS (Butterfly Flower) H. A. 1½ ft.

Elegant, free flowering, hardy annuals for the garden in Summer or for pot culture in the greenhouse during Winter.

GRANDIFLORUS BODDINGTONII. Boddington's Select Hybrids. The strain is superior to any of the Schizanthus in cultivation, the flowers are better shaped and the colors are more varied. In habit the plants are very bushy, and the flowers are invaluable for cutting; as a pot plant for conservatory decoration, they are unequaled. Trade pkt., 75 cts.

WISETONENSIS. The colors are varied, ranging from white with yellow center to pink with brown center. Most useful as a Winter plant, and should be given a place in every greenhouse. Trade pkt., 50 cts.

Boddington's Matchless GIANT PRIMULAS

PRIMULA SINENSIS

Boddington's Matchless Giant Primulas, Mixed. This selection includes all the finest Giant Single Primulas of the plain-leaved class. ½ trade pkt., 60 cts.; trade pkt., $1.00.

Boddington's Matchless Giant Pure White; Boddington's Matchless Giant Blush White; Boddington's Matchless Giant Orange King, a delightful novelty, almost orange; **Boddington's Matchless Giant Rose; Boddington's Matchless Giant Scarlet; Boddington's Matchless Giant Royal Blue.**

Each, ½ trade pkt., 60 cts.; trade pkt., $1.00. Collection of the above 6 varieties, ½ trade pkt., each, for $3.50.

The Duchess. The large, pure white flower, with its unique zone of bright, rosy carmine, surrounding a clear yellow eye, is simply unapproachable in its beauty. ½ trade pkt., 60 cts.; trade pkt., $1.00.

Sutton's Coral Pink. The name describes it; habit dwarf and compact; flowers thrown well above foliage. Pkt., $1.00.

PRIMULA OBCONICA GIGANTEA

Primula obconica gigantea Kermesina. Beautiful, deep crimson.

Primula obconica gigantea alba. The pure white flowers greatly enhance the beauty of the existing lilac, rose and crimson shades.

Primula obconica gigantea lilacina. Beautiful lilac.

Primula obconica gigantea rosea. Lovely rose.

Primula obconica gigantea grandiflora. Mixed varieties, pure white to deep crimson.

Each of above, ½ pkt., 30 cts.; pkt., 50 cts.

PRIMULA floribunda grandiflora (Buttercup). Small yellow flowers, borne in great profusion; fine for pots. Pkt., 50 cts. **Forbesii** (Baby Primrose). Pkt., 25 cts.

PRIMULA KEWENSIS (Giant Buttercup). This plant is a strong grower, with bright green leaves and numerous erect flower-scapes, 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb nearly an inch in diameter. As a Winter flowering decorative plant it is an acquisition; very floriferous when in a small state. ½ trade pkt., 60 cts.; pkt., $1.00.

PRIMULA FIMBRIATA, GIANT QUEEN ALEXANDRA. G. P. The largest white Primula Sinensis, blooms measuring 2½ inches across. Petals very solid and erect. Robust foliage with red stems. ½ pkt., 60 cts.; trade pkt., $1.00.

PRIMULA, NEW HYBRID QUEEN OF ROSES. A lovely new hybrid of P. obconica and P. stellata, producing shapely heads of large and beautiful, bright rose colored flowers, remaining decorative for a long time. 1 foot. Trade pkt., $1.00; ½ pkt., 60 cts.

PRIMULA MALACOIDES. H. H. P. (The Giant Baby Primrose.) The plants branch very freely. The flowers, which are ¾ inch wide, are of a pretty light lilac, and are borne in whorls on long stems. If grown in a greenhouse, can be had in bloom in four months after sowing. Trade pkt., 40 cts.; 3 pkts. for $1.25.

PRIMULA MALACOIDES ALBA. The white prototype of the foregoing variety and a great acquisition; very chaste and beautiful. A plant or cut flower. Trade pkt., 50 cts.; 3 pkts. for $1.25.

ARTHUR T. BODDINGTON, Seedsman **342 West 14th St. New York City**

before midsummer that any forecast of these crops will be of any value.

As to California crops, onion seed is estimated at from two-thirds to three-fourths of an average yield, lettuce about the same, and we may include under this heading, carrots, table beets and some less important items, such as kale, etc. Cabbage, with the exception of Danish ballhead, will be little better than two-thirds of a crop. Radish will be from three-fourths to full, salsify the same, while parsley and mangels will be practically full. These estimates cover not only California, but the general European and American conditions. We understand sweet peas will be very short, estimates being about fifty per cent of an average, while Golden Self Blanching celery will be very short as usual. The French grown seed probably will not be much better than one-quarter of a crop. Other varieties of celery will range from half to three-fourths.

From now on we shall endeavor to keep our readers as accurately informed of crop conditions as possible, and as we have generally exceptionally well informed correspondents, our crop news may be accepted as reliable. As has been predicted, trade which opened late this year (we refer ta counter and local trade) has held up well and there has been greater activity than usual at this season of the year. Trade, however, has been easing off quite rapidly within the past week or ten days, and at this date business is general confined to seasonable products.

Notes.

The St. Louis Seed Co. gave their employes an outing at Waterloo, Ill., on Sunday, June 14, when the entire force and the officers attended. The affair was managed by H. Hummert, vice-president of the company. The weather was fine and everybody had a good time.

A rumor that Mr. F. B. Mills, of Rose Hill, N. Y., the well known mail order seedsman, had decided to dispose of his seed business, and go west to engage in some other line, is emphatically denied by Mr. Mills, who reports a very satisfactory season's business. After nearly a quarter of a century of well-directed effort, Mr. Mills has established a fine mail order business and it is incredible that he would sacrifice it for a, to him, new and untried line.

TWO SERIOUS BEAN DISEASES.

The office of information, U. S. Dept. of Agriculture, has sent out a bulletin on the blight and anthracnose of garden and field beans, which caused a loss in Michigan alone estimated at $2,000,000, or 20 per cent of the crop of 1913, from which we take the following extracts. It is becoming more difficult each year to secure bean seed free from one or both of these diseases and it becomes highly important that the diseases be more thoroughly recognized and that the best available methods of control, some of which must be begun in the early cultivation of the plants, be understood and put into practice.

Bean Anthracnose.

Bean anthracnose is caused by a fungus which attacks the stems, leaves, pods and seeds of the plants. On the stems and leaf veins it causes elongated, sunken, dark-red cankers, sometimes killing young plants and often producing deformed and yellowed leaves. Rounded or irregular sunken spots with a slightly raised rim are produced on the pods, the fungus sometimes penetrating the pods and entering the seed, causing dark, sunken specks or spots. In these diseased seed as well as in the refuse from diseased plants the fungus is propagated from season to season.

Bean Blight.

The bean blight is caused by a bacterial organism. On the leaves it produces irregular, diseased areas which at first have a water-soaked appearance, later dry out and become brown and brittle. The entire margin, or half of a leaflet is often affected. On the pods the disease starts as slightly raised and watery pustules, which later enlarge, become of irregular shape and amber color with yellow centers. Infected seed show yellow diseased blotches or are entirely yellowed and shriveled.

Nature of Loss.

Both diseases cause serious losses in the snap bean trade. Diseased pods are unmarketable and must be sorted out. If but a few slightly spotted pods are packed in a basket, the disease may spread during shipment. In the seed bean trade all beans must be hand-picked to get out the discolored diseased seeds, involving heavy loss of beans as well as the cost of sorting.

Control Measures.

Anthracnose can be avoided by a careful system of seed selection. Save seed from pods selected with great care for entire absence of spotting. Shell by hand to avoid reinfection, and plant on clean land. Pull and burn any plants showing disease.

In the absence of such disease-free seed (1) secure for planting, seed having the least possible amount of disease; (2) all seed should be hand-picked and no seed showing the slightest discoloration should be planted; (3) never plant beans on land where the same crop grew the previous season; (4) do not cultivate or walk through the bean field or pick beans while wet with dew or rain. The bean blight is more difficult to control than anthracnose, but the same methods will give the best results at present available.

Painesville, O.—R. E. Jackson and H. C. Bickle have entered the nursery business.

KNOXVILLE, TENN., NOTES.

Crouch's report that the demand for bedding plants was much heavier this year than usual, and all are practically sold out clean in that line.

Addison J. McNutt has just installed a new refrigerator, which adds a great attraction to his place and shows off his stock to good advantage.

The Knoxville Florists' Society met on Tuesday night, June 2nd, at C. W. Crouch's store on Gay street. A very enthusiastic meeting was held and it was unanimously decided that all stores be closed on July 9th, to have our first annual picnic. Committees were appointed on grounds and advertising.

Weather extra dry; in fact, if we do not get rain in a very short time everything out of doors will be ruined. This is the longest drought ever known in this section that we have any record of. It has also been very hot, the thermometer ranging from 95 to 105 degrees, which is very unusual. This dry weather is working a hardship on our market gardeners especially, and our local market, which is considered one of the best in the South, is very short and prices are just about double what they usually are.

On account of the exceedingly hot and dry weather Chas. L. Baum was forced to discontinue the shipping of carnations to the South. This week will about wind up all carnations, as the old plants are being thrown out and new stock planted in. Roses are going off crop after cutting heavily for the last four weeks. Mr. Baum contends that the bedding plant business is slightly a separate line and does not go well with the cut flower trade and intends to put the space occupied by plants into carnations and chrysanthemums and figures it will pay him twice as well.

Miss Ethel Lawrence, of the Lawrence Floral Company, Atlanta, Ga., on her vacation, spent ten days in Knoxville with Mr. and Mrs. Karl P. Baum. She left for Asheville, N. C., where she spends a week, and then goes to Spartanburg for a few days, thence home. Miss Lawrence reports the weather very hot and dry in Georgia. Miss Lawrence was a visitor to our last Florists' Society meeting. Mr. Sanders, representing Poehlmann Brothers, Chicago, Ill., and A. J. Keroes, representing Climax Mfg. Co., Castorland, N. Y., called upon the trade in the last few days.

WASHINGTON NOTES.

A fine new cement flooring has been laid in the store of Marche & Co., and this without interruption to business. A start on the work was made on Saturday night and the cement allowed to dry over Sunday.

Lightning last week struck the fuel shed on the J. R. Freeman property at Georgia Avenue and Dahlia Street and caused a slight conflagration. The storm was a very severe one and put a number of telephone wires out of commission.

Washington merchants lost out in their long fight for a continuation of the free store-door delivery service formerly furnished by the railroads and which had been enjoyed for a period of about thirty years. It was the contention of the business interests that the withdrawal of this service from New England and eastern points constituted an increase in freight rates, but this fact was denied by the Interstate Commerce Commission. Their decision applies as well to Baltimore which city had also protested against the action of the railroads.

Sunday last was observed by the Odd Fellows of the District of Columbia as Memorial Day and suitable exercises were held in their hall on Seventh Street. The huge columns in the auditorium were surmounted by three feet amphion wreaths and were surrounded by large palms. On the stage was a rail against which rested twenty-two 28-inch wreaths of ivy leaves and white flowers, with the name of each lodge here worked in purple immortelles. The work was that of Gude Bros. Co., who also were the decorators on the occasion of the McLean-Thompson wedding in St. Thomas Episcopal Church. The entire chancel and music loft were banked with Cybotium Schiedei, and along the walls were large palms. The altar was banked with Kaiserin roses and white snapdragons, and every pew in the church was decorated with a bunch of white peonies tied with white ribbon, the whole forming a flowered aisle from the street to the altar. At alternate pews the bouquets were on standards eight feet high. Wall pockets were filled with white peonies and quantities of pin-oak brush were also used.

PHILADELPHIA NOTES.

William Plumb, of the horticultural department of the Panama-Pacific Exposition, has been visiting the trade here and stirring us up in the interests of the big show of 1915. He is full to the brim with enthusiasm and has many of us hypnotized already so that it looks as if Philadelphia and vicinity will have a good representation in exhibits and attendance.

Anthony Waterer and Elsie Merriman were married on the 10th inst. This is the third Anthony in the Waterer family. His grandfather was Anthony Waterer and his uncle of Knap Hill, Surrey, England, is also Anthony. The present Anthony is a son of H. Waterer, well known in the Horticultural trade of Philadelphia, and is associated with his father in the seed, plant and bulb trade. A young man of great promise and good prospects.

The borough of Lansdowne, where your scribe sleeps o' nights when not engaged like the Laird o' Cockpen on affairs o' the state, had a "clean-up week" recently. The borough also harbors the district agent of the King Construction Co., William J. Muth, and he informs us that there also was a bit of a "clean-up" in Lansdowne for his company. Here is his record: Wm. A. Leonard, complete material for a house 40 x 300; David Anderson, do., 45 x 250; James Verner, do., 42 x 183; Wm. Didden, do., 28 x 175; E. F. Lieker, material for repairs to an old house. Pretty good for one little town.

Springville, N. Y.—John Simpson has purchased the greenhouse business of Henry Weber.

A CORDIAL INVITATION

Is extended to the trade to visit and inspect our new establishment, Fifth Avenue at 46th Street, New York City.

H. BAYERSDORFER & CO.

The Florists' Supply House of America

1129 Arch Street, - - Philadelphia, Pa.

CHICAGO NOTES.

The General Federation of Women's Clubs now in session here has led to the use of many flowers, especially roses. Huge bunches have been presented to the various speakers and used in the many receptions and banquets.

Florists are evidently regarded as worthy of attention by burglars, for Peter Reinberg's store was entered last week and the home of Richard Gloede of Evanston was the scene of an attempted robbery this week. Mr. Gloede was given some rather sensational advertising in the local papers as a result.

That portion of the downtown district known as the headquarters of the Chicago wholesale florists, is gradually being encroached upon by the big buildings. Just across the alley from E. C. Winterson's, the Franklin McVeagh building is down and the one at the N. E. corner of Wabash and Washington is following. The building occupied by A. L. Vaughan seems likely to follow soon and it is understood that the Atlas block, housing eleven wholesale florists, has only a limited time left.

PERSONAL.

Thomas Pegler, of Brunswick, Me., late of the Boston Flower Exchange, is in the asylum at Augusta, Me.

David Welch of Welch Bros., wholesale florists, Boston, will sail for Liverpool on the Cunarder Laconia, leaving Boston on June 23.

C. E. Critchell is arranging to go to Boston next week to look after his various duties as chairman of the sports committee of the S. A. F.

Chas. J. Bolgiano, of J. Bolgiano & Son, Baltimore, Md., is now enjoying a much needed rest with his family at the Hotel Dennis, Atlantic City.

George O'Sullivan, salesman for P. J. Smith, 49 West 28th street, New York city, and Miss M. A. Gallagher, of Astoria, were married on June 15th.

Flower Market Reports

BOSTON Trade is quite improved over the past two weeks and may be said to be fairly good all around. The closing exercises of colleges and schools on the one hand and the clearing out of old stock by the growers, on the other hand, has made the supply and demand more nearly equal and a better feeling prevails in the wholesale marts. There is a greatly reduced cut of carnations especially. Lilies continue in enormous overstock and sweet peas are also far beyond requirements.

BUFFALO The first two weeks in June has seen the heaviest receipts of the season, especially on carnations and peonies. Everything in the line of cut material has to be forced on the buyers. Peonies of local growing are in and it certainly has been a bad season for disposing of them. The retailers have failed to move them in quantity at 25c. the dozen. Other sales such as peas, roses, carnations, have had to move at very low prices, especially carnations, which, on Saturday, were sold at a merchant's store for three hours at 25c. for two dozen. Of course this helped out the wholesaler considerable though the losses had been heavy at the earlier part of the week. At this writing, Monday, 15th, roses have shortened up and the demand is good on lily of the valley, white roses, peas, beauties, but again an over supply on peonies and carnations. With graduations and school commencements booked for next week it is hoped that things will improve.

CHICAGO Chicago market more nearly approaches a normal condition this week. The extreme heat and hot winds that played such havoc with stock, gave way to a cold wave which revived trade and greatly improved the quality of the flowers. Peonies are now selling at $4.00 per 100 with something of the old-time readiness, and growers are again encouraged. Carnations are much firmer in texture but small, and the demand is not very active. Good roses are not at all plentiful and sell promptly at sight, but there are more inferior ones than are needed. A fair demand exists for lily of the valley and a fair supply of orchids is coming in. Sweet peas are not likely to recover from the effects of the heat. Shipping trade is reported by the wholesalers as again satisfactory. The large spikes of gladioli which have been seen in this market and proved rather hard to move, were given a good advertisement as a stage bouquet, at the Auditorium. Two large urns held immense bouquets of light pink gladioli and asparagus plumosa, and they were a delight to the eye. No smaller flower could have filled the place so effectively. Among the offerings at the State street stores during the hot days were seen two dozen carnations for five cents—pretty fair flowers too.

EASTER LILIES

For decorative work and store use—splendid quality and in any quantity.

Long Stems $1.50 per doz. $10 per 100

EVERYTHING IN RIBBONS. We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues advise us and we will mail you one immediately.

CINCINNATI Market conditions have changed materially since the last writing. Instead of a glut in all lines with but a small or special demand we now have a market with more limited offerings in each seasonable line with a general demand that is much better than it was up till the close of last week. The improvement was first noted after the middle of last week. Gladioli, lilies, sweet peas and lily of the valley are the best as far as relative quality is concerned. The first named are much more plentiful than they have been this spring. Most of roses from our local growers are fine large stock. A considerable part of the receipts, however, are shorter than is usual for varieties such as America at this time of the year. Lilies are plentiful and excellent in quality. Sweet pea cuts are good both in respect to quantity and quality. Roses are not as plentiful as they have been for several weeks. The extreme heat has seriously affected the old stock while the cuts from the strictly summer roses are not large as yet. Carnations are easily sufficient for present needs, but are rather indifferent in quality. Large quantities of fine peonies are being taken out of storage.

NEW YORK Summer conditions are here with one exception; that is, the tremendous supply of flowers in evidence. In roses probably there is a little let-up but not enough to affect prices. Outdoor roses are very much in evidence; Ramblers, Brunners, etc. Peonies are everywhere—home grown as well as cold storage, and prices are ridiculously low. Lily of the valley again has taken a tumble, arriving in great quantity and selling any where from $12.00 to $25.00 per thousand. The quality of carnations is keeping up remarkably well. Lilies are a glut but of good quality. The best can be bought for $2.00 per 100. Cattleyas the same, good blooms selling very low as a rule. While all of the retailers seem busy with funeral work and orders for steamers, the stock they take out of the wholesale market does not make much impression.

Flower Market Reports

(Continued from page 910)

PHILADELPHIA The market here has been a little brighter, — in spots,—the past week. Lily of the valley and cattleyas are conspicuous among the bright spots as are also good white roses. The double white Killarney is distinctly ahead in quality at present—far superior to the ordinary type of White Killarney. American Beauty sells well, especially in the better grades. In fact this may be said of all flowers all along the line. There is an enormous oversupply of poor stock in everything and such material might as well be kept at home as there is little demand except for the best quality and the poor material hardly brings enough returns to pay for packing and shipping. This is especially true of carnations. Any amount of stock but nearly all poor quality. Sweet peas have suffered from the hot dry weather and are mostly short stemmed. Gardenias plentiful and going fairly well. The congested condition of the lily market which has prevailed for close on three months, shows signs of abating and it looks as if this crop would shortly swing back to normal prices.. Callas are about done. Gladioli are in good shape and are mostly of the large-flowering varieties — very few of the "baby" type now to be seen. Delphinium coming in strong and extra good, fine large spikes and long stems—a lovely decorative subject.

ST. LOUIS The wholesalers say they had a pretty good business the past week but the complaint was as to quality of the stock. Of late first-class stock is out of the question in roses and carnations. Sweet peas are about burned out by the heat. Gladioli, lily of the valley and lilies are among the flowers of which fancy grades can be had. Prices are low and the demand from now on will be slow.

WASHINGTON Some little additional business was had last week from the many commencement and graduation exercises and the June weddings, and these affairs used up a considerable portion of the best quality of stock brought into the market. Stock of all kinds continues to be overplentiful and far more flowers are being produced than can be disposed of even at rock-bottom prices. The heat on several of the days was excessive and this had a tendency to decrease the size of roses and carnations. Sweet peas and lily of the valley are moving well; orchids too are in fair demand, but the other varieties find little demand, in comparison with the quantity of stock received. Gardenias are very plentiful. There are few if any peonies and several orders last week went to out of town producers to be filled. A remarkable slump has taken place in the corsage business, for a walk along the F Street promenade finds a much smaller percentage of corsage bouquets being worn than has been the case this year.

Plainville, Ct.—John Ahlquist has leased the greenhouses of Mrs. C. M. Woodford.

During Recess

St. Louis Growers.

The St. Louis County Growers' Association will hold an outing for its members at Stuts' Grove, on June 30. This was decided at the last meeting. Something of a surprise is in store for all who come.

Cincinnati Outing.

The outing committee of the Florists Society have selected The Lagoon for the annual outing and picnic of the florists on Thursday, July 9th. The committee are arranging for the usual programme of sport and entertainment for the day.

New York Florists' Club Outing.

All aboard for Glen Island, July 1st. Boat leaves East 24th street at 9.45 A. M. All arrangements have been made for the comfort and amusement of all. We are going to a beautiful place and will be conveyed in a handsome steamer. A large sum of money has been donated for the various events. The price of tickets, which includes shore dinner and all refreshments on steamer, also sandwiches and ice cream returning, is as follows: gent's ticket, $3.50; lady's ticket, $2.50; boys and girls between the ages of 12 and 16, $2.00; children under 12 years, $1.00; babies, free and welcome. Extra tickets may be procured from A. M. Henshaw, 51 West 28th street; R. J. Irwin, 71 West 23rd street, and W. E. Marshall, 166 West 23rd street. It is necessary to let the committee know early how many tickets you will require so that ample time will be allowed to provide for the large attendance expected.

THE OUTING COMMITTEE.

W. E. Marshall, Chairman, Alf. E. Wheeler, Treasurer, 166 W. 23rd street, New York.

Philadelphia Club Outing.

The Outing Committee of the Florists' Club of Philadelphia has made all arrangements for the Third Annual Outing, to be held Monday, June 22nd, at Schuetzen Park, Tabor Station. A very interesting and pleasant program has been prepared and a most enjoyable afternoon is promised. The games start promptly at 2.30 p. m. The outing will take place, rain or shine.

Program of Events.

Baseball Game, Seedsmen and Retail Florists vs. Growers and Commissionmen. A prize will be awarded to each one of the winning nine.

Wheelbarrow Race for men; Wheelbarrow Race for ladies; Fat Men's Race, 50 yards; Sack Race for men, 18 years and over; Ladies' Race, 50 yards; Girls' Race, 75 yards, 10 to 15 years; Boys' Race, 75 yards, 10 to 15 years; Tug of War, Seedsmen and Retail Florists vs. Growers and Commissionmen. Six men on each side. Six prizes will be awarded in this event.

In all events, unless otherwie mentioned, three prizes will be awarded.

Arrangements have been made for dancing in the Club House. Music from 7.30 to 10 p. m.

The Outing Committee consists of John C. Gracey, chairman; Adolph Farenwald, John Kuhn, Fred J. Michell, Jr., Fred Cowperthwaite, Charles E. Meehan, Arthur A. Niessen, treasurer.

NEW YORK NOTES.

Alex. McConnell is serving on the jury for the month of June.

J. H. Troy is away for a few weeks in Canada on a fishing trip.

Robert F. MacClelland, 286 Fifth Ave., assumes the position of advertising representative for HORTICULTURE beginning this week. Give him a call.

Julius Roehrs was booked to sail for Europe June 30, on the Kaiser Wilhelm, II. Now that the Kaiser Wilhelm is disabled, his plans will have to be changed.

The principal topic of conversation is, "Are you going to the Convention?" The trip via Metropolitan Steamship line, known as the "Outside Line," is a very popular one and many of the florists with their ladies will avail themselves of the opportunity of joining the party, which from all accounts will be a large one.

William Plumb, Chief of Horticulture, Panama Pacific Exposition, is making his second trip to Philadelphia, Baltimore and Washington and is very much pleased with a good prospect for a creditable horticultural display from the east and middle west. H. A. Dreer and Wm. Tricker will make extensive displays of aquatics.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now You See How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

AUTOMOBILE TIRES AT FACTORY PRICES

SAVE FROM 30 TO 60 PER CENT.

	Tire	Tube

INFORMATION WANTED

WANTED names and addresses of foremen seeking positions on commercial places January and February, 1913. Address "J. L.," care HORTICULTURE.

PUBLICATIONS RECEIVED.

Success With Hens, by Robert Joos. Published by Forbes & Co., Chicago. Profit and pleasure with poultry, equipment, management, raising and marketing of eggs and poultry, diseases, exhibiting and the thousand and one details of successful poultry farming are thoroughly and practically elucidated in the 55 chapters included in this useful work. Price $1.00.

The Tree Guide, for Trees East of the Rockies, by Julia Ellen Rogers. This is a very practical little descriptive handbook, size 3¼x5½, 270 pages, each page giving a portrait (some in colors) and careful botanical description of one tree in all details necessary for identification. It will be found a very useful pocket companion by the tree lover. Published by Doubleday, Page & Co., Garden City, N. Y. Price: Cloth, $1.00; leather, net, $1.25. Copies can be supplied by HORTICULTURE.

The Back Yard Farmer, by J. Willard Bolte. Published by Forbes & Co., Chicago. Price, $1.00. Just the book for the amateur and home gardener. There are 76 chapters, covering all kinds of garden crops, ornamental and useful, laying out and culture, poultry, bees, domestic animals, etc., and anyone using this practical book as a guide cannot fail to make the back yard and the entire home environment a beauty spot and a full realization of home comfort and happiness.

Transactions of the National Chrysanthemum Society (England) for the year 1913. This annual volume issued by the secretary, Mr. Richard A. Witty, 72 Savernake Road, Gospel Oak, N. W. London, is full of interesting information for the chrysanthemum enthusiast. A portrait of Mr. Thos. Bevan, chairman of the executive committee, forms the frontispiece, and there is an interesting illustrated chapter on Chrysanthemums for Outdoor Garden Decoration. P. A. Cragg contributes a useful report on a trial of steam sterilization for chrysanthemums. A full audit of blooms exhibited at the Crystal Palace Show last November is given by D. B. Crane, chairman of the floral committee, also a report on the new classification of chrysanthemums. Seven beautiful colored plates of first-prize winning exhibits are inserted as a supplement. A detailed report on the Autumn Exhibition at Ghent, Belgium, is contributed by C. Harman Payne.

Also received the Schedule of Prizes, List of Members, etc., of the National Chrysanthemum Society for 1914.

THE 1913 AGRICULTURAL YEAR-BOOK OUT.

Washington, D. C.—The Yearbook of the United States Department of Agriculture for 1913 has just come from the presses, and is now being distributed to Congressmen and to correspondents of the Department entitled to receive copies. The new volume differs in several respects from its predecessors. The articles that it contains are in general of a more popular and instructive character, and although the book itself contains a smaller number of pages, it is safe to say that it has as much valuable material in it as ever.

The book is illustrated by 54 full-page plates, of which a large number are reproduced in colors, and by 21 tables, maps and line drawings.

LEMON OIL CO'S STANDARD SOLUBLE IN WATER INSECTICIDE NO ODOR NO POISON

Guaranteed under the Insecticide Act, 1910. Series No. 321

Save your plants and trees. Just the thing for Greenhouse and outdoor use. Destroys Mealy Bug, Brown and White Scale, Thrip, Red Spider, Black and Green Fly, Mites, Ants, Insects on Rosebushes, Carnations, etc., without injury to plants and without odor. Used according to directions our standard Insecticide will prevent ravages on your crops by insects.

Non-poisonous and harmless to user and plant. Leading Seedsmen and Florists have used it with wonderful results.

Destroys Lice in Poultry Houses, Fleas on Dogs and all Domestic Pests. Excellent as a wash for dogs and other animals. Relieves mange.

Effective where others fail.

½ Pint...25c; Pint...40c; Quart.....75c
½ Gal., $1.25; Gal., $2.00; 5 Gal. Can, $9
10 Gal. Can....$17.00

Dilute with water 30 to 50 parts.

Directions on every package

RAISE PIGEONS

THEY PAY DOLLARS WHILE CHICKENS PAY CENTS

The young, 20 to 25 days old, sell for 40 to 60 cents each (according to the season). The city markets are always clamoring for them.

Each pair of Pigeons will raise 18 to 22 young a year.

They will clear you, above all expenses, $5.00 a year per pair. They breed the entire year. Twenty minutes daily will care for 100 pairs.

Always penned up out of the way. Very small space required

All this is fully explained in this month's issue of our Journal; send for it; price 10 cents.

Reliable Squab Journal, Versailles, Mo.

MASSACHUSETTS AGRICULTURAL COLLEGE.

With the close of the college year the regular work in floriculture has ended. The Department strongly advises the students to get practical experience, and so each summer a number of men go out into practical work. F. E. Allen is to work for W. N. Craig at Faulkner Farms, Brookline; A. S. Thurston for A. H. Wingett at "Aileen Winden," Lenox; W. L. Doran on the estate of J. P. Morgan in Newport. A. E. Wilkins and E. S. Wright stay at the college to work for the Floricultural Department; W. H. Haskell also stays to work in the Market Gardening Department. Miss S. J. Strange, who graduates from the college, will teach school gardening and elementary horticulture the coming year. W. H. Hatfield has charge of the school gardening work at Milton, Mass., for the summer. G. A. Reid, another Senior, has secured a position as an assistant manager on the estate of Mr. F. C. Littleton, Mamaroneck, New York.

PINO-LYPTOL

THE VERY NEWEST AND QUICKEST METHOD OF DESTROYING WEEDS, GRASS AND OTHER GROWTH IN GARDEN WALKS, GUTTERS TENNIS COURTS, DRIVEWAYS, ETC.

This fluid absolutely destroys all weeds and other growth wherever applied, and its effect on the ground prevents the growth of fresh ones for a year and thus saves a great deal of time and labor, as no cutting, hoeing or hauling away of the weeds is required.

We manufacture the strongest line of DISINFECTANTS on the market.

Dilute with 24 to 40 parts water.

Ask your dealer or write

EASTERN CHEMICAL CO, BOSTON

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

Stumpp & Walter Co.

30-32 Barclay Street, NEW YORK

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N.Y.

"Non-Puncture" Auto Tires

Guaranteed 7,500 Miles Service

These tires bear the greatest known mileage guarantee, yet are sold at a price even less than tires of ordinary guarantee. This guarantee covers punctures, blow-outs and general wear. Guarantee covers 7,500 miles service against everything except abuse. These tires are intended for most severe service.

Orders have been received for these tires for use in United States Government Service.

As a SPECIAL INTRODUCTORY offer, we will allow the following prices for the next ten days.

TIRES—TUBES

	Tire	Tube
28x3	$9.20	$2.00
30x3	10.25	2.30
30x3½	13.50	2.80
32x3½	14.05	3.00
34x3½	15.35	3.20
31x4	17.00	3.25
32x4	18.00	3.30
33x4	19.50	3.40
34x4	20.40	3.60
35x4	21.00	3.80
36x4	22.00	3.90
35x4½	26.00	5.00
36x4½	27.00	5.10
37x4½	27.50	5.15
37x5	32.60	5.40

All other sizes. Non-Skids 20 per cent. extra. 5 per cent. discount if payment in full accompanies order and if two are so ordered, shipping charges will be paid by us. C. O. D. on 15 per cent. of amount of order. Our output is limited, so we suggest early ordering. We sell direct only, giving purchaser the advantage of all middlemen's profits.

NON-PUNCTURE RELINERS.

Use our famous reliners, they eliminate blow outs and 90 per cent. of punctures besides giving many thousand more miles service to each tire. When in your tires you ride without worry or tire troubles.

NON-PUNCTURE RELINERS

For all 3	inch tires	$1.95
For all 3½	inch tires	2.20
For all 5½	inch tires	3.00
For all 4	inch tires	2.60
For all 4½	inch tires	2.75
For all 5	inch tires	2.90

PEIRCE PAPER FLOWER POT

A waterproof paper pot.

Does not fold up or come apart.

Plants in transit retain moisture within the plant ball instead of its being absorbed by the packing, insuring their traveling long distances in perfect condition.

Received a Certificate of Merit from the Society of American Florists and Ornamental Horticulturists, Minneapolis, August, 1913.

Only paper pot ever so recognized.

Ask your seedsman or supply house. If they do not keep them, send direct.

Made in Standard sizes, 2 inch to 6 inch inclusive.

Samples furnished free.

JERSEY CITY, N. J.

An Ideal Semi-Ornamental Range

FOR the meeting of conditions where a combination of the practical growing houses and the show house is desired—this layout of ornamental central house, two wings; and a connecting house at the rear is to our notion an ideal one.

It is attractive. It is practical from a growing standpoint. It is economical to work and heat. It's price is reasonable. Send for facts and figures about this or any other house you have in mind.

Greenhouse Erected for the Franciscan Fathers

AT Paterson, New Jersey, we erected this thoroughly practical curved eave house for the Catholic Order of Franciscan Fathers. It is a well established fact that such institutions are careful, keen buyers. They are willing to pay the price, but everything they buy must be *the very best for the price.*

This cardinal principle of theirs, of planning carefully and building enduringly dates back to the days of Ancient Rome. That our construction was selected in this case, is most conclusive evidence of its superiority. Send for our catalog—see for yourself.

Miscellaneous Stock

A few items every florist needs. For complete list send for catalog No. 5. Send us your list of wants.

CALADIUM ESCULENTUM—Good bulbs with sound centers: 5 to 7 in. circumference, $2.00 per 100; 7 to 9 in. circumference, $3.00 per 100; 9 to 11 in. circumference, $6.00 per 100.

BEGONIA, TUBEROUS ROOTED—Bulbs large from one of Belgium's best growers: Single Separate colors, $2.50 per 100, $22.50 per 1000; Single Mixed colors, $2.25 per 100, $20.00 per 1000; Double Separate colors, $4.50 per 100, $40.00 per 1000; Double Mixed colors, $4.00 per 100, $35.00 per 1000.

GLOXINIAS—Fine sound bulbs in separate colors, $4.00 per 100, $35.00 per 1000.

RHODODENDRONS—A fine lot of hardy sorts, in plants full of buds and with good foliage, 18 in. high, 8 to 12 buds, $9.00 per doz.; 24 in. high, 12 to 14 buds, $12.00 per doz.

AZALEA MOLLIS—Bushy, well budded plants, 15 to 18 in. high, $35.00 per dozen.

DUTCHMAN'S PIPE—Aristolochia Sipho, tops 4 ft. long, a grand vine for shade and cold exposure, $3.50 per dozen, $25.00 per 100.

MAGNOLIA—Fine well budded plants, with ball of earth, burlapped; all varieties, White, Pink and Red, 4 to 5 ft. high, $1.50 each. Stellata or Halleana, early star shaped white, 2½ to 3 ft. high, at $1.50 each.

ENGLISH IVY—Two or more shoots, 3 ft. long, $12.00 per 100.

NOTES OF CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

Care of Violets.

To keep violets that are under glass in good condition will require lots of attention from this on. If there is any crop that requires to be kept strictly clean during every stage of their growth it is the violet. They should be gone over every week and all diseased or decayed leaves removed. Keep the soil open and sweet by frequent and shallow cultivations. Give a good syringing early in the morning on fine days so as to allow the foliage to become dry before night. When the short and dark days come give all the air you can day and night until winter sets in. Be always very careful in watering, looking over the beds at first to detect the dry spots which can be watered. About the first week in August give them a mulch of cow manure and half soil, put on about three-quarters of an inch which will help to feed the surface roots which start after this date.

Cibotium Schiedei.

During the summer this fern will need lots of moisture both at the root and in the house. Go over them at least twice a day in bright weather. Do not keep the house too humid as it makes them very soft, but on the other hand when giving ventilation give it so that no cold currents of air will strike them. While these ferns like shade they do not want it too heavy. Shading, nine times out of ten, is overdone with all kinds of ferns. Where these ferns are quite pot-bound now is a good time to give them some liquid feeding. There is nothing better than cow manure. You can place about a bushel of cow manure in a barrel that holds about 50 gallons of water and let it stand for about two days. If this is too strong, dilute it some. They can get this about once a week, and you will be surprised at the great good this will do them in every way.

Ferns for Ferneries

Where you do not raise your own stock now is a good time to buy those that have been once transplanted. They can be kept over winter in 2½-inch pots. It is desirable to have a good plant in as small a pot as possible. When received put them on a bench on which is spread at least one inch of sand or coal ashes, so that they are not continually drying out. Keep them lightly shaded and the atmosphere should be kept moist all the time. Go over them three or four times a day in order that none dry out.

Primulas.

It is always better to have the primula pots plunged. When this is done they will not dry out near so quick as otherwise. Have the sashes raised both top and bottom at least eight inches so they can have plenty of fresh air and keep the sashes shaded so the foliage will not burn. It pays to have the sashes all removed from four o'clock in the afternoon until the next morning at about nine o'clock, when the sashes can be put on again. Some growers use lath shading, except when they run into a rainy spell. It is always well to go over these plants at least three times a day to see if any may need water. Give them a nice spraying overhead once a day. As they grow they will want spacing to prevent crowding.

Seasonable Repairs.

If you take note you will find that the most prosperous growers are always those who put their houses in proper shape before the cold weather. There will be lots of bench building or repairing, with an increased use of cement. Even at the hottest time of the year, the florist always finds plenty to do. It is hot work these torrid days but cloths can be laid over the roof to make it more tolerable. There is nothing worse than leaky and draughty houses. Give a general inspection as to painting, puttying, and other repairing. Repairing ventilators may be necessary. Do it now and—by the way—be sure that they are kept well oiled, so that they run easily. There isn't a greenhouse that should not have at least thorough cleaning out once a year. Don't put off cleaning for any reason; the present is the time to do it. There is absolutely nothing to look forward to in two months from now, but work—more of it than we can attend to perhaps, but don't overlook having clean houses.

Propagating Scented Geraniums.

Where a good stock of scented geraniums to cut from is wanted for next winter a batch should be put in sand now. By keeping them watered and shaded they will soon root. When they are rooted pot into three-inch pots and give some shade until they will stand the sun. Before they get pot-bound they should be planted out on a bench in a house that runs cool.

A Query

Mr. John J. M. Farrell

Dear Sir: I shall greatly appreciate your favor in advising me as to what time I shall sow mignonette in pots in order to get good plants to plant in benches by the middle of August. Is it time to sow the seeds, now?

Is it necessary to have the cyclamen outdoors in frames covered with sashes covered with laths on top, or is the lath covering only sufficient to put over them and the sashes put on at night time? Which frame is better adapted for cyclamen, a deep or shallow one?

A SUBSCRIBER

MIGNONETTE.

In reply to A Subscriber I would say that he should sow his seed in pots just as soon as he can, in order to have them fairly good size by the middle of August. You can sow about four seeds in a three-inch pot and keep moist and shaded until they come up, when they should have full sun, but never allowed to dry out.

CYCLAMEN.

It is not necessary to have sashes on your cyclamen in frames all the time. These sashes should always be near at hand in case of a heavy thunder storm, or a continued heavy rain. You can put them on at night if you want to without any harm by leaving them raised top and bottom 6 to 8 inches. Keep the lath covering on during bright, sunny days. Cyclamen likes to be well up to the light so deep frames are not advisable.

Mr. Farrell's next notes will be on the following: Crotons; Hydrangeas; Planting Carnations; Mignonette for Winter Flowering; Orchids; Keeping Down the Weeds.

Bulb prices advanced

We are informed that the Holland Bulb Growers' Association have decided to mark up bulb prices for export ten per cent all along the line. There does not appear to be any plausible reason for this as there is an abundant crop and the Dutchmen should not be surprised if their action is interpreted by the trade as due simply to avariciousness and as furnishing a fresh evidence of the truth of the century-old saying that

> "The characteristic fault of the Dutch
> Is giving too little and asking too much."

The enormously increased demand here for Darwin tulips has had a stimulating effect on the price of that specialty but on the other lines of bulbs no such excuse is apparent and a natural consequence will be that the trade will resent the advance and reduce the amount of their purchases accordingly.

An unwelcome revival

According to *Deutsche Gartner Zietung* dried and dyed flowers and grasses are being revived as a fashion in Germany. We recall the time some thirty-five years ago when this sort of material had a very large sale in this country in loose state or arranged in baskets of various styles. That fashion we imported from Germany and much of the goods came from German sources. We can also recall still further back, and to some extent ever since, the custom of decorating the mantels and walls of the "best room" of the New England country cottage with vases and wreaths of dried flowers. The latter were bright amaranths, helichrysums, honesty, and a few of the native grasses of most the flowers cultivated by the housewife in the home garden each year. We can see a pretty sentiment in thus preserving through the long dreary winter these fadeless souvenirs of the summer time and they make a pretty and appropriate adornment of the rural home, but the revival of the use of the gaudy commercial stuff referred to in our German contemporary, as floral decoration in places where fresh flowers and plants are appropriate and available in abundance for every purpose, we should regard as a misfortune and a reaction much to be regretted and discouraged.

The florist can set the pace

The spring planting season is now pretty well over. An entire cleanup of the stock in the houses and frames is out of the question. There are always some remnants left over. We have always felt sorry to see these little batches of pot geraniums, cannas, heliotropes, etc., standing or lying topsy-turvey, neglected and baked in the hot sun, to be later thrown away, when, in many instances, there was vacant room in abundance outside where they might be tastefully planted out and made to add materially to the external appearance of the florists' place. It pays to make the surroundings of any home—and particularly the home or business establishment of a florist—beautiful and attractive by a profuse setting of flowers and verdure and to keep it scrupulously neat as an impressive object lesson which cannot fail to exercise a tremendous influence upon the local demand for such goods. Whole towns are made beautiful or otherwise and their attractiveness or repulsiveness as places of residence depends very much upon the care or neglect shown in the matter of home environment. The good example of a few will quickly inspire emulation and imitation and the man who can most effectively set the pace is the local florist.

THE GLADIOLUS.

By Ira H. Landis, Paradise, Pa.

The gladiolus is becoming more deservedly popular each year, with its beautiful flowers of such wonderful lasting qualities placing it above many other cut flowers. By merely trimming a small portion of the stem away each day the same bouquet will last over a week. It may be had during a long blooming season by different plantings at intervals of two weeks from the time the frost is out of the ground until July 1st and you may enjoy their beauty for ten or twelve weeks. This flower succeeds everywhere. The gladiolus responds so quickly to good treatment and requires so little effort that there can be no excuse for not producing good flowers. According to the varieties the bulbs will produce flowers in from sixty-five to ninety days. Well rotted stable manure is one of the best fertilizers and should be spread over the land in the fall and plowed the following spring. Plant from three to four inches deep, the larger bulbs the latter depth. The secret of growing good flowers is thorough cultivation. In nearly all parts of the country artificial watering is unnecessary provided a dust mulch is kept on the surface to conserve the moisture. Stir the surface as soon as fit after each rain and give frequent cultivation. A sunny situation and not planted close to buildings is best.

In cutting gladiolus the greatest satisfaction is obtained by cutting the spike when the first bud opens and allow the flower to develop indoors. Every bud will open and more perfect coloring will develop than would be possible if left in the sun. Cutting the spike when the first bud opens is also a benefit to the bulb as the strength of the foliage is required by the bulb to develop the next year's growth. For this reason always allow two or more leaves to remain.

About the latter part of September or after the first frosts appear the bulbs should be taken out of the ground and allowed to dry several hours in the sun, however the more drying or curing there is done the greater the loss of vitality and only enough drying should be practiced to free the bulb of surplus moisture contained in the skin or husk so that there will be no tendency to mould. The bulbs can be stored in shallow boxes safely in a reasonably dry air at a temperature of 32 to 40 for almost an indefinite period.

AMHERST NOTES.

With the close of the college year, the regular work in the floriculture department has ended. Many of the students specializing in floriculture have good jobs for the summer. The students are greatly in need of practical training, and the department does what it can to place them (the students) with good gardeners and florists during their vacation.

Of the seniors who have graduated, G. A. Reid is with Mr. F. C. Littleton, Mamaroneck, New York, as assistant manager of the estate; Miss S. J. Strange will teach gardening and elementary horticulture; A. S. Thurston is with Mr. A. H. Wingett at Lenox.

Of the juniors, F. E. Allen is with Mr. W. N. Craig, Faulkner Farm, Brookline; W. L. Doran on the estate of J. P. Morgan, Newport; W. H. Haskell on the market garden farm connected with the college; A. E. Wilkins and E. S. Wright will work in the floriculture department under Professor Nehrling's instruction; W. H. Hatfield will have charge of the Hillcrest Farm boys, Miss M. R. Case, Weston.

One of the special features of the commencement program of the Massachusetts Agricultural College was the sophomore senior hop in the armory on Tuesday evening, the sixteenth. The hall was decorated very elaborately. The decorations displayed an English formal tea garden. It showed a well defined, well-planned scheme, for it changed a bare, flat, dingy armory into an artistic and pleasing tea garden, where could be found terraced-pergolas in which were pools containing aquatic plants and gold fish; a garden house which was very much a part of the whole, not a separate unit; a pavilion made artistic with sprays of Asparagus plumosus; and a walk, edged with sod, which led around the hall. To be sure of complete balance of the many related parts, a hemlock tree was well placed in a corner, the boughs of which shaded one side of the house. The material in use was hydrangeas, peonies, bedding plants, English ivy, gernamiums and bay trees.

W. H. Hatfield.

GLADIOLUS SNOW KING.

Snow King, the Whitest White

This beautiful gladiolus novelty will be introduced next season by John Lewis Childs of Flowerfield, N. Y. It is destined to be of great value to florists as it is a good forcer and the flowers are of good substance. An important characteristic of Snow King is that the flowers stay white and do not turn pink with age as most white varieties do.

JUNE!

Roses pink and white and crimson,
Roses dwarf and roses tall,
Wet with dew, or warm with sunshine,
Nod within my garden wall!
Droning bees, and darting fireflies,
Butterflies and birds in tune,
Happy children, laughing, lilting,
Tell thy presence, lovely June!

At your breath the buds of May time
Burst from bondage, opening wide,
Balmy winds that sing of summer
Cool and play on every side
Days ablaze with golden sunlight!
Silent nights, and crystal moon!
Month of Roses, Love and Promise—
Oh, to keep thee, gracious June!

Our Dumb Animals.

CLUBS AND SOCIETIES

AMERICAN PEONY SOCIETY.

Address of President B. H. Farr Before the Society in Chicago.

The year has been rather one of rest from the activities of previous season, gathering together our resources and materials preparatory to the publication of the society's book on the Peony, to which end we have been steadily working for some years.

The season has been a most trying one, the intense heat making it unusually difficult to hold flowers in good form for any length of time. It is again demonstrated that a peony show must depend principally upon the local growers for its success, and, while the possibility of holding flowers in cold storage and shipping long distances for exhibition has been amply demonstrated, the great mass effect which is so necessary for an attractive show must come from purely local growers, and the peony growers of Chicago and vicinity who have brought in such great quantities of blooms have made the present show the success it is.

It is unfortunate that as a cut flower commercially, the peony is in most localities considered only as a Memorial Day proposition. Millions of them are sold at high prices before, and millions almost wasted after that day. No flower keeps better when properly handled, and no flower makes so fine a show for the cost as the peony, for all decorative effects, and there seems to be no good reason why they should not be eagerly sought for and used for all purposes during their season, from the earliest to the latest. It seems to be largely up to the retail dealer to push the peony more, and to educate and stimulate their use, by making more of an effort to handle a better class of stock in better shape.

Among the amateurs the peony continues to increase in popularity, the demand for the better and higher priced varieties being always greater than the supply, with prices as a consequence tending to increase rather than decrease. Occasionally I have heard it said that the American Peony Society is made up of commercial growers whose interest in the peony is a purely selfish one. How far from the truth this is will be seen by looking over the membership list, of whom over two-thirds are exclusively amateurs. Among those remaining who are classed as nurserymen or florists only a few may be said to be in the peony business. The majority of those members who are classed as being in "the trade" are amateurs so far as their interest in the peony goes, their collections being grown largely as a hobby because of the personal interest they take in the flower and for their own gratification.

Last year through the completion of the work at Cornell and the sale of the remaining plants, the way was opened for the publication of the society's official work on the Peony. The material is ready, but in order that there might be as few errors as possible, it was thought better to wait until after another blooming season had passed, in the hope that any existing errors might be detected, and descriptions of additional varieties obtained. This book is to be published by the society as a whole and not by a few members, and that all members might assist circulars were sent to all with a lot of questions and request that all look over their bulletins carefully, study their plants in bloom and send in to the committee any information, criticism or suggestion, and it will be taken for granted by the committee that those not heard from accepted and approve of the committee's work.

During the past year, permanent planting at Cornell has been largely augmented by the addition of varieties not previously to be found there, so that now most of the varieties described in the Bulletins may be seen and studied there by anyone interested. The season at Ithaca is very late, and a similar collection for the South and easily accessible, was suggested, and last year the United States Government agreed to co-operate with the American Peony Society in the establishment of such a collection at the Arlington Experimental Grounds at Washington, D. C., a place visited yearly by many thousands of people. Negotiations are now in progress along the same line as the collection of the American Rose Society at the same place. While this matter was acted on favorably by the society at its meeting last year, I desire to give the members present at this meeting an opportunity to ratify that action and their willingness to give this place their active support, as this collection will have to be made up by contribution of plants from the members individually.

Another subject that was talked of last year, and which should receive fuller consideration, is the advisability in view of the great distance between the East and West and the difference in blooming time of Northern and Southern plants, that the society holding its business meeting at but one point might be officially represented in exhibitions at two or more points, in conjunction with other horticultural societies.

AMERICAN ASSOCIATION OF NURSERYMEN.

Report of John Hall, Secretary.

To the Members of the American Association of Nurserymen:

It is a pleasurable, but at the same time a sad duty that falls to your secretary every twelve months when we are assembled in convention. Pleasurable in the recollection of the incidents which have sprung up in the extensive correspondence he has had with members; pleasurable also in the realization of reasonably favorable results in the canvass for new memberships and patronage for the Badge Book. Of course there is the memory of strenuous pursuits of those whose responses were tardy—exasperatingly so, sometimes—experiences softened only by the thought that these same delinquents were having a good packing season and were then busily engaged, like myself, in the pursuit of collections. When the time came to close the forms for the printer, we even ventured to assume the responsibility of entering the renewals of some members who had ignored our numerous reminders and appeals. There was satisfaction, however, in these cases, in receiving the thanks and apologies of the delinquents when they honored my drafts.

I have hinted that there is also a sad feature in connection with the secretary's report, and that is the chronicling of the visits of the Death Angel among our membership. Our own beloved Longfellow wrote:

"There is no flock, however watched and tended,
But one dead lamb is there!
There is no fireside, howsoe'er defended,
But has one vacant chair."

July 4, 1913, Mrs. F. W. Kelsey, wife of F. W. Kelsey, Orange, N. J.

August 18, 1913, Charles M. Hooker, Rochester, N. Y., aged 81 years. We were able to get a brief notice in the 1913 Proceedings and shall hope to make more extended notice in the next issue.

November 4, 1913, John Rice, Geneva, N. Y., aged 70 years.

In January last, at Siasconset, Mass., Mrs. John Craig, widow of the late Professor John Craig.

OYSTER BAY HORTICULTURAL SOCIETY.

The annual exhibition of this society was held in the Fireman's Hall, Thursday, June 18, and was a great success. The roses, sweet peas and peonies were in fine condition. The winners were as follows:

H. P. roses, B. Stern, gard. W. Robertson; H. T. roses, E. F. Whitney, gard. Jas. Duckham; 3 varieties H. P. roses, white, A. Straus, gard. Michael O'Neil; pink, F. N. Doubleday, gard. F. Gale; 6 H. P. roses, white, Mrs. C. L. Tiffany, gard. F. Kyle; pink, Chas. Moyses; any other color, F. Kyle; 3 H. P. roses, white, pink and any other color, all won by Chas. Moyses; 6 Teas, white, pink and any other color, won by W. Robertson; 3 Teas, white, F. Gale; pink, Chas. Moyses; any other color, F. Gale; climbing roses, Jas. Duckham; vase climbing roses, John A. Garver, gard. J. Lorisick.

Hardy flowers, 1st John Lorisick, 2nd A.

Walker. Decorations 1st John Lorisick, 2nd T. Kyle. Sweet William and Digitalis, Jas. Duckham. Campanula, John Lorisick. 6 varieties Sweet Peas, W. Robertson. Peonies, Michael O'Neil. Bouquet of hardy flowers hardy flowering shrubs and specimen. Nephrolepis, John Lorisick. specimen fern, any variety, J. T. Ingram. foliage plant, John Lorisick; 3 plants of Orchids in flower, John T. Ingram. specimen Hydrangeas, F. Kyle; Begonia, John Lorisick; any other plant in pot, David Fothersall; Sweet Peas, President J. T. Ingram's prize, 1st W. Robertson, 2nd Jas. Duckham.

Cultural certificates to W. Robertson, roses and sweet peas; J. Duckham, roses; T. A. Havemeyer, peonies, hardy flowers and shrubs; E. M. Townsend, strawberries; A. S. Hodenpyle, vegetables. Honorable mention to J. T. Ingram, climbing roses.

F. KIRKHAM, Sec'y.

AMERICAN ROSE SOCIETY.

Hartford Rose Garden.

On June 19th the representatives of the American Rose Society visited officially the Rose Test Garden at Elizabeth Park, Hartford, Conn., to take up and examine the forty-four specimen plants that were put out at the formation of the garden. The judges were: John F. Huss, Hartford, Conn., S. S. Pennock, Philadelphia, Pa., and W. F. Gude, Washington, D. C. The recommendation made by the judges in regard to the rose which seemed to attract the most attention is as follows: That the award of the silver medal be made to Mr. John Cook of Baltimore, Md., for the rose "Radiance" in recognition of its superior merits as a bedding rose, signed, John F. Huss, S. S. Pennock, W. F. Gude.

There were present at the dinner, Supt. of Parks, Geo. W. Parker, Hartford, Conn.; Wallace R. Pierson, president of the American Rose Society; Robert Pyle, S. S. Pennock, Prof. A. C. Beal of Cornell University, Leonard Barron, J. Harrison Dick, Alex. Montgomery, Alex. Montgomery, Jr., J. H. MacFarlane, Edw. Norburg, A. N. Pierson, A. Gude, W. F. Gude, Geo. Johannes, R. T. Beers, John F. Huss, Alex. Cumming, Jr., Louis J. Reuter, Benj. Hammond and Messrs. Green, Anderson, Clark, Rigby and Morgan.

At the dinner an account of the Washington Rose Garden at Arlington was reported upon by W. F. Gude who complimented Messrs. Cumming, Pyle and Mulford for the work they had done in bringing about this matter; that two acres had been laid out for the work along the national highway that is to run from Quebec to Florida and there were three hundred and fifty varieties of roses already there. Prof. Beal, speaking for Ithaca, said, that much interest had been shown not only by growers of plants who had furnished them so that the varieties exceed three-hundred but also from a large number of local amateur societies; that at Cornell there were some hundreds of students all of whom became more of less acquainted and interested in these test gardens, and that they carried away with them an interest in the beauties that follow the cultivation of flowers in any place or section.

The Executive Committee of the American Rose Society also met and have awarded formally the Hubbard Gold Medal to M. H. Walsh, Woods Hole, Mass., for the rose "Excelsa." The display of this rose in the garden showed it to be a most vigorous plant, and the concensus of opinion received during the past three months concerning the rose caused the award to be properly made for that rose. The medals both for Mr. Walsh and Mr. Cook will be presented at the S. A. F. convention in Boston in August.

VIEW IN ROSE GARDEN, ELIZABETH PARK, HARTFORD, CONN.
25,000 People Pass Through this Garden on "Rose Sunday."

The day that was spent at Hartford was damp and cloudy which prevented the taking of any pictures. The general layout of the rose garden aside from the test garden in Elizabeth Park is something that certainly is very beautiful, and something that the city of Hartford can well feel proud of.

BENJAMIN HAMMOND, Sec'y.

Beacon, N. Y., June 20, 1914.

Mr. Benj. Hammond,
Dear Sir:

Your call for the meeting at the Elizabeth Rose Garden is received and I wish very much that I could answer to same in person. This, however, is impossible, but I shall be with you in thoughts at least.

A short report on the condition of our Lyndale Park Rose Garden, at the time of this writing may be of interest to you and those present at your meeting. I spent an hour at our Garden yesterday morning, and a week from now it will be at its best, which is ten days earlier than last year. We have had splendid growing weather all spring, but just now have a little too much rain, and not enough sunshine. Nevertheless, our plants are still free from mildew, and in perfect health. We have only two exhibits in our A. R. S. Test garden, namely: the two Climbers, Dazzling Red and Bridal Wreath, by W. A. Manda; and the new H. R. Rose Defiance, by C. Kress. They are all doing well. The climbers are in bloom and Defiance shows promising buds. The following were in full bloom in the garden and were very satisfactory:

H. T. Mary, Countess of Ilchester, Mrs. Leonard Petrie, Madame Jules Grolez, Killarney, pink and white, Lady Ashtown, Gruss an Teplitz, Laurent Carle, General MacArthur, Farben Koenigin.

H. R.—Jules Margotin, Anna de Diesbach, Mrs. John Laing, Captain Hayward, Prince Camille de Rohan, Mrs. Geo. Dickson, Hugh Dickson, Frau Karl Druschki, Madame Gabrielle Luizet, Baroness Rothschild, Oscar Cordell, Mabel Morrison, Ulrich Brunner.

Every one of our 200 varieties will be in bloom by the end of this week, and I wish your meeting could adjourn from Hartford to Minneapolis to meet here the 21st, which as far as the time and distance are concerned, would be possible. The invitation is most cordially extended.

THEO. WIRTH.

THE LANCASTER COUNTY FLORISTS' CLUB.

June 18th found us all back on the job for keeping up our record breaking attendance, there being very few faces missing.

A paper on Asters, by Chas. B. Weaver, Ronks, Pa., and one on Gladiolus, by Ira H. Landis, of Paradise, Pa., were the literary events of the evening.

The flower show committee reported having secured the hall for Nov. 6th and 7th and notified the members that they were going to visit every establishment in Lancaster and Lancaster County early in Oct. and expected to find an exhibit being prepared for the show at every place. Mr. Heimenze, the owner of the finest dance and social hall in the city is going to allow us the use of it for this show, we allowing him the proper financial equivalent for it. A feature of the show will be amateur exhibits and as Lancaster is a pretty good market for novelties we expect to have some of the newer varieties on exhibition from out of town growers. Albert M. Herr, Lancaster, Pa., has charge of this end and a letter addressed to him may put you in touch with a good thing.

The cooperative buying committee had an out-of-town man put up a proposition to us. This is becoming a regular feature of the meeting and is going to save us a lot of money when it gets into its final working shape.

The next meeting will be a picnic on July 16th at Mt. Gretna, a popular summer resort about thirty miles west of Lancaster. Out of town florists who may wish to enjoy this with us can correspond with Elmer Weaver of Ronks, Pa.

WESTCHESTER & FAIRFIELD HORTICULTURAL SOCIETY.

The summer show of this society was held June 19-20 on the grounds of the United Hospital at Portchester, N. Y., and was a great success. The hospital management provided a spacious tent that was pitched directly over a water lily pond that is a permanent feature of the premises, and formed a fine setting for the exhibits that were grouped around the inside of the tent. The wide strip of lawn around the pool was utilized for the display of individual plants, vases of flowers in the special classes, baskets and other made-up work. The vegetable classes were so placed that groups of flowering plants were placed on either side of them, and the effect was novel, obviating the usual commonplace look that so often obtains in sections set aside for vegetables. Competition was very keen in nearly every class, and the exhibition throughout was notable for the high standard of excellence. The exhibits of Mrs. J. E. Rees, of Greenwich, Ct., attracted much attention, as she employs a woman gardener, Miss Beatrice Dell. Tasteful arrangement and fine quality marked her exhibits.

Several novelties of recent introduction were noted, among these being Salvia Greggi, hardy shrub; climbing American Beauty rose, a clean grower; two hardy nympheas in the exhibit of Henry A. Dreer, Inc., John Hay in charge. The Dreer exhibit was awarded a certificate of merit. Certificates of merit were also awarded to George E. Baldwin, Mamaroneck, N. Y., for display of orchid plants in bloom; Julius Roehrs Company, do; John I. Downey, gard. Thomas Ryan for collection of sweet peas. Leonard Petrie received honorable mention for collection of geraniums of recent introduction. A cultural certificate was awarded Wm. Shillaber, Essex Fels, N. J., gard. J. P. Sorenson, for display of old-fashioned flowers. First prize in table decorations went to Joseph Lorie, Mamaroneck, who combined pink and white sweet peas with adiantum; 2nd, Fred Lagerstom, Greenwich, Ct., rambler roses; 3rd, James Linane, Rye, N. Y., Deutzia candidissima and Heuchera sanguinea. Other awards in the competitive classes were as follows:

H. P. roses, 12 varieties, 3 each: 1st, Mrs. A. P. Stokes, Noroton, Conn., gard. A. Whitelaw; 2nd, Mrs. G. D. Barron, Rye, N. Y., gard. Jas. Linane. H. P. roses, 6 varieties, 3 each: 1st, E. C. Benedict, gard. Robert Allen; 2nd, Robert Mallory, Portchester, N. Y., gard. Wm. Smith; 3rd, Mrs. Henry Schaefer, Greenwich, Conn., gard. Ed. Stumpp. Assorted H. P. roses: 1st, Mrs. F. A. Constable, Mamaroneck, N. Y., gard. Jas. Stuart; 2nd, Mrs. G. D. Barron; 3rd, Mrs. Wm. G. Nichols, gard. John McAllister. H. T. roses, 12 varieties, 3 each: 1st, Mrs. A. P. Stokes; 2nd, Mrs. H. S. Bowen, Greenwich, Conn., gard. John Watts. Vase of roses arranged for effect: 1st, Robert Mallory; 2nd, Robert Grunnert; 3rd, C. T. Willis, Greenwich, Conn., gard. Martin Glendon. Collection of roses to cover 50 sq. ft.: 1st, H. Darlington, Mamaroneck, gard, P. W. Popp. 12 blooms Frau Karl Druschki: 1st, H. Darlington; 2nd, Mrs. Wm. Nichols; 3rd, Robert Grunnert.

Collection hardy flowers, 18 species: 1st, Mrs. F. A. Constable; 2nd, Mrs. Wm. G. Nichols; 3rd, H. Darlington. Collection hardy flowers, 9 species: 1st, Robert Mallory; 2nd, Mrs. A. A. Anderson, gard. Robert Williamson; 3rd, Mrs. J. E. Rantz Rees, Greenwich, Conn., gard. Miss Beatrice Dell. Flowers from hardy shrubs: 1st, G. D. Barron; 2nd, Mrs. I. C. Bruce, Greenwich, Conn., gard. John Andrew; 3rd, H. Darlington. Sweet peas, 18 varieties, 25 sprays each: 1st, D. G. Reid. Sweet peas, 6 varieties, 15 sprays each: Mrs. A. A. Anderson; 2nd, Mrs. C. A. Gould, Greenwich, Conn., gard. W. H. Waterenowski; 3rd, Mrs. F. A. Constable. Sweet peas, 3 varieties, 15 sprays each: 1st, Mrs. C. A. Gould; 2nd, Robert Grunnert. Basket of sweet peas arranged for effect: 1st, Mrs. Wm. G. Nichols; 2nd, H. Darlington. Vase of sweet peas arranged for effect: 1st, Mrs. A. A. Anderson; 2nd, Wm. Shillaber. Vase of Iris: 1st, Mrs. J. E. R. Rees; 2nd, H. Darlington. Vase of lilies: 1st, Robert Mallory. Vase of moss roses, special prize: H. Darlington.

Pair of palms: 1st, Mrs. F. A. Constable; 2nd, Mrs. A. A. Anderson. Specimen palm: Mrs. G. F. Chamberlain; 2nd, Mrs. F. A. Constable. Foliage plant other than palm: 1st, Mrs. F. A. Constable; 2nd, John I. Downey. Pair hydrangeas: 1st, Chas. Mallny; 2nd, G. D. Barron. Specimen hydrangea: 1st, John I. Downey.

Among the winners in the vegetable classes were Adrian Iselin, Jr., New Rochelle, gard. Joseph Tiernan; H. F. Shoemaker, Riverside, Conn., gard. James Maclean; Arnold Schleet, Saugatuck, Conn., gard. Edmund Lawrence; J. A. Topping, Greenwich, Conn., gard. F. Lagerstom; Mrs. Albert Crane, Stamford, Conn., gard. Alex. Geddes.

The judges were Wm. Duckham, Wm. Scott, W. H. Waite and Chas. H. Totty. P. W. Popp.

NEW BEDFORD HORTICULTURAL SOCIETY.

The third annual peony exhibition of the New Bedford Horticultural Society held in the Library Building on Wednesday, June 17, was a marked success notwithstanding the most trying season experienced in years. An open winter coupled with the natural freezing and thawing occasioned by fluctuating temperature and an almost entire absence of snow took much of their strength, while a very fickle May and June caused many buds to blast or mature in two or three days. In some cases the late flowering varieties were going by and the mid-season flowers were not really open. Through the centre of the hall was a long table entirely devoted to peonies the principal exhibitors being E. J. Shaylor of Auburndale with seventy-five beautiful specimens for exhibition only, of the latest varieties, and J. H. Hathaway, an amateur grower of this city with about the same number, conspicuous among which were fine specimens of Japanese singles.

Among Mr. Shaylor's exhibit were to be seen four of his seedlings which do credit to any hybridizer, viz., Georgiana Shaylor, a lovely cream color with peach shadings; Francis Shaylor, creamy white with yellow stamens between the rows of petals; a red seedling strongly resembling Adolph Rousseau, but darker and richer in color, and one resembling Mme. August Dessert only much lighter in tone. The writer recently visited Mr. Shaylor's farm and was convinced that he had seedlings developed and developing which would take rank with any of Europe's best, the most notable being Mary Woodbury Shaylor. This is doubtless his finest production to date and ranks with Lady Alex Duff.

The other principal exhibitors were D. F. Roy, "The Moorings" Marion, who secured the Henry F. Michell silver medal for the best collection; James Garthly, gardener for the Rogers' estate, with a fine bank of peonies and roses not in competition, and Wm. Keith, gardener for T. M. Stetson with a large table of foliage and flowering plants which made a fine setting for the flowers.

J. H. Hathaway and Wm. F. Turner were awarded bronze medals for their general exhibits and W. F. Turner was first and J. H. Hathaway second in the class for six distinct varieties. W. F. Turner also took first for vase of Japanese peonies, one variety and first for vase of Japanese in variety. J. H. McVicker beat all competitors in the class for six reds with excellent specimens of Armand Rousseau. F. G. Tripp was winner in all classes for three of a kind and specimen blooms and deserves much credit as his space is very limited. He had seven first prizes to his credit.

W. F. Turner.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual peony exhibition was held in Horticultural Hall, June 20th and 21st. While some doubt was felt, owing to the backwardness of the season, of its success it certainly compared favorably with those held in former years. The flowers displayed were all of good quality and kept well and nearly filled the large hall. The Mt. Desert Nurseries and R. & J. Farquhar & Co., made an exceptionally good display. Following is a list of the awards.

Herbaceous Peonies, twenty named varieties, double, one flower of each: 1st, A. H. Fewkes; 2nd, James McKissock; 3rd, T. C. Thurlow's Sons Co. Ten varieties, double, three flowers of each: 1st, T. C. Thurlow's Sons Co.; 2nd, A. W. Preston; 3rd, James McKissock. Specimen bloom, double: 1st, A. H. Fewkes; 2nd, James McKissock. Twelve varieties, single, one bloom of each: 1st, T. C. Thurlow's Sons Co. Twelve varieties, Japanese single: 1st, T. C. Thurlow's Sons Co. Six double varieties, white: 1st, Dr. C. S. Minot; 2nd, James McKissock; 3rd, T. C. Thurlow's Sons Co. Six double varieties, rose pink: 1st, James McKissock. Six double varieties, salmon pink: 1st, T. C. Thurlow's Sons Co. Six double varieties, crimson: 1st, T. C. Thurlow's Sons Co. Six double varieties, any other color: 1st, A. W. Preston. Twenty-five blooms, double, white or blush: 1st, H. F. Chase; 2nd, A. H. Fewkes; 3rd, Wm. Whitman. Twenty-five blooms, double, pink or rose: 1st, T. C. Thurlow's Sons Co.; 2nd, T. C. Thurlow's Sons Co.; 3rd, James McKissock. Twenty-five blooms, double, red or crimson: 1st, T. C. Thurlow's Sons Co.; 2nd, Wilfrid Wheeler. Twelve named varieties, double, one flower of each, for non-commercial growers only: 1st, C. S. Minot; 2nd, Wm. Whitman; 3rd, A. W. Preston. Twelve blooms, pink, for private gardeners only: 1st, Wm. Whitman. Twelve blooms, white, for private gardeners only: 1st, Wm. Whitman; 2nd, A. W. Preston. Twelve blooms, red, for private gardeners only: 1st, Wm. Whitman; 2nd, Wm. Whitman.

Gratuities: Wellesley Nurseries, Wm. Whitman, T. C. Thurlow's Sons Co., J. K. Alexander, A. W. Preston, A. H. Fewkes, peonies; Wm. Whitman, hybrid roses; and Kalmia latifolia; Lowthorpe School of Horticulture, Sweet Williams; Eastern Nurseries, Old Town Nurseries; Perennials; T. C. Thurlow's Sons Co., Mrs. E. M. Gill, Mrs. M. W. Chadbourne, cut flowers.

Silver Medals: Charles S. Minot, for Peony Mrs. Charles S. Minot; R. & J. Farquhar & Co., Peonies; Mt. Desert Nurseries, for Eremuri and herbaceous flowers.

Certificate of Merit: Wheeler & Co., three specimens of Dendrobium formosum, summer-flowering variety.

Honorable Mention: Jackson Dawson, Rose Baby Dawson; Charles S. Minot, Peony R. T. Jackson; Jackson Dawson, collection of seedling roses.

HYDRANGEAS

EXTRA LARGE PLANTS IN TUBS AND BARRELS FOR SUMMER FLOWERING

We make a specialty of hydrangeas, and have a very large stock of plants which have been kept backward and which are now just beginning to set buds. They are in fine shape for shipment, and will bloom from June to August. Plants are heavily budded, and are exceptionally good value.

We have always made a specialty of large hydrangeas for summer-blooming, and we never had such a fine stock as we have at this time. We have a very large stock, especially of the plants in barrels, and can supply carload lots.

Fine plants in tubs.....$2.00 and $3.00 each.
Extra fine specimens in half-barrels.....$5.00, $7.50 and $10.00 each.

F. R. PIERSON COMPANY
TARRYTOWN-ON-HUDSON, NEW YORK

SOCIETY OF AMERICAN FLORISTS

Department of Plant Registration.

Public notice is hereby given that as no objection has been filed against the registration of the Geranium Gen. Funston by Peter Henderson & Co., 35-37 Cortlandt St., New York City, same becomes complete.

As no objection has been filed to the registration of the Rose Climbing American Beauty by The United States Nursery Co., (S. W. Crowell, Manager), Roseacres, Mississippi, same becomes complete.

JOHN YOUNG, Sec'y.

June 26, 1914.

CONVENTION NOTES.

A well attended meeting was held Tuesday, at the Parker House, Boston, of the local executive committee and plans of preparation relative to the program of sports for the coming S. A. F. Convention in August, were discussed. Aside from the local members, there were present John Young, secretary of the society and Chas. E. Critchell, national chairman of the committee on sports. Vice-president Patrick Welch presided.

Chicago to Boston.

The Chicago Florists' Club has arranged for the President's Special, Chicago, Niagara Falls, Boston, leaving Chicago, Sunday, August 16, at 8.00 P. M., Toledo 1.20 A. M., Cleveland 5.55 A. M.

President Wirth of the Society of American Florists will leave Chicago, Sunday evening, August 16, on special train over the Lake Shore & Michigan Southern Railroads, LaSalle street station, at 8.00 P. M. with the Chicago Florists' Club and others desirous of joining the convention party. This train is due at Niagara Falls Monday noon at 12.04 o'clock and several hours will be spent there, the party leaving again at 3.50 P. M. the same day and due in Boston, Tuesday, August 18, at 7.05 A. M. The fare from Chicago to Boston and return is $30, good for 30 days. Berths, Chicago to Boston (one way) lower, $5.50; upper $4.40. The foregoing rates apply only to Boston and return. Many extended tours and side trips may be arranged returning on application to local transportation agents at equally low rates, including New York, Philadelphia, Boston, Thousand Islands, Hudson River, etc. All members of the Society of American Florists and their friends from points north, west and south of Chicago, who wish to join the president's party at Chicago should secure tickets reading over the Lake Shore & Michigan Southern Railroad and New York Central, Chicago to Boston and return.

Reservations will be made on application to G. K. Thompson, 100 South Clark street, Chicago, Ill., telephone Randolph 5300, who will cheerfully supply all other information regarding this trip.

W. L. PALINSKY, A. MILLER, M. BARKER (Chairman), 440 S. Dearborn St., Chicago, Ill.; Transportation Committee Chicago Florists' Club.

SWEET PEA SHOW PHILADELPHIA.

Considering the warm weather we have had, the display of sweet peas on the 23rd, held under the auspices of the Philadelphia Horticultural Society, was very creditable, although not as extensive as we have often seen on other occasions. The chief prize winners were Ellis, Pepper, Frazier, McFadden and McKean. All the prizes were donated, the donors being Dreer, Michell, Waterer and Bodine. A nice display of hardy perennials was an attractive adjunct of the show.

SACRIFICE TO MAKE ROOM FOR MUMS

2000 2½ inch Egg Plants N. Y. Improved; 1500 2½ inch Sweet Pepper Bull Nose; 2000 2½ inch Stone and Ponderosa Tomato; all at $1.00 per 100; $8.00 per 1000.

2½ inch Lobelia Crystal Palace in bloom; 2½ inch Ice Pinks (mesembryanthemum) in bloom; 2½ inch Single Petunias, assorted; 2½ inch Sweet Sultans; Late Branching Asters, assorted; 2½ inch Calendulas; Zinnias; Coleus, all kinds; at $1.50 per 100.

Cannas Henderson and Vaughan; Salvia Bonfire; at $3.00 per 100; 3 inch pots.

Cash with order, please.

These prices are in effect now; 3% for cash in 10 days.

POEHLMANN BROS. CO.

Box 127 MORTON GROVE, ILL.

PERSONAL.

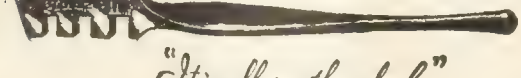
P. Joseph Lynch of New Castle, Ind., has been nominated for Congress.

Harold Joseph Patten, son of M. A. Patten, Tewksbury, Mass., and Miss Josephine N. Millett, were married on June 10.

Will Asseck, of the W. C. Smith Floral Co., St. Louis, broke his arm last week slipping on the floor during the morning rush.

F. A. Ward, for several years engaged in the nursery business at Cleburne, Texas, has removed with his family to St. Cloud, Minn., where he will represent a wholesale nursery firm.

C. Thorley Bridgeman and Roger Lane Bridgeman, sons of W. Bridgeman, with J. H. Small & Sons, New York, sailed on the St. Paul, June 12th, for England, thus spending their vacations from college and school.



Several hundred guests prominent in greater Boston were present at the marriage of Mildred Evelyn Baker, daughter of Mr. and Mrs. Madison Mayall Baker, of 10 George street, Chelsea, Mass., and George Herbert Grey, son of Thomas J. Grey, the veteran seedsman, of 19 Jefferson avenue, Chelsea, Mass., Tuesday evening, June 23.

CLUB AND SOCIETY NOTES.

The Rochester Florists' Club at their last meeting decided to dispense with the Flower Show this coming fall. It means so much work and time that it is the unanimous opinion of all to wait until another year and then make a big show.

The Chicago Florists' Club have completed their plans for a picnic July 19, at St. Paul's Park, Morton Grove. Round trip only 30c. Trains leave Chicago 9.35, 12.40 and 1.50, return 5.35, 6.50 and 10.15. Dancing, games, etc., with prizes will fill the program. Base ball at 3 P. M. Milwaukee florists and their families are guests.

Goshen, Ind. — The Staack Greenhouses at 2702 Sixth avenue sustained a damage of about $8,000 during the storm of Thursday evening, June 6th.

VIBURNUM SARGENTII.

This beautiful shrub which furnishes the subject for our cover page illustration has been planted quite freely along the Arborway in the Boston Park System. It is rather similar to the well-known V. Opulus but is a more dense and upright grower, the anthers of the flowers are quite purple and contrast strikingly with the

JACKSON DAWSON

ray-flowers which are larger than in Opulus and from an almost symmetrical circle around the perfect flowers. At first it was considered a variety of Opulus but was afterwards recognized as a distinct species. The plants here came from seed sent from Pekin, China, to the Arnold Arboretum, by Prof. C. S. Sargent at the time of his visit there some nineteen years ago, and raised under the nurture of Jackson Dawson, whose latest portrait appears herewith.

WASHINGTON NOTES.

Mr. William Plumb, of New York, visited a number of the florists here last week. Mr. Plumb is superintendent of the Department of Horticulture of the Panama Exposition.

F. S. Good, who has been for some time with J. S. Nicholas, of New York, and who was formerly in the employ of Thomas Galvin, of Boston, Mass., has entered the employ of F. H. Kramer, 916 F Street, Northwest.

William F. Gude has returned from a trip to New England where he acted as judge at several shows held in that section last week, and jumped right into harness again with the address of welcome to the delegates to the convention of the American Seed Trade Association. Mr. Gude was accompanied on the trip north by his brother, Adolphus, who has also obtained world-wide fame as a judge.

George H. Cooke has secured temporary quarters at 1020 Connecticut avenue, Northwest, and is getting along nicely considering the adverse conditions attending such a move. The store is fitted with a small greenhouse and in all it is well equipped for handling the summer business. Mr. Cooke expects to be able to return to his old location about October 15, the time of the opening of the social season.

BODDINGTON'S QUALITY FLOWER SEEDS

SELECTED SEEDS SUCCESSFULLY SOWN SECURE SURE, SAFE AND SERVICEABLE SATISFACTION

IT **has been, is, and always will be our policy and intention** to disseminate only the very **choicest strains of flowering seeds** or any other varieties of seeds, giving special attention to the class known as **Florists' Seeds,** and intending customers need have no hesitation in buying or fear of disappointment **when they bloom. No expense** has been spared to secure the finest types as to habit of plant, form of flower, color and breeding of our **Quality Strains of Primula, Cineraria, Cyclamen, Calceolaria, etc.**

ASPARAGUS

PLUMOSUS NANUS. True greenhouse grown. 50 cts. per 100 seeds; $1.00 for 250 seeds; $3.50 per 1000 seeds.
PLUMOSUS NANUS. California grown. 50 cts. per 100 seeds; 75 cts. for 250 seeds; $2.50 per 1000 seeds.
SPRENGERI. 25 cts. for 250 seeds; 75 cts. per 1000 seeds; $3.00 for 5000 seeds.

CALCEOLARIA HYBRIDA

BODDINGTON'S PERFECTION. The herbaceous Calceolaria is an easily cultivated plant. So long as frost is excluded from the plants in Winter they are perfectly safe, and to attempt to hasten growth at any time is a failure. July is the best month for sowing the seed. The great advance made in the habit of the strains offered is remarkable, whilst in the colors there is a marked improvement. Saved by England's most famous specialists. Monster flowers of rich and varied colors, including spotted, laced, blotched and self-colored varieties. ½ pkt., 60 cts.; pkt., $1.00.

Boddington's Matchless CINERARIAS

BODDINGTON'S MATCHLESS CINERARIA. A combination of the three most famous English strains, which we can recommend to those wishing to grow the best. **Tall,** ½ trade pkt., 60 cts.; trade pkt., $1.00. **Dwarf,** ½ trade pkt., 60 cts.; trade pkt., $1.00.
CINERARIA STELLATA (Star-flowering Cineraria). Tall growing, 4 to 5 feet; excellent as a single specimen for table decoration, or for grouping with splendid effect in corridors and conservatories. ½ trade pkt., 60 cts.; trade pkt., $1.00.

CANDYTUFT (Iberis) H. A.

BODDINGTON'S GIANT HYACINTH-FLOWERED. Large, pure white, spiral spikes. The finest variety for growing under glass. Trade pkt., 35 cts.; oz., $2.00.

MIGNONETTE H. A.

BODDINGTON'S MAJESTY. The finest of all the fancy varieties of Migonette; an improvement on Allen's Defiance. Seed saved from select spikes under glass. Trade pkt., 60 cts.; ⅛ oz., $1.00; oz., $7.50.

BODDINGTON'S POT MYOSOTIS

Forget-Me-Nots are delightful subjects for flowering indoors at Christmas time, and as they are everywhere welcome, the practice of growing plants in pots is rapidly increasing. Sown in July and potted on, the strain we offer produces fine, free-growing specimen plants. Trade pkt., 50 cts.; 3 pkts. for $1.25.

SCHIZANTHUS (Butterfly Flower) H. A. 1½ ft.

Elegant, free-flowering, hardy annuals for the garden in Summer or for pot culture in the greenhouse during Winter.
GRANDIFLORUS BODDINGTONII. Boddington's Select Hybrids. The strain is superior to any of the Schizanthus in cultivation, the flowers are better shaped and the colors are more varied. In habit the plants are very bushy, and the flowers are invaluable for cutting; as a pot plant for conservatory decoration, they are unequaled. Trade pkt., 75 cts.
WISETONENSIS. The colors are varied, ranging from white with yellow center to pink with brown center. Most useful as a Winter plant, and should be given a place in every greenhouse. Trade pkt., 50 cts.

Boddington's Matchless GIANT PRIMULAS

PRIMULA SINENSIS

Boddington's Matchless Giant Primulas, Mixed. This selection includes all the finest Giant Single Primulas of the plain-leaved class. ½ trade pkt., 60 cts.; trade pkt., $1.00.
Boddington's Matchless Giant Pure White; Boddington's Matchless Giant Blush White; Boddington's Matchless Giant Orange King, a delightful novelty, almost orange; **Boddington's Matchless Giant Rose; Boddington's Matchless Giant Scarlet; Boddington's Matchless Giant Royal Blue.**
Each, ½ trade pkt., 60 cts.; trade pkt., $1.00. Collection of the above 6 varieties, ½ trade pkt., each, for $3.50.
The Duchess. The large, pure white flower, with its unique zone of bright, rosy carmine, surrounding a clear yellow eye, is simply unapproachable in its beauty. ½ trade pkt., 60 cts.; trade pkt., $1.00.
Sutton's Coral Pink. The name describes it; habit dwarf and compact; flowers thrown well above foliage. Pkt., $1.00.

PRIMULA OBCONICA GIGANTEA

Primula obconica gigantea Kermesina. Beautiful, deep crimson.
Primula obconica gigantea alba. The pure white flowers greatly enhance the beauty of the existing lilac, rose and crimson shades.
Primula obconica gigantea lilacina. Beautiful lilac.
Primula obconica gigantea rosea. Lovely rose.
Primula obconica gigantea grandiflora. Mixed varieties, pure white to deep crimson.
Each of above, ½ pkt., 30 cts.; pkt., 50 cts.
PRIMULA floribunda grandiflora (Buttercup). Small yellow flowers, borne in great profusion; fine for pots. Pkt., 50 cts. **Forbesii** (Baby Primrose). Pkt., 25 cts.
PRIMULA KEWENSIS (Giant Buttercup). This plant is a strong grower, with bright green leaves and numerous erect flower-scapes, 10 to 18 inches in height, producing flowers in whorls at intervals along their whole length. The flowers are fragrant, bright yellow in color, with a slender tube and spreading limb nearly an inch in diameter. As a Winter-flowering decorative plant it is an acquisition; very floriferous when in a small state. ½ trade pkt., 60 cts.; pkt., $1.00.
PRIMULA FIMBRIATA, GIANT QUEEN ALEXANDRA. G. P. The largest white Primula Sinensis, blooms measuring 2½ inches across. Petals very solid and erect. Robust foliage with red stems. ½ pkt., 60 cts.; trade pkt., $1.00.
PRIMULA, NEW HYBRID QUEEN OF ROSES. A lovely new hybrid of P. obconica and P. stellata, producing shapely heads of large and beautiful, bright rose-colored flowers, remaining decorative for a long time. 1 foot. Trade pkt., $1.00; ½ pkt., 60 cts.
PRIMULA MALACOIDES. H. H. P. (The Giant Baby Primrose.) The plants branch very freely. The flowers, which are ¾ inch wide, are of a pretty light lilac, and are borne in whorls on long stems. If grown in a greenhouse, can be had in bloom in four months after sowing. Trade pkt., 50 cts.; 3 pkts. for $1.25.
PRIMULA MALACOIDES ALBA. The white prototype of the foregoing variety, and a great acquisition; very chaste and beautiful as a plant or cut flower. Trade pkt., 50 cts.; 3 pkts. for $1.25.

ARTHUR T. BODDINGTON, Seedsman **342 West 14th St. New York City**

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION.

More than two hundred delegates were present at the opening of the convention of the American Seed Trade Association at the Raleigh Hotel on Tuesday and despite the summer heat great interest was taken in the discussions of the day. The address of welcome was delivered by William F. Gude, as president of the Washington Chamber of Commerce. Mr. Gude told the delegates that it is the sincere hope of the business men that the meetings of the association will be profitable from a business standpoint, and that their impressions of the city will be such that they will come back often. He called special attention to the proposed erection of a monument in memory of the late William R. Smith and told the delegates of the many delightful places around Washington to which visits should be paid before they leave the the city.

The convention was opened by C. C. Massey, of Milwaukee, Wis., president of the association. The morning's business consisted of the appointment of various committees including the obituary committee of which S. F. Leonard, Chicago, Ill.; E. L. Page, Greene, N. Y., and W. H. Greenell, Saginaw, Mich., are the members; the auditing committee composed of A. L. Don, New York City; B. W. Dulaney, Cincinnati, Ohio, and S. A. Wilson, Madison, Wis., and the banquet committee on which S. F. Willard, Cleveland, Ohio; Arthur B. Clark, Milford, Conn., and James P. Coon, and G. Edward Schultz will serve.

At the conclusion of Mr. Gude's address of welcome, Watson S. Woodruff, of Orange, N. J., spoke on the selling of seeds at wholesale. He told of the different methods used to dispose of seeds as by catalogues, traveling salesmen, surplus lists, etc. A discussion as to the advisability of sending out surplus lists followed his remarks and it developed that it was not an unmixed evil. There was no action taken in the matter it being found best to leave it entirely to the individual house for that which would be good business for one in this respect might fall short in prospect for others.

F. W. Bruggerhof, of New York, addressed the delegates on the subject of "The Central System of Selling Seeds and Its Advantages," which subject also brought forth considerable comment. He favored the selling seeds by weight instead of by measure as is the present method on account of the great variation in the different kinds of seeds and because of the fact that many new methods have been adopted for cleaning seeds. There appears to be many phases to this question and under present conditions the advocated change would prove revolutionary. The Government measures its seeds on the basis of the bushel unit, farmers consider the value of seeds on the basis of how far a bushel or a quart can be sown, and more important yet is the fact that all of the present seed catalogues are based on the bushel unit.

In the afternoon a reception was tendered to the ladies who accompanied the delegates, in the parlors of the hotel, by the ladies of the Washington contingent, and later they, together with the male members of the large party as guests of the Washington Chamber of Commerce,

LESTER L. MORSE

were taken in automobiles for a sightseeing trip around the city.

The entertainment features of the convention are in the hands of F. W. Bolgiano, G. Edward Schultz, Robert E. Mann, James P. Coon, Frank Campbell, all of Washington, D. C., and John W. May, of Alexandria, Va.

SEED TRADE NOTES.

The Pittman & Harrison Company, Sherman, Tex., have purchased property on Cherry street on which they will make additions to their milling and warehouse facilities, and remodel their entire building.

The president of the New York Produce Exchange has appointed Wm. Jacot, chairman, Marshall H. Duryea, Ernst Wehncke, O. W. F. Randolph and Charles Wimmer as a committee on seeds for the ensuing year.

OBITUARY.

George C. Wiggin.

George C. Wiggin of Sharon, proprietor of extensive vegetable forcing houses, died on June 18 at the Massachusetts General Hospital from injuries received in being run over by an auto truck on the Easton road on the day before. The automobile was operated by W. O. Dixon of Waltham. Both Wiggin's legs were crushed.

Charles H. Sieck.

Charles H. Sieck, proprietor of the florist business of Charles E. Smith & Co., Baltimore, Md., died at his residence, 216 Warren avenue, June 10th, after a long illness, aged 49 years. He was formerly employed by Charles E. Smith until he took over the business, continuing it under the old name. He is survived by his wife.

Austin, Tex.—Austin is now enjoying summer weather. The recent continued rains have given a wealth of beauty in gladioli and lilies never experienced since this class of planting became general. Indoor stuff is getting too much heat and field plants have not quite adjusted themselves to the change from extreme wet to normal conditions. Sweet peas have failed completely and rust has affected them very badly. As these have been the florists' hope they hardly know what to do, as carnations are played out and the Eastern stuff comes in asleep. Roses are improving.

PHILADELPHIA NOTES.

Miss E. A. O'Neil who conducts a flower shop at 1618 Susquehanna Ave., was pronounced by the doctors out of danger, on the 22nd inst. She had undergone a serious operation at the Polyclinic Hospital.

During Recess

COMMODORE WESTCOTT'S ANNUAL OPENING.

The picturesque bungalow of the Waretown Rod and Gun Club, on Barnegat Bay, N. J.—of which John Westcott is the founder and ruling spirit—was resplendent with flags and bunting on the morning of June 19—when a distinguished company of guests from all parts of the country met at the Commodore's invitation, to celebrate the 14th annual opening of the club house. The weather was ideal during the three days' celebration, the Commodore's hospitality was on the usual generous scale; the sport on land and water was equal to all demands; and every one had the time of his life—renewing old acquaintances and cementing new.

An idea of the personnel of the gathering may be had when it is mentioned that no less than five ex-presidents of the S. A. F. were present, namely: Messrs. Dean, Gude, Burton, Vaughan, and Craig. It is seldom so many distinguished men meet at a private table. All of them show a tinge of gray, but are as hale and hearty as youngsters and showed their virility, by out-walking, out-sailing, out-running, out-quoiting and out-talking many of those present, not half as frosty-powed.

Many letters and telegrams were read from old friends of the Commodore, who from distance or other cause were unable to be present. Among these were three from ex-presidents of the S. A. F., namely: Edwin Lonsdale, California; William J. Stewart, Massachusetts and Adam Graham, Ohio. An affectionate letter was also read from H. B. Beatty, ex-treas. of the S. A. F., who had to leave suddenly for Richmond on account of the illness of his daughter.

A feature of the occasion was the presentation of 48 new records for the Victrola, including all the latest masterpieces of the world's famous singers and musicians. Another feature was the initiation of a distinguished Western seedsman by Bo's'n Trainer, into the true meaning of the word "luff." It would appear that a prairie schooner can do lots of things but "luff" seems to be beyond it. "Coming-up," and "going-over," and "riding-easy" are all possible, but "luffing" required a lot of elucidation. But it's all right now, and the Alamo will sound with "luff, you landlubbers, luff". There's always something to learn. Never say "'Vast heaving when it comes to acquiring more knowledge. And so once more the world has said "All Hail" to the "Waretown Commodore." G. C. W.

WARETOWN REVISITED.

The Westcott lights have blazed again
As kindly as of yore;
The Beacon Light of Barnegat
Shines far to the Waretown shore.

"Stars of the Summer Night" draw
Nearer, clearer than before;
Sun, sky and breeze and dancing wave
Each signals, thine, once more.

Long may the kindly master live
To greet his grateful guests;
West winds blow soft to sail thee, John,
To "Islands of the Blest."

June 19, 1914. J. C. VAUGHAN.

NEW YORK FLORISTS' CLUB OUTING.

The annual outing of the New York Florists' Club at Glen Island on July 1st promises to be a gala event and the committee is sparing no effort to make this occasion one long to be remembered by club members, their families and friends. Over $400.00 has been donated for prizes for the various events and every member should make a special effort to get aboard and have a grand time. Tickets can be obtained from members of the committee of which W. E. Marshall is chairman.

ANNUAL PICNIC FLORISTS' CLUB OF PHILADELPHIA.

Jupiter Pluvius frowned a little in the forenoon of the 22nd inst. when the annual outing of the Florists' Club of Philadelphia was scheduled to take place. But the committees' defy of "rain or shine" seemed to have had some effect, for he drew up his old watering can and retired behind by the afternoon, and the sun shone on the gay assemblage that gathered at Schuetzen Park to celebrate the twenty-eighth annual festival of the club.

There was a fine turn out of members and everyone had a good time. The games were well contested; the dinner was fine and everything went merry as a marriage bell.

Scores of old timers, who never come to a club meeting were there. They like a picnic in the open air—where they can meet their cronies informally under a tree and swap reminiscences, and once a year just about suits them.

There were no fines for talking politics, religion, business, free-will, foreordination, the nebular hypothesis, pure scandal, or any other old thing that interested—thanks to the timely hint by HORTICULTURE—so we take our hat off to our noble selves. (Committee please note.)

The committee in charge did their work nobly and they deserve the highest commendation, one and all. They worked like beavers to make everybody happy and by so doing were happy themselves. That is their true reward for good work well done. Handclaps are unnecessary. Smiling faces all around them—far more eloquent.

GEO. C. WATSON.

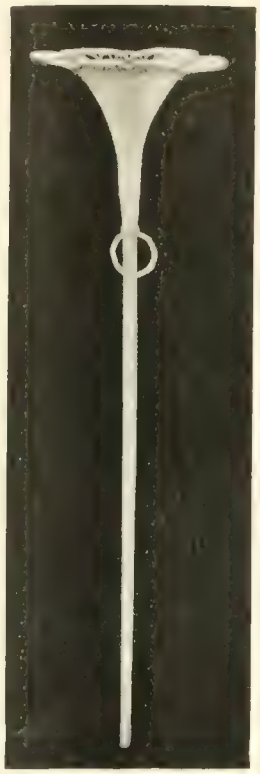
FITTING ON THE CAP.



Not so much in self-defense, as in defense of my fellow committee-men, I wish to say that I am entirely responsible for the paragraph which appeared at the bottom of the Florists' Club Outing Circular, "Anyone talking business on the grounds will be fined $5.00 by the committee." It was not my intention to be humorous. I only tried it once, and I was set upon so severely, that I will not very soon venture to try it again. I claim no accomplishments in that direction, not any more so, than it is possible for a Scotchman to appreciate.

I have had the pleasure of attending several of the Florists' Club Outings, and if there was anything being done

in excess, it was certainly not the pushing of business. Mr. Watson refers to someone in the trade, in his article, as a Curbstone Peddler, but I have never met that man at any picnic; in fact, that man would be too mean to allow himself to be separated from the price of a ticket. What is really meant by the above quotation is, that for half a day, we should lay aside all thoughts of business, and in the fullest sense of the word enter into the spirit of the fun. Why make comparison between a half day's outing and the nurserymen's convention? At a convention, to make it a success, it is necessary to mix business and relaxation. A three or four-day session of all business, or all relaxation, would be monotonous. But why, Mr. Watson, make such a far-fetched comparison! Surely we had expected your fertile brain to bring forth something more convincing!

Your P. S. pleases me more than anything else. That shows that at least the committee seems to understand the spirit of my unwisely chosen quotation. I quite agree with Mr. Watson, that his interpretation of my quotation is silly, and shows the lack of understanding of human nature. Mr. Watson must have been in such a dense fog, that a collision was unavoidable. No doubt his intentions are good, and between the lines we can read, and readily see Mr. Watson's lofty ideals, which are generous and admirable. Diogenes took his lantern and went in search of a man. It seems that Mr. Watson took his lantern, in search of something to write about. If Mr. Watson had put in print the thought that he wishes to convey in his article, before reading the Florists' Club circular, the spirit and sentiment would have been beautiful, but he spoils the article, when we consider what aroused his faculties. His excuse for writing does not appeal to me!

ARTHUR A. NUSSEN.

(Note.—Mr. Watson does not refer to any one in his article as a curbstone peddler. He distinctly says that he is thankful there are few in the club who talk business like a curbstone peddler. In regard to the Scot being non-humorous, Dean Ramsay says they are the only people on earth with a real sense of humor.

KING ARTHUR TO FLORA.

(Dedicated to the Florists Club of Philadelphia, with apologies to James Graham, Earl of Montrose, 1650.)

And in the empire of three [illegible]
Where I should solely be,
If others do pretend a part,
Or dare to vie with me,
Or, if committee's thou elect
And go on such a score,
I'll laugh and sing at thy neglect
And never love thee more!

But if thou wilt prove faithful then,
And constant of thy word,
I'll make thee glorious by my pen
And famous by my sword;
I'll serve thee in such noble ways,
Was never heard before;
I'll crown and deck thee all with bays,
And love thee more and more.

Flower Market Reports

BOSTON Prevailing conditions in the market this week are fairly good, the buoyancy of prices being held by the usual June weddings. Roses are somewhat scarce, white being exceptionally so. Sweet peas are to be had in abundance and while carnations are plentiful the quality is poor. Lily of the valley is selling well and the supply equals the demand.

BUFFALO Trade is more on the upward course and business is more on a satisfactory basis, the receipts have shortened up considerable, but there is still a large quantity of carnations, in which a part are of inferior grade. The rose supply has shortened and good roses, especially white, are scarce. A good supply of lilies and peonies, the latter have nearly come to their end. Weddings are quite noticeable, the demand has been good on lily of the valley and bridal flowers. The coming week will see a good many weddings and with school commencements, a busy week is looked for.

CHICAGO At some seasons of the year, trade this week would be counted as dull, but in comparison with the weeks just passed, it is considered fairly good. Local demand for wedding flowers keeps the market cleaned up of much stock that would hardly stand shipping, as well as calling for a good many first class flowers. Shipping trade is again good as is evidenced by the visits of the messenger boys to the wholesale houses. For two weeks Poehlmann Bros. have been cutting Mrs. Russell roses from stock made from cuttings taken since the holidays. The roses are on heavy stems, three feet long and heavily foliaged. The flower is so full and fragrant and of so pleasing a shade of deep pink, that John Poehlmann says he is sure his customers will be delighted with it. This is Mrs. Russell's first appearance here, locally grown. First class roses are scarce and good carnations are few. Peonies are selling very well and lilies are seen every where, moving usually at a fair price. The market has plenty of marguerites. Gladioli sales will average up well and lily of the valley is quite in demand for the numerous weddings.

CINCINNATI The usual early summer conditions prevail in the market. There is a fair call and just about enough to take care of this demand. Few of the offerings can boast of any real quality, although most all of them are pretty fair. Rose offerings continue to be rather limited and as a result, everything at all fair cleans up very readily. Cuts of the strictly summer roses are still rather small and are not nearly able to take care of all calls for them. Carnations too are limited as to quality and owing to the extremely hot weather, are lacking in quality. Lilies are cleaning up each day. The first of this week they were rather short, but the chances are that this scarcity will hardly last more than a few days and by the end of this week they will again be in a good supply. Gladioli are more plentiful than before and judging from reports the receipts will increase very greatly in the next fortnight. Sweet peas are in a heavy supply, they have a fair market. Other offerings include lily of the valley, orchids, peonies, and water lilies.

NEW YORK Business is in a much more favorable condition. Stock of all kinds has shortened up and prices have advanced all along the line. Roses, especially white, are in short supply. Lily of the valley are selling well, also carnations and lilies. A little better demand for orchids. All things considered, the month of June will be a very satisfactory one as far as prices are concerned.

PHILADELPHIA A recession of stocks is the chief feature of the flower market here the past week. The advancing season of course precludes any lively demand, but prices for the decreased supply are on a more healthy basis. The cool weather has improved quality very much and keeping and shipping conditions are much more satisfactory. Lily of the valley is scarce, the calculations of the regular growers having been upset by the warm weather in May and early June. Rose situation is unchanged except a slight improvement in quality and a smaller cut. Carnations are plentiful, but the quality is not nearly as good except in certain scattered spots. Still some peonies around, mostly from the cold storage. They are fine keepers and give very good satisfaction. Lilium candidum is one of the newcomers and is meeting with a fairly good demand. The lily situation is a little better, fewer and more normal as to price.

ST. LOUIS There's a little difference in the wholesale flower market this week from the week previous. Stock became scarce and the trade is quite busy with seasonable work. It's a well-known fact that at this time of the year we depend a great deal on

(Continued on page 942.)

GLADIOLI

Splendid long stemmed well flowered spikes, the better varieties.

$5.00 and $6.00 per 100

EVERYTHING IN RIBBONS. We carry one of the largest and most varied stocks of Ribbons pertaining to the florist business of any house in the country. If you have not received one of our new catalogues advise us and we will mail you one immediately

Flower Market Reports

(Continued from page 941)

outdoor stock, but the long-continued dry weather has played havoc with stock. Prices that were low advanced some owing to the scarcity and demand—the retailers had a lot of work for school commencements and late weddings, also a good lot of funeral work found them short of stock. Roses are poor, so are carnations. Lilies and lily of the valley are fine, also gladioli. Roses are short stemmed and flowers poor.

WASHINGTON Stock has been comparatively scarce due to the rapid changes in the weather. There has been quite a drop in the temperature. Roses and carnations are very small and poor in quality with little demand and prices higher than the previous week. The price on gladioli has dropped quite a little. The graduation decorations and wedding bouquets have called for a considerable amount of lily of the valley and this flower sold readily. The heavy rains which attended the coming of the cooler weather hit the outdoor flowers hard and a much smaller quantity of sweet-peas was brought in from the outlying farms. This condition is desirable from the storeman's view and especially as there was a sufficient quantity of fine Spencer-type to be had. Northern lilies which have been on the market for some little time now are very good. No one seems to want snapdragon no matter at what price it may be offered.

CHICAGO NOTES.

Philip J. Foley, president of the Foley Greenhouse Manufacturing Co., has just returned from a business trip covering the territory between Chicago and Pittsburgh. Mr. Foley says he found business fairly good with the florists and landed some good greenhouse orders.

D. Scott Geddis, formerly of Chicago and now manager of the floral department of the Scruggs-Vandervoort-Barney Co., of St. Louis, Mo., while in this city last week, stated that his firm were contemplating building a range of greenhouses, to supply their increasing trade in cut flowers.

Bedding season is now about over and the length of the season has been limited. On account of the late Easter, bedding plants had to be held back and just at the time that sales were the heaviest, the wave of mid-summer heat, practically closed the trade. Department stores are still offering some plant stock, but florists in general are closing up their books for the season.

California redwood is now being used extensively by Chicago dealers in greenhouse materials. P. J. Foley is filling a large per cent of his orders now with this wood, where formerly only cypress was used. He states that it is clearer, of better quality, and costs less. The redwood in Fritz Bahr's new 42 ft. wide houses, at Highland Park, Ill. was furnished by Foley.

Poehlmann Bros'. plant department bears evidence of the growth of the plant business in Chicago. Their plant range has now an addition of 25,000 sq. ft., and every available inch filled. The lath house built a year ago is more than the name indicates. It is 27 by 150 ft. and is of 1 by 2 inch strips, with sides and ends enclosed as well as overhead. The house is built with heavy posts and has additional support of iron pipes set in concrete. All that remains of 3,000 large hanging baskets of Bostons are housed there and the benches are filled with Boston ferns in 5, 6 and 7 inch pots, now so greatly in demand.

Personal.

Wm. Kalina, of Norwood Park had his greenhouse badly damaged in the storm Sunday night.

Among the Chicago visitors this week was Aug. Mirring of East St. Louis, who has sold his land to the school board and is planning a new range on another site.

Mrs. Williams, proprietor of The Alpha, corner of Randolph St., and Wabash Ave., and A. Arends were married June 13, at the La Salle Hotel, and left for a trip through the West.

George Gobel and Miss Ella Schaefer were married June 23, at the home of the bride, and left at once for a honeymoon in Michigan. Upon their return they will live at 2219 Washington Ave.

Pauline Anderson, of the Poehlmann Bros'. Morton Grove, office, is attending commencement exercises at Kenosha, Wis. Her brother, who is in the city office will spend the summer in Colorado.

George Economopolus, proprietor of The Alpha, corner of Adams St., and Wabash Ave., stole a march on his friends and slipped away to West Baden, Ind., where he was married on June 16, to Miss Snyder. The wedding may be considered as the after effect of his recent attack of appendecitis, for cupid was busy at the hospital where Miss Snyder was nurse in charge.

NEW YORK NOTES.

John Donaldson and family removed on Tuesday last from Elmhurst, L. I., to their new home at Patchogue, L. I. Alex Donaldson, who has been associated with his father at Elmhurst has taken charge of the greenhouses and will operate them for another year.

Secretary John Young, of the Society of American Florists, has been in Boston the past week, attending a conference of the local committees at which Chas. E. Critchell, the S. A. F. chairman of sports was present. Mr. Young is delighted with the progress made with the convention, which now is so well advanced, and intending exhibitors should not delay in communicating with Mr. Jas. B. Shea at once if they intend to take space in this garden.

Chairman Frank H. Traendly of the Transportation Committee is prepared to made reservations for those who intend to go with the New York delegation and as a very large party is assured, applications for staterooms, etc., on the boat should be made at once. The club's annual outing which takes place July 1, will from all accounts be a record breaker as far as attendance is concerned. Chairman Wm. E. Marshall and his committee have carefully arranged all the details to prevent any delay or slip-up on the day the affair comes off.

Why HORTICULTURE has stood the test as a profitable Advertising medium for the trade.

Because It is read by the men of standing and influence in the Horticultural field, every one of whom is a prospective buyer.

Why HORTICULTURE is so widely read.

Because Its contents are distinctly representative of American Horticulture and are thus indispensable to the Florist, Nurseryman, Seedsman and Gardener.

An Admirer of HORTICULTURE in the Central West writes; "It has won on its merits. It is our most prized weekly visitor."

And Now You See How HORTICULTURE has managed to elbow its way in between its older rivals and why the best trade advertisers find it an indispensable auxiliary.

It's No Secret That the men who read HORTICULTURE are the sort of men that advertisers like to talk to and if you have anything to advertise you can't afford to get along without them.

TWENTY-FIVE YEARS OF PRACTICAL EXPERIENCE.

HAMMOND'S GRAPE DUST

For Use Against Mildew and Blights

GRAPE DUST is a readily diffusible, lightweight powder, **Fungicide**, for destroying Mildew and preventing Blights; also for destroying the **Aphis** and Black Fly. It is packed in 5 and 10 pound packages; also in 25 pound bags, **100 pound** kegs, and barrels of 225 pounds, net. Kept in stock and sold by the leading Seedsmen in America. Dust by use of bellows.

EXPERIENCE OF FLORISTS AND GARDENERS

MILDEW ON ROSES, CARNATIONS, ETC. IT IS SIMPLE AND EASILY APPLIED

Staatsburg, N. Y., May 25, 1908.

Mr. B. Hammond.

Dear Sir: Replying to your inquiries regarding "Grape Dust," would say that we use it solely on Roses, Carnations and Chrysanthemums. As a fungicide we have not found anything to equal it; it is simple and easily applied. We close down the ventilators and fill the house with dust blown through the bellows; when the dust has settled down we ventilate again, putting on a little air as required. We have been using your "Grape Dust" with good results for the last fourteen years. Yours truly, JAMES BLAIR.

Flushing, N. Y., Aug. 1889.

I find your "Grape Dust" the most efficacious remedy for "Mildew" on roses that I have tried, and cheerfully recommend it to the trade. Yours truly, CHAS. P. ANDERSON.
The John Henderson Co., Rose Growers.

Easthampton, Mass., April 4, 1889.

The "Grape Dust" is sudden death to Mildew in greenhouses.
E. A. BRAINERD, Florist, 7 Main Street.

ROBERT SIMPSON, Rose Grower.

Clifton, N. J., Oct. 11th, 1907.

Dear Mr. Hammond: In reply to your inquiry regarding my experience with "Grape Dust," would say that I am glad to be able to say a good word for the article in question, because I have found it so generally satisfactory when used for Mildew on roses. I do not know anything about its constituents, nor do I care so long as it does the work and is as economical as anything else on the market. During the summer when the steam pipes cannot be brought into use to check Mildew, and dusting over the foliage has to be resorted to, we prefer to use Grape Dust rather than Sulphur, because it is much lighter and finer in texture; a given number of pounds will cover more than twice the number of plants; will cover them more thoroughly, and can be put on with a bellows in about one-fourth the time that would be required for Sulphur. The fact that I have used it continuously for ten or twelve years should prove to you that I consider it the best article on the market for the purpose for which it is used.

With best wishes, I am yours very truly,
ROBERT SIMPSON.

Poughkeepsie, N. Y., Jan. 25th, 1912.

Benjamin Hammond, Esq.

Dear Sir: Please send me 25 lbs. "Grape Dust" as soon as possible. I find it is the only thing for Mildew on Roses. We have used it successfully for many years past.
Very truly, CONRAD C. GINDRA.

VALLEY VIEW GREENHOUSES.
Velie Bros., Props.
Growers of Choice Cut Flowers.

Marlborough, N. Y., July 9, 1908.

Mr. B. Hammond.

Dear Sir: Your letter asking our opinion of the qualities of "Grape Dust" received. We have used "Grape Dust" on Carnations, Chrysanthemums and Asters, and we find it an excellent thing for keeping the plants in a healthful condition. No greenhouse establishment should be without "Grape Dust." We find it O. K. Yours truly, VELIE BROS.

CHRYSANTHEMUMS AND CARNATIONS.

This comes from Wallace Gomersall, Superintendent of the famous "Wodenethe," owned and finely maintained by Winthrop Sargent, Esq., Fishkill-on-Hudson, N. Y.:

"For Chrysanthemums we use 'Grape Dust' with the best results by freely dusting with it until the delicate blooms come, then we are a bit shy of it, to prevent any staining of the petals, but during the green state, even in bad weather, there is no trace of fungus, and we keep free of the spot. I have recommended it to many gardeners, and so far my acquaintances have found it very valuable. In common with many Gardeners and Florists, I have found it of great value in checking the Rust on Carnations. It is not expensive to use, for by using in air bellows it diffuses itself everywhere, and is, in my judgment, a valuable everyday article."

Babylon, N. Y., May 25, 1908.

Mr. Hammond, Dear Sir:

It's with pleasure I give testimony to the value of your "Grape Dust." I consider it the safest and cheapest and most reliable Fungicide I have ever used. I use it in grapery, rose houses and amongst any plants that are subject to Mildew, such as Chrysanthemums, etc. I have never had any bad effects through its use for the past twelve years, so this ought to be convincing of its good qualities. With best wishes.
I remain very respectfully, WILLIAM WINCOTT.

S. G. BENJAMIN, Wholesale and Retail Florist.

Fishkill, N. Y., Jan. 8, 1914.

Mr. Benjamin Hammond, Beacon, N. Y.

Dear Sir: Replying to your inquiry, I have known and used your "Grape Dust" in the greenhouse for the past 25 years, and have found it excellent in preventing and keeping down Mildew and other fungus diseases, also found it would prevent and keep down the ravages of the Red Spider on Carnations and other plants. Have used it with success for Mildew on Grape Vines grown under glass.
Yours, etc., S. G. BENJAMIN.

First used in California in 1890 at Menlo Park, San Mateo County.

HAMMOND'S SLUG SHOT WORKS, BEACON, (Fishkill on Hudson) N. Y.

RAISE PIGEONS

THEY PAY DOLLARS WHILE CHICKENS PAY CENTS

The young, 20 to 25 days old, sell for 40 to 60 cents each (according to the season). The city markets are always clamoring for them.

Each pair of Pigeons will raise 18 to 22 young a year.

They will clear you, above all expenses, $5.00 a year per pair. They breed the entire year. Twenty minutes daily will care for 100 pairs.

Always penned up out of the way. Very small space required

All this is fully explained in this month's issue of our Journal; send for it; price 10 cents.

Reliable Squab Journal, Versailles, Mo.

NEWS NOTES.

Cincinnati Chas. Garvey and Chas. Gardner of Peter Weiland's have engaged in the business of making galvanized vases for florists' use. They are doing business under the name of The Queen City Vase & Can Co.

Arlington, N. J.—A young and sportive mustang broke away from his owner one day last week and among the many exciting stunts he performed before he was lassoed was the kicking out of some of the glass in Wm. Tricker's greenhouse and overturning some seedling pond lilies named in honor of Mrs. Woodrow Wilson.

Scotch Soot

Where there is a house that is just full of buds almost ready to show color, nothing will turn better color into the flowers than a little soot, that can be scattered over the benches before watering. The amount applied should not be excessive, as the soot is very strong and may damage some of the foliage somewhat. Apply just enough to blacken the surface of the soil in the benches, and let it go at that. Better a little oftener than too much all at once.

We offer the genuine in original cwt. Sacks, at:

$2.75 per 112 lbs.; $12.50 per 560 lbs.

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

LOOK FOR THE IVY LEAF TRADE MARK.

Ask your dealer or write

EASTERN CHEMICAL CO., BOSTON

PLANTLIFE

PLANTLIFE has several advantages over liquid insecticides on the market. Containing refined tobacco dust it can be used to mix with the soil, acting as an excellent fertilizer, at the same time destroying worms and insects in the ground before they have a chance to reach the plant.

PLANTLIFE has been found very effective in ridding greenhouses of insects by dusting on plants. When dry, use for dusting about once a week.

Put up in bulk for greenhouse men; in packages for retail trade.

Bag of 100 lbs. $3.50.

Let us quote you prices in quantity.

The Plantlife Company, 251 East 66th Street NEW YORK, N.Y.

Cocoanut Fibre Soil

This is the Real Nature's Humus. Put it on your lawn this spring. Don't let it burn up, or stand all summer hose in hand.

Order now in 100 lb. bags.

20th CENTURY PLANT FOOD CO.

27 & 29 OCEAN ST., - BEVERLY, MASS.

POISON **KIL - WORM** POISON

Destroys Worms, Ants, etc., infesting Golf, Cricket Grounds, Parks and Lawns. Sure death to Snails. Does not injure Grass; causes the insects to come to the surface to die. (Must not come in contact with fine plants.)

One gallon **Kil-Worm** makes 50 gallons liquid when mixed with water.

1 qt., $1.00; ½ gal., $1.75; 1 gal., $3.00; 5 gals., $13.50.

POISON **KIL - WEED** POISON

A scientific Weed Destroyer—free from odor. An unsurpassed preparation for the removal of Grass, Weeds, Vines and Bushes from paths, etc. Saves expense of several men; can be applied with an ordinary sprinkling can.

One gallon **Kil-Weed** makes 30 to 35 gallons liquid when mixed with water.

1 qt., 35c.; ½ gal., 60c.; 1 gal., $1.00; 5 gals., $4.00; 10 gals., $7.50; 1 barrel, per gal., 65c.

IF YOU ONLY KNEW what a good eave the METROPOLITAN PATENTED is, you would use no other. It is made of cast iron and will not rust. That part of your greenhouse which in other constructions is the weakest becomes the strongest. Not this alone, it is ice-clearing and carries all the water of condensation from the inside, and it is so constructed that almost the entire end of the bar is exposed to the air, thereby preventing decay. Only one screw, about two inches from the end, is all that is necessary to secure the bars. For side stationary glass, wood headers are absolutely unnecessary, thereby causing no shade. Zinc glass stops are not necessary—the eave is made with a lug to prevent the glass from slipping. Let your next house be built with a **Metropolitan Patented Iron Wall Construction.** You will never regret it. Our price and service are right.

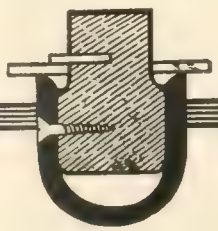
Stripped For The Running

THE professional runner, when he gets ready for a race, discards all unnecessary clothing so he will have all the possible freedom of action.

In designing the U-Bar greenhouse construction we did exactly the same thing — it was stripped for the running. We got it right down to a racing basis.



This could be done, because the U-Bar performs the work of both the rafter and the roof bar.

This U-Bar and roof bar combination is so strong that we don't have to make the entire bar any larger than the ordinary cypress roof bars on other constructions. Stripped for the running as the U-Bar house is, it is the lightest of houses and produces quicker growth and of a better quality. It is only natural that it should. It's only a plain every day common sense result.

If you want a house as light as a bubble, stronger and more enduring than any other house built, then you want the U-Bar.

Send for our new catalog. Or send for us. Or both.
